P.O. Box 1049

Application No: 08-03002

DATE: 11/6/2001

Retterbush Injection Molded Fiberglass
Bryan Retterbush
PO Box 207
Piqua, OH 45356

Enclosed Please find a modification to the Ohio EPA Permit To Install referenced above which will modify the terms and conditions.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
236 East Town Street, Room 300
Columbus, Ohio 43215

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

CC: USEPA

RAPCA

**Permit To Install
Terms and Conditions**

**Issue Date: 11/6/2001
Effective Date: 11/6/2001**

FINAL ADMINISTRATIVE MODIFICATION OF PERMIT TO INSTALL 08-03002

Application Number: 08-03002
APS Premise Number: 0855100393
Permit Fee: **\$0**
Name of Facility: Retterbush Injection Molded Fiberglass
Person to Contact: Bryan Retterbush
Address: PO Box 207
Piqua, OH 45356

Location of proposed air contaminant source(s) [emissions unit(s)]:

**719 Long Dr
Piqua, Ohio**

Description of proposed emissions unit(s):

resin spray and hand layup booth and resin transfer molding area; administrative modification to PTI 08-03002 issued January 24, 1991.

The above named entity is hereby granted a modification to the permit to install described above pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this modification does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described source(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans included in the application, the above described source(s) of pollutants will be granted the necessary operating permits.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Retterbush Injection Molded Fiberglass
PTI Application: 08-03002
Modification Issued: 11/6/2001

Facility ID: 0855100393

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized

Retterbush Injection Molded Fiberglass
PTI Application: 08-03002
Modification Issued: 11/6/2001

Facility ID: 0855100393

representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio

Retterbush Injection Molded Fiberglass
PTI Application: 08-03002
Modification Issued: 11/6/2001

Facility ID: 0855100393

Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit to Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

- a. If the permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77, the permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or

modified source(s) would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).

- b. If the permittee is required to apply for permit(s) pursuant to OAC Chapter 3745-35, the source(s) identified in this Permit To Install is (are) permitted to operate for a period of up to one year from the date the source(s) commenced operation. Permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within thirty (30) days after commencing operation of the source(s) covered by this permit.

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

**SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS**

<u>Pollutant</u>	<u>Tons Per Year</u>
organic compounds	10.7

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
P003 - resin sprayup and hand layup booth (modification)	OAC rule 3745-31-05(A)(3)	3.9 lbs/hour and 31.2 lbs/day organic compounds (OC), excluding cleanup
	OAC rule 3745-21-07(G)(2)	3.9 TPY OC, excluding cleanup 48 lbs/day and 6.1 TPY OC from cleanup 6.95 TPY OC, including cleanup The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

2. **Additional Terms and Conditions**

- 2.a The 3.9 lbs/hour organic compounds emission limitation was developed for PTI purposes to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with this limit.

B. Operational Restrictions

1. The permittee shall not employ any cleanup material in this emissions unit that is a photochemically reactive material. "Photochemically reactive material" is defined in OAC rule 3745-21-01(C)(5).

C. Monitoring and/or Recordkeeping Requirements

1. The permittee shall collect and record the following information for each month for each resin and

catalyst employed in this emissions unit:

- a. The company identification for each resin and catalyst employed.
 - b. The total number of gallons of each resin and catalyst employed.
 - c. The organic compound content of each resin and catalyst, in pounds per gallon.
 - d. The method of application for each resin employed.
 - e. The styrene content of each resin employed, in percent by weight.
 - f. The total organic compound emissions from all resins and catalysts employed, in pounds (see calculation methodology in Section E.1.b.).
 - g. The total number of days the emissions unit was in operation.
 - h. The average daily organic compound emission rate, in pounds per day (i.e., (f)/(g)).
2. The permittee shall collect and record the following information each month for this emissions unit:
- a. The company identification of each cleanup material employed in this emissions unit.
 - b. Whether or not each cleanup material employed is a photochemically reactive material.
 - c. The total number of gallons of cleanup material employed.
 - d. The organic compound content of each cleanup material, in pounds per gallon.
 - e. The total organic compound emission rate from all resins, catalysts, and cleanup materials employed, in pounds per month.

D. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports that include an identification of each month during which the average daily organic compound emissions from the resin and catalyst exceeded 31.2 pounds per day, and the actual average daily organic compound emissions for each such day.

The quarterly deviation (excursion) reports shall be submitted in accordance with paragraph 3 of the General Terms and Conditions.

2. The permittee shall submit deviation reports that identify each month during which any photochemically reactive cleanup material was employed in this emissions unit. Each report shall identify the cause for the use of the photochemically reactive cleanup material(s), and the estimated total quantity of the material(s) emitted during each such day, in pounds. Each report shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days of the deviation.
3. The permittee shall submit annual reports to the Director (the appropriate Ohio EPA District Office or local air agency) that specify the total organic compound emissions and total material usages for this emissions unit. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

E. Testing Requirements

1. Compliance with the emission limitation(s) in Section A.1. of these terms and conditions shall be determined in accordance with the following method(s):
 - a. Emission Limitation -
3.9 lbs/hour organic compounds, excluding cleanup

Applicable Compliance Method -
Compliance shall be determined as follows:
 - i. The usage of each resin (gallons per hour) shall be multiplied by the resin density, in pounds per gallon, and then divided by 2,000. The usage of each resin, in tons, shall then be multiplied by the appropriate emission factor from Table 3 of the Engineering Environmental Consulting Services document, Technical Discussion of the Unified Emission Factors for Open Molding of Composites, April 7, 1999.
 - ii. The total usage rate of the catalyst (gallons per hour) shall be multiplied by the maximum organic compound content of the catalyst, in pounds per gallon.
 - iii. The total hourly organic compound emission rate (in pounds) shall then be the sum of the results from i and ii above.
 - b. Emission Limitation -
31.2 lbs/day organic compounds, excluding cleanup

Retterbush Injection Molded Fiberglass**PTI Application: 08-03003****Modif****Facility ID: 0855100393****Emissions Unit ID: P003**

Applicable Compliance Method -

Compliance shall be based upon record keeping as specified in Section C.1. and shall be determined as follows:

i. The usage of each resin (gallons per month), as required to be recorded in Section C.1., shall be multiplied by the resin density, in pounds per gallon, and then divided by 2,000. The usage of each resin, in tons, shall then be multiplied by the appropriate emission factor from Table 3 of the Engineering Environmental Consulting Services document, Technical Discussion of the Unified Emission Factors for Open Molding of Composites, April 7, 1999.

ii. The total usage rate of the catalyst (gallons per month), as required to be recorded in Section C.1., shall be multiplied by the maximum organic compound content of the catalyst, in pounds per gallon.

iii. The total organic compound emission rate (in pounds), excluding cleanup, shall then be the sum of the results from i and ii above, divided by the total number of days the emissions unit was in operation for the month.

- c. Emission Limitation -
3.9 TPY OC, excluding cleanup
48 lbs/day and 6.1 TPY OC from cleanup

6.95 TPY OC, including cleanup

Applicable Compliance Method -

Compliance shall be based upon record keeping as specified in C.2. and shall be the sum of the monthly organic compound emission rates for the calendar year, divided by 2,000 pounds per ton.

F. Miscellaneous Requirements

None

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
P004 - Low Pressure Molding Compound (LPMC) and Resin Transfer Molding (RTM)	OAC rule 3745-31-05(A)(3)	5.6 lbs/day organic compounds (OC), excluding cleanup
		0.7 TPY OC, excluding cleanup
		3.75 TPY organic compounds, including cleanup
	OAC rule 3745-21-07(G)(2)	The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

2. Additional Terms and Conditions

2.a None

B. Operational Restrictions

1. The permittee shall not employ any cleanup material in this emissions unit that is a photochemically reactive material. "Photochemically reactive material" is defined in OAC rule 3745-21-01(C)(5).

C. Monitoring and/or Recordkeeping Requirements

1. The permittee shall collect and record the following information for each month for each resin and catalyst employed in this emissions unit:
 - a. The company identification for each resin and catalyst employed.
 - b. The total amount, in pounds or gallons, of each resin employed and the total amount, in gallons, of each catalyst employed.
 - c. The organic compound content of each resin, in percent by weight, and the organic compound content of each catalyst, in pounds per gallon.
 - d. The method of application for each resin employed.
 - e. The styrene content of each resin employed, in percent by weight.
 - f. The total organic compound emissions from all resins and catalysts employed, in pounds (see calculation methodology in Section E.1.a.).
 - g. The total number of days the emissions unit was in operation.
 - h. The average daily organic compound emission rate, in pounds per day (i.e., (f)/(g)).
2. The permittee shall collect and record the following information each month for this emissions unit:
 - a. The company identification of each cleanup material employed in this emissions unit.
 - b. Whether or not each cleanup material employed is a photochemically reactive material.
 - c. The total number of gallons of cleanup material employed.
 - d. The organic compound content of each cleanup material, in pounds per gallon.
 - e. The total organic compound emission rate from all resins, catalysts, and cleanup materials employed, in pounds per month.

D. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports that include an identification of each month during which the average daily organic compound emissions from the resins and catalyst exceeded 5.6 pounds per day, and the actual average daily organic compound emissions for each such month.

The quarterly deviation (excursion) reports shall be submitted in accordance with paragraph 3 of

the General Terms and Conditions.

2. The permittee shall submit deviation reports that identify each month during which any photochemically reactive cleanup material was employed in this emissions unit. Each report shall identify the cause for the use of the photochemically reactive cleanup material(s), and the estimated total quantity of the cleanup material(s) emitted during each such day, in pounds. Each report shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days of the deviation.
3. The permittee shall submit annual reports to the Director (the appropriate Ohio EPA District Office or local air agency) that specify the total organic compound emissions and total material usages for this emissions unit. These reports shall be submitted by January 31 of each year and shall cover the previous calendar year.

E. Testing Requirements

1. Compliance with the emission limitation(s) in Section A.1. of these terms and conditions shall be determined in accordance with the following method(s):
 - a. Emission Limitation -
5.6 lbs/day organic compounds, excluding cleanup

Applicable Compliance Method -
Compliance shall be based upon record keeping as specified in Section C.1. and shall be determined as follows:
 - i. The usage of each low pressure molding compound (LPMC) resin (gallons per month), as required to be recorded in Section C.1., shall be multiplied by the LPMC resin density, in pounds per gallon, and then divided by 2,000. The usage of each LPMC resin, in tons, shall then be multiplied by the appropriate emission factor from Table 3 of the Engineering Environmental Consulting Services document, Technical Discussion of the Unified Emission Factors for Open Molding of Composites, April 7, 1999.
 - ii. The usage of each resin transfer molding (RTM) resin (gallons per month), as required to be recorded in Section C.1., shall be multiplied by the RTM resin density, in pounds per gallon, and then divided by 2,000 pounds per ton. The usage of each RTM resin, in tons, shall then be multiplied by the styrene content in percent by weight and the emission loss factor of 1% (0.01) determined by the Composite Fabricators Association for Resin Transfer Molding.
