Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**

How to appeal this permit

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
77 South High Street, 17th Floor
Columbus, OH 43215

How to save money, reduce pollution and reduce energy consumption

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: www.ohioairquality.org/clean_air

How to give us feedback on your permitting experience

Please complete a survey at www.epa.ohio.gov/survey.aspx and give us feedback on your permitting experience. We value your opinion.

How to get an electronic copy of your permit

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

If you have any questions, please contact Southwest Ohio Air Quality Agency at (513)946-7777 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section, DAPC

Final Permit-to-Install and Operate
Village of Indian Hill
Permit Number: P0115309
Facility ID: 1431244104
Effective Date: 9/19/2013

Authorization

Facility ID: 1431244104
Application Number(s): A0048603
Permit Number: P0115309
Permit Description: FEPTIO Renewal for one (1) large stationary diesel fuel-fired 910 kW (9.39 MMBtu/hour) internal combustion engine with a generator used for peak shaving
Permit Type: Renewal
Permit Fee: \$0.00
Issue Date: 9/19/2013
Effective Date: 9/19/2013
Expiration Date: 9/19/2018
Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15

This document constitutes issuance to:

Village of Indian Hill
7100 Glendale-Milford Rd
Milford, OH 45150

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Southwest Ohio Air Quality Agency
250 William Howard Taft Rd.
Cincinnati, OH 45219
(513)946-7777

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Facility ID: 1431244104

Effective Date: 9/19/2013

Authorization (continued)

Permit Number: P0115309

Permit Description: FEPTIO Renewal for one (1) large stationary diesel fuel-fired 910 kW (9.39 MMBtu/hour) internal combustion engine with a generator used for peak shaving

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	P001
Company Equipment ID:	Plant Generator
Superseded Permit Number:	P0099537
General Permit Category and Type:	Not Applicable

Final Permit-to-Install and Operate
Village of Indian Hill
Permit Number: P0115309
Facility ID: 1431244104
Effective Date: 9/19/2013

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. Unless otherwise specified, facilities subject to one or more synthetic minor restrictions must use Ohio EPA's "Air Services" to submit annual emissions associated with this permit requirement. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Southwest Ohio Air Quality Agency in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting¹ a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emissions unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

¹Permittees that use Ohio EPA's "Air Services" can mark the affected emissions unit(s) as "permanently shutdown" in the facility profile along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update will constitute notifying of the permanent shutdown of the affected emissions unit(s).

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Final Permit-to-Install and Operate
Village of Indian Hill

Facility ID: 1431244104
Effective Date: 9/19/2013

B. Facility-Wide Terms and Conditions

Final Permit-to-Install and Operate

Village of Indian Hill

Permit Number: P0115309

Facility ID: 1431244104

Effective Date: 9/19/2013

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.
2. The Ohio EPA has determined that this facility is subject to the requirements of 40 CFR Part 63 Subpart ZZZZ, the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Stationary Reciprocating Internal Combustion Engines. Although Ohio EPA has determined that this Generally Available Control Technology NESHAP (GACT) applies, at this time Ohio EPA does not have the authority to enforce this standard. Instead, U.S. EPA has the authority to enforce this standard. Please be advised, that all requirements associated with this rule are in effect and shall be enforced by U.S. EPA. For more information on the area source rules, please refer to the following U.S. EPA website: <http://www.epa.gov/ttn/atw/area/arearules.html>.

Final Permit-to-Install and Operate
Village of Indian Hill
Permit Number: P0115309
Facility ID: 1431244104
Effective Date: 9/19/2013

C. Emissions Unit Terms and Conditions

1. P001, Plant Generator

Operations, Property and/or Equipment Description:

910 KW Peak Shaving Diesel Generator

- a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - (1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - a. None.
 - (2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - a. b)(1)b., c)(1), d)(1), and e)(1).
- b) Applicable Emissions Limitations and/or Control Requirements
 - (1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	Particulate emissions (PE) and emissions of particulate matter 10 microns and less in diameter (PM10) from this emissions unit shall not exceed 0.6 pound per hour. Emissions of sulfur dioxide (SO ₂) from this emissions unit shall not exceed 4.7 pounds per hour. Emissions of volatile organic compounds (VOC) from this emissions unit shall not exceed 0.9 pound per hour. Emissions of nitrogen oxides (NO _x) from this emissions unit shall not exceed 30.1 pounds per hour.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		<p>Emissions of carbon monoxide (CO) from this emissions unit shall not exceed 8.0 pounds per hour.</p> <p>The requirements of this rule also include compliance with the requirements of OAC rules 3745-31-05(D), 3745-17-07(A)(1), and 3745-17-11(B)(5)(b).</p>
b.	<p>OAC rule 3745-31-05(D)</p> <p>Synthetic Minor to Avoid Title V</p>	<p>PE and emissions of PM10 from this emissions unit shall not exceed 0.5 tons per year (TPY) based on a rolling, 12-month summation.</p> <p>Emissions of SO2 from this emissions unit shall not exceed 3.8 TPY based on a rolling, 12-month summation.</p> <p>Emissions of VOC from this emissions unit shall not exceed 0.7 TPY based on a rolling, 12-month summation.</p> <p>Emissions of NOx from this emissions unit shall not exceed 24.0 TPY based on a rolling, 12-month summation.</p> <p>Emissions of CO from this emissions unit shall not exceed 6.4 TPY based on a rolling, 12-month summation.</p> <p>See c)(1).</p>
c.	<p>OAC rule 3745-17-07(A)(1)</p>	<p>Visible particulate emissions from the stack serving this emissions unit shall not exceed 20 percent opacity as a six-minute average, except as provided by rule.</p>
d.	<p>OAC rule 3745-17-11(B)(5)(b)</p>	<p>PE shall not exceed 0.062 pound per million Btu (MMBtu) of actual heat input.</p>
e.	<p>OAC rule 3745-18-06</p>	<p>See b)(2)a.</p>

(2) Additional Terms and Conditions

- a. Based on OAC rule 3745-18-06(B), this emissions unit is exempt from the regulatory requirement of OAC rule 3745-18-06(G) since the engine has a rated heat input capacity equal to, or less than, ten MMBtu per hour, total rated capacity.

- b. The short term emission limitations outlined in b)(1) are based upon the emissions unit's Potential to Emit. Therefore, no records are required to demonstrate compliance with these limitations.
- c) Operational Restrictions
 - (1) The maximum annual operating hours for this emissions unit shall not exceed 1600 hour per year, based upon a rolling, 12-month summation of the operating hours.
- d) Monitoring and/or Recordkeeping Requirements
 - (1) The permittee shall maintain monthly records of the following information:
 - a. the operating hours for each month;
 - b. the rolling, 12-month summation of the operating hours;
 - c. the monthly emissions rates of PE/PM10, SO₂, VOC, NO_x, and CO for each month of operation, i.e., the product of a., in hours per month, multiplied by the actual heat input of the engine, in MMBtu per hour, multiplied by the Emission Factors (EF) for each pollutant from AP-42, Fifth Ed., Chapter 3.4, Large Stationary Diesel and all Dual-Fuel Engines, 10/1996, Table 3.4-1, in pounds per MMBtu, resulting in the monthly emissions rates in pounds per month; and
 - d. the rolling, 12-month summations of the PE/PM10, SO₂, VOC, NO_x, and CO emission rates, i.e., the summation of the monthly emissions rates for each pollutant, as calculated in c., for the current month plus the 11 previous calendar months, in pounds per month, each then divided by 2000 pounds, yielding the rolling, 12-month emissions rates in TPY.
 - (2) The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the stack serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emissions incident; and
 - e. any corrective actions taken to minimize or eliminate the visible emissions.

If visible emissions are present, a visible emissions incident has occurred. The observer does not have to document the exact start and end times for the visible emissions incident under item (d) above or continue the daily check until the incident has ended. The observer may indicate that the visible emissions incident was continuous during the

observation period (or, if known, continuous during the operation of the emissions unit). With respect to the documentation of corrective actions, the observer may indicate that no corrective actions were taken if the visible emissions were representative of normal operations, or specify the minor corrective actions that were taken to ensure that the emissions unit continued to operate under normal conditions, or specify the corrective actions that were taken to eliminate abnormal visible emissions.

e) Reporting Requirements

(1) The permittee shall submit quarterly deviation (excursion) reports that identify:

- a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - i. all exceedances of the rolling, 12-month restriction on the hours of operation for this emissions unit; and
 - ii. all exceedances of any rolling, 12-month Emission Limitation for this emissions unit.
- b. the probable cause of each deviation (excursion);
- c. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
- d. the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

(2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be completed electronically and submitted via the Ohio EPA e-Business Center: Air Services by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.

(3) The permittee shall identify the following information in the annual PER in accordance with the monitoring requirements for visible emissions in term number d)(2) above:

- a. all days during which any visible particulate emissions were observed from the stack serving this emissions unit; and

- b. any corrective actions taken to minimize or eliminate the visible particulate emissions.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:

- a. Emission Limitations:

Particulate emissions (PE) and emissions of particulate matter 10 microns and less in diameter (PM10) from this emissions unit shall not exceed 0.6 pound per hour.

Emissions of sulfur dioxide (SO₂) from this emissions unit shall not exceed 4.7 pounds per hour.

Emissions of volatile organic compounds (VOC) from this emissions unit shall not exceed 0.9 pound per hour.

Emissions of nitrogen oxides (NO_x) from this emissions unit shall not exceed 30.1 pounds per hour.

Emissions of carbon monoxide (CO) from this emissions unit shall not exceed 8.0 pounds per hour.

PE shall not exceed 0.062 pound per million Btu (MMBtu) of actual heat input.

Applicable Compliance Methods:

If required, compliance with the short term PE/PM10, SO₂, VOC, NO_x, and CO emission limitations shall be determined in accordance with U.S. EPA Methods 1 through 4 and the appropriate U.S. EPA Test Methods found in 40 CFR Part 60, Appendix A for each pollutant, or, if required, compliance shall be determined by multiplying the actual heat input of the engine, in MMBtu per hour, by the EFs for each pollutant from AP-42, Fifth Ed., Chapter 3.4, Large Stationary Diesel and all Dual-Fuel Engines, 10/1996, Table 3.4-1, in pounds per MMBtu, resulting in the short term emissions rates in pounds per hour. PE/PM10 emissions shall be determined using the Applicable Emission Limitation of 0.062 pound per MMBtu rather than the AP-42 EF.

The short term emission limitations were established based on information provided in Application A0048603 for PTIO P0115309:

$9.39 \text{ MMBtu/hour} \times 0.062 \text{ pound PE/PM10/MMBtu} = 0.58 \text{ pound PE/PM10/hour}$, rounded to 0.6 pound PE/PM10/hour

$9.39 \text{ MMBtu/hour} \times 1.01(0.5) \text{ pound SO}_2\text{/MMBtu}^* = 4.7 \text{ pounds SO}_2\text{/hour}$

$9.39 \text{ MMBtu/hour} \times 0.09 \text{ pound VOC/MMBtu} = 0.85 \text{ pound VOC/hour}$, rounded to 0.9 pound VOC/hour

$9.39 \text{ MMBtu/hour} \times 3.20 \text{ pound NOx/MMBtu} = 30.05 \text{ pounds NOx/hour}$, rounded to 30.1 pounds NOx/hour

$9.39 \text{ MMBtu/hour} \times 0.85 \text{ pound CO/MMBtu} = 7.98 \text{ pounds CO/hour}$, rounded to 8.0 pounds CO/hour

*EF developed assuming that all sulfur in fuel is converted to SO₂ and % sulfur in fuel oil equals 0.5% based on information provided in Application A0048603.

b. Emission Limitations:

PE and emissions of PM₁₀ from this emissions unit shall not exceed 0.5 tons per year (TPY) based on a rolling, 12-month summation.

Emissions of SO₂ from this emissions unit shall not exceed 3.8 TPY based on a rolling, 12-month summation.

Emissions of VOC from this emissions unit shall not exceed 0.7 TPY based on a rolling, 12-month summation.

Emissions of NO_x from this emissions unit shall not exceed 24.0 TPY based on a rolling, 12-month summation.

Emissions of CO from this emissions unit shall not exceed 6.4 TPY based on a rolling, 12-month summation.

Applicable Compliance Methods:

Compliance with the rolling, 12-month emission limitations shall be demonstrated by the recordkeeping requirements in term number d)(1) above.

The rolling, 12-month emission limitations were established based on information provided in Application A0048603 for PTIO P0115309:

$9.39 \text{ MMBtu/hour} \times 0.062 \text{ pound PE/PM}_{10}\text{/MMBtu} \times 1600 \text{ hours/year} \times 1 \text{ Ton}/2000 \text{ pounds} = 0.47 \text{ TPY PE/PM}_{10}$, rounded to 0.5 TPY PE/PM₁₀

$9.39 \text{ MMBtu/hour} \times 1.01(0.5) \text{ pound SO}_2\text{/MMBtu} \times 1600 \text{ hours/year} \times 1 \text{ Ton}/2000 \text{ pounds} = 3.79 \text{ TPY SO}_2$, rounded to 3.8 TPY SO₂

$9.39 \text{ MMBtu/hour} \times 0.09 \text{ pound VOC/MMBtu} \times 1600 \text{ hours/year} \times 1 \text{ Ton}/2000 \text{ pounds} = 0.68 \text{ TPY VOC}$, rounded to 0.7 TPY VOC

$9.39 \text{ MMBtu/hour} \times 3.20 \text{ pound NOx/MMBtu} \times 1600 \text{ hours/year} \times 1 \text{ Ton}/2000 \text{ pounds} = 24.04 \text{ TPY NOx}$, rounded to 24.0 TPY NO_x

$9.39 \text{ MMBtu/hour} \times 0.85 \text{ pound CO/MMBtu} \times 1600 \text{ hours/year} \times 1 \text{ Ton}/2000 \text{ pounds} = 6.39 \text{ TPY CO}$, rounded to 6.4 TPY CO

Final Permit-to-Install and Operate

Village of Indian Hill

Permit Number: P0115309

Facility ID: 1431244104

Effective Date: 9/19/2013

c. Emission Limitation:

Visible particulate emissions from the stack shall not exceed 20 percent opacity as a six-minute average, except as specified by rule.

Applicable Compliance Method:

Compliance with the stack visible particulate emissions limitation shall be determined through visible emissions observations performed in accordance with U.S. EPA Method 9.

g) Miscellaneous Requirements

(1) None.
