RE: FINALAIR POLLUTION PERMIT-TO-INSTALL AND OPERATE
Facility ID: 0684020037
Permit Number: P0113986
Permit Type: OAC Chapter 3745-31 Modification
County: Washington

Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**

How to appeal this permit

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
77 South High Street, 17th Floor
Columbus, OH 43215

How to save money, reduce pollution and reduce energy consumption

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: www.ohioairquality.org/clean_air

How to give us feedback on your permitting experience

Please complete a survey at www.epa.ohio.gov/survey.aspx and give us feedback on your permitting experience. We value your opinion.

How to get an electronic copy of your permit

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

If you have any questions, please contact Ohio EPA DAPC, Southeast District Office at (740)385-8501 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Michael W. Ahern, Manager

Permit Issuance and Data Management Section, DAPC

Authorization

Facility ID: 0684020037
 Application Number(s): A0047223
 Permit Number: P0113986
 Permit Description: Chapter 31 modification to existing emissions unit F001 (roadways), F002 (material storage piles), and F003 (material handling) to allow multi-modal transportation and storage of coal and other industrial materials. This request will also transfer the facility from a Title V to a NTV source .
 Permit Type: OAC Chapter 3745-31 Modification
 Permit Fee: \$1,650.00
 Issue Date: 12/31/2013
 Effective Date: 12/31/2013
 Expiration Date: 12/31/2023
 Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15

This document constitutes issuance to:

Marietta Materials Management and Transportation Center
 State Route 7 South
 P. O. Box 728
 Marietta, OH 45750

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

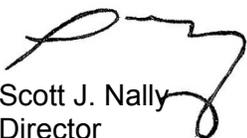

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Southeast District Office
 2195 Front Street
 Logan, OH 43138
 (740)385-8501

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

 Scott J. Nally
 Director

Authorization (continued)

Permit Number: P0113986

Permit Description: Chapter 31 modification to existing emissions unit F001 (roadways), F002 (material storage piles), and F003 (material handling) to allow multi-modal transportation and storage of coal and other industrial materials. This request will also transfer the facility from a Title V to a NTV source .

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	F001
Company Equipment ID:	Plant Roadways and Parking Areas
Superseded Permit Number:	06-06186
General Permit Category and Type:	Not Applicable
Emissions Unit ID:	F002
Company Equipment ID:	Material Storage Piles
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable
Emissions Unit ID:	F003
Company Equipment ID:	Material Handling
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

Final Permit-to-Install and Operate
Marietta Materials Management and Transportation Center
Permit Number: P0113986
Facility ID: 0684020037
Effective Date: 12/31/2013

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the [DO/LAA] in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Final Permit-to-Install and Operate
Marietta Materials Management and Transportation Center
Permit Number: P0113986
Facility ID: 0684020037
Effective Date: 12/31/2013

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.

Final Permit-to-Install and Operate
Marietta Materials Management and Transportation Center
Permit Number: P0113986
Facility ID: 0684020037
Effective Date: 12/31/2013

C. Emissions Unit Terms and Conditions

1. F001, Plant Unpaved and Paved Roadways and Parking Areas

Operations, Property and/or Equipment Description:

Unpaved (maximum of 168,000 VMT per year) and paved (maximum of 12, 500 VMT per year) roadways and parking areas (Chapter 31 modification to PTI 06-06186 issued 8/3/2000).

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) **Applicable Emissions Limitations and/or Control Requirements**

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3) ORC 3704.03(T)	There shall be no visible particulate emissions (PE) except for three minutes during any 60-minute period from unpaved roadways and parking areas. There shall be no visible PE except for one minute during any 60-minute period from paved roadways and parking areas.
b.	OAC rule 3745-17-07(B)	The emissions limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3) and ORC 3704.03(T).
c.	OAC rule 3745-17-08(B)	Reasonable available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust. See b)(2)a. through b)(2)f. below.

(2) Additional Terms and Conditions

- a. The permittee shall employ reasonable available control measures on all unpaved and paved roadways and parking areas for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee's application, the permittee has committed to treat the unpaved and paved roadways and parking areas by application of chemical stabilization/dust suppressants and/or watering at sufficient treatment frequencies to ensure compliance. Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.
- b. The needed frequencies of implementation of the control measures shall be determined by the permittee's inspections pursuant to the monitoring section of this permit. Implementation of the control measures shall not be necessary for unpaved or paved roadways and parking areas that are covered with snow and/or ice or if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements. Implementation of any control measure may be suspended if unsafe or hazardous driving conditions would be created by its use.
- c. The permittee shall promptly remove, in such a manner as to minimize or prevent resuspension, earth and/or other material from paved streets onto which such material has been deposited by trucking or earth moving equipment or erosion by water or other means.
- d. Any unpaved roadway or parking area, which during the term of this permit is paved or takes the characteristics of paved surface due to the application of certain types of dust suppressants, may be controlled with the control measure specified above for paved surfaces. Any unpaved roadway or parking area that takes the characteristics of a paved roadway or parking area due to the application of certain types of dust suppressants shall remain subject to the visible emissions limitation for unpaved roadways and parking areas. Any unpaved roadway or parking area that is paved shall be subject to the visible emissions limitation for paved roadways and parking areas.
- e. Open-bodied vehicles transporting materials likely to become airborne shall have such materials covered at all times if the control measure is necessary for the materials being transported.
- f. Implementation of the above-mentioned control measures in accordance with the terms and conditions of this permit is appropriate and sufficient to satisfy the reasonable available technology requirements of OAC rule 3745-17-08(B).

c) Operational Restrictions

- (1) None.

d) Monitoring and/or Recordkeeping Requirements

- (1) Except as otherwise provided in this section, the permittee shall perform inspections of each of the roadway segments and parking areas in accordance with the following frequencies:

<u>unpaved roadways and parking areas</u>	<u>minimum inspection frequency</u>
---	-------------------------------------

all roads and parking areas	daily
-----------------------------	-------

<u>paved roadways and parking areas</u>	<u>minimum inspection frequency</u>
---	-------------------------------------

all roads and parking areas	daily
-----------------------------	-------

- (2) The purpose of the inspections is to determine the need for implementing the above-mentioned control measures. The inspections shall be performed during representative, normal traffic conditions. No inspection shall be necessary for a roadway or parking area that is covered with snow and/or ice or if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements. Any required inspection that is not performed due to any of the above-identified events shall be performed as soon as such event(s) has (have) ended, except if the next required inspection is within one week.

- (3) The permittee shall maintain records of the following information:

- a. the date and reason any required inspection was not performed, including those inspections that were not performed due to snow and/or ice cover or precipitation;
- b. the date of each inspection where it was determined by the permittee that it was necessary to implement the control measures;
- c. the dates the control measures were implemented; and
- d. on a calendar quarter basis, the total number of days the control measures were implemented and the total number of days where snow and/or ice cover or precipitation were sufficient to not require the control measures.

The information required in d)(3)d. shall be updated on a calendar quarter basis within 30 days after the end of each calendar quarter.

e) Reporting Requirements

- (1) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the appropriate district office or local air agency.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.

f) Testing Requirements

(1) Compliance with the emissions limitations in b)(1) of the terms and conditions of this permit shall be determined in accordance with the following methods:

a. Emissions Limitation:

There shall be no visible PE from unpaved roadways and parking areas except for a period of time not to exceed three minutes during any 60-minute observation period.

Applicable Compliance Method:

If required, visible emissions of fugitive dust shall be determined according to USEPA Method 22.

b. Emissions Limitation:

There shall be no visible PE from paved roadways and parking areas except for a period of time not to exceed one minute during any 60-minute observation period.

Applicable Compliance Method:

If required, visible emissions of fugitive dust shall be determined according to USEPA Method 22.

g) Miscellaneous Requirements

(1) None.

2. F002, Material Storage Piles

Operations, Property and/or Equipment Description:

Material storage piles including sand, gravel, rip-rap, recycled concrete, bricks, (concrete masonry unit) CMU's, coal, crushed limestone, metallurgical cokes, ferromanganese, bottom ash, blast furnace slag, foundry/frac sand, petroleum cokes, silicon carbide, magnetite, bauxite, deicing salt, diatomite, biomass fuel pellets, waste grain, pelletized gypsum, synthetic gypsum, vermiculite, perlite, fertilizer, soil and Hog fuel (wood chips) (maximum total storage pile of 30.4 acres, no single outside pile exceeding 6.4 acres in size, and total maximum load in throughput for all material combined of 14,016,000 TPY)(Chapter 31 to existing source with no prior installation permit due to original installation date of 6/1/1951).

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3) ORC 3704.03(T)	There shall be no visible particulate emissions (PE) except for one minute during any 60-minute period.
b.	OAC rule 3745-17-07(B)	The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3) and ORC 3704.03(T).

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
c.	OAC rule 3745-17-08(B)	Reasonable available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust. See b)(2)a. through b)(2)e. below

(2) Additional Terms and Conditions

- a. The permittee shall employ reasonable available control measures on all load-in operations, load-out operations and wind erosion associated with the storage piles for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee’s application, the permittee has committed to maintain minimal drop height, and chemical stabilization/dust suppressants and/or watering at sufficient treatment frequencies to ensure compliance for the following materials outlined in the permittee’s application:

Sand, gravel, and rip-rap

Recycled concrete, bricks, CMU’s

Coal

Crushed limestone

Metallurgical cokes

Ferromanganese

Bottom ash

Blast furnace slag

Foundry/frac sand

Petroleum cokes

Silicon carbide

Magnetite

Bauxite

Soil

Hog fuel (wood chips)

Nothing in the above paragraph shall prohibit the permittee from employing other control measures to ensure compliance.

- b. The permittee shall employ reasonable available control measures on all load-in operations, load-out operations and wind erosion associated with the storage piles for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee's application, the permittee has committed to maintain minimal drop height, and full building enclosure with exhaust filter to ensure compliance for the following materials outlined in the permittee's application:

Deicing salt

Diatomite

Biomass fuel pellets

Waste grain

Pelletized gypsum

Synthetic gypsum

Vermiculite

Perlite

Fertilizer

Nothing in the above paragraph shall prohibit the permittee from employing other control measures to ensure compliance.

- c. The above-mentioned control measure(s) shall be employed for each load-in operation, load-out operation and wind erosion of each storage pile if the permittee determines, as a result of the inspection conducted pursuant to the monitoring section of this permit, that the control measure(s) are necessary to ensure compliance with the above-mentioned applicable requirements. Any required implementation of the control measure(s) shall continue during any such operation until further observation confirms that use of the measure(s) is unnecessary.
- d. The operator shall avoid dragging any front-end loader bucket along the ground. Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.
- e. Implementation of the above-mentioned control measures in accordance with the terms and conditions of this permit is appropriate and sufficient to satisfy the requirements of OAC rule 3745-17-08(B).

c) Operational Restrictions

- (1) The permittee shall only store the material outlined in the submitted application. In order to store additional material types on an ongoing basis, the permittee shall contact Ohio EPA and determine if a permit modification is required.

d) Monitoring and/or Recordkeeping Requirements

- (1) Except as otherwise provided in this section, the permittee shall perform inspections of each load-in operation at each storage pile in accordance with the following frequencies:

<u>storage pile identification</u>	<u>minimum load-in inspection frequency</u>
all	daily

- (2) Except as otherwise provided in this section, the permittee shall perform inspections of each load-out operation at each storage pile in accordance with the following frequencies:

<u>storage pile identification</u>	<u>minimum load-out inspection frequency</u>
all	daily

- (3) Except as otherwise provided in this section, the permittee shall perform inspections of the wind erosion from pile surfaces associated with each storage pile in accordance with the following frequencies:

<u>storage pile identification</u>	<u>minimum wind erosion inspection frequency</u>
all	daily

- (4) No inspection shall be necessary for wind erosion from the surface of a storage pile when the pile is covered with snow and/or ice and for any storage pile activity if precipitation has occurred that is sufficient for that day to ensure compliance with the above-mentioned applicable requirements. Any required inspection that is not performed due to any of the above identified events shall be performed as soon as such event(s) has (have) ended, except if the next required inspection is within one week.

- (5) The purpose of the inspections is to determine the need for implementing the control measures specified in this permit for load-in and load-out of a storage pile, and wind erosion from the surface of a storage pile. The inspections shall be performed during representative, normal storage pile operating conditions.

- (6) The permittee shall maintain records of the following information:

- a. the date and reason any required inspection was not performed, including those inspections that were not performed due to snow and/or ice cover or precipitation;
- b. the date of each inspection where it was determined by the permittee that it was necessary to implement the control measures;
- c. the dates the control measures were implemented; and

- d. on a calendar quarter basis, the total number of days the control measures were implemented and, for wind erosion from pile surfaces, the total number of days where snow and/or ice cover or precipitation were sufficient to not require the control measure(s).

The information required in d)(6)d. shall be kept separately for (i) the load-in operations, (ii) the load-out operations, and (iii) the pile surfaces (wind erosion), and shall be updated on a calendar quarter basis within 30 days after the end of each calendar quarter.

e) Reporting Requirements

- (1) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the appropriate district office or local air agency.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.

f) Testing Requirements

- (1) Compliance with the emissions limitations in b)(1) of the terms and conditions of this permit shall be determined in accordance with the following methods:

- a. Emissions Limitation:

There shall be no visible PE except for a period of time not to exceed one minute in any 60-minute observation period.

Applicable Compliance Method:

If required, visible emissions of fugitive dust shall be determined according to USEPA Method 22.

g) Miscellaneous Requirements

- (1) None.

- a. None.

3. F003, Material Handling

Operations, Property and/or Equipment Description:

Material handling of various materials including sand, gravel, rip-rap, recycled concrete, bricks, (concrete masonry unit) CMU's, coal, crushed limestone, metallurgical cokes, ferromanganese, bottom ash, blast furnace slag, foundry/frac sand, petroleum cokes, silicon carbide, magnetite, bauxite, deicing salt, diatomite, biomass fuel pellets, waste grain, pelletized gypsum, synthetic gypsum, vermiculite, perlite, fertilizer, soil and Hog fuel (wood chips). Material handling operation include hoppers, conveyors, truck load out stations, truck unloading, rail car load-out stations, rail car unloading, barge unloading and loading (Chapter 31 modification to PTI 06-06186 issued 8/3/2000) .

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3) ORC 3704.03(T)	Visible particulate emissions (PE) shall not exceed 10% opacity, as a 3-minute average.
b.	OAC rule 3745-17-07(B)	The emission limitation specified by this rule is less stringent than the emissions limitation established pursuant to OAC rule 3745-31-05(A)(3) and ORC 3704.03(T).

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
c.	OAC rule 3745-17-08(B)	Reasonable available control measures that are sufficient to minimize or eliminate visible emissions of fugitive dust. See b)(2)a. through b)(2)e. below

(2) Additional Terms and Conditions

- a. The material handling operations that are covered by this permit and subject to the requirements of OAC rule 3745-31-05, ORC 3704.03(T), 3745-17-07 and 3745-17-08 are listed below:

Barge unloading into OTR Trucks Load-out Station No.1

Load-out from OTR Trucks Load-out Station No. 1 into Trucks

Barge unloading into River Receiving Hopper

Transfer of material from River Receiving Hopper onto River Conveyor

Movement of material on River conveyor

Transfer of material from River Conveyor into Rail Car Shed Elevated Receiving Hopper

Transfer of material from Rail Car Shed Elevated Receiving Hopper onto OTR Truck Load-out Station No. 2 Conveyor

Movement of material on OTR Truck Load-out Station No. 2 Conveyor

Transfer of material from OTR Truck Load-out Station No. 2 Conveyor into OTR Truck Load-out Station No. 2

Load-out from OTR Truck Load-out Station No. 2 into Trucks

Transfer of material from Rail Car Shed Receiving Hopper into Rail Car Load-Out Station No. 1

Load-out from Rail Car Load-out Station No.1 into Rail Car

Rail Car unloading into Rail Car Shed Floor Receiving Hopper

Truck unloading into Rail Car Shed Floor Receiving Hopper

Transfer of material from Rail Car Shed Floor Receiving Hopper onto Intermediate Conveyor

Movement of material on Intermediate Conveyor

Transfer of material from Intermediate Conveyor to Transfer House Conveyor

Movement of material on Transfer House Conveyor

Transfer of material from Transfer House Conveyor to Mobile Conveyor Unit No. 1

Movement of material on Mobile Conveyor Unit No. 1

Transfer of material from Mobile Conveyor Unit No. 1 to River load-out Conveyor

Movement of material on River load-out Conveyor

Transfer of material from River load-out Conveyor to River load-out Hopper

Transfer of material from River load-out Hopper to Barge load-out

OTR Trucks unloading into Mobile Receiving Hopper No. 1

Mobile Receiving Hopper No. 1 to Mobile Conveyor Unit No. 2

Movement of material on Mobile Conveyor Unit No. 2

Load-in from storage piles into OTR Truck Load-out Station No. 4

Load-out from OTR Truck Load-out Station No. 4 into trucks

Load-in from storage piles into Rail Car Load-out Station No. 2

Load-out from Rail Car Load-out Station No. 2 into rail cars

OTR trucks/front end loaders load-in to Mobile Receiving Hopper No. 2

Transfer of Material from Mobile Receiving Hopper No. 2 into Mobile Conveyor Unit No. 1

Movement of Material on Mobile Conveyor Unit No. 1

Transfer of Material from Mobile Conveyor Unit No. 1 to Mobile Conveyor Unit No.3

Movement of Material on Mobile Conveyor No. 3

Transfer of Material from Mobile conveyor Unit No. 3 into OTR Truck load-out Station No. 3 Hopper or Rail Car Load-out Station No. 2 Hopper

Transfer of Material from OTR Truck load-out Station No. 3 Hopper into OTR Truck load-out Station No. 3.

Transfer of Rail Car Load-out Station No. 2 Hopper to Rail Car Load-out Station No.2

Load-out from OTR Truck load-out Station No. 3. Into trucks

- b. The permittee shall employ the following control measures for the above-identified processing/handling operation(s) for the purpose of ensuring compliance with the above-mentioned applicable requirements. In accordance with the permittee’s permit application, the permittee has committed to perform the following control measure(s) to ensure compliance:

Material handling operation(s)	Control measures(s)
Barge unloading into OTR Trucks Load-out Station No.1; Load-out from OTR Trucks Load-out Station No. 1 into trucks; Barge unloading into River Receiving Hopper; and OTR Trucks unloading into Mobile Receiving Hopper No. 2	Sufficient moisture of material when material permitted to be wet*, water spray as needed for material that is permitted to be wet* or screened drop, where practicable, controlled loading rate and minimize drop height.
Transfer of material from River Receiving Hopper onto River Conveyor; Transfer of material from Transfer House Conveyor to Mobile Conveyor Unit No. 1; Transfer of material from Mobile Conveyor Unit No. 1 to River load-out Hopper; Transfer of material from River load-out Hopper to Barge load-out; and Mobile Receiving Hopper No. 1 to Mobile Conveyor Unit No. 2; Transfer of material from Mobile Receiving Hopper No. 2 into Mobile Conveyor Unit No. 1; Transfer of material from Mobile Conveyor Unit No. 1 to Mobile Conveyor Unit No. 3; Transfer of material from Mobile Conveyor Unit No. 3 into OTR Truck Load-out Station No. 3 Hopper or Rail Car Load-out Station No. 2 Hopper; Transfer of material from OTR Truck Load-out Station No.3 Hopper to OTR Truck Load-out Station No. 3; Transfer of material from Rail Car Load-out Station No.2 Hopper to Rail Car Load-out Station No.2.	Sufficient moisture of material when material permitted to be wet*, controlled loading rate, minimize drop height and covered conveyor.

Material handling operation(s)	Control measures(s)
Movement of material on River conveyor; and Movement of material on Mobile Conveyor Unit No. 1; Movement of material on OTR Truck Load-out Station No. 2 Conveyor; Transfer of material from OTR Truck load-out Station No. 2 Conveyor into OTR Truck Load-out Station No. 2; Transfer of material from Mobile Conveyor No. 1 to River Load-out Conveyor; Movement of material on river load-out conveyor; movement of material on mobile conveyor No. 3; movement of material on mobile conveyor unit No. 2.	Sufficient moisture of material when material permitted to be wet* and covered conveyor.
Transfer of material from River Conveyor into Rail Car Shed Elevated Receiving Hopper; Rail Car unloading into Rail Car Shed Floor Receiving Hopper; and Truck unloading into Rail Car Shed Floor Receiving Hopper; Transfer of material from Rail Car Shed Elevated Receiving Hopper into OTR Truck Load-out Station No. 2 Conveyor; Transfer of material from Rail Car Shed Elevated Receiving Hopper into Rail Car Load-out Station No. 1; Load-out from Rail Car Load-out Station No. 1 into Rail Cars	Sufficient moisture of material when material permitted to be wet*, where practicable apply water spray as needed for material that is permitted to be wet*, controlled loading rate, minimize drop height, and partial enclosure of building.
Transfer of material from Rail Car Shed Floor Receiving Hopper onto Intermediate Conveyor; and Transfer of material from Intermediate Conveyor to Transfer House Conveyor	Sufficient moisture of material when material permitted to be wet*, controlled loading rate, minimize drop height and fully enclosed building with exhaust filtration.
Movement of material on Intermediate Conveyor; and Movement of material on Transfer House Conveyor.	Sufficient moisture of material when material permitted to be wet* and fully enclosed building with exhaust filtration.
Load-in from storage piles into OTR Truck Load-out Station No. 4; Load-out from OTR Truck Load-out Station No. 4 into trucks; and Load-in from storage piles into Rail Car Load-out Station No.	Sufficient moisture of material when material permitted to be wet*, water spray as needed for material that is permitted to be wet*, controlled loading rate and minimize drop height.

Material handling operation(s)	Control measures(s)
2; Transfer of material from River Load-out Conveyor to River Load-out Hopper; OTR Trucks unloading into Mobile Receiving Hopper No. 1.	
Load-out from Rail Car Load-out Station No. 2 into rail cars; and Load-out from OTR Truck load-out Station No. 3. Into trucks or load-out from rail car load-out station No. 2 into rail cars.	Sufficient moisture of material when material permitted to be wet*, telescoping chute, when using conveyors for load-out, controlled loading rate and minimize drop height.
Mobile conveyor Unit No. 1 into OTR Truck load-out Station No. 3; Load out from OTR Truck Load-out Station No. 2 into Trucks.	Sufficient moisture of material when material permitted to be wet*, controlled loading rate and minimize drop height.

*The following material in the permittee’s application was identified to have watering used as an acceptable control method: sand, gravel, rip-rap, recycled concrete, bricks, CMU’s, coal, crushed limestone, metallurgical cokes, ferromanganese, bottom ash, blast furnace slag, foundry/frac sand, petroleum cokes, silicon carbide, magnetite, bauxite, soil and hog fuel (wood chips).

Nothing in this paragraph shall prohibit the permittee from employing other control measures to ensure compliance.

- c. For each processing/handling operation that is not adequately enclosed, the above-identified control measure(s) shall be implemented if the permittee determines, as a result of the inspection conducted pursuant to the monitoring section of this permit, that the control measure(s) is (are) necessary to ensure compliance with the above-mentioned applicable requirements. Any required implementation of the control measure(s) shall continue during the operation of the material handling operation(s) until further observation confirms that use of the control measure(s) is unnecessary.
- d. The permittee shall not overload trucks hauling material so as to eliminate spillage, along with maintaining a minimum dump height from front end loaders into trucks, in order to minimize or eliminate the visible emissions of fugitive dust.
- e. The permittee shall maintain covers on the conveyor that are not partially enclosed by a building. In addition, the belt shall not be overloaded, in order to minimize or eliminate the visible emissions of fugitive dust.
- f. Implementation of the above-mentioned control measure(s) in accordance with the terms and conditions of this permit is appropriate and sufficient to satisfy the requirements of OAC rule 3745-17-08(B).

c) Operational Restrictions

- (1) None.

d) Monitoring and/or Recordkeeping Requirements

- (1) Except as otherwise provided in this section, for material handling operations that are not adequately enclosed, the permittee shall perform inspections of such operations in accordance with the following minimum frequencies:

<u>material handling operation(s)</u>	<u>minimum inspection frequency</u>
Each material handling operation identified in b)(2)a. above.	daily

- (2) The above-mentioned inspections shall be performed during representative, normal operating conditions.

- (3) The permittee shall maintain records of the following information:

- a. the date and reason any required inspection was not performed;
- b. the date of each inspection where it was determined by the permittee that it was necessary to implement the control measure(s);
- c. the dates the control measure(s) was (were) implemented; and
- d. on a calendar quarter basis, the total number of days the control measure(s) was (were) implemented.

The information in d)(3)d. shall be kept separately for each material handling/processing operation identified above, and shall be updated on a calendar quarter basis within 30 days after the end of each calendar quarter.

e) Reporting Requirements

- (1) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the appropriate district office or local air agency.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.

f) Testing Requirements

- (1) Compliance with the emissions limitations in b)(1) shall be determined in accordance with the following methods:

a. Emissions Limitation:

Visible PE of fugitive dust shall not exceed 10% opacity as a 3-minute average.

Applicable Compliance Method:

If required, visible particulate emissions shall be determined according to USEPA Method 9.

g) Miscellaneous Requirements

(1) None.
