This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part III" and before "I. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

Facility ID: 0819070099 Emissions Unit ID: P001 Issuance type: Title V Preliminary Proposed Permit

A. State and Federally Enforceable Section

The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.

1. None.

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

| <u>Operations, Property, and/or Equipment</u> | <u>Applicable Rules/Requirements</u> | <u>Applicable Emissions Limitations/Control Measures</u> |
|---|---|---|
| Melting Tank 141 | OAC rule 3745-17-11(B)(1) OAC rule 3745-17-07(C) | less than 10.0 lbs/hr of particulates (see A.I.2.b) See A.I.2.a. |

2. Additional Terms and Conditions

- a. Pursuant to the provisions of OAC rule 3745-17-07(C), the permittee has been granted the following equivalent visible particulate emission limitation for this emissions unit in lieu of the 20 percent opacity limitation specified in OAC rule 3745-17-07(A)(1)(a):
 - (a) Except as otherwise specified in OAC rule 3745-17-07(A)(1)(b) through (A)(3), the permittee shall not cause or allow the discharge into the ambient air from any stack associated with this emissions unit any air contaminant of a shade or density greater than 36 percent opacity, as a 6-minute average.
 - b. The uncontrolled mass rate of PE from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. In addition, based on Table I of OAC rule 3745-17-11, the allowable PE limitation is greater than 10 lbs PE/hr. Therefore, to ensure that Figure II will not be applicable, the permittee has agreed to accept a PE limitation of less than 10 lbs/hr.

2. A statement of certification of the existing continuous opacity monitoring system shall be maintained on site and shall consist of a letter from the Ohio EPA detailing the results of an Agency review of the certification tests and a statement by the Agency that the system is considered certified in accordance with the requirements of 40 CFR Part 60, Appendix B, Performance Specification 1. Proof of certification shall be

made available to the Director (the appropriate Ohio EPA District Office or local air agency) upon request.

3. Within 180 days of the effective date of this permit, the permittee shall develop a written quality assurance/quality control plan for the continuous opacity monitoring system designed to ensure continuous valid and representative readings of opacity. The plan shall include, as a minimum, conducting and recording daily automatic zero/span checks, provisions for conducting a quarterly audit of the continuous opacity monitoring system, and a description of preventive maintenance activities. The plan shall describe step by step procedures for ensuring that sections 7.1.4, 7.4.1, 7.4.2, and Table 1-1 of Performance Specification 1 are maintained on a continuous basis. The quality assurance/quality control plan and a logbook dedicated to the continuous opacity monitoring system must be kept on site and available for inspection during regular office hours.

IV. Reporting Requirements

1. Pursuant to 40 CFR Parts 60.7 and 60.13(h), the permittee shall submit reports within 30 days following the end of each calendar quarter to the appropriate Ohio EPA District Office or local air agency documenting all instances of opacity values in excess of the limitations specified in OAC rule 3745-17-07, detailing the date, commencement and completion times, duration, magnitude (percent opacity), reason (if known), and corrective actions taken (if any) of each 6-minute block average above the applicable opacity limitation(s).

The permittee shall submit reports within 30 days following the end of each calendar quarter to the appropriate Ohio EPA District Office or local air agency documenting any continuous opacity monitoring system downtime while the emissions unit was on line (date, time, duration and reason) along with any corrective action(s) taken. The permittee shall provide the emissions unit operating time during the reporting period and the date, time, reason, and corrective action(s) taken for each time period of emissions unit and control equipment malfunctions. The total operating time of the emissions unit and the total operating time of the analyzer while the emissions unit was on line shall be included in the quarterly report.

If there are no excess emissions during the calendar quarter, the permittee shall submit a statement to that effect along with the emissions unit operating time during the reporting period and the date, time, reason, and corrective action(s) taken for each time period of emissions unit, control equipment, and/or monitoring system malfunctions. The total operating time of the emissions unit and the total operating time of the analyzer while the emissions unit was on line also shall be included in the quarterly report. These quarterly excess emission reports shall be submitted by January 30, April 30, July 30, and October 30 of each year and shall address the data obtained during the previous calendar quarter.

V. **Testing Requirements**

1. Compliance with the emissions limitation(s) in section A.1 of these terms and conditions shall be determined in accordance with the following method(s):
 - a. Emission Limitation-
3.65 lbs/hr of particulates

Applicable Compliance Method-
Compliance may be determined by multiplying the maximum hourly production rate of 30.40 tons by an emission factor of 0.6 lb/ton, from AP-42, Section 11.13, Table 11.13-2. The resulting maximum hourly uncontrolled emission rate of 18.24 lb/hr, is then multiplied by a factor of 1 minus a fabric filter control efficiency of 99 percent (1 - .99), resulting in a maximum controlled emission rate of 0.18 lb PE/hr.

If required, compliance shall be demonstrated in accordance with the methods specified in OAC rule 3745-17-03(B)(10).
 - b. Emission Limitation-
20% opacity as a 6-minute average

Applicable Compliance Method-
Visible emission evaluations using USEPA Reference Method (RM) 9 of 40 CFR, Part 60, Appendix A may be taken at any time the emissions unit is in operation by qualified observers certified in accordance with USEPA RM 9, 40 CFR Part 60, Appendix A, section 3., Qualifications and Testing. The frequency of USEPA RM 9 evaluations shall be at a minimum quarterly.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall perform weekly checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the fabric filter associated with this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of each visible emission incident; and
 - e. any corrective actions taken to eliminate the visible emissions.

IV. Reporting Requirements

1. The permittee shall submit semiannual written reports which (a) identify all weeks during which any visible particulate emissions were observed from the fabric filter associated with this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance with the emissions limitation(s) in section B.1 of these terms and conditions shall be determined in accordance with the following method(s):
 - a. Emission Limitation-
0.18 lb/hr of particulates

Applicable Compliance Method-
Compliance may be determined by multiplying the maximum hourly production rate of 30.40 tons by an emission factor of 0.6 lb/ton, from AP-42, Section 11.13, Table 11.13-2. The resulting maximum hourly uncontrolled emissions rate of 18.24 lb/hr, is then multiplied by a factor of 1 minus a fabric filter control efficiency of 99 percent (1 - .99), resulting in a maximum controlled emission rate of 0.18 lb PE/hr.

If required, compliance shall be demonstrated in accordance with Methods 1 - 5 of 40 CFR, Part 60, Appendix A.
 - b. Emission Limitation-
0.79 ton/yr of particulates

Applicable Compliance Method-
Compliance with the annual emission limitation shall be assumed as long as compliance with the hourly emission limitation is maintained (the annual emission limitation was calculated by multiplying the hourly emission limitation by 8760 and dividing by 2000).
 - c. Emission Limitation-
5 percent opacity, as a 6-minute average

Applicable Compliance Method-
If required, compliance shall be determined by visible emission evaluations performed in accordance with Method 9 of 40 CFR, Part 60, Appendix A.
