Facility ID: 1652100055 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

   (a) None.

2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

   (a) None.

A. **Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Operations, Property, and/or Equipment	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
Petroleum dry cleaning operation: Midwest Machinery model 6205 washer, and one Hoyt dryer.	OAC rule 3745-21-09(BB)	See B.1 below.

2. **Additional Terms and Conditions**

   (a) Any bucket or barrel which contains petroleum solvent or petroleum solvent-laden waste shall be covered to minimize solvent evaporation.
   Any equipment associated with the use of petroleum solvent shall be visually inspected weekly to identify any liquid leaks of petroleum solvent.
   Any liquid or vapor leak of pertoleum solvent shall be repaired within fifteen days after identifying the source of the leak, unless a necessary repair part is not on hand. If a repair part is not on hand, it shall be ordered within three working days after identifying the source of the leak. The leak shall be repaired within fifteen days following the delivery of the necessary repair part.

B. **Operational Restrictions**

1. The total annual consumption of petroleum solvent shall be less than or equal to four thousand seven hundred gallons.

C. **Monitoring and/or Record Keeping Requirements**

1. The permittee shall maintain records of annual solvent consumption.

2. The permittee shall maintain a record of the results of any leak checks which includes, at a minimum, the following information:

   a. the date of each inspection;

   b. the findings (may indicate no leaks discovered or location, nature, and severity of each leak);

   c. the leak determination method;

   d. any corrective action taken (date each leak was repaired and the reason(s) for any repair interval in excess of fifteen calendar days); and

   e. the inspector's name and signature.

D. **Reporting Requirements**

1. If the annual consumption of petroleum solvent is greater than four thousand seven hundred gallons, the permittee shall so notify the director within thirty days of becoming aware of the occurrence.

2. Any liquid or vapor leak of petroleum solvent that is not repaired within fifteen days after identification shall be reported to the director within thirty days after the repair is completed.

E. **Testing Requirements**

1. None

F. **Miscellaneous Requirements**

1. None
