Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate (PTIO) for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the permit. A public notice will appear in the Ohio Environmental Protection Agency (EPA) Weekly Review and the local newspaper, Akron Beacon Journal. A copy of the public notice and the draft permit are enclosed. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc) by clicking the "Search for Permits" link under the Permitting topic on the Programs tab. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall  
Permit Review/Development Section  
Ohio EPA, DAPC  
50 West Town Street Suite 700  
PO Box 1049  
Columbus, Ohio 43216-1049

and Akron Regional Air Quality Management District  
146 South High Street, Room 904  
Akron, OH 44308

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified if a public hearing is scheduled. A decision on issuing a final permit-to-install will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Akron Regional Air Quality Management District at (330)375-2480.

Sincerely,

*Michael W. Ahern*

PUBLIC NOTICE

2/25/2014 Issuance of Draft Air Pollution Permit-To-Install and Operate

Baker Mc Millen Company  
3688 WYOGA LAKE ROAD,  
Stow, OH 44224

Summit County

FACILITY DESC.: All Other Miscellaneous Wood Product Manufacturing

PERMIT #: P0116087

PERMIT TYPE: Renewal

PERMIT DESC: Renewal FEPTIO for woodworking operation controlled with a baghouse and various coating operations.

The Director of the Ohio Environmental Protection Agency issued the draft permit above. The permit and complete instructions for requesting information or submitting comments may be obtained at: <http://epa.ohio.gov/dapc/permitsonline.aspx> by entering the permit # or: Sean Vadas, Akron Regional Air Quality Management District, 146 South High Street, Room 904, Akron, OH 44308. Ph: (330)375-2480

## Permit Strategy Write-Up

1. Check all that apply:

Synthetic Minor Determination

Netting Determination

2. Source Description:

Baker Mc Millen operates an existing woodworking process controlled with a baghouse (P002) along with three spray booths (R002 – R004) and two dip tanks (P003, P004) and a stain machine (P005) in Summit County. Baker Mc Millen desires to limit the facility's VOC, individual HAP and combined HAPs emissions to less than Title V thresholds, 100 tons of VOC, 10 tons of any HAP and 25 tons of all HAPs, respectively.

3. Facility Emissions and Attainment Status:

This facility has a potential to emit of 176 tons of VOC and is also major for HAPs. The facility desires that allowable emissions be limited to 99.5 tons VOC, 24.5 tons combined HAPs, and 9.95 tons of any individual HAP in order to avoid Title V permitting requirements. Summit County is currently non-attainment for Ozone.

4. Source Emissions:

Baker Mc Millen will limit the facility-wide emissions to to 99.5 tons VOC, 24.5 tons combined HAPs, and 9.95 tons of any individual HAP as a rolling, 12-month summation to ensure federal enforceability. The permit will contain terms and conditions which limit the emission units to the restrictions identified above.

5. Conclusion:

The terms and conditions in the permit will limit the facility's VOC, individual and combined HAPs emissions to less than Title V thresholds. Baker Mc Millen shall maintain records summarizing the facility's emissions. Excursion reports will be required of the facility to ensure compliance.

6. Please provide additional notes or comments as necessary:

This is a renewal FEPTIO.

7. Total Permit Allowable Emissions Summary (for informational purposes only):

<u>Pollutant</u>	<u>Tons Per Year</u>
VOC	99.5
Individual HAPs	9.95
Combined HAPs	24.5

**Draft Permit-to-Install and Operate**

Baker Mc Millen Company

**Permit Number:** P0116087

**Facility ID:** 1677110035

**Effective Date:** To be entered upon final issuance

## Authorization

Facility ID: 1677110035  
Application Number(s): A0049550  
Permit Number: P0116087  
Permit Description: Renewal FEPTIO for woodworking operation controlled with a baghouse and various coating operations.  
Permit Type: Renewal  
Permit Fee: \$0.00 *DO NOT send payment at this time, subject to change before final issuance*  
Issue Date: 2/25/2014  
Effective Date: To be entered upon final issuance  
Expiration Date: To be entered upon final issuance  
Permit Evaluation Report (PER) Annual Date: To be entered upon final issuance

This document constitutes issuance to:

Baker Mc Millen Company  
3688 WYOGA LAKE ROAD  
Stow, OH 44224

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Akron Regional Air Quality Management District  
146 South High Street, Room 904  
Akron, OH 44308  
(330)375-2480

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Craig W. Butler  
Director

## Authorization (continued)

Permit Number: P0116087

Permit Description: Renewal FEPTIO for woodworking operation controlled with a baghouse and various coating operations.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

<b>Emissions Unit ID:</b>	<b>P001</b>

**Draft Permit-to-Install and Operate**

Baker Mc Millen Company

**Permit Number:** P0116087

**Facility ID:** 1677110035

**Effective Date:** To be entered upon final issuance

## **A. Standard Terms and Conditions**

**1. What does this permit-to-install and operate ("PTIO") allow me to do?**

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

**2. Who is responsible for complying with this permit?**

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

**3. What records must I keep under this permit?**

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

**4. What are my permit fees and when do I pay them?**

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

**5. When does my PTIO expire, and when do I need to submit my renewal application?**

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

**6. What happens to this permit if my project is delayed or I do not install or modify my source?**

This PTIO expires 18 months after the issue date identified on the “Authorization” page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

**7. What reports must I submit under this permit?**

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

**8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?**

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

**9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?**

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

**10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?**

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Akron Regional Air Quality Management District in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

**11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?**

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

**12. What happens if one or more emissions units operated under this permit is/are shut down permanently?**

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

**13. Can I transfer this permit to a new owner or operator?**

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the

change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

**14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?**

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

**15. What happens if a portion of this permit is determined to be invalid?**

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

**Draft Permit-to-Install and Operate**

Baker Mc Millen Company

**Permit Number:** P0116087

**Facility ID:** 1677110035

**Effective Date:** To be entered upon final issuance

## **B. Facility-Wide Terms and Conditions**

**Draft Permit-to-Install and Operate**

Baker Mc Millen Company

**Permit Number:** P0116087

**Facility ID:** 1677110035

**Effective Date:** To be entered upon final issuance

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - (1) None.
  - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - (1) None.

**Draft Permit-to-Install and Operate**

Baker Mc Millen Company

**Permit Number:** P0116087

**Facility ID:** 1677110035

**Effective Date:** To be entered upon final issuance

## **C. Emissions Unit Terms and Conditions**

1. P001, Woodworking Operations

Operations, Property and/or Equipment Description:

Woodworking operations controlled with two baghouses.

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-17-07(A)	Visible particulate emissions (PE) from any stack shall not exceed 20% opacity as a 6-minute average, except as provided by rule.
b.	OAC rule 3745-17-11(B)	PE shall not exceed 4.36 pounds per hour. (based on 2,190 lbs/hr maximum process rate)

(2) Additional Terms and Conditions

a. The emissions from this emissions unit shall be vented to the baghouse at all times the emissions unit is in operation.

c) Operational Restrictions

(1) None.

d) Monitoring and/or Recordkeeping Requirements

- (1) In order to maintain compliance with the applicable emission limitation(s) contained in this permit, the acceptable range established for the pressure drop across the baghouse is between 0.5 to 5.0 inches of water.
- (2) The permittee shall properly install, operate, and maintain equipment to continuously monitor the pressure drop, in inches of water, across the baghouse when the controlled emissions unit(s) is/are in operation, including periods of startup and shutdown. The permittee shall record the pressure drop across the baghouse on a daily basis. The monitoring equipment shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s), with any modifications deemed necessary by the permittee.

Whenever the monitored value for the pressure drop deviates from the limit or range established in accordance with this permit, the permittee shall promptly investigate the cause of the deviation. The permittee shall maintain records of the following information for each investigation:

- a. the date and time the deviation began;
- b. the magnitude of the deviation at that time;
- c. the date the investigation was conducted;
- d. the name(s) of the personnel who conducted the investigation; and
- e. the findings and recommendations.

In response to each required investigation to determine the cause of a deviation, the permittee shall take prompt corrective action to bring the operation of the control equipment within the acceptable range specified in this permit, unless the permittee determines that corrective action is not necessary and documents the reasons for that determination and the date and time the deviation ended. The permittee shall maintain records of the following information for each corrective action taken:

- f. a description of the corrective action;
- g. the date corrective action was completed;
- h. the date and time the deviation ended;
- i. the total period of time (in minutes) during which there was a deviation;
- j. the pressure drop readings immediately after the corrective action was implemented; and
- k. the name(s) of the personnel who performed the work.

Investigation and records required by this paragraph do not eliminate the need to comply with the requirements of OAC rule 3745-15-06 if it is determined that a malfunction has occurred.

This range or limit on the pressure drop across the baghouse is effective for the duration of this permit, unless revisions are requested by the permittee and approved in writing by the appropriate Ohio EPA District Office or local air agency. The permittee may request revisions to the permitted limit or range for the pressure drop based upon information obtained during future testing that demonstrate compliance with the allowable particulate emission rate for the controlled emissions unit(s). In addition, approved revisions to the range or limit will not constitute a relaxation of the monitoring requirements of this permit and may be incorporated into this permit by means of an administrative modification.

e) Reporting Requirements

- (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be submitted by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (2) The permittee shall identify in the annual permit evaluation report the following information concerning the operations of the baghouse during the 12-month reporting period for this/these emissions unit(s):
  - a. each period of time (start time and date, and end time and date) when the pressure drop across the baghouse was outside of the acceptable range;
  - b. any period of time (start time and date, and end time and date) when the emissions unit(s) was/were in operation and the process emissions were not vented to the baghouse;
  - c. each incident of deviation described in "a" (above) where a prompt investigation was not conducted;
  - d. each incident of deviation described in "a" where prompt corrective action, that would bring the pressure drop into compliance with the acceptable range, was determined to be necessary and was not taken; and
  - e. each incident of deviation described in "a" where proper records were not maintained for the investigation and/or the corrective action(s), as identified in the monitoring and record keeping requirements of this permit.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:
  - a. Emission Limitation:  
  
Visible PE from any stack shall not exceed 20% opacity as a 6-minute average.

**Draft Permit-to-Install and Operate**

Baker Mc Millen Company

**Permit Number:** P0116087

**Facility ID:** 1677110035

**Effective Date:** To be entered upon final issuance

Applicable Compliance Method:

If required, compliance with the visible PE limitation shall be demonstrated through the results of visible emission observations performed in accordance with 40 CFR Part 60, Appendix A, Method 9.

b. Emission Limitation:

PE shall not exceed 4.36 pounds per hour.

Applicable Compliance Method:

If required, compliance with the hourly limitation shall be demonstrated based on the results of stack testing performed in accordance with Methods 1 – 5 of 40 CFR Part 60, Appendix A.

g) Miscellaneous Requirements

(1) None.

**2. Emissions Unit Group -Dip Tanks & Stain Machine: P003,P004,P005,**

<b>EU ID</b>	<b>Operations, Property and/or Equipment Description</b>
P003	Dip tank process line 1
P004	Dip tank 2
P005	Stain Machine

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. All.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	<b>Applicable Rules/Requirements</b>	<b>Applicable Emissions Limitations/Control Measures</b>
a.	OAC rule 3745-31-05(A)(3)	Volatile organic compounds (VOC) shall not exceed 33.07 pounds per hour, and 48.3 tons per year. <b>(P003)</b>  VOC shall not exceed 7.41 pounds per hour, and 10.8 tons per year. <b>(P004)</b>  VOC shall not exceed 0.18 pound per hour, and 0.79 ton per year. <b>(P005)</b>  See c)(1) below.
b.	OAC rule 3745-31-05(D)	The combined annual coatings usage input rates* and combined annual emissions from the entire facility (P003 - P005, and R002 - R004, combined) shall not exceed the following as rolling, 12-month summations:

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		<p>99.5 tons of VOC; 24.5 tons of the combined hazardous air pollutants (HAPs); and 9.95 tons of any individual HAP.</p> <p>*The annual coatings usage (VOC ) input rates are equivalent to the annual VOC emission rates, based upon 100% of the solvent in the coating materials being emitted.</p> <p>See b(2)a. below.</p>

(2) Additional Terms and Conditions

- a. These emissions units have been in operation for more than 12 months and, as such, the permittee has existing records to generate the rolling, 12-month summation of the emissions, upon issuance of this permit.

c) Operational Restrictions

- (1) The permittee shall not employ any photochemically reactive materials, as defined in OAC rule 3745-21-01(C)(5), in this emissions unit.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information each month for each coating and cleanup material for emissions units P003 - P005, R002 - R004, combined:
  - a. the name and identification number of each coating and cleanup material, as applied;
  - b. the total VOC content, in pounds of VOC per gallon, of each coating and cleanup material, as applied;
  - c. the individual HAP content for each HAP of each coating, in pounds of individual HAP per gallon of coating, as applied;
  - d. the total combined HAP content of each coating, in pounds of combined HAPs per gallon of coating, as applied [sum all the individual HAP contents from (c)];
  - e. the number of gallons of each coating employed;
  - f. the individual HAP content for each HAP of each cleanup material, in pounds of individual HAP per gallon of cleanup material, as applied;

- g. the total combined HAP content of each cleanup material, in pounds of combined HAPs per gallon of cleanup material, as applied [sum all the individual HAP contents from (f)];
  - h. the number of gallons of each cleanup material employed;
  - i. the total individual HAP emissions from all the coatings and cleanup materials employed, in pounds [for each HAP, the sum of (c) times (e) for all the coatings plus the sum of (f) times (h) for all the cleanup materials];
  - j. the total combined HAPs emissions from all the coatings and cleanup materials employed, in pounds [the sum of (d) times (e) for all the coatings plus the sum of (g) times (h) for all the cleanup materials];
  - k. the total VOC emissions from all the coatings and cleanup materials employed, in pounds [the sum of (b) times (e) for all the coatings plus the sum of (b) times (h) for all the cleanup materials];
  - l. the rolling, 12-month total VOC input rates and VOC emissions from all the coatings and cleanup materials employed, in tons;
  - m. the rolling, 12-month individual HAP emissions from all the coatings and cleanup materials employed, in tons; and
  - n. the rolling, 12-month total combined HAPs emissions from all the coatings and cleanup materials, in tons.
- (2) The permittee shall collect and record the following information for each day for the coating operation for this emissions unit:
- a. the company identification for each coating and cleanup material employed;
  - b. the number of gallons of each coating and cleanup material employed;
  - c. the VOC content of each coating and cleanup material, in pounds per gallon;
  - d. the total number of hours the emissions unit was in operation;
  - e. the total VOC emission rate for all the coatings and cleanup materials [summation of  $c \times b$  for all coatings + summation of  $c \times b$  for all cleanup materials], in pounds per day;
  - f. the average hourly VOC emission rate for all the coatings and cleanup materials, i.e.  $(e)/(d)$ , in pounds per hour (average).

[Note: The coating information must be for the coatings as employed, including any thinning solvents added at the emissions unit.]

e) Reporting Requirements

- (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be submitted by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (2) The permittee shall submit quarterly deviation (excursion) reports that identify:
  - a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:  
  
allexceedances of the rolling, 12-month emission limitations for VOC, individual, and combined HAPs.
  - b. the probable cause of each deviation (excursion);
  - c. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
  - d. the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

f) Testing Requirements

- (1) Compliance with the emission limitation(s) in Section b)(1) of these terms and conditions shall be determined in accordance with the following method(s):
  - a. Emission Limitations:  
  
VOC shall not exceed 33.07 pounds per hour, and 48.3 tons per year. **(P003)**  
  
VOC shall not exceed 7.41 pounds per hour, and 10.8 tons per year. **(P004)**  
  
VOC shall not exceed 0.18 pound per hour, and 0.79 ton per year. **(P005)**

Applicable Compliance Method:

The permittee shall demonstrate compliance with the hourly limitation based upon the record keeping requirements established in section d)(2) of these terms and conditions.

**Draft Permit-to-Install and Operate**

Baker Mc Millen Company

**Permit Number:** P0116087

**Facility ID:** 1677110035

**Effective Date:** To be entered upon final issuance

If required, compliance with the hourly limitation shall be demonstrated in accordance with Methods 1-4 and 18, 25, or 25A, as appropriate, of 40 CFR Part 60, Appendix A.

The annual emission limitation was developed by multiplying the hourly mass emission limitation by 8760 hours per year, and then dividing by 2000. Therefore, compliance with the annual limitation shall be ensured if compliance with the hourly limitation is maintained.

b. Emission Limitations:

99.5 tons of VOC

24.5 tons of combined HAPs

9.95 tons of any individual HAP

(facility-wide limitations)

Applicable Compliance Method

The permittee shall demonstrate compliance with the facility-wide limitations based upon the record keeping requirements established in section d)(1) of these terms and conditions.

g) Miscellaneous Requirements

(1) None.

**3. Emissions Unit Group -Spray Booths: R002,R003,R004,**

<b>EU ID</b>	<b>Operations, Property and/or Equipment Description</b>
R002	Walk-in Spray Booth
R003	Chain-on-edge conveyor with Binks spray booth
R004	Chain-on-edge conveyor with Binks spray booth

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. All.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	<b>Applicable Rules/Requirements</b>	<b>Applicable Emissions Limitations/Control Measures</b>
a.	OAC rule 3745-31-05(A)(3)	Volatile organic compounds (VOC) shall not exceed 45.2 pounds per hour, and 99.5 tons per year.
b.	OAC rule 3745-31-05(D)	The combined annual coatings usage input rates* and combined annual emissions from the entire facility (P003 - P005, and R002 - R004, combined) shall not exceed the following as rolling, 12-month summations:  99.5 tons of VOC; 24.5 tons of the combined hazardous air pollutants (HAPs); and 9.95 tons of any individual HAP.  *The annual coatings usage (VOC ) input rates are equivalent to the annual VOC

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		emission rates, based upon 100% of the solvent in the coating materials being emitted.  See b(2)a. below.
c.	OAC rule 3745-17-11(C)	See c)(1), c)(2), and d)(3) – d)(4) below.

(2) Additional Terms and Conditions

a. These emissions units have been in operation for more than 12 months and, as such, the permittee has existing records to generate the rolling, 12-month summation of the emissions, upon issuance of this permit.

c) Operational Restrictions

(1) The permittee shall operate the dry filtration system for the control of particulate emissions whenever this emissions unit is in operation and shall maintain the dry particulate filter in accordance with the manufacturer's recommendations, instructions, and/or operating manual(s), with any modifications deemed necessary by the permittee.

(2) In the event the particulate filter system is not operating in accordance with the manufacturer's recommendations, instructions, or operating manual, with any modifications deemed necessary by the permittee, the control device shall be expeditiously repaired or otherwise returned to these documented operating conditions.

d) Monitoring and/or Recordkeeping Requirements

(1) The permittee shall collect and record the following information each month for each coating and cleanup material for emissions units P003 - P005, R002 - R004, combined:

- a. the name and identification number of each coating and cleanup material, as applied;
- b. the total VOC content, in pounds of VOC per gallon, of each coating and cleanup material, as applied;
- c. the individual HAP content for each HAP of each coating, in pounds of individual HAP per gallon of coating, as applied;
- d. the total combined HAP content of each coating, in pounds of combined HAPs per gallon of coating, as applied [sum all the individual HAP contents from (c)];
- e. the number of gallons of each coating employed;
- f. the individual HAP content for each HAP of each cleanup material, in pounds of individual HAP per gallon of cleanup material, as applied;

- g. the total combined HAP content of each cleanup material, in pounds of combined HAPs per gallon of cleanup material, as applied [sum all the individual HAP contents from (f)];
  - h. the number of gallons of each cleanup material employed;
  - i. the total individual HAP emissions from all the coatings and cleanup materials employed, in pounds [for each HAP, the sum of (c) times (e) for all the coatings plus the sum of (f) times (h) for all the cleanup materials];
  - j. the total combined HAPs emissions from all the coatings and cleanup materials employed, in pounds [the sum of (d) times (e) for all the coatings plus the sum of (g) times (h) for all the cleanup materials];
  - k. the total VOC emissions from all the coatings and cleanup materials employed, in pounds [the sum of (b) times (e) for all the coatings plus the sum of (b) times (h) for all the cleanup materials];
  - l. the rolling, 12-month total VOC input rates and VOC emissions from all the coatings and cleanup materials employed, in tons;
  - m. the rolling, 12-month individual HAP emissions from all the coatings and cleanup materials employed, in tons; and
  - n. the rolling, 12-month total combined HAPs emissions from all the coatings and cleanup materials, in tons.
- (2) The permittee shall collect and record the following information for each day for the coating operation for this emissions unit:
- a. the company identification for each coating and cleanup material employed;
  - b. the number of gallons of each coating and cleanup material employed;
  - c. the VOC content of each coating and cleanup material, in pounds per gallon;
  - d. the total number of hours the emissions unit was in operation;
  - e. the total VOC emission rate for all the coatings and cleanup materials [summation of  $c \times b$  for all coatings + summation of  $c \times b$  for all cleanup materials] , in pounds per day;
  - f. the average hourly VOC emission rate for all the coatings and cleanup materials, i.e.  $(e)/(d)$ , in pounds per hour (average).
- [Note: The coating information must be for the coatings as employed, including anything thinning solvents added at the emissions unit.]
- (3) The permittee shall maintain documentation of the manufacturer's recommendations, instructions, or operating manuals for the dry particulate filter, along with documentation of any modifications deemed necessary by the permittee. These documents shall be

maintained at the facility and shall be made available to the appropriate Ohio EPA District Office or local air agency upon request.

- (4) The permittee shall conduct periodic inspections of the dry particulate filter to determine whether it is operating in accordance with the manufacturer's recommendations, instructions, or operating manuals with any modifications deemed necessary by the permittee or operator. These inspections shall be performed at a frequency that shall be based upon the recommendation of the manufacturer and the permittee shall maintain a copy of the manufacturer's recommended inspection frequency and it shall be made available to the Ohio EPA upon request.
- (5) In addition to the recommended periodic inspections, not less than once each calendar year the permittee shall conduct a comprehensive inspection of the dry particulate filter while the emissions unit is shut down and perform any needed maintenance and repair to ensure that it is operated in accordance with the manufacturer's recommendations.
- (6) The permittee shall document each inspection (periodic and annual) of the dry particulate filter system and shall maintain the following information:
  - a. the date of the inspection;
  - b. a description of each/any problem identified and the date it was corrected;
  - c. a description of any maintenance and repairs performed; and
  - d. the name of person who performed the inspection.

These records shall be maintained at the facility for not less than five years from the date the inspection and any necessary maintenance or repairs were completed and shall be made available to the appropriate Ohio EPA District Office or local air agency upon request.

- (7) The permittee shall maintain records that document any time periods when the dry particulate filter was not in service when the emissions unit(s) was/were in operation, as well as, a record of all operations during which the dry particulate filter was not operated according to the manufacturer's recommendations with any documented modifications made by the permittee. These records shall be maintained for a period of not less than five years and shall be made available to the Ohio EPA upon request.

e) Reporting Requirements

- (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be submitted by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (2) The permittee shall submit quarterly deviation (excursion) reports that identify:
  - a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:

all exceedances of the rolling, 12-month emission limitations for VOC, individual, and combined HAPs.

- b. the probable cause of each deviation (excursion);
- c. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
- d. the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

f) Testing Requirements

- (1) Compliance with the emission limitation(s) in Section b)(1) of these terms and conditions shall be determined in accordance with the following method(s):

- a. Emission Limitations:

VOC shall not exceed 45.2 pounds per hour, and 99.5 tons per year

Applicable Compliance Method

The permittee shall demonstrate compliance with the hourly limitation based upon the record keeping requirements established in section d)(2) of these terms and conditions.

If required, compliance with the hourly limitation shall be demonstrated in accordance with Methods 1-4 and 18, 25, or 25A, as appropriate, of 40 CFR Part 60, Appendix A.

Compliance with the annual limitation can be ensured based on compliance with the facility-wide VOC limitation.

- b. Emission Limitations:

99.5 tons of VOC

24.5 tons of combined HAPs

9.95 tons of any individual HAP

(facility-wide limitations)

**Draft Permit-to-Install and Operate**

Baker Mc Millen Company

**Permit Number:** P0116087

**Facility ID:** 1677110035

**Effective Date:** To be entered upon final issuance

Applicable Compliance Method

The permittee shall demonstrate compliance with the facility-wide limitations based upon the record keeping requirements established in section d)(1) of these terms and conditions.

g) Miscellaneous Requirements

(1) None.
