Facility ID: 0640020012 Issuance type: Draft State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

   (a) None.

2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

   (a) None.

A. **Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Operations, Property, and/or Equipment	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
Paint Line #3 (K002)	OAC 3745-35-07	50.0 tons of VOC per rolling 12-month period.

2. **Additional Terms and Conditions**

   (a) None

B. **Operational Restrictions**

1. The maximum monthly usage of coatings and thinners (formulated as specified in the permit application) shall not exceed 1536 gallons. The maximum monthly usage of cleanup material (xylene) shall not exceed 10 gallons.

2. The coatings and thinners employed in this emissions unit shall not contain any hazardous air pollutants (HAPs) , as identified in Section 112 (b) of Title III of the Clean Air Act.

C. **Monitoring and/or Record Keeping Requirements**

1. The permittee shall collect and record the following information each month .
   The name and identification number of each coating, thinnner, and cleanup material employed.
   The VOC content and HAP content of each coating, thinner,and cleanup material ,in pounds per gallon.
   The number of gallons of each coating, thinner,and cleanup material employed during the month.
   The total number of gallons of coatings and thinners.
   The total number of gallons of cleanup material.
   The total VOC emissions from all coatings, thinners, and cleanup materials employed in pounds or tons for the month and the rolling, 12-month summation of VOC emissions from all coatings, thinners, and cleanup material employed, in tons.

D. **Reporting Requirements**

1. The permittee shall submit quarterly reports of any deviation (excursions) of the monthly coatings / thinners usage limitation, the monthly cleanup material usage limitation, and the rolling 12-month VOC emission limitation. The quarterly reports also shall identify the use of any coatings and/or thinners that contain one or more HAPs.

2. The permittee shall also submit an annual report which includes the following information :
   The total VOC emissions from the coatings, thinners, and cleanup materials employed , in tons, for each month, and each rolling 12-month period and annual total.
   The total gallons of coatings and thinners and total gallons of cleanup material used for each month .

E. **Testing Requirements**

1. Compliance with the rolling, 12-month emission limitation in Section A of this permit shall be determined in accordance with the following :
   Monthly records shall be maintained of coating, thinners, and cleanup material usages as required in Section C of this permit. Formulation data or USEPA Method 24 shall be used to determine the VOC content of the coatings, thinners, and cleanup material. The VOC emission rate for each coating, thinner, and cleanup material shall be calculated by multiplying the volume of the material employed by the appropriate VOC content determined for that material. The VOC emission rate for each month shall be calculated by adding all of the VOC emissions from all of the coatings, thinners, and cleanup material employed during that time. The rolling 12-month summations for VOC shall be calculated each month by adding the VOC emissions for that month to the VOC emissions from the previous 11 calendar months.

   The HAP content of each coating, thinner, and cleanup material shall be determined from formulation data.

F. **Miscellaneous Requirements**

1. Pursuant to OAC rule 3745-35-07(B)(2), all the terms and conditions in this permit are federally enforceable.
