

Facility ID: 0660000237 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0660000237 Emissions Unit ID: F001 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Material Handling at C&D Disposal Facility (F001)	OAC 3745-31-05 See F.2.	Particulate emissions shall not exceed 7.89 tons per year. Visible particulate emissions shall be minimized or eliminated through the use of wet suppression, covering, or other suitable chemical stabilization.

2. **Additional Terms and Conditions**
 - (a) There shall be no open burning in violation of Ohio Administrative Code 3745-19 at this facility. This facility shall be limited to accepting only C&D material as defined in Ohio Revised Code 3714.01 (C) and limited to accepting no more than 72,000 tons of C&D material per calendar year.

B. Operational Restrictions

1. All vehicles hauling construction and demolition (C&D) material shall be closed, covered or tarped coming to or leaving the facility in order to minimize visible particulate emissions of fugitive dust and to eliminate load loss.
2. This facility shall ensure C & D materials are deposited, spread and compacted in such a manner as to minimize or prevent visible particulate emissions of fugitive dust. When dumping C&D materials, the facility shall implement the following procedures:
 - i. Any loads which appear to contain dusty C&D materials shall be watered prior to dumping of the load.
 - ii. No dusty C&D material shall be dumped during periods of high wind speed unless it has been treated to prevent it from becoming airborne.
 - iii. This facility shall ensure that all truckloads of C&D material are unloaded in a manner which will minimize the drop height of the C&D material and be dumped as near to the point of final placement as possible.
 - iv. During the dumping of any load of the C&D materials, in which dusty C&D materials become airborne, the C&D materials shall be watered as necessary.

When handling and stockpiling of the C&D and cover material, the facility shall minimize the handling and the stockpiling of cover material, except for top soil. Unvegetated cover material and soil in the waste disposal area must be periodically wetted with water and shall be handled in such a manner as to minimize or eliminate visible particulate emissions of fugitive dust. The frequency and amounts of this water application will depend on weather conditions, cover material conditions and soil conditions.

C. Monitoring and/or Record Keeping Requirements

1. A record of water applications required per Section B.2.b of this permit shall be maintained at the facility for a period of not less than three years and shall be made available to the Director, or any authorized representative of the Director, for review during normal business hours.
2. This facility shall maintain records of the volume of material received per day. These records shall be maintained for a period of not less than three years and the records shall be available for review by the Director or his representative during normal business hours.

D. Reporting Requirements

1. None

E. Testing Requirements

1. None

F. Miscellaneous Requirements

1. This facility shall not accept for disposal any NESHAP Regulated Asbestos Containing Material (RACM) as defined in the NESHAP for Asbestos, 40 CFR, Part 61, Subpart M, section 141 amended 11/20/90 or any subsequent revisions. This regulation defines RACM as "(a) Friable asbestos material, (b) Category I nonfriable asbestos containing material that has become friable, (c) Category I nonfriable asbestos containing material that will be or has been subjected to sanding, grinding, cutting, or abrading, or (d) Category II nonfriable asbestos containing material that has a high probability of becoming or has become crumbled, pulverized, or reduced to powder by the forces expected to act on the material in the course of demolition or renovation operations regulated by this subpart."

In addition, this facility shall not accept for disposal any Category II nonfriable asbestos containing material.

For asbestos materials, this facility shall be limited to accepting Category I nonfriable asbestos containing material that has not or will not be subjected to sanding, grinding, cutting, or abrading.

The facility shall ensure that any Category I nonfriable asbestos containing material which has not or will not be subjected to sanding, grinding, cutting, or abrading shall not become friable during processing at the landfill.

2. The following terms and conditions shall supersede all the air pollution control requirements contained in permit to install number 06-4729 issued for this emissions unit on January 10, 1996: A.1, A.2.a, A.2.b, B.1, B.2, B.2.a, B.2.b, C.1, C.2, and F.1.
