

**PERMIT TO OPERATE AN AIR CONTAMINANT SOURCE**

Date of Issuance 08/23/91

Application No. 1652050101F001

Effective Date 08/23/91

Permit Fee \$100

This document constitutes issuance to:

MEDINA SUPPLY COMPANY  
820 W. SMITH ROAD  
MEDINA

OHIO 44256

of a permit to operate for:

PAVED/UNPAVED ROADS AND PARKING AREAS  
PLANT WEST

The following terms and conditions are hereby expressly incorporated into this permit to operate:

1. This permit to operate shall be effective until 08/22/94  
You will be contacted approximately six months prior to this date regarding the renewal of this permit. If you are not contacted, please write to the appropriate Ohio EPA field office.
2. The above-described source is and shall remain in full compliance with all applicable State and federal laws and regulations and the terms and conditions of this permit.
3. Prior to any modification of this source, as defined in rule 3745-31-01 of the Ohio Administrative Code (OAC), a permit to install must be granted by the Ohio EPA pursuant to OAC Chapter 3745-31.
4. The Director of the Ohio EPA or an authorized representative may, subject to the safety requirements of the permit holder, enter upon the premises of this source at any time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State and federal air pollution laws and regulations and the terms and conditions of this permit.
5. A permit fee in the amount specified above must be remitted within 15 days from the issuance date of this permit.
6. Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA field office must be notified in writing of any transfer of this permit.
7. This source and any associated air pollution control system(s) shall be maintained regularly in accordance with good engineering practices in order to minimize air contaminant emissions. Any malfunction of this source or any associated air pollution control system(s) shall be reported immediately to the appropriate Ohio EPA field office in accordance with OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of this source.
8. Any unauthorized or emergency release of an air contaminant from this source which, due to the toxic or hazardous nature of the material, may pose a threat to public health, or otherwise endanger the safety or welfare of the public, shall be reported immediately to the appropriate Ohio EPA field office (during normal business hours) or to the Ohio EPA's Emergency Response Group (1-800-282-9378). (Additional reporting may be required pursuant to the federal Comprehensive Environmental Response, Compensation, and Liability Act).
9. The appropriate Ohio EPA field office is:

AIR POLLUTION CONTROL  
177 S. BROADWAY  
AKRON, OH 44308 (216) 375-2480

10.  If this term and condition is checked, the permit holder is subject to the attached special terms and conditions.

OHIO ENVIRONMENTAL PROTECTION AGENCY

*Donald R. Scheyardus*

Director

**APPLICATION NUMBER:** 1652050101 F001  
**FACILITY NAME:** Medina Supply Company - West  
**EQUIPMENT DESCRIPTION:** Paved/Unpaved Roads and Parking Areas  
**COMPANY ID:** Plant West

#### **SPECIAL TERMS AND CONDITIONS**

1) This Permit to Operate covers all paved road segments and parking areas, and all unpaved road segments and parking areas at this facility. The plant roadways and parking areas are subject to the requirements of Paragraph "B" of Ohio Administrative Code rule 3745-17-08.

2) The facility shall employ the following measures to control fugitive dust emissions created by vehicular traffic.

a) All paved surfaces shall be swept and flushed of surface material two to three times per week during the period April 1st through October 31st. During the period November 1st through March 31st, paved surfaces shall be swept and flushed as needed to prevent or minimize visible emissions of fugitive dust.

b) The unpaved roadway from the front unloading pit to the scale shall be treated with oil once per month during the period April 1st through October 31st. All unpaved road surfaces shall be watered at a frequency which will eliminate or minimize visible emissions of fugitive dust by vehicular traffic.

The facility shall abide by the above-noted treatment frequencies unless precipitation occurs during such period which is sufficient to minimize or eliminate visible emissions of fugitive dust. No road cleaning, flushing, or treatment shall be necessary for a surface which is covered with snow and/or ice.

3) The facility shall certify or possess certification that all waste oil used to control fugitive dust meets the PCB limitations set forth in 40 CFR 761, and that there are no listed hazardous waste or characteristic hazardous waste as set forth in 40 CFR 261.

4) A record shall be kept for three years of the dates of individual applications and the quantity of all oil applied, and its certificate of compliance with 40 CFR 761 and 40 CFR 261. This certificate of compliance should include, but not be limited to, the name of the oil supplier and an analysis of the oil. The analysis shall include a standard PCB test (gas chromatography using electron capture detector, a column

Special Terms: Page 2

packing of OV-17 and a florisol clean-up) and representative sampling methods, EP toxicity test procedures, and chemical analysis test methods as specified in 40 CFR 261, App. I, II, and III. This record shall be made available to the Director or his authorized representative for inspection at any reasonable time.

5) Waste oil shall be applied in such a manner as to prevent pollution of waters of the State, as required by the Ohio Revised Code, Section 6111.

6) Waste oil shall be applied only to unpaved road and parking lot surfaces, and only between sunrise and sundown (daylight hours).

7) Waste oil shall not be applied to a water-saturated surface nor to surfaces on days of predicted rainfall events.

8) Waste oil shall not be applied at an application rate that allows pooling of liquid.

9) Waste oil shall not be applied to the same surface more frequently than twice per week.

10) The application of waste oil shall not cause runoff from the application surface.

11) Waste oil shall not be applied to vegetation near or adjacent to surfaces being treated.

12) Waste oil shall not be applied within 12 feet of structures crossing bodies of water or drainage ditches.

13) The discharge of waste oil must stop when the applicator vehicle stops.

14) The applicator vehicle must be moving at least five (5) mph at all times while the waste oil is being applied.

(Continued)

15) The applicator vehicle discharge valve shall be locked closed between the waste oil collection point and the specific surfaces which have been approved for waste oil application.

16) Any valves that provide for tank draining other than through the spreader bar must be locked closed during waste oil application and transport.

17) The angle of discharge from the applicator vehicle spreader bar shall not be greater than 60 degrees from the perpendicular to the unpaved surface.

18) The facility may, upon notice to the Director of the Ohio Environmental Protection Agency and the Akron Regional Air Quality Management District, modify the control measures if operating experience indicates that less stringent methods will be sufficient to comply with the requirements of OAC 3745-17-08.

19) The Akron Regional Air Quality Management District and the Ohio EPA may modify the control measures in this permit if operating experience indicates that additional control methods are required to comply with the requirements of AC 3745-17-08.

20) The facility shall maintain records for the paved and unpaved areas which list the following:

- a) The date each parking lot or roadway was swept, flushed or watered;
- b) The manner in which the parking lot or road segment was cleaned, flushed, etc;
- c) The name of the individual; responsible for the treatment.
- d) The general weather conditions for the treatment days, including the high temperature, amount of precipitation, and average wind speed.
