Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**

**How to appeal this permit**

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
77 South High Street, 17th Floor  
Columbus, OH 43215

## **How to save money, reduce pollution and reduce energy consumption**

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: [www.ohioairquality.org/clean\\_air](http://www.ohioairquality.org/clean_air)

## **How to give us feedback on your permitting experience**

Please complete a survey at [www.epa.ohio.gov/dapc/permitsurvey.aspx](http://www.epa.ohio.gov/dapc/permitsurvey.aspx) and give us feedback on your permitting experience. We value your opinion.

## **How to get an electronic copy of your permit**

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc) by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

If you have any questions, please contact Ohio EPA DAPC, Northwest District Office at (419)352-8461 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Michael W. Ahern, Manager

Permit Issuance and Data Management Section, DAPC

**Final Permit-to-Install and Operate**  
LOUDONVILLE FARMERS EQUITY CO  
**Permit Number:** P0107579  
**Facility ID:** 0303000133  
**Effective Date:** 5/2/2013

## Authorization

Facility ID: 0303000133  
Application Number(s): A0041206  
Permit Number: P0107579  
Permit Description: Installation of column grain dryer, truck unloading, grain transfer, screening and cleaning, truck loading, feed mixing and grinding, and feed loadout operations.  
Permit Type: Initial Installation  
Permit Fee: \$600.00  
Issue Date: 5/2/2013  
Effective Date: 5/2/2013  
Expiration Date: 5/2/2023  
Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15

This document constitutes issuance to:

LOUDONVILLE FARMERS EQUITY CO  
514 W MAIN ST  
Loudonville, OH 44842

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

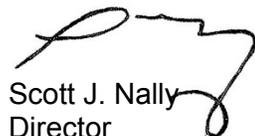

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Northwest District Office  
347 North Dunbridge Road  
Bowling Green, OH 43402  
(419)352-8461

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

  
Scott J. Nally  
Director

## Authorization (continued)

Permit Number: P0107579  
Permit Description: Installation of column grain dryer, truck unloading, grain transfer, screening and cleaning, truck loading, feed mixing and grinding, and feed loadout operations.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

<b>Emissions Unit ID:</b>	<b>F001</b>
Company Equipment ID:	GRAIN DRYER M6
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable
<b>Emissions Unit ID:</b>	<b>F002</b>
Company Equipment ID:	F002
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable
<b>Emissions Unit ID:</b>	<b>F003</b>
Company Equipment ID:	F003
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable
<b>Emissions Unit ID:</b>	<b>P901</b>
Company Equipment ID:	F006
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

**Final Permit-to-Install and Operate**  
LOUDONVILLE FARMERS EQUITY CO  
**Permit Number:** P0107579  
**Facility ID:** 0303000133  
**Effective Date:** 5/2/2013

## **A. Standard Terms and Conditions**

**1. What does this permit-to-install and operate ("PTIO") allow me to do?**

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

**2. Who is responsible for complying with this permit?**

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

**3. What records must I keep under this permit?**

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

**4. What are my permit fees and when do I pay them?**

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. Unless otherwise specified, facilities subject to one or more synthetic minor restrictions must use Ohio EPA's "Air Services" to submit annual emissions associated with this permit requirement. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

**5. When does my PTIO expire, and when do I need to submit my renewal application?**

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

**6. What happens to this permit if my project is delayed or I do not install or modify my source?**

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

**7. What reports must I submit under this permit?**

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

**8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?**

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

**9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?**

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

**10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?**

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Ohio EPA DAPC, Northwest District Office in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

**11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?**

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

**12. What happens if one or more emissions units operated under this permit is/are shut down permanently?**

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting<sup>1</sup> a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emissions unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

---

<sup>1</sup> Permittees that use Ohio EPA's "Air Services" can mark the affected emissions unit(s) as "permanently shutdown" in the facility profile along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update will constitute notifying of the permanent shutdown of the affected emissions unit(s).

**13. Can I transfer this permit to a new owner or operator?**

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

**14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?**

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

**15. What happens if a portion of this permit is determined to be invalid?**

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

**Final Permit-to-Install and Operate**  
LOUDONVILLE FARMERS EQUITY CO  
**Permit Number:** P0107579  
**Facility ID:** 0303000133  
**Effective Date:** 5/2/2013

## **B. Facility-Wide Terms and Conditions**

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - (1) None
  - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - (1) None

**Final Permit-to-Install and Operate**  
LOUDONVILLE FARMERS EQUITY CO  
**Permit Number:** P0107579  
**Facility ID:** 0303000133  
**Effective Date:** 5/2/2013

## **C. Emissions Unit Terms and Conditions**

**1. F001, Grain Dryer**

**Operations, Property and/or Equipment Description:**

Grain Dryer

- a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - (1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - a. None
  - (2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - a. None
- b) Applicable Emissions Limitations and/or Control Requirements
  - (1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	<u>Grain Dryer Emissions</u> 2.72 tons of fugitive particulate emissions (PE)/year  0.68 tons of fugitive particulate matter less than 10 microns in size (PM10)/year  Visible fugitive PE shall not exceed 20% opacity as a three-minute average  See b)(2)a.  <u>Natural Gas Combustion Emissions</u> 2.53 lbs of nitrogen oxides (NOx)/hour; 4.43 tons of NOx/year  1.58 lbs of carbon monoxide (CO)/hour; 2.77 tons of CO/year
b.	OAC rule 3745-17-07(B)	See b)(2)b.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
c.	OAC rule 3745-17-08(A)	See b)(2)c.

(2) Additional Terms and Conditions

- a. The “Best Available Technology” (BAT) requirements for this emissions unit have been determined to be the use of a column plate perforation with a diameter equal to or less than 0.094 inch, and visible emission restrictions.
- b. This emissions unit is exempt from the visible particulate emission limitation specified in OAC rule 3745-17-07(B) pursuant to OAC rule 3745-17-07(B)(11)(e).
- c. This facility is not located in an “Appendix A” area as identified in OAC rule 3745-17-08. Therefore, pursuant to OAC rule 3745-17-08(A), this emissions unit is exempt from the requirements of OAC rule 3745-17-08(B).
- d. 40 CFR Part 60 Subpart DD is not applicable to this emissions unit due to the fact that the permanent grain storage capacity at the elevator is less than 2.5 million bushels per year. [40 CFR 60.300 and 60.301(c)]

c) Operational Restrictions

- (1) The maximum annual throughput shall not exceed 24,706 tons of grain.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall maintain monthly records of the amount of material throughput for this emissions unit, in tons per month and total tons, to date, for the calendar year.

e) Reporting Requirements

- (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Northwest District Office by the due date specified in the Authorization section of this permit. The PER shall cover a reporting period of no more than 12 months for each air contaminant source identified in this permit. It is recommended that the PER is submitted electronically through Ohio EPA’s “e-Business Center: Air Services” although PERs can be submitted via U.S. postal service or can be hand-delivered.

f) Testing Requirements

- (1) Compliance with the emission limitations in section b)(1) of these terms and conditions shall be determined in accordance with the following methods:

**Grain Dryer Emissions**

- a. Emission Limitation  
 2.72 tons of fugitive PE/year  
 0.68 tons of fugitive PM10/year

Applicable Compliance Method

The annual fugitive PE limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.22 lb of PE/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and dividing by 2000 lbs/ton.

The annual fugitive PM10 limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.055 lb of PM10/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and dividing by 2000 lbs/ton.

Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PE and PM10 limitations will also be demonstrated.

b. Emission Limitation

Visible fugitive PE shall not exceed 20% opacity as a three-minute average

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A and the modifications listed in paragraphs (B)(3)(a) and B)(3)(b) of OAC rule 3745-17-03.

**Natural Gas Combustion Emissions**

c. Emission Limitation

2.53 lbs of nitrogen oxides (NOx)/hour  
4.43 tons of NOx/year

Applicable Compliance Method

Compliance with the hourly NOx limitation shall be determined by multiplying the maximum heat input of 18.4 mmBtu/hour, a conversion factor of 1 ft<sup>3</sup>/1020 Btu and an emission factor of 140 lbs of NOx/mmft<sup>3</sup> (AP-42 Section 1.4 [3/98]).

The annual NOx limitation was determined by multiplying the hourly emission rate by a maximum annual operating schedule of 3500 hours\* per year and dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the hourly emission rate compliance will the annual limitation shall also be demonstrated.

\*The maximum annual operating schedule is based on the grain throughput restriction of 24,706 tons per year.

d. Emission Limitation

1.58 lbs of carbon monoxide (CO)/hour  
2.77 tons of CO/year

Applicable Compliance Method

Compliance with the hourly CO limitation shall be determined by multiplying the maximum heat input of 18.4 mmBtu/hour, a conversion factor of 1 ft<sup>3</sup>/1020 Btu and an emission factor of 84 lbs of NOx/mmft<sup>3</sup> (AP-42 Section 1.4 [3/98]).

**Final Permit-to-Install and Operate**  
LOUDONVILLE FARMERS EQUITY CO  
**Permit Number:** P0107579  
**Facility ID:** 0303000133  
**Effective Date:** 5/2/2013

The annual CO limitation was determined by multiplying the hourly emission rate by a maximum annual operating schedule of 3500 hours\* per year and dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the hourly emission rate compliance will the annual limitation shall also be demonstrated.

\*The maximum annual operating schedule is based on the grain throughput restriction of 24,706 tons per year.

g) Miscellaneous Requirements

(1) None

**2. F002, Grain Receiving**

**Operations, Property and/or Equipment Description:**

Grain Receiving, Transferring and Conveying, Screening and Cleaning

- a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - (1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - a. None
  - (2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - a. None
- b) Applicable Emissions Limitations and/or Control Requirements
  - (1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	<p><u>Truck Receiving</u>            2.22 tons of fugitive particulate emissions (PE)/year;             0.73 ton of fugitive particulate matter less than 10 microns in size (PM10)/year             Visible fugitive PE shall not exceed 20% opacity as a three-minute average</p> <p><u>Transferring and Conveying</u>            0.01 ton of fugitive PE/year;            0.42 ton of fugitive PM10/year             Visible fugitive PE shall not exceed 0% opacity as a three-minute average</p> <p><u>Cleaning and Screening</u>            0.01 ton of fugitive PE/year;</p>

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		0.23 ton of fugitive PM10/year  Visible fugitive PE shall not exceed 0% opacity as a three-minute average  Control requirements (see b)(2)a.)
b.	OAC rule 3745-17-07(B)	See b)(2)b.
c.	OAC rule 3745-17-08(B)	See b)(2)c.

(2) Additional Terms and Conditions

- a. Best Available Technology (BAT) requirements for this emissions unit has been determined to be:
  - i. the emission limitations and visible emission restrictions contained in b)(1)a.; and
  - ii. use of total enclosure on transferring/conveying and screening/cleaning.
- b. This emissions unit is exempt from the visible particulate emission limitations specified in OAC rule 3745-17-07(B) pursuant to OAC rule 3745-17-07(B)(11)(e).
- c. This facility is not located within an "Appendix A" area as identified in OAC rule 3745-17-08. Therefore, pursuant to OAC rule 3745-17-08(A), this emissions unit is exempt from the requirements of OAC rule 3745-17-08(B).

c) Operational Restrictions

- (1) The maximum throughput shall not exceed 24,706 tons of grain per year.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall maintain monthly records of the amount of material throughput for this emissions unit, in tons per month and total tons, to date, for the calendar year.
- (2) The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible fugitive particulate emissions from the truck dump pit. The presence or absence of any visible fugitive emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
  - a. the color of the emissions;
  - b. whether the emissions are representative of normal operations;
  - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;

- d. the total duration of any visible emission incident; and
- e. any corrective actions taken to minimize or eliminate the visible emissions.

If visible emissions are present, a visible emission incident has occurred. The observer does not have to document the exact start and end times for the visible emission incident under item d)(2)d. above or continue the daily check until the incident has ended. The observer may indicate that the visible emission incident was continuous during the observation period (or, if known, continuous during the operation of the emissions unit). With respect to the documentation of corrective actions, the observer may indicate that no corrective actions were taken if the visible emissions were representative of normal operations, or specify the minor corrective actions that were taken to ensure that the emissions unit continued to operate under normal conditions, or specify the corrective actions that were taken to eliminate abnormal visible emissions.

- (3) The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible fugitive particulate emissions from (a) transferring/conveying operations and from (b) screening/cleaning operations. The presence or absence of any visible fugitive emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
  - a. the color of the emissions;
  - b. the total duration of any visible emission incident; and
  - c. any corrective actions taken to eliminate the visible emissions.

e) Reporting Requirements

- (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Northwest District Office by the due date specified in the Authorization section of this permit. The PER shall cover a reporting period of no more than 12 months for each air contaminant source identified in this permit. It is recommended that the PER is submitted electronically through Ohio EPA's "e-Business Center: Air Services" although PERs can be submitted via U.S. postal service or can be hand-delivered.
- (2) The permittee shall identify the following information in the annual PER in accordance with the monitoring requirements in section d)(2) and d)(3):
  - a. all days during which any visible fugitive particulate emissions were observed from:
    - i. the truck dump pit;
    - ii. transferring/conveying operations; and
    - iii. screening/cleaning operations.
  - b. any corrective actions taken to minimize or eliminate the visible fugitive particulate emissions from grain receiving at the truck dump pit;

- c. any corrective actions taken to eliminate the visible fugitive particulate emissions from:
  - i. transferring/conveying operations; and
  - ii. screening/cleaning operations.

The above information shall be submitted as an attachment to the PER. If there are no days and/or corrective actions to identify as required above, the permittee shall indicate within the "Additional Information and Corrections" section of the PER that no visible emissions were observed and no corrective actions were taken.

f) **Testing Requirements**

- (1) Compliance with the emission limitations in section b)(1) of these terms and conditions shall be determined in accordance with the following methods:

**Grain Receiving (Truck Dump Pit)**

- a. Emission Limitation  
2.22 tons of fugitive particulate emissions (PE)/year  
0.73 ton of fugitive particulate matter less than 10 microns in size (PM10)/year

Applicable Compliance Method

The annual fugitive PE limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.18 lb of PE/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and dividing by 2000 lbs/ton.

The annual fugitive PM10 limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.059 lb of PM10/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and dividing by 2000 lbs/ton.

Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PE and PM10 limitations will also be demonstrated.

- b. Emission Limitation  
Visible fugitive PE from the truck dump pit shall not exceed 20% opacity as a three-minute average

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A.

**Transferring and Conveying**

- c. Emission Limitation  
0.01 ton of fugitive PE/year;  
0.42 ton of fugitive PM10/year

Applicable Compliance Method

The annual fugitive PE limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.061 lb of PE/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and applying a control efficiency of 99% for a totally enclosed system, then dividing by 2000 lbs/ton.

The annual fugitive PM10 limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.034 lb of PM10/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and dividing by 2000 lbs/ton.

Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PE and PM10 limitations will also be demonstrated.

d. Emission Limitation

Visible fugitive PE shall not exceed 0% opacity as a three-minute average from transferring/conveying operations.

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A and the modifications listed in paragraphs (B)(3)(a) and B)(3)(b) of OAC rule 3745-17-03.

**Cleaning and Screening**

e. Emission Limitation

0.01 ton of fugitive PE/year  
0.23 ton of fugitive PM10/year

Applicable Compliance Method

The annual fugitive PE limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.075 lb of PE/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and applying a control efficiency of 99% for a totally enclosed system, then dividing by 2000 lbs/ton.

The annual fugitive PM10 limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.019 lb of PM10/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and dividing by 2000 lbs/ton.

Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PE and PM10 limitations will also be demonstrated.

f. Emission Limitation

Visible fugitive PE shall not exceed 0% opacity as a three-minute average from screening/cleaning operations.

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A and the modifications listed in paragraphs (B)(3)(a) and B)(3)(b) of OAC rule 3745-17-03.

**Final Permit-to-Install and Operate**  
LOUDONVILLE FARMERS EQUITY CO  
**Permit Number:** P0107579  
**Facility ID:** 0303000133  
**Effective Date:** 5/2/2013

g) Miscellaneous Requirements

(1) None

**3. F003, Grain Loadout**

**Operations, Property and/or Equipment Description:**

Grain Loadout

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	0.21 ton of fugitive particulate emissions (PE)/year  0.07 ton of fugitive particulate matter less than 10 microns in size (PM10)/year  Visible fugitive PE shall not exceed 20% opacity as a three-minute average  See b)(2)a.
b.	OAC rule 3745-17-07(B)	See b)(2)b.
	OAC rule 3745-17-08(B)	See b)(2)c.

(2) Additional Terms and Conditions

a. Best Available Technology (BAT) requirements for this emissions unit has been determined to be:

- i. the emission limitations and visible emission restrictions contained in b)(1)a.; and
    - ii. use of mineral oil.
  - b. This emissions unit is exempt from the visible particulate emission limitations specified in OAC rule 3745-17-07(B) pursuant to OAC rule 3745-17-07(B)(11)(e).
  - c. This facility is not located within an "Appendix A" area as identified in OAC rule 3745-17-08. Therefore, pursuant to OAC rule 3745-17-08(A), this emissions unit is exempt from the requirements of OAC rule 3745-17-08(B).
- c) Operational Restrictions
  - (1) The maximum throughput shall not exceed 24,706 tons of grain per year.
- d) Monitoring and/or Recordkeeping Requirements
  - (1) The permittee shall maintain monthly records of the amount of material throughput for this emissions unit, in tons per month and total tons, to date, for the calendar year.
  - (2) The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible fugitive particulate emissions from the egress points (i.e., the drop chutes) serving this emissions unit. The presence or absence of any visible fugitive emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
    - a. the location and color of the emissions;
    - b. whether the emissions are representative of normal operations;
    - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
    - d. the total duration of any visible emission incident; and
    - e. any corrective actions taken to minimize or eliminate the visible emissions.

If visible emissions are present, a visible emission incident has occurred. The observer does not have to document the exact start and end times for the visible emission incident under item d)(2)d. above or continue the daily check until the incident has ended. The observer may indicate that the visible emission incident was continuous during the observation period (or, if known, continuous during the operation of the emissions unit). With respect to the documentation of corrective actions, the observer may indicate that no corrective actions were taken if the visible emissions were representative of normal operations, or specify the minor corrective actions that were taken to ensure that the emissions unit continued to operate under normal conditions, or specify the corrective actions that were taken to eliminate abnormal visible emissions.

e) Reporting Requirements

- (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Northwest District Office by the due date specified in the Authorization section of this permit. The PER shall cover a reporting period of no more than 12 months for each air contaminant source identified in this permit. It is recommended that the PER is submitted electronically through Ohio EPA's "e-Business Center: Air Services" although PERs can be submitted via U.S. postal service or can be hand-delivered.
- (2) The permittee shall identify the following information in the annual PER in accordance with the monitoring requirements in section d)(2):
  - a. all days during which any visible fugitive particulate emissions were observed from the egress points (i.e., the drop chutes) serving this emissions unit; and
  - b. any corrective actions taken to minimize or eliminate the visible fugitive PE.

The above information shall be submitted as an attachment to the PER. If there are no days and/or corrective actions to identify as required above, the permittee shall indicate within the "Additional Information and Corrections" section of the PER that no visible emissions were observed and no corrective actions were taken.

f) Testing Requirements

- (1) Compliance with the emission limitations in section b)(1) of these terms and conditions shall be determined in accordance with the following methods:
  - a. Emission Limitation  
0.21 ton of fugitive particulate emissions (PE)/year  
0.07 ton of fugitive particulate matter less than 10 microns in size (PM10)/year  
  
Applicable Compliance Method  
The annual fugitive PE limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.086 lb of PE/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and a control efficiency of 80% for use of mineral oil, then dividing by 2000 lbs.  
  
The annual fugitive PM10 limitation was determined by multiplying the maximum annual grain throughput of 24,706 tons by an emission factor of 0.029 lb of PM10/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and a control efficiency of 80% for use of mineral oil, then dividing by 2000 lbs.  
  
Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PE and PM10 limitations will also be demonstrated.
  - b. Emission Limitation  
Visible fugitive PE shall not exceed 20% opacity as a three-minute average

**Final Permit-to-Install and Operate**  
LOUDONVILLE FARMERS EQUITY CO  
**Permit Number:** P0107579  
**Facility ID:** 0303000133  
**Effective Date:** 5/2/2013

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A and the modifications listed in paragraphs (B)(3)(a) and B)(3)(b) of OAC rule 3745-17-03.

- g) Miscellaneous Requirements
  - (1) None

**4. P901, Feed Mixing, Grinding, and Loading**

**Operations, Property and/or Equipment Description:**

Feed Operations - Receiving, Grinding, Mixing, Transferring & Conveying, and Loadout

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	<p><u>Grain Receiving</u>            0.05 ton of fugitive particulate emissions (PE)/year</p> <p>0.008 ton of fugitive particulate matter less than 10 microns in size (PM10)/year</p> <p>Visible fugitive PE shall not exceed 20% opacity as a three-minute average (from building enclosure for receiving operations)</p> <p><u>Milling with Cyclone (see b)(2)a.)</u>            0.54 lb PE/hour and 0.20 ton PE/year;            0.27 lb PM10/hour and 0.10 ton PM10/year</p> <p>Visible PE shall not exceed 20% opacity as a six-minute average (from cyclone stack)</p> <p><u>Mixing, Transferring/Conveying, and Loadout</u></p>

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		0.03 ton of fugitive PE/year; 0.01 ton of fugitive PM10/year  Visible fugitive PE shall not exceed 20% opacity as a three-minute average (from the building enclosure for mixing and transferring & conveying operations)  Visible fugitive PE shall not exceed 20% opacity as a three-minute average (from loadout operations)  Control requirements (see b)(2)b.)
b.	OAC rule 3745-17-07(B)	See b)(2)c.
c.	OAC rule 3745-17-08(B)	See b)(2)d.
d.	OAC rule 3745-17-11(B)	See b)(2)e.
e.	OAC rule 3745-17-07(A)	See b)(2)f.

(2) Additional Terms and Conditions

- a. The feed mill operations involves the use of a cyclone to pneumatically transfer material from the hammermill and grinding operations to intermediate holding bin storage prior to being transferred by mechanical means to mixing operations. The cyclone is an integral portion of the process involved in transferring material (i.e., pneumatic conveying) and is not considered “control equipment.” Additionally, the transferring and conveying limitations, requirements, etc. specified by this permit do not involve the pneumatic conveying operations described above.
- b. Best Available Technology (BAT) requirements for this emissions unit has been determined to be:
  - i. the emission limitations and visible emission restrictions contained in b)(1)a.; and
  - ii. the use of a building enclosure on grain receiving, milling, mixing, and transferring/conveying operations.
- c. This emissions unit is exempt from the visible particulate emission limitations specified in OAC rule 3745-17-07(B) pursuant to OAC rule 3745-17-07(B)(11)(e).
- d. This facility is not located within an “Appendix A” area as identified in OAC rule 3745-17-08. Therefore, pursuant to OAC rule 3745-17-08(A), this emissions unit is exempt from the requirements of OAC rule 3745-17-08(B).
- e. The uncontrolled mass rate of particulate emissions is less than 10 lbs/hour. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(ii), Figure II in OAC rule 3745-17-11 does not apply.

- f. This unit is exempt from the visible particulate emission limitations specified in OAC rule 3745-17-07(A) pursuant to OAC rule 3745-17-07(A)(3)(h) because OAC rule 3745-17-11(B) is not applicable.
- c) Operational Restrictions
  - (1) The maximum throughput shall not exceed 6,000 tons of grain per year.
- d) Monitoring and/or Recordkeeping Requirements
  - (1) The permittee shall maintain monthly records of the amount of material throughput for this emissions unit, in tons per month and total tons, to date, for the calendar year.
  - (2) The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible fugitive particulate emissions from the egress points (i.e., from the loadout operations and from the building enclosing the grainreceiving, milling, mixing, transferring/conveying operations) serving this emissions unit. The presence or absence of any visible fugitive emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
    - a. the location and color of the emissions;
    - b. whether the emissions are representative of normal operations;
    - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
    - d. the total duration of any visible emission incident; and
    - e. any corrective actions taken to minimize or eliminate the visible emissions.

If visible emissions are present, a visible emission incident has occurred. The observer does not have to document the exact start and end times for the visible emission incident under item d)(2)d. above or continue the daily check until the incident has ended. The observer may indicate that the visible emission incident was continuous during the observation period (or, if known, continuous during the operation of the emissions unit). With respect to the documentation of corrective actions, the observer may indicate that no corrective actions were taken if the visible emissions were representative of normal operations, or specify the minor corrective actions that were taken to ensure that the emissions unit continued to operate under normal conditions, or specify the corrective actions that were taken to eliminate abnormal visible emissions.
- e) Reporting Requirements
  - (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Northwest District Office by the due date specified in the Authorization section of this permit. The PER shall cover a reporting period of no more than 12 months for each air contaminant source identified in this permit. It is recommended that the PER is submitted electronically through Ohio EPA's "e-Business Center: Air Services" although PERs can be submitted via U.S. postal service or can be hand-delivered.

- (2) The permittee shall identify the following information in the annual PER in accordance with the monitoring requirements in section d)(2):
- a. all days during which any visible fugitive particulate emissions were observed from the egress points (i.e., from the loadout operations and from the building enclosing the truck receiving, milling, mixing, transferring/conveying operations) serving this emissions unit; and
  - b. any corrective actions taken to minimize or eliminate the visible fugitive particulate emissions.

The above information shall be submitted as an attachment to the PER. If there are no days and/or corrective actions to identify as required above, the permittee shall indicate within the "Additional Information and Corrections" section of the PER that no visible emissions were observed and no corrective actions were taken.

f) **Testing Requirements**

- (1) Compliance with the emission limitations in section b)(1) of these terms and conditions shall be determined in accordance with the following methods:

**Grain Receiving**

- a. Emission Limitation  
0.05 ton of fugitive particulate emissions (PE)/year  
0.008 ton of fugitive particulate matter less than 10 microns in size (PM10)/year

Applicable Compliance Method

The annual fugitive PE limitation was determined by multiplying the maximum annual grain throughput of 6,000 tons by an emission factor of 0.017 lb of PE/ton of grain (AP-42 Table 9.9.1-2 [3/03]) and dividing by 2000 lbs/ton.

The annual fugitive PM10 limitation was determined by multiplying the maximum annual grain throughput of 6,000 tons by an emission factor of 0.0025 lb of PM10/ton of grain (AP-42 Table 9.9.1-1 [3/03]) and dividing by 2000 lbs/ton.

Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PE and PM10 limitations will also be demonstrated.

- b. Emission Limitation  
Visible fugitive PE from the building enclosure for grain receiving operations shall not exceed 20% opacity as a three-minute average

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A and the modifications listed in paragraphs (B)(3)(a) and B)(3)(b) of OAC rule 3745-17-03.

**Milling with Cyclone**

- c. Emission Limitation  
0.54 lb of PE/hour and 0.20 ton of PE/year (stack)

Applicable Compliance Method

The hourly PE limitation was determined by multiplying the maximum operational capacity of milling operations (8 tons grain processed/hour) by an emission factor of 0.067 lb of PE/ton (AP-42 Table 9.9.1-2 [3/03]). If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1-5 of 40 CFR Part 60, Appendix A.

The annual PE limitation was determined by multiplying an emission factor of 0.067 lb of PE/ton (AP-42 Table 9.9.1-2 [3/03]) by a maximum annual grain throughput of 6,000 tons, then dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PE limitation shall also be demonstrated.

- d. Emission Limitation  
0.27 lb PM10/hour; 0.10 ton of PM10/year (stack)

Applicable Compliance Method

The hourly PM10 limitation was determined by multiplying the maximum operational capacity of milling operations (8 tons of grain processed/hour) by an emission factor of 0.034 lb of PM10/ton (AP-42 Table 9.9.1-2, includes reference to PM10 estimate from foot notes [3/03]). If required, the permittee shall demonstrate compliance by testing in accordance with Methods 1-4 of 40 CFR Part 60, Appendix A and Methods 201/201A and 202 of 40 CFR Part 51, Appendix M. Alternative U.S. EPA approved test methods may be used with prior approval from the Ohio EPA, Northwest District Office.

The annual PM10 limitation was determined by multiplying an emission factor of 0.034 lb of PM10/ton (AP-42 Table 9.9.1-2, includes reference to PM10 estimate from footnotes [3/03]) by a maximum annual grain throughput of 6,000 tons, then dividing by 2000 lbs/ton. Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PM10 limitation shall also be demonstrated.

- e. Emission Limitation  
Visible fugitive PE shall not exceed 20% opacity as a six-minute average (from cyclone stack)

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A.

**Mixing, Transferring & Conveying, and Loadout**

- f. Emission Limitation  
0.03 ton of fugitive PE/year

Applicable Compliance Method

The annual fugitive PE limitation was determined by multiplying an emission factor of 0.0033 lb PE/ton of grain (AP-42 Table 9.9.1-1 [3/03]) by a factor of three to account for three emission-generating operations (mixing, transferring & conveying, and loadout), a maximum annual grain throughput of 6,000 tons, and dividing by 2000 lbs/ton.

Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PE limitation shall also be demonstrated.

- g. Emission Limitation  
0.01 ton of fugitive PM10/year

Applicable Compliance Method

The annual fugitive PM10 limitation was determined by multiplying an emission factor of 0.0008 lb PM10/ton of grain (AP-42 Table 9.9.1-1 [3/03]) by a factor of three to account for three emission generating operations (mixing, transferring & conveying, and loadout), a maximum annual grain throughput of 6,000 tons, and dividing by 2000 lbs/ton.

Therefore, provided compliance is shown with the annual production restriction, compliance with the annual PM10 limitation will also be demonstrated.

- h. Emission Limitation  
Visible fugitive PE shall not exceed 20% opacity as a three-minute average (from the building enclosure for mixing and transferring & conveying operations)

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A and the modifications listed in paragraphs (B)(3)(a) and B)(3)(b) of OAC rule 3745-17-03.

- i. Emission Limitation  
Visible fugitive PE shall not exceed 20% opacity as a three-minute average (from loadout operations)

Applicable Compliance Method

If required, compliance shall be demonstrated by testing in accordance with Method 9 of 40 CFR Part 60, Appendix A and the modifications listed in paragraphs (B)(3)(a) and B)(3)(b) of OAC rule 3745-17-03.

- g) Miscellaneous Requirements
  - (1) None
