RE: FINALAIR POLLUTION PERMIT-TO-INSTALL AND OPERATE  
Facility ID: 1409040657  
Permit Number: P0116664  
Permit Type: Renewal  
County: Butler

Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**

**How to appeal this permit**

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
77 South High Street, 17th Floor  
Columbus, OH 43215

## **How to save money, reduce pollution and reduce energy consumption**

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: [www.ohioairquality.org/clean\\_air](http://www.ohioairquality.org/clean_air)

## **How to give us feedback on your permitting experience**

Please complete a survey at [www.epa.ohio.gov/survey.aspx](http://www.epa.ohio.gov/survey.aspx) and give us feedback on your permitting experience. We value your opinion.

## **How to get an electronic copy of your permit**

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc) by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

If you have any questions, please contact Southwest Ohio Air Quality Agency at (513)946-7777 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Michael W. Ahern, Manager

Permit Issuance and Data Management Section, DAPC

## Authorization

Facility ID: 1409040657  
Application Number(s): A0050466  
Permit Number: P0116664  
Permit Description: Renewal PTIO for P001 (Transport Loading Operation), P002 (Drum Loading Operation) and P003 (Can Filling Operation).  
Permit Type: Renewal  
Permit Fee: \$0.00  
Issue Date: 6/18/2014  
Effective Date: 6/18/2014  
Expiration Date: 6/18/2019  
Permit Evaluation Report (PER) Annual Date: Oct 1 - Sept 30, Due Nov 15

This document constitutes issuance to:

UNIVAR USA INC - HAMILTON BRANCH  
12 Standen Drive  
Hamilton, OH 45015

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Southwest Ohio Air Quality Agency  
250 William Howard Taft Rd.  
Cincinnati, OH 45219  
(513)946-7777

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

  
Craig W. Butler  
Director

## Authorization (continued)

Permit Number: P0116664  
Permit Description: Renewal PTIO for P001 (Transport Loading Operation), P002 (Drum Loading Operation) and P003 (Can Filling Operation).

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

<b>Emissions Unit ID:</b>	<b>P001</b>
Company Equipment ID:	Transport Loading
Superseded Permit Number:	P0104675
General Permit Category and Type:	Not Applicable
<b>Emissions Unit ID:</b>	<b>P002</b>
Company Equipment ID:	Drum Loading
Superseded Permit Number:	P0104675
General Permit Category and Type:	Not Applicable
<b>Emissions Unit ID:</b>	<b>P003</b>
Company Equipment ID:	Can Filling
Superseded Permit Number:	P0104675
General Permit Category and Type:	Not Applicable

**Final Permit-to-Install and Operate**  
UNIVAR USA INC - HAMILTON BRANCH  
**Permit Number:** P0116664  
**Facility ID:** 1409040657  
**Effective Date:** 6/18/2014

## **A. Standard Terms and Conditions**

**1. What does this permit-to-install and operate ("PTIO") allow me to do?**

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

**2. Who is responsible for complying with this permit?**

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

**3. What records must I keep under this permit?**

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

**4. What are my permit fees and when do I pay them?**

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

**5. When does my PTIO expire, and when do I need to submit my renewal application?**

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

**6. What happens to this permit if my project is delayed or I do not install or modify my source?**

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

**7. What reports must I submit under this permit?**

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

**8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?**

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

**9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?**

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

**10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?**

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the [DO/LAA] in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

**11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?**

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

**12. What happens if one or more emissions units operated under this permit is/are shut down permanently?**

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

**13. Can I transfer this permit to a new owner or operator?**

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

**14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?**

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

**15. What happens if a portion of this permit is determined to be invalid?**

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

**Final Permit-to-Install and Operate**  
UNIVAR USA INC - HAMILTON BRANCH  
**Permit Number:** P0116664  
**Facility ID:** 1409040657  
**Effective Date:** 6/18/2014

## **B. Facility-Wide Terms and Conditions**

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - (1) None.
  - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - (1) 2., 3., 4., and 5.
2. The actual emissions of Hazardous Air Pollutants (HAPs), as identified in Section 112(b) of Title III of the Clean Air Act from the Univar USA Hamilton Branch (Premise 1409040657) emissions units P001 (Transport Loading Operation), P002 (Drum Loading Operation), P003 (Can Filling Operation), P004 (Solvent Blending No. 1), P005 (Solvent Blending No. 2), P009 (Blend Tank No. 6), P011 (Drum Mixing Unit), T001 – T024 (Storage Tanks), other de minimus air contaminant sources, as defined in OAC rule 3745-15-05, and other air contaminant sources exempt from the requirement to obtain a permit-to-install pursuant to OAC rule 3745-31-03 installed subsequent to the issuance of this permit, combined, shall not exceed 9.9 tons per year (TPY) for any single HAP and 24.9 TPY for any combination of HAPs. Compliance with the above limitations shall be based on a rolling, 12-month summation.

The permittee has existing records of existing sources to demonstrate compliance with this limitation upon issuance of this permit.
3. The permittee shall collect and record the following information each month for the emissions units identified in 2. above:
  - a) The name and identification number of each product or material processed or employed including solvents stored, solvents blended, and solvents packaged;
  - b) The individual HAP\* content for each HAP of each solvent, in pounds of individual HAP per gallon of solvent, as processed or employed;
  - c) The total combined HAP content of each solvent in pounds of combined HAPs per gallon of solvent, as processed or employed [sum all the individual HAP contents from b)];
  - d) The number of gallons of each solvent processed or employed;
  - e) The total individual HAP emissions for each HAP from all solvents processed or employed, in pounds or tons per month [for each HAP the sum of b) times d) times the appropriate emission factor for each organic solvent];
  - f) The total combined HAP emissions from all solvents processed or employed, in pounds or tons per month [the sum of c) times d) times the appropriate emission factor for each organic solvent];

- g) The updated rolling, 12-month summation of emissions for each individual HAP, in pounds or tons. This shall include the information for the current month and the preceding eleven calendar months; and
- h) The updated rolling, 12-month summation of emissions for total combined HAPs, in pounds or tons. This shall include the information for the current month and the preceding eleven calendar months.

\* A listing of the HAPs can be found in Section 112(b) of the Clean Air Act or can be obtained by contacting the Southwest Ohio Air Quality Agency (SWOAQA).

- 4. The permittee shall notify SWOAQA of any exceedance of the HAP emission limitations specified in 2. above. If no exceedances occurred, the permittee shall state so in the report. The reports shall be submitted by January 31, April 30, July 31 and October 31 of each year and shall cover the previous calendar quarters (October through December, January through March, April through June and July through September, respectively).
- 5. Compliance with the emission limitations in 2. of these terms and conditions shall be determined in accordance with the following method(s) identified below:

- a) Emission Limitations:

Actual emissions of Hazardous Air Pollutants (HAPs) shall not exceed 9.9 TPY for any single HAP and 24.9 TPY for any combination of HAPs, as a 12-month rolling summation, as specified in 2. above.

Applicable Compliance Method:

Compliance with the 12-month rolling HAP limitations shall be demonstrated by the record keeping identified in 3. above.

**Final Permit-to-Install and Operate**  
UNIVAR USA INC - HAMILTON BRANCH  
**Permit Number:** P0116664  
**Facility ID:** 1409040657  
**Effective Date:** 6/18/2014

## **C. Emissions Unit Terms and Conditions**

**1. P001, Transport Loading**

**Operations, Property and/or Equipment Description:**

Transport Loading Operation

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. g)(1).

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. b)(1)c.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3), as effective 11/30/01.	Volatile Organic Compound (VOC) emissions shall not exceed 193 pounds per day and 9.8 tons per year (TPY).  See b)(2)a. and c)(1).
b.	OAC rule 3745-31-05(C), as effective 12/01/06.	See b)(2)b.
c.	OAC rule 3745-31-05(D)	See Section B.2.

(2) Additional Terms and Conditions

a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to Ohio Administrative Code (OAC) paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to the Ohio Revised Code (ORC) changes effective August 3, 2006 (Senate Bill 265 changes), such that BAT is no longer required by State regulations for National Ambient Air Quality

Standards (NAAQS) pollutant(s) less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05, then these emission limitations/control measures no longer apply.

- b. This rule paragraph applies once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the State Implementation Plan.

Permit to Install and Operate P0116664 for this air contaminant source takes into account the following voluntary restrictions (including the use of any applicable air pollution control equipment), as proposed by the permittee, for the purpose of avoiding Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A(3):

- i. the maximum annual material throughput rates for this emissions unit shall not exceed:
  - (a) 3,000,000 gallons per year of Group A\* chemical products;
  - (b) 7,000,000 gallons per year of Group B\* chemical products;
  - (c) 40,000,000 gallons per year of Group C\* chemical products; and
- ii. the organic compound (OC)emissions and volatile organic compound (VOC) emissions shall each not exceed 9.8 tons per year.

\*See f)(1)a. of these terms and conditions for definitions of the Group A, B, and C chemical product categories.

c) **Operational Restrictions**

- (1) the maximum annual material throughput rates for this emissions unit shall not exceed:
  - a. 3,000,000 gallons per year of Group A\* chemical products;
  - b. 7,000,000 gallons per year of Group B\* chemical products; and
  - c. 40,000,000 gallons per year of Group C\* chemical products.

\*See f)(1)a. of these terms and conditions for definitions of the Group A, B, and C chemical product categories.

d) **Monitoring and/or Recordkeeping Requirements**

- (1) The permittee shall collect and record the following information annually for the purpose of determining annual VOC emissions:

- a. the name and identification of each solvent processed or employed, including whether the solvent is categorized as a Group A, B, or C chemical product;
- b. the molecular weight, in lb/lb-mole, and the vapor pressure, in psia, for each solvent processed or employed;
- c. the number of gallons of each solvent processed or employed;
- d. the total number of gallons of all solvents processed or employed in each chemical product category (Groups A, B, and C); and
- e. the total VOC emissions from all solvents processed or employed, in tons, using the calculation methods provided in f)(1)a. of these terms and conditions and replacing the voluntary restriction amounts with the actual amounts as recorded above in d)(1)b. and d)(1)c. VOC emissions are assumed to be equal to the OC emissions.

e) Reporting Requirements

- (1) All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications, or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the District Office or Local Air Agency, and/or any other individual or organization specifically identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the required application, notification or report is considered to be "submitted" on the date the submission is successful using a valid electronic signature. Signature by the signatory authority may be represented as provided through procedures established in Air Services
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (3) See Section B.4. of this permit.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:
  - a. Emission Limitation:  
  
VOC emissions shall not exceed 193 pounds per day and 9.8 tons per year.

Applicable Compliance Method:

The daily VOC emissions and annual VOC emissions voluntary restriction was developed from the following equations using US EPA AP-42 *Chapter 5.2 Transportation and Marketing of Petroleum Liquids*, revised 6/2008, and the information contained in the permittee's application for FEPTIO No. P0104675, submitted on March 20, 2009:

Loading Loss ( $L_L$ ) of each solvent, in pounds/1000 gallons throughput =

$$12.46 (SPM)/T$$

where,

S = saturation factor of 0.50 (ref. AP-42 Table 5.2-1, 6/2008)

P = vapor pressure of the material transferred, in psia

M = molecular weight of the material transferred, in lbs per lb-mole

T = temperature of material transferred, in degrees Rankin

Emissions, in pounds per day = ( $L_L$  of worst case solvent in Group A at 2.386 lbs/1000 gals of solvent transferred x 40,000 gallons per day maximum throughput of Group A chemical products) + ( $L_L$  of worst case solvent in Group B at 1.098 lbs/1000 gals of solvent transferred x 80,000 gallons per year maximum throughput of Group B chemical products) + ( $L_L$  of worst case solvent in Group C at 0.117 lbs/1000 gals of solvent transferred x 80,000 gallons per year maximum throughput of Group C chemical products) x (1 ton/2000 lbs) = 193 pounds per day VOC

Emissions, in tons per year = ( $L_L$  of worst case solvent in Group A at 2.386 lbs/1000 gals of solvent transferred x 3,000,000 gallons per year maximum throughput of Group A chemical products) + ( $L_L$  of worst case solvent in Group B at 1.098 lbs/1000 gals of solvent transferred x 7,000,000 gallons per year maximum throughput of Group B chemical products) + ( $L_L$  of worst case solvent in Group C at 0.117 lbs/1000 gals of solvent transferred x 40,000,000 gallons per year maximum throughput of Group C chemical products) x (1 ton/2000 lbs) = 9.8 tons per year VOC

Group A chemical products are defined as having a value greater than 100 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

Group B chemical products are defined as having a value greater than 10 and less than or equal to 100 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

Group C chemical products are defined as having a value less than or equal to 10 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

VOC was assumed to be equal to the OC emissions.

g) Miscellaneous Requirements

- (1) Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified FEPTIO prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new FEPTIO.

**2. P002, Drum Loading**

**Operations, Property and/or Equipment Description:**

Drum Loading Operation

- a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - (1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - a. g)(1).
  - (2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - a. b)(1)c.
- b) Applicable Emissions Limitations and/or Control Requirements
  - (1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3), as effective 11/30/01.	Volatile Organic Compound (VOC) emissions shall not exceed 80 pounds per day and 9.3 tons per year (TPY).  See b)(2)a. and c)(1).
b.	OAC rule 3745-31-05(C), as effective 12/01/06.	See b)(2)b.
c.	OAC rule 3745-31-05(D)	See Section B.2.

- (2) Additional Terms and Conditions
  - a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to Ohio Administrative Code (OAC) paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to the Ohio Revised Code (ORC) changes effective August 3, 2006 (Senate Bill 265 changes), such that BAT is no longer required by State regulations for National Ambient Air Quality

Standards (NAAQS) pollutant(s) less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05, then these emission limitations/control measures no longer apply.

- b. This rule paragraph applies once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the State Implementation Plan.

Permit to Install and Operate P0116664 for this air contaminant source takes into account the following voluntary restrictions (including the use of any applicable air pollution control equipment), as proposed by the permittee, for the purpose of avoiding Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A(3):

- i. the maximum annual material throughput rates for this emissions unit shall not exceed:
  - (a) 1,000,000 gallons per year of Group A\* chemical products;
  - (b) 4,000,000 gallons per year of Group B\* chemical products;
  - (c) 95,000,000 gallons per year of Group C\* chemical products; and
- ii. the organic compound (OC)emissions and volatile organic compound (VOC) emissions shall each not exceed 9.3 tons per year.

\*See f)(1)a. of these terms and conditions for definitions of the Group A, B, and C chemical product categories.

c) Operational Restrictions

- (1) the maximum annual material throughput rates for this emissions unit shall not exceed:
  - a. 1,000,000 gallons per year of Group A\* chemical products;
  - b. 4,000,000 gallons per year of Group B\* chemical products; and
  - c. 95,000,000 gallons per year of Group C\* chemical products.

\*See f)(1)a. of these terms and conditions for definitions of the Group A, B, and C chemical product categories.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information annually for the purpose of determining annual VOC emissions:

- a. the name and identification of each solvent processed or employed, including whether the solvent is categorized as a Group A, B, or C chemical product;
- b. the molecular weight, in lb/lb-mole, and the vapor pressure, in psia, for each solvent processed or employed;
- c. the number of gallons of each solvent processed or employed;
- d. the total number of gallons of all solvents processed or employed in each chemical product category (Groups A, B, and C); and
- e. the total VOC emissions from all solvents processed or employed, in tons, using the calculation methods provided in f)(1)a. of these terms and conditions and replacing the voluntary restriction amounts with the actual amounts as recorded above in d)(1)b. and d)(1)c. VOC emissions are assumed to be equal to the OC emissions.

e) Reporting Requirements

- (1) All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications, or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the District Office or Local Air Agency, and/or any other individual or organization specifically identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the required application, notification or report is considered to be "submitted" on the date the submission is successful using a valid electronic signature. Signature by the signatory authority may be represented as provided through procedures established in Air Services.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (3) See Section B.4. of this permit.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:
  - a. Emission Limitation:  
  
VOC emissions shall not exceed 80 pounds per day and 9.3 tons per year.

Applicable Compliance Method:

The daily VOC emissions and the annual VOC emissions voluntary restriction was developed from the following equations using US EPA AP-42 *Chapter 5.2 Transportation and Marketing of Petroleum Liquids*, revised 6/2008, and the information contained in the permittee's application for FEPTIO No. P0104675, submitted on March 20, 2009:

Loading Loss ( $L_L$ ) of each solvent, in pounds/1000 gallons throughput =

$$12.46 (SPM)/T$$

where,

S = saturation factor of 0.50 (ref. AP-42 Table 5.2-1, 6/2008)

P = vapor pressure of the material transferred, in psia

M = molecular weight of the material transferred, in lbs per lb-mole

T = temperature of material transferred, in degrees Rankin

Emissions, in pounds per day = ( $L_L$  of worst case solvent in Group A at 3.022 lbs/1000 gals of solvent transferred x 15,000 gallons per day maximum throughput of Group A chemical products) + ( $L_L$  of worst case solvent in Group B at 1.098 lbs/1000 gals of solvent transferred x 25,000 gallons per year maximum throughput of Group B chemical products) + ( $L_L$  of worst case solvent in Group C at 0.118 lbs/1000 gals of solvent transferred x 60,000 gallons per year maximum throughput of Group C chemical products) x (1 ton/2000 lbs) = 80 pounds per day VOC

Emissions, in tons per year = ( $L_L$  of worst case solvent in Group A at 3.022 lbs/1000 gals of solvent transferred x 1,000,000 gallons per year maximum throughput of Group A chemical products) + ( $L_L$  of worst case solvent in Group B at 1.098 lbs/1000 gals of solvent transferred x 4,000,000 gallons per year maximum throughput of Group B chemical products) + ( $L_L$  of worst case solvent in Group C at 0.118 lbs/1000 gals of solvent transferred x 95,000,000 gallons per year maximum throughput of Group C chemical products) x (1 ton/2000 lbs) = 9.3 tons per year VOC

Group A chemical products are defined as having a value greater than 100 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

Group B chemical products are defined as having a value greater than 10 and less than or equal to 100 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

Group C chemical products are defined as having a value less than or equal to 10 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

VOC was assumed to be equal to the OC emissions.

g) Miscellaneous Requirements

- (1) Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified FEPTIO prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new FEPTIO.

**3. P003, Can Filling**

**Operations, Property and/or Equipment Description:**

Can Filling Operation

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. g)(1).

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. b)(1)c.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3), as effective 11/30/01.	Volatile Organic Compound (VOC) emissions shall not exceed 81 pounds per day and 9.8 tons per year (TPY).  See b)(2)a. and c)(1).
b.	OAC rule 3745-31-05(C), as effective 12/01/06.	See b)(2)b.
c.	OAC rule 3745-31-05(D)	See Section B.2.

(2) Additional Terms and Conditions

a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to Ohio Administrative Code (OAC) paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to the Ohio Revised Code (ORC) changes effective August 3, 2006 (Senate Bill 265 changes), such that BAT is no longer required by State regulations for National Ambient Air Quality

Standards (NAAQS) pollutant(s) less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05, then these emission limitations/control measures no longer apply.

- b. This rule paragraph applies once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the State Implementation Plan.

Permit to Install and Operate P0116664 for this air contaminant source takes into account the following voluntary restrictions (including the use of any applicable air pollution control equipment), as proposed by the permittee, for the purpose of avoiding Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A(3):

- i. the maximum annual material throughput rates for this emissions unit shall not exceed:
  - (a) 1,500,000 gallons per year of Group A\* chemical products;
  - (b) 1,500,000 gallons per year of Group B\* chemical products;
  - (c) 5,000,000 gallons per year of Group C\* chemical products; and
- ii. the organic compound (OC)emissions and volatile organic compound (VOC) emissions shall each not exceed 9.8 tons per year.

\*See f)(1)a. of these terms and conditions for definitions of the Group A, B, and C chemical product categories.

c) Operational Restrictions

- (1) the maximum annual material throughput rates for this emissions unit shall not exceed:
  - a. 1,500,000 gallons per year of Group A\* chemical products;
  - b. 1,500,000 gallons per year of Group B\* chemical products; and
  - c. 5,000,000 gallons per year of Group C\* chemical products.

\*See f)(1)a. of these terms and conditions for definitions of the Group A, B, and C chemical product categories.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information annually for the purpose of determining annual VOC emissions:

- a. the name and identification of each solvent processed or employed, including whether the solvent is categorized as a Group A, B, or C chemical product;
- b. the molecular weight, in lb/lb-mole, and the vapor pressure, in psia, for each solvent processed or employed;
- c. the number of gallons of each solvent processed or employed;
- d. the total number of gallons of all solvents processed or employed in each chemical product category (Groups A, B, and C); and
- e. the total VOC emissions from all solvents processed or employed, in tons, using the calculation methods provided in f)(1)a. of these terms and conditions and replacing the voluntary restriction amounts with the actual amounts as recorded above in d)(1)b. and d)(1)c. VOC emissions are assumed to be equal to the OC emissions.

e) Reporting Requirements

- (1) All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications, or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the District Office or Local Air Agency, and/or any other individual or organization specifically identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the required application, notification or report is considered to be "submitted" on the date the submission is successful using a valid electronic signature. Signature by the signatory authority may be represented as provided through procedures established in Air Services.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (3) See Section B.4. of this permit.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:
  - a. Emission Limitation:  
  
VOC emissions shall not exceed 81 pounds per day and 9.8 tons per year.

Applicable Compliance Method:

The daily VOC emissions and the annual VOC emissions voluntary restriction was developed from the following equations using US EPA AP-42 *Chapter 5.2 Transportation and Marketing of Petroleum Liquids*, revised 6/2008, and the information contained in the permittee's application for FEPTIO No. P0104675, submitted on March 20, 2009:

Loading Loss ( $L_L$ ) of each solvent, in pounds/1000 gallons throughput =

$$12.46 (SPM)/T$$

where,

S = saturation factor of 0.50 (ref. AP-42 Table 5.2-1, 6/2008)

P = vapor pressure of the material transferred, in psia

M = molecular weight of the material transferred, in lbs per lb-mole

T = temperature of material transferred, in degrees Rankin

Emissions, in pounds per day = ( $L_L$  of worst case solvent in Group A at 8.764 lbs/1000 gals of solvent transferred x 7,000 gallons per day maximum throughput of Group A chemical products) + ( $L_L$  of worst case solvent in Group B at 3.185 lbs/1000 gals of solvent transferred x 3,500 gallons per year maximum throughput of Group B chemical products) + ( $L_L$  of worst case solvent in Group C at 0.340 lbs/1000 gals of solvent transferred x 24,500 gallons per year maximum throughput of Group C chemical products) x (1 ton/2000 lbs) = 81 pounds per day VOC

Emissions, in tons per year = ( $L_L$  of worst case solvent in Group A at 8.764 lbs/1000 gals of solvent transferred x 1,500,000 gallons per year maximum throughput of Group A chemical products) + ( $L_L$  of worst case solvent in Group B at 3.185 lbs/1000 gals of solvent transferred x 1,500,000 gallons per year maximum throughput of Group B chemical products) + ( $L_L$  of worst case solvent in Group C at 0.34 lbs/1000 gals of solvent transferred x 5,000,000 gallons per year maximum throughput of Group C chemical products) x (1 ton/2000 lbs) = 9.8 tons per year VOC

Group A chemical products are defined as having a value greater than 100 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

Group B chemical products are defined as having a value greater than 10 and less than or equal to 100 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

Group C chemical products are defined as having a value less than or equal to 10 from the multiplication of the molecular weight (M) and the vapor pressure (P) in the equation above.

VOC was assumed to be equal to the OC emissions.

g) Miscellaneous Requirements

- (1) Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified FEPTIO prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new FEPTIO.
