RE: FINALAIR POLLUTION PERMIT-TO-INSTALL AND OPERATE

Facility ID: 0660010188  
Permit Number: P0115000  
Permit Type: Renewal  
County: Muskingum

Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**

**How to appeal this permit**

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
77 South High Street, 17th Floor  
Columbus, OH 43215

## **How to save money, reduce pollution and reduce energy consumption**

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: [www.ohioairquality.org/clean\\_air](http://www.ohioairquality.org/clean_air)

## **How to give us feedback on your permitting experience**

Please complete a survey at [www.epa.ohio.gov/survey.aspx](http://www.epa.ohio.gov/survey.aspx) and give us feedback on your permitting experience. We value your opinion.

## **How to get an electronic copy of your permit**

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc) by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

If you have any questions, please contact Ohio EPA DAPC, Southeast District Office at (740)385-8501 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

*Michael W. Ahern*

Michael W. Ahern, Manager

Permit Issuance and Data Management Section, DAPC

**Final Permit-to-Install and Operate**  
Co-Alliance, LLP - Zanesville Branch  
**Permit Number:** P0115000  
**Facility ID:** 0660010188  
**Effective Date:** 3/14/2014

## Authorization

Facility ID: 0660010188  
Application Number(s): A0047748  
Permit Number: P0115000  
Permit Description: Renewal PTIO for two storage tanks and a loading rack at a bulk gasoline plant.  
Permit Type: Renewal  
Permit Fee: \$0.00  
Issue Date: 3/14/2014  
Effective Date: 3/14/2014  
Expiration Date: 3/14/2024  
Permit Evaluation Report (PER) Annual Date: Oct 1 - Sept 30, Due Nov 15

This document constitutes issuance to:

Co-Alliance, LLP - Zanesville Branch  
975 Malinda St.  
Zanesville, OH 43701

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

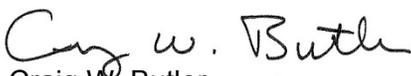

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Southeast District Office  
2195 Front Street  
Logan, OH 43138  
(740)385-8501

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

  
Craig W. Butler  
Director

## Authorization (continued)

Permit Number: P0115000

Permit Description: Renewal PTIO for two storage tanks and a loading rack at a bulk gasoline plant.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

<b>Emissions Unit ID:</b>	<b>J001</b>
Company Equipment ID:	Loading Rack
Superseded Permit Number:	06-5564
General Permit Category and Type:	Not Applicable

**Group Name: Gasoline Storage Tanks**

<b>Emissions Unit ID:</b>	<b>T002</b>
Company Equipment ID:	Storage Tank A
Superseded Permit Number:	06-5564
General Permit Category and Type:	Not Applicable
<b>Emissions Unit ID:</b>	<b>T003</b>
Company Equipment ID:	Storage Tank B
Superseded Permit Number:	06-5564
General Permit Category and Type:	Not Applicable

**Final Permit-to-Install and Operate**  
Co-Alliance, LLP - Zanesville Branch  
**Permit Number:** P0115000  
**Facility ID:** 0660010188  
**Effective Date:** 3/14/2014

## **A. Standard Terms and Conditions**

**1. What does this permit-to-install and operate ("PTIO") allow me to do?**

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

**2. Who is responsible for complying with this permit?**

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

**3. What records must I keep under this permit?**

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

**4. What are my permit fees and when do I pay them?**

There are two fees associated with permitted air contaminant sources in Ohio:

PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

**5. When does my PTIO expire, and when do I need to submit my renewal application?**

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

**6. What happens to this permit if my project is delayed or I do not install or modify my source?**

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

**7. What reports must I submit under this permit?**

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

**8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?**

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

**9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?**

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

**10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?**

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the [DO/LAA] in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

**11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?**

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

**12. What happens if one or more emissions units operated under this permit is/are shut down permanently?**

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

**13. Can I transfer this permit to a new owner or operator?**

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

**14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?**

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

**15. What happens if a portion of this permit is determined to be invalid?**

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

**Final Permit-to-Install and Operate**  
Co-Alliance, LLP - Zanesville Branch  
**Permit Number:** P0115000  
**Facility ID:** 0660010188  
**Effective Date:** 3/14/2014

## **B. Facility-Wide Terms and Conditions**

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - (1) None.
  - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - (1) None.
2. The Ohio EPA has determined that this facility may be subject to the requirements of an area source MACT/GACT rule that the Ohio EPA does not have the delegated authority to implement. Although Ohio EPA has determined that an area source MACT (also known as the GACT) may apply, at this time Ohio EPA does not have the authority to enforce this standard. Instead, U.S. EPA has the authority to enforce this standard. Please be advised that all requirements associated with these rules are in effect and are enforceable by U.S. EPA. For more information on the area source rules, please refer to the follow U.S. EPA website: <http://www.epa.gov/ttn/atw/area/arearules.html>.

**Final Permit-to-Install and Operate**  
Co-Alliance, LLP - Zanesville Branch  
**Permit Number:** P0115000  
**Facility ID:** 0660010188  
**Effective Date:** 3/14/2014

## **C. Emissions Unit Terms and Conditions**

**1. J001, Loading Rack**

**Operations, Property and/or Equipment Description:**

6-arm bottom load loading rack for tank cars equipped with a vapor balance system with a maximum throughput of 5,516,000 gallons per year; supersedes PTI 06-5564 issued 10/7/98

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. g)(1).

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	<p>Volatile organic compound (VOC) emissions shall not exceed 0.31 pound per hour.</p> <p>VOC emissions shall not exceed 0.21 ton per year.</p>
b.	OAC rule 3745-21-09(P)	See b)(2)a. below.

(2) Additional Terms and Conditions

a. For any transfer of gasoline from a loading rack located at the bulk gasoline plant to a delivery vessel, the vapors displaced from the delivery vessel shall be processed by a vapor balance system with a vapor tight vapor line from the delivery vessel to the stationary storage tank being unloaded. The system shall be equipped with a means to ensure that the vapor line is connected before gasoline can be transferred, and it shall be designed and operated to route at

least 90 percent by weight of the VOC in the displaced vapors to the stationary storage tank.

c) Operational Restrictions

- (1) The permittee shall maintain the bulk gasoline plant's tanks, delivery vessels, and transfer lines using the following operational practices:
  - a. Each stationary storage tank that stores gasoline shall be loaded by means of a submerged fill pipe.
  - b. Any loading rack that transfers gasoline to a delivery vessel shall be equipped for top submerged filling or bottom filling for the transfer of gasoline.
  - c. All gasoline loading lines, unloading lines, and vapor lines shall be equipped with fittings which are vapor tight.
  - d. The vapor balance or vapor control system shall be kept in good working order and shall be used at all times during the transfer of gasoline.
  - e. The delivery vessel hatches shall be closed at all times during the loading of the delivery vessel.
  - f. There shall be no leaks in the delivery vessel pressure/vacuum relief valves and hatch covers.
  - g. There shall be no leaks in the vapor and liquid lines during the transfer of gasoline.
  - h. The pressure relief valves on the stationary storage tanks and delivery vessels shall be set to release at no less than 0.7 pound per square inch gauge or the highest possible pressure (in accordance with State or local fire codes, or the "National Fire Prevention Association" guidelines).
  - i. The permittee shall not allow gasoline to be spilled, discarded in sewers, stored in open containers, or handled in any other manner that would result in evaporation.
- (2) The permittee shall repair any leak from the vapor balance system or vapor control system within 15 days of detection, where the system is employed to meet the requirements of paragraph (P)(1) of OAC rule 3745-21-09 and when such leak is equal to or greater than 100 percent of the lower explosive limit as propane, as determined under paragraph (K) of OAC rule 3745-21-10.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall maintain records of the results of any leak checks, including, at a minimum, the following information:
  - a. the date of inspection;

- b. the leak detection method;
- c. the findings of the inspection, which shall indicate the location, nature, and severity of each leak (or may indicate no leak found);
- d. the corrective action(s) taken to repair each leak and the date of final repair;
- e. the reasons for any repair interval exceeding 15 calendar days, from the time of detection to the date of final repair; and
- f. the inspector's name and signature.

These records shall be retained for a period of 5 years and shall be made available to the Director (the appropriate Ohio EPA District Office or local air agency) upon verbal or written request.

- (2) The permittee shall maintain records of the daily quantity of all gasoline loaded into gasoline tank trucks and shall retain these records for a period of 5 years.

e) Reporting Requirements

- (1) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the appropriate district office or local air agency.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (3) Any leaks in the vapor balance system or vapor control system equal to or greater than 100 percent of the lower explosive limit as propane, as determined under paragraph (K) of OAC rule 3745-21-10 of the Administrative Code, that are not repaired within 15 days after identification, shall be reported to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days after the repair is completed. This report shall include the date the leak was detected and the date the leak was repaired.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:

a. Emissions Limitation:

VOC emissions shall not exceed 0.31 pound per hour.

Applicable Compliance Method:

The hourly emissions limitation for VOC was calculated using the following emissions factor found in AP-42 Table 5.2-5 for gasoline and for diesel fuel:

Gasoline: 8.0 lbs VOC / 1,000 gallons

Diesel: 0.014 lb VOC / 1,000 gallons

["Submerged loading – vapor balance service" was used for gasoline and diesel; 90% capture efficiency]

$[(8.0 \text{ lbs VOC} / 1,000 \text{ gallons gasoline}) * (378 \text{ gallons} / \text{hour}) * (1.0 - 0.90 \text{ capture eff})] = \mathbf{0.30 \text{ lb/hr VOC from gasoline}}$

$[(0.014 \text{ lbs VOC} / 1,000 \text{ gallons diesel}) * (3,822 \text{ gallons} / \text{hour}) * (1.0 - 0.90 \text{ capture eff})] = \mathbf{0.005 \text{ lb/hr VOC from diesel or kerosene}}$

**0.30 + 0.005 = 0.31 lb/hr VOC**

b. Emissions Limitation:

VOC emissions shall not exceed 0.21 ton per year.

Applicable Compliance Method:

The annual emissions limitation for VOC was calculated using the following emissions factor found in AP-42 Table 5.2-5 for gasoline and for diesel fuel:

Gasoline: 8.0 lbs VOC / 1,000 gallons

Diesel: 0.014 lb VOC / 1,000 gallons

["Submerged loading – vapor balance service" was used for gasoline and diesel; 90% capture efficiency]

$[(8.0 \text{ lbs VOC} / 1,000 \text{ gallons gasoline}) * (516,000 \text{ gallons} / \text{yr}) * (1 \text{ ton} / 2,000 \text{ lb}) * (1.0 - 0.90 \text{ capture eff})] = \mathbf{0.21 \text{ TPY VOC from gasoline}}$

$[(0.014 \text{ lbs VOC} / 1,000 \text{ gallons diesel}) * (5,000,000 \text{ gallons} / \text{yr}) * (1 \text{ ton} / 2,000 \text{ lb}) * (1.0 - 0.90 \text{ capture eff})] = \mathbf{0.004 \text{ TPY VOC from diesel fuel or kerosene}}$

**0.21 + 0.004 = 0.21 ton per year VOC**

g) Miscellaneous Requirements

- (1) Modeling to demonstrate compliance with, the Toxic Air Contaminant Statute, ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified PTIO prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new PTIO.

**2. T002, Storage Tank A**

**Operations, Property and/or Equipment Description:**

20,000 gallon gasoline storage tank with a maximum throughput of 416,000 gallons; supersedes PTI 06-5564 issued 10/7/98

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	Volatile organic compound (VOC) emissions shall not exceed 1.41 tons per year.
b.	OAC rule 3745-21-09(P)	See b)(2)a. below.

(2) Additional Terms and Conditions

a. For any transfer of gasoline from a delivery vessel to a stationary storage tank located at the bulk gasoline plant, the vapors displaced from the stationary storage tank shall be processed by a vapor balance system with a vapor tight vapor line from the stationary storage tank to the delivery vessel. The system shall be equipped with a means to ensure that the vapor line is connected before gasoline can be transferred, and it shall be designed and operated to route at least 90 percent, by weight, of the VOC in the displaced vapors to the delivery vessel.

c) Operational Restrictions

- (1) The permittee shall maintain the bulk gasoline plant's tanks, delivery vessels, and transfer lines using the following operational practices:
  - a. Each stationary storage tank that stores gasoline shall be loaded by means of a submerged fill pipe.
  - b. Any loading rack that transfers gasoline to a delivery vessel shall be equipped for top submerged filling or bottom filling for the transfer of gasoline.
  - c. All gasoline loading lines, unloading lines, and vapor lines shall be equipped with fittings which are vapor tight.
  - d. The vapor balance or vapor control system shall be kept in good working order and shall be used at all times during the transfer of gasoline.
  - e. The delivery vessel hatches shall be closed at all times during the loading of the delivery vessel.
  - f. There shall be no leaks in the delivery vessel pressure/vacuum relief valves and hatch covers.
  - g. There shall be no leaks in the vapor and liquid lines during the transfer of gasoline.
  - h. The pressure relief valves on the stationary storage tanks and delivery vessels shall be set to release at no less than 0.7 pound per square inch gauge or the highest possible pressure (in accordance with State or local fire codes, or the "National Fire Prevention Association" guidelines).
  - i. The permittee shall not allow gasoline to be spilled, discarded in sewers, stored in open containers, or handled in any other manner that would result in evaporation.
- (2) The permittee shall repair any leak from the vapor balance system or vapor control system within 15 days of detection, where the system is employed to meet the requirements of paragraph (P)(1) of OAC rule 3745-21-09 and when such leak is equal to or greater than 100 percent of the lower explosive limit as propane, as determined under paragraph (K) of OAC rule 3745-21-10.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall maintain records of the results of any leak checks, including, at a minimum, the following information:
  - a. the date of inspection;
  - b. the leak detection method;

- c. the findings of the inspection, which shall indicate the location, nature, and severity of each leak (or may indicate no leak found);
- d. the corrective action(s) taken to repair each leak and the date of final repair;
- e. the reasons for any repair interval exceeding 15 calendar days, from the time of detection to the date of final repair; and
- f. the inspector's name and signature.

These records shall be retained for a period of 5 years and shall be made available to the Director (the appropriate Ohio EPA District Office or local air agency) upon verbal or written request.

- (2) The permittee shall maintain records of the daily quantity of all gasoline loaded into gasoline tank trucks and shall retain these records for a period of 5 years.

e) Reporting Requirements

- (1) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the appropriate district office or local air agency.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (3) Any leaks in the vapor balance system or vapor control system equal to or greater than 100 percent of the lower explosive limit as propane, as determined under paragraph (K) of OAC rule 3745-21-10 of the Administrative Code, that are not repaired within 15 days after identification, shall be reported to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days after the repair is completed. This report shall include the date the leak was detected and the date the leak was repaired.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:

a. Emissions Limitation:

VOC emissions shall not exceed 1.41 tons per year.

Applicable Compliance Method:

Compliance shall be determined by a one-time calculation using TANKS Program 4.09d (or most current version) or other method acceptable to the Ohio EPA Southeast District Office.

**Final Permit-to-Install and Operate**  
Co-Alliance, LLP - Zanesville Branch  
**Permit Number:** P0115000  
**Facility ID:** 0660010188  
**Effective Date:** 3/14/2014

- g) Miscellaneous Requirements
  - (1) None.

**3. T003, Storage Tank B**

**Operations, Property and/or Equipment Description:**

20,000 gallon gasoline storage tank with a maximum throughput of 100,000 gallons per year; supersedes PTI 06-5564 issued 10/7/98

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	Volatile organic compound (VOC) emissions shall not exceed 0.49 ton per year.
b.	OAC rule 3745-21-09(P)	See b)(2)a. below.

(2) Additional Terms and Conditions

a. For any transfer of gasoline from a delivery vessel to a stationary storage tank located at the bulk gasoline plant, the vapors displaced from the stationary storage tank shall be processed by a vapor balance system with a vapor tight vapor line from the stationary storage tank to the delivery vessel. The system shall be equipped with a means to ensure that the vapor line is connected before gasoline can be transferred, and it shall be designed and operated to route at least 90 percent, by weight, of the VOC in the displaced vapors to the delivery vessel.

c) Operational Restrictions

- (1) The permittee shall maintain the bulk gasoline plant's tanks, delivery vessels, and transfer lines using the following operational practices:
  - a. Each stationary storage tank that stores gasoline shall be loaded by means of a submerged fill pipe.
  - b. Any loading rack that transfers gasoline to a delivery vessel shall be equipped for top submerged filling or bottom filling for the transfer of gasoline.
  - c. All gasoline loading lines, unloading lines, and vapor lines shall be equipped with fittings which are vapor tight.
  - d. The vapor balance or vapor control system shall be kept in good working order and shall be used at all times during the transfer of gasoline.
  - e. The delivery vessel hatches shall be closed at all times during the loading of the delivery vessel.
  - f. There shall be no leaks in the delivery vessel pressure/vacuum relief valves and hatch covers.
  - g. There shall be no leaks in the vapor and liquid lines during the transfer of gasoline.
  - h. The pressure relief valves on the stationary storage tanks and delivery vessels shall be set to release at no less than 0.7 pound per square inch gauge or the highest possible pressure (in accordance with State or local fire codes, or the "National Fire Prevention Association" guidelines).
  - i. The permittee shall not allow gasoline to be spilled, discarded in sewers, stored in open containers, or handled in any other manner that would result in evaporation.
- (2) The permittee shall repair any leak from the vapor balance system or vapor control system within 15 days of detection, where the system is employed to meet the requirements of paragraph (P)(1) of OAC rule 3745-21-09 and when such leak is equal to or greater than 100 percent of the lower explosive limit as propane, as determined under paragraph (K) of OAC rule 3745-21-10.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall maintain records of the results of any leak checks, including, at a minimum, the following information:
  - a. the date of inspection;
  - b. the leak detection method;

- c. the findings of the inspection, which shall indicate the location, nature, and severity of each leak (or may indicate no leak found);
- d. the corrective action(s) taken to repair each leak and the date of final repair;
- e. the reasons for any repair interval exceeding 15 calendar days, from the time of detection to the date of final repair; and
- f. the inspector's name and signature.

These records shall be retained for a period of 5 years and shall be made available to the Director (the appropriate Ohio EPA District Office or local air agency) upon verbal or written request.

- (2) The permittee shall maintain records of the daily quantity of all gasoline loaded into gasoline tank trucks and shall retain these records for a period of 5 years..

e) Reporting Requirements

- (1) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the appropriate district office or local air agency.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (3) Any leaks in the vapor balance system or vapor control system equal to or greater than 100 percent of the lower explosive limit as propane, as determined under paragraph (K) of OAC rule 3745-21-10 of the Administrative Code, that are not repaired within 15 days after identification, shall be reported to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days after the repair is completed. This report shall include the date the leak was detected and the date the leak was repaired.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:

- a. Emissions Limitation:

VOC emissions shall not exceed 0.49 ton per year.

Applicable Compliance Method:

Compliance shall be determined by a one-time calculation using TANKS Program 4.09d (or most current version) or other method acceptable to the Ohio EPA Southeast District Office.

**Final Permit-to-Install and Operate**  
Co-Alliance, LLP - Zanesville Branch  
**Permit Number:** P0115000  
**Facility ID:** 0660010188
