

Facility ID: 0679010213 Issuance type: Title V Final Permit

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part III" and before "I. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0679010213 Issuance type: Title V Final Permit

Part II - Specific Facility Terms and Conditions

a State and Federally Enforceable Section

1. There are no storage piles at this facility and the permit does not authorize the permittee to establish and maintain storage piles at this facility.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0679010213 Issuance type: Title V Final Permit

b State Only Enforceable Section

1. The following insignificant emissions units are located at this facility:
Z008 - 1 tank (<10,000 gal) containing diesel fuel; and
Z009 - 4 natural gas-fired heaters, 3 - #2 fuel oil-fired boilers (<10 mmBtu/hr each), 1 waste oil-fired furnace.

Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations, as well as any emission limitations and/or control requirements contained within a permit to install for the emissions unit.

Part III - Terms and Conditions for Emissions Units

[Go to the top of this document](#)

Facility ID: 0679010213 Emissions Unit ID: F005 Issuance type: Title V Final Permit

A. State and Federally Enforceable Section

The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.

1. None.

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
municipal solid waste landfill	OAC rule 3745-31-05(A)(3) (PTI 06-4554)	24.2 lbs/hr of nonmethane organic compounds (NMOC) 105.9 tpy of NMOC 33.6 lbs/hr of carbon monoxide (CO) 147.3 tpy of CO 40.0 lbs/hr of nitrogen oxides (NOx) 175.2 tpy of NOx 2.2 lbs/hr of hydrogen chloride (HCl) 9.8 tpy of HCl 3780 lbs/hr of methane (CH4) 16557 tpy of CH4 See A.I.2.d below.
	40 CFR Part 60, Subpart WWW	See A.I.2.a, A.I.2.b, and A.I.2.c below.

2. Additional Terms and Conditions

- a. The permittee shall record the NMOC emission rate annually, as determined using the procedures specified in 40 CFR 60.754(a) until such time as it is determined that the NMOC emission rate is equal to or greater than 50 megagrams per year, or the landfill is closed.
- b. If the calculated NMOC emission rate is equal to or greater than 50 megagrams per year, the permittee shall:
 - a. submit a collection and control system design plan in accordance with 40 CFR 60.752(b)(2)(i), prepared by a professional engineer, within one year;
 - b. install a collection and control system that effectively captures the gas generated within the landfill in accordance with 40 CFR 60.752(b)(2)(ii), within 18 months of the submittal of the design plan;
 - c. route all the collected gas to a control system in accordance with 40 CFR 60.752(b)(2)(iii); and
 - d. operate the collection system and control device in accordance with 40 CFR 60.753, 40 CFR 60.755, and 40 CFR 60.756.
- c. If this emissions unit is permanently closed, a closure notification, as provided for in 40 CFR 60.757(d), shall be submitted to the Ohio EPA, Southeast District Office.
- d. The permittee shall ensure solid wastes are deposited, spread and compacted in such a manner as to minimize or prevent visible emissions of fugitive dust. The permittee shall require all truckloads of solid waste to be unloaded in a manner which will minimize the drop height of the solid wastes. Any dusty materials or wastes likely to become airborne, shall be watered as necessary prior to or during dumping operations in order to minimize or eliminate visible emissions of fugitive dust, but any watering shall avoid free liquids and runoff. No dusty material shall be dumped during periods of high

wind speed unless treated to prevent it from becoming airborne.

All vehicles hauling wastes shall be closed, covered or tarped coming to or leaving the facility in order to minimize visible emissions of fugitive dust and to eliminate load loss.

This facility is not permitted to accept asbestos-containing material for disposal.

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

II. Operational Restrictions

1. None

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

III. Monitoring and/or Record Keeping Requirements

1. Pursuant to 40 CFR 60.758(a), the permittee shall keep, for at least 5 years, up-to-date, readily accessible, on-site records of the maximum design capacity of the landfill, the current amount of solid waste in place, and the year-by-year waste acceptance rate. Off-site records may be maintained if they are retrievable within 4 hours. Either paper copy or electronic formats are acceptable.
2. In the event that this facility becomes a controlled landfill, the permittee shall comply with the monitoring requirements specified in 40 CFR 60.756(a) through 60.756(f), as appropriate, and the record keeping requirements specified in 40 CFR 60.758(b) through 60.758(e).
3. The initially calculated NMOC emission rate for this emissions unit was less than 50 megagrams (55 tons) per year. Pursuant to 40 CFR 60.752(b), the permittee shall recalculate and record the NMOC emission rate annually using either the equation provided in paragraph (a)(1)(i) or the equation provided in paragraph (a)(1)(ii) of 40 CFR 60.754, and the procedures specified in paragraph (a)(2) of 40 CFR 60.754.
4. The permittee shall comply with Ohio EPA's Air Toxics Policy and conduct air toxics screening modeling for HCl as part of the collection system and control plan.
5. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible fugitive particulate emissions resulting from any landfill operations (i.e., load-in, covering and excavating, and wind erosion). The presence or absence of any visible fugitive emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emission incident; and
 - e. any corrective actions taken to eliminate the visible emissions.
6. The permittee shall maintain a daily operations log for each waste dumping/placement area that lists any watering activity employed to minimize or eliminate visible emissions of fugitive dust, and the time, the location, and the amount of water employed, in gallons.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

IV. Reporting Requirements

1. The permittee shall submit an annual report, by January 31 of each year, which includes the determination of the NMOC emission rate, using the procedures specified in 40 CFR 60.754(a). This report shall no longer be required when the collection system and control device are in operation, or the landfill is closed.
2. The permittee shall submit semiannual written reports which (a) identify all days during which any visible fugitive particulate emissions were observed from any landfill operations (i.e., load-in, covering and excavating, and wind erosion) and (b) describe any corrective actions taken to eliminate the visible fugitive particulate emissions. These reports shall be submitted to the Director (Ohio EPA, Southeast District Office) by January 31 and July 31 of each year and shall cover the previous 6-month period.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

V. Testing Requirements

1. Emissions shall not exceed the values shown in section A.I.1, based on the calculations and assumptions described below. These calculations represent the highest emission rates which could occur based on landfill gas emission rates predicted by USEPA's Landfill estimation program and AP-42 emission factors. Control equipment has not yet been selected; therefore, allowables are based on the worst-case assumptions. Since the allowable emission rates are theoretical maximums, no monitoring, record keeping or reporting requirements are necessary.

Emissions predicted by USEPA's Landfill estimation model were based on receipt of the existing waste (4,308,913 Mg in 1998) divided equally over the previous 42 years of operation and the additional capacity (31,280,919 Mg in 1998) filled at the AMDWR rate of 3000 tons per day. The maximum gas generation predicted by the model was used with AP-42 emission factors for internal combustion engines and flares to calculate the maximum emissions if either of those options were chosen. The option yielding the highest

emission rate was used as the allowable, as described below.

- a. NMOC: Emissions were predicted by USEPA's Landfill estimation model. The highest annual emission rate would be the third year after emissions exceed 50 Mg per year since NSPS allows 30 months to install collection and controls after that rate is attained.
- b. CH4: Emissions were predicted by USEPA's Landfill estimation model. The highest modeled year was used since methane is not required to be controlled.
- c. NOx: The total volume of CH4 and NMOC predicted by USEPA's Landfill estimation model was calculated at 1,000 Btu/cuft to be burned in an internal combustion engine to generate electricity. The AP-42 emission factor of 0.44 pound of NOx per mmBtu was used.
- d. CO: The total volume of CH4 and NMOC predicted by USEPA's Landfill estimation model was calculated at 1,000 Btu/cuft to be burned in a flare. The AP-42 emission factor of 0.37 pound of CO per mmBtu was used.
- e. HCl: Emissions were calculated based on predictions from USEPA's Landfill estimation model and AP-42 equations. The highest modeled year was used since HCl is not required to be controlled.

Part III - Terms and Conditions for Emissions Units

[Go to the top of this document](#)

Facility ID: 0679010213 Emissions Unit ID: F006 Issuance type: Title V Final Permit

A. State and Federally Enforceable Section

The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.

- 1. None.

I. Applicable Emissions Limitations and/or Control Requirements

- 1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
paved roadways (see section A.I.2.a)	OAC rule 3745-31-05(A)(3) (PTI 06-4554)	no visible particulate emissions except for 6 minutes during any 60-minute period best available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust (see below)
unpaved roadways and parking areas (see section A.I.2.b)	OAC rule 3745-31-05(A)(3) (PTI 06-4554)	no visible particulate emissions except for 13 minutes during any 60-minute period best available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust (see below)
		56.3 tpy of particulate emissions

2. Additional Terms and Conditions

- a. The paved roadways and parking areas that are covered by this permit and subject to the requirements of OAC rule 3745-31-05 are listed below:
 - (a) paved roadways:
 - main access road - entrance to scale house
 - main haul road - scale house to perimeter road
 - perimeter road
 - b. The unpaved roadways and parking areas that are covered by this permit and subject to the requirements of OAC rule 3745-31-05 are listed below:
 - unpaved roadway:
 - phase development haul road

unpaved parking areas:

scale house

maintenance building

- c. The permittee shall employ best available control measures on all paved roadways for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee's permit application, the permittee has committed to treat the paved roadways by flushing with water and sweeping at sufficient treatment frequencies to ensure compliance. Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.
- d. The permittee shall employ best available control measures on all unpaved roadways and parking areas for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee's permit application, the permittee has committed to treat the unpaved roadways and parking areas with water and/or any other suitable dust suppression chemicals at sufficient treatment frequencies to ensure compliance. Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.
- e. The needed frequencies of implementation of the control measures shall be determined by the permittee's inspections pursuant to the monitoring section of this permit. Implementation of the control measures shall not be necessary for a paved or unpaved roadway or parking area that is covered with snow and/or ice or if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements. Implementation of any control measure may be suspended if unsafe or hazardous driving conditions would be created by its use.
- f. Any unpaved roadway or parking area, which during the term of this permit is paved or takes the characteristics of a paved surface due to the application of certain types of dust suppressants, may be controlled with the control measure specified above for paved surfaces. Any unpaved roadway or parking area that takes the characteristics of a paved roadway or parking area due to the application of certain types of dust suppressants shall remain subject to the visible emission limitation for unpaved roadways and parking areas. Any unpaved roadway or parking area that is paved shall be subject to the visible emission limitation for paved roadways and parking areas.
- g. The permittee shall promptly remove, in such a manner as to minimize or prevent resuspension, earth and/or other material from paved streets onto which such material has been deposited by trucking or earth moving equipment or erosion by water or other means.
- h. Open-bodied vehicles transporting materials likely to become airborne shall have such materials covered at all times if the control measure is necessary for the materials being transported.
- i. Implementation of the above-mentioned control measures in accordance with the terms and conditions of this permit is appropriate and sufficient to satisfy the requirements of OAC rule 3745-31-05.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

II. Operational Restrictions

1. None

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

III. Monitoring and/or Record Keeping Requirements

1. Except as otherwise provided in this section, the permittee shall perform inspections of each of the roadways and parking areas in accordance with the following frequencies:
 - paved roadways minimum inspection frequency
 - all paved roadways once per week
 - unpaved roadways and parking areas minimum inspection frequency
 - all unpaved roadways and parking areas twice daily
2. The purpose of the inspections is to determine the need for implementing the above-mentioned control measures. The inspections shall be performed during representative, normal traffic conditions. No inspection shall be necessary for a roadway or parking area that is covered with snow and/or ice or if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements. Any required inspection that is not performed due to any of the above identified events shall be performed as soon as such event(s) has (have) ended, except if the next required inspection is within one week.
3. The permittee may, upon receipt of written approval from the appropriate Ohio EPA District Office or local air

agency, modify the above-mentioned inspection frequencies if operating experience indicates that less frequent inspections would be sufficient to ensure compliance with the above-mentioned applicable requirements. Such modified inspection frequencies would not be considered a minor or significant modification that would be subject to the Title V permit modification requirements in paragraphs (C)(1) and (C)(3) of OAC rule 3745-77-08.

4. The permittee shall maintain records of the following information:
 - a. the date and reason any required inspection was not performed, including those inspections that were not performed due to snow and/or ice cover or precipitation;
 - b. the date of each inspection where it was determined by the permittee that it was necessary to implement the control measures;
 - c. the dates the control measures were implemented; and
 - d. on a calendar quarter basis, the total number of days the control measures were implemented and the total number of days where snow and/or ice cover or precipitation were sufficient to not require the control measures.

The information required in section A.III.4.d shall be kept separately for (i) the paved roadways and parking areas and (ii) the unpaved roadways and parking areas, and shall be updated on a calendar quarter basis within 30 days after the end of each calendar quarter.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

IV. Reporting Requirements

1. The permittee shall submit deviation reports that identify any of the following occurrences:
 - a. each day during which an inspection was not performed by the required frequency, excluding an inspection which was not performed due to an exemption for snow and/or ice cover or precipitation; and
 - b. each instance when a control measure, that was to be implemented as a result of an inspection, was not implemented.

The deviation reports shall be submitted in accordance with the reporting requirements specified in Part I - General Term and Condition A.1.c.

[Go to the top of this document](#)

[Go to the top of Part III for this Emissions Unit](#)

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION.

V. Testing Requirements

1. Compliance with the emission limitations in section A.1.1 of these terms and conditions shall be determined in accordance with the following methods:
 - a. Emission Limitations:

no visible particulate emissions from any paved roadway or parking area except for a period of time not to exceed 6 minutes during any 60-minute observation period

no visible particulate emissions from any unpaved roadway or parking area except for a period of time not to exceed 13 minutes during any 60-minute observation period

Applicable Compliance Method:

Compliance shall be determined in accordance with Test Method 22 as set forth in "Appendix on Test Methods" in 40 CFR, Part 60 "Standards of Performance for New Stationary Sources," as such Appendix existed on July 1, 1996, and the modifications listed in paragraphs (B)(4)(a) through (B)(4)(d) of OAC rule 3745-17-03.
 - b. Emission Limitation:

56.3 tpy of particulate emissions

Applicable Compliance Method:

Compliance will be determined by calculating the emissions using the estimated maximum vehicle miles traveled and the emission factors contained in AP-42, 5th edition, Table 13.2.2, dated September, 1998.
