Dear Permit Holder:

Enclosed is a final Ohio Environmental Protection Agency (EPA) Air Pollution Title V permit that allows you to operate the facility in the manner indicated in the permit. Because this permit may contain several conditions and restrictions, we urge you to read it carefully. In this letter you will find the information on the following topics:

- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**

**How to appeal this permit**

The issuance of this Title V permit is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

## **A. Standard Terms and Conditions**

**1. Federally Enforceable Standard Terms and Conditions**

- a) All Standard Terms and Conditions are federally enforceable, with the exception of those listed below which are enforceable under State law only:
- (1) Standard Term and Condition A. 24., Reporting Requirements Related to Monitoring and Record Keeping Requirements of State-Only Enforceable Permit Terms and Conditions
  - (2) Standard Term and Condition A. 25., Records Retention Requirements for State-Only Enforceable Permit Terms and Conditions
  - (3) Standard Term and Condition A. 27., Scheduled Maintenance/Malfunction Reporting For State-Only Requirements
  - (4) Standard Term and Condition A. 29., Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations
  - (5) Standard Term and Condition A. 30.

*(Authority for term: ORC 3704.036(A))*

**2. Monitoring and Related Record Keeping and Reporting Requirements**

- a) Except as may otherwise be provided in the terms and conditions for a specific emissions unit (i.e., in section C. Emissions Unit Terms and Conditions of this Title V permit), the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
- (1) The date, place (as defined in the permit), and time of sampling or measurements.
  - (2) The date(s) analyses were performed.
  - (3) The company or entity that performed the analyses.
  - (4) The analytical techniques or methods used.
  - (5) The results of such analyses.
  - (6) The operating conditions existing at the time of sampling or measurement.

*(Authority for term: OAC rule 3745-77-07(A)(3)(b)(i))*

- b) Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

*(Authority for term: OAC rule 3745-77-07(A)(3)(b)(ii))*

c) The permittee shall submit required reports in the following manner:

- (1) All reporting required in accordance with OAC rule 3745-77-07(A)(3)(c) for deviations caused by malfunctions shall be submitted in the following manner:

Any malfunction, as defined in OAC rule 3745-15-06(B)(1), shall be promptly reported to the Ohio EPA in accordance with OAC rule 3745-15-06. In addition, to fulfill the OAC rule 3745-77-07(A)(3)(c) deviation reporting requirements for malfunctions, written reports that identify each malfunction that occurred during each calendar quarter (including each malfunction reported only verbally in accordance with OAC rule 3745-15-06) shall be submitted by January 31, April 30, July 31, and October 31 of each year in accordance with Standard Term and Condition A.2.c)(2) below; and each report shall cover the previous calendar quarter. An exceedance of the visible emission limitations specified in OAC rule 3745-17-07(A)(1) that is caused by a malfunction is not a violation and does not need to be reported as a deviation if the owner or operator of the affected air contaminant source or air pollution control equipment complies with the requirements of OAC rule 3745-17-07(A)(3)(c).

In accordance with OAC rule 3745-15-06, a malfunction reportable under OAC rule 3745-15-06(B) is a deviation of the federally enforceable permit requirements. Even though verbal notifications and written reports are required for malfunctions pursuant to OAC rule 3745-15-06, the written reports required pursuant to this term must be submitted quarterly to satisfy the prompt reporting provision of OAC rule 3745-77-07(A)(3)(c).

In identifying each deviation caused by a malfunction, the permittee shall specify the emission limitation(s) (or control requirement(s)) for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation. For a specific malfunction, if this information has been provided in a written report that was submitted in accordance with OAC rule 3745-15-06, the permittee may simply reference that written report to identify the deviation. Nevertheless, all malfunctions, including those reported only verbally in accordance with OAC rule 3745-15-06, must be reported in writing on a quarterly basis.

Any submitted scheduled maintenancerequests, as referenced in OAC rule 3745-15-06(A)(1), that results in a deviation from a federally enforceable emission limitation (or control requirement) shall be reported in the same manner as described above for malfunctions.

*(Authority for term: OAC rule 3745-77-07(A)(3)(c))*

- (2) Except as may otherwise be provided in the terms and conditions for a specific emissions unit (i.e., in section C. Emissions Unit Terms and Conditions of this Title V permit or, in some cases, in section B. Facility-Wide Terms and Conditions of this Title V permit), all reporting required in accordance with OAC rule 3745-77-07(A)(3)(c) for deviations of the emission limitations, operational restrictions, and control device operating parameter limitations shall be submitted in the following manner:

Written reports of (a) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures taken, shall be submitted promptly to the Ohio EPA DAPC, Northwest District Office. Except as provided below, the written reports shall be submitted by January 31, April 30, July 31, and October 31 of each year; and each report shall cover the previous calendar quarter.

In identifying each deviation, the permittee shall specify the emission limitation(s), operational restriction(s), and/or control device operating parameter limitation(s) for which the deviation occurred, describe each deviation, and provide the estimated magnitude and duration of each deviation.

These written deviation reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c) pertaining to the submission of monitoring reports every six months and to the prompt reporting of all deviations. Full compliance with OAC rule 3745-77-07(A)(3)(c) requires reporting of all other deviations of the federally enforceable requirements specified in the permit as required by such rule.

If an emissions unit has a deviation reporting requirement for a specific emission limitation, operational restriction, or control device operating parameter limitation that is not on a quarterly basis (e.g., within 30 days following the end of the calendar month, or within 30 or 45 days after the exceedance occurs), that deviation reporting requirement satisfies the reporting requirements specified in this Standard Term and Condition for that specific emission limitation, operational restriction, or control device parameter limitation. Following the provisions of that non-quarterly deviation reporting requirement will also satisfy (for the deviations so reported) the requirements of OAC rule 3745-77-07(A)(3)(c) pertaining to the submission of monitoring reports every six months and to the prompt reporting of all deviations, and additional quarterly deviation reports for that specific emission limitation, operational restriction, or control device parameter limitation are not required pursuant to this Standard Term and Condition.

See A.29 below if no deviations occurred during the quarter.

*(Authority for term: OAC rule 3745-77-07(A)(3)(c))*

- (3) All reporting required in accordance with the OAC rule 3745-77-07(A)(3)(c) for other deviations of the federally enforceable permit requirements which are not reported in accordance with Standard Term and Condition A.2)c)(2) above shall be submitted in the following manner:

Unless otherwise specified by rule, written reports that identify deviations of the following federally enforceable requirements contained in this permit; Standard Terms and Conditions: A.3, A.4, A.5, A.7.e), A.8, A.13, A.15, A.19, A.20, A.21, and A.23 of this Title V permit, as well as any deviations from the requirements in section C. Emissions Unit Terms and Conditions of this Title V permit, and any monitoring, record keeping, and reporting requirements, which are not reported in accordance with Standard Term and Condition A.2.c)(2) above shall be submitted to the Ohio EPA DAPC, Northwest District Office by January 31 and July 31 of each year; and each report shall cover the previous six calendar months. Unless otherwise specified by rule, all other deviations from

federally enforceable requirements identified in this permit shall be submitted annually as part of the annual compliance certification, including deviations of federally enforceable requirements not specifically addressed by permit or rule for the insignificant activities or emissions levels (IEU) identified in section B. Facility-Wide Terms and Conditions of this Title V permit. Annual reporting of deviations is deemed adequate to meet the deviation reporting requirements for IEUs unless otherwise specified by permit or rule.

In identifying each deviation, the permittee shall specify the federally enforceable requirement for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation.

These semi-annual and annual written reports shall satisfy the reporting requirements of OAC rule 3745-77-07(A)(3)(c) for any deviations from the federally enforceable requirements contained in this permit that are not reported in accordance with Standard Term and Condition A.2.c)(2) above.

If no such deviations occurred during a six-month period, the permittee shall submit a semi-annual report which states that no such deviations occurred during that period.

*(Authority for term: OAC rules 3745-77-07(A)(3)(c)(i) and (ii) and OAC rule 3745-77-07(A)(13)(b))*

- (4) Each written report shall be signed by a Responsible Official certifying that, "based on information and belief formed after reasonable inquiry, the statements and information in the report (including any written malfunction reports required by OAC rule 3745-15-06 that are referenced in the deviation reports) are true, accurate, and complete." Signature by the Responsible Official may be represented by entry of the personal identification number (PIN) by the Responsible Official as part of the electronic submission process or by the scanned attestation document signed by the Responsible Official that is attached to the electronically submitted written report.

*(Authority for term: OAC rule 3745-77-07(A)(3)(c)(iv))*

- (5) Consistent with A.2.c.1. above, reports of any required monitoring and/or record keeping information required to be submitted to Ohio EPA shall be submitted to Ohio EPA DAPC, Northwest District Office unless otherwise specified.

*(Authority for term: OAC rule 3745-77-07(A)(3)(c))*

### **3. Reporting of Any Exceedence of a Federally Enforceable Emission Limitation or Control Requirement Resulting From Scheduled Maintenance**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. Except as provided in OAC rule 3745-15-06(A)(3), any scheduled maintenance necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s). Any scheduled maintenance, as defined in OAC rule 3745-15-06(A)(1), that results in a deviation from a federally enforceable emission limitation (or control requirement) shall be reported in the same manner as described for malfunctions in Standard Term and Condition A.2.c)(1) above.

*(Authority for term: OAC rule 3745-77-07(A)(3)(c))*

#### **4. Risk Management Plans**

If applicable, the permittee shall develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. § 7401 et seq. ("Act"); and, pursuant to 40 C.F.R. 68.215(a), the permittee shall submit either of the following:

- a) a compliance plan for meeting the requirements of 40 C.F.R. Part 68 by the date specified in 40 C.F.R. 68.10(a) and OAC 3745-104-05(A); or
- b) as part of the compliance certification submitted under 40 C.F.R. 70.6(c)(5), a certification statement that the source is in compliance with all requirements of 40 C.F.R. Part 68 and OAC Chapter 3745-104, including the registration and submission of the risk management plan.

*(Authority for term: OAC rule 3745-77-07(A)(4))*

#### **5. Title IV Provisions**

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

*(Authority for term: OAC rule 3745-77-07(A)(5))*

#### **6. Severability Clause**

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

*(Authority for term: OAC rule 3745-77-07(A)(6))*

#### **7. General Requirements**

- a) Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.
- b) It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit except as provided pursuant to A.16 below.
- c) This permit may be modified, reopened, revoked, or revoked and reissued, for cause, in accordance with A.11 below. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.

- d) This permit does not convey any property rights of any sort, or any exclusive privilege.
- e) The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.
- f) Except as otherwise indicated below, this Title V permit, or permit modification, is effective for five years from the original effective date specified in the permit. In the event that this facility becomes eligible for non-title V permits, this permit shall cease to be enforceable when:
  - (1) the permittee submits an approved facility-wide potential to emit analysis supporting a claim that the facility no longer meets the definition of a "major source" as defined in OAC rule 3745-77-01(W) based on the permanent shutdown and removal of one or more emissions units identified in this permit; or
  - (2) the permittee no longer meets the definition of a "major source" as defined in OAC rule 3745-77-01(W) based on obtaining restrictions on the facility-wide potential(s) to emit that are federally enforceable or legally and practically enforceable ; or
  - (3) a combination of (1) and (2) above.

The permittee shall continue to comply with all applicable OAC Chapter 3745-31 requirements for all regulated air contaminant sources once this permit ceases to be enforceable. The permittee shall comply with any residual requirements, such as quarterly deviation reports, semi-annual deviation reports, and annual compliance certifications covering the period during which this Title V permit was enforceable. All records relating to this permit must be maintained in accordance with law.

*(Authority for term: OAC rule 3745-77-01(W), OAC rule 3745-77-07(A)(3)(b)(ii), OAC rule 3745-77(A)(7))*

## **8. Fees**

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78.

*(Authority for term: OAC rule 3745-77-07(A)(8))*

## **9. Marketable Permit Programs**

No revision of this permit is required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in this permit.

*(Authority for term: OAC rule 3745-77-07(A)(9))*

**10. Reasonably Anticipated Operating Scenarios**

The permittee is hereby authorized to make changes among operating scenarios authorized in this permit without notice to the Ohio EPA, but, contemporaneous with making a change from one operating scenario to another, the permittee must record in a log at the permitted facility the scenario under which the permittee is operating. The permit shield provided in these standard terms and conditions shall apply to all operating scenarios authorized in this permit.

*(Authority for term: OAC rule 3745-77-07(A)(10))*

**11. Reopening for Cause**

This Title V permit will be reopened prior to its expiration date under the following conditions:

- a) Additional applicable requirements under the Act become applicable to one or more emissions units covered by this permit, and this permit has a remaining term of three or more years. Such a reopening shall be completed not later than eighteen (18) months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of OAC rule 3745-77-08.
- b) This permit is issued to an affected source under the acid rain program and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit, and shall not require a reopening of this permit.
- c) The Director of the Ohio EPA or the Administrator of the U.S. EPA determines that the federally applicable requirements in this permit are based on a material mistake, or that inaccurate statements were made in establishing the emissions standards or other terms and conditions of this permit related to such federally applicable requirements.
- d) The Administrator of the U.S. EPA or the Director of the Ohio EPA determines that this permit must be revised or revoked to assure compliance with the applicable requirements.

*(Authority for term: OAC rules 3745-77-07(A)(12) and 3745-77-08(D))*

**12. Federal and State Enforceability**

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA, the State, and citizens under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

*(Authority for term: OAC rule 3745-77-07(B))*

- c) The permittee shall submit progress reports to the Ohio EPA DAPC, Northwest District Office concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
  - (1) Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
  - (2) An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
  
- d) Compliance certifications concerning the terms and conditions contained in this permit that are federally enforceable emission limitations, standards, or work practices, shall be submitted to the Director (the Ohio EPA DAPC, Northwest District Office) and the Administrator of the U.S. EPA in the following manner and with the following content:

#### **14. Permit Shield**

- a) Compliance with the terms and conditions of this permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but excluding terms and conditions for which the permit shield is expressly prohibited under OAC rule 3745-77-07) shall be deemed compliance with the applicable requirements identified and addressed in this permit as of the date of permit issuance.
- b) This permit shield provision shall apply to any requirement identified in this permit pursuant to OAC rule 3745-77-07(F)(2), as a requirement that does not apply to the source or to one or more emissions units within the source.

*(Authority for term: OAC rule 3745-77-07(F))*

#### **15. Operational Flexibility**

The permittee is authorized to make the changes identified in OAC rule 3745-77-07(H)(1)(a) to (H)(1)(c) within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the Act [as defined in OAC rule 3745-77-01(JJ)], and does not result in an exceedance of the emissions allowed under this permit (whether expressed therein as a rate of emissions or in terms of total emissions), and the permittee provides the Administrator of the U.S. EPA and the Ohio EPA DAPC, Northwest District Office with written notification within a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions. If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the Administrator of the U.S. EPA and the Ohio EPA DAPC, Northwest District Office as soon as possible after learning of the need to make the change. The notification shall contain the items required under OAC rule 3745-77-07(H)(2)(d).

*(Authority for term: OAC rule 3745-77-07(G))*

## **17. Off-Permit Changes**

The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:

- a) The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition.
- b) The permittee provides contemporaneous written notice of the change to the Director and the Administrator of the U.S. EPA, except that no such notice shall be required for changes that qualify as insignificant emissions levels or activities as defined in OAC rule 3745-77-01(U). Such written notice shall describe each such change, the date of such change, any change in emissions or pollutants emitted, and any federally applicable requirement that would apply as a result of the change.
- c) The change shall not qualify for the permit shield under OAC rule 3745-77-07(F).
- d) The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes.
- e) The change is not subject to any applicable requirement under Title IV of the Act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of rule 3745-77-07 of the Administrative Code applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit-to-install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that Chapter. Nothing in paragraph (I) of rule 3745-77-07 of the Administrative Code shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

*(Authority for term: OAC rule 3745-77-07(I))*

## **18. Compliance Method Requirements**

Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Federal Register 8314, Feb. 24, 1997), in the context of any future proceeding.

*(This term is provided for informational purposes only.)*

*(Authority for term: OAC rule 3745-77-07(A)(1))*

**20. Permit to Install Requirement**

Prior to the "installation" or "modification" of any "air contaminant source," as those terms are defined in OAC rule 3745-31-01, a permit to install must be obtained from the Ohio EPA pursuant to OAC Chapter 3745-31.

*(Authority for term: OAC rule 3745-77-07(A)(1))*

**22. Permanent Shutdown of an Emissions Unit**

The permittee may notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification from the Responsible Official that identifies the date on which the emissions unit was permanently shut down. Authorization to operate the affected emissions unit shall cease upon the date certified by the Responsible Official that the emissions unit was permanently shut down.

After the date on which an emissions unit is permanently shut down (i.e., that has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31 and therefore ceases to meet the definition of an "emissions unit" as defined in OAC rule 3745-77-01(O)), rendering existing permit terms and conditions irrelevant, the permittee shall not be required, after the date of the certification and submission to Ohio EPA, to meet any Title V permit requirements applicable to that emissions unit, except for any residual requirements, such as the quarterly deviation reports, semi-annual deviation reports and annual compliance certification covering the period during which the emissions unit last operated. All records relating to the shutdown emissions unit, generated while the emissions unit was in operation, must be maintained in accordance with law.

Unless otherwise exempted, no emissions unit identified in this permit that has been certified by the Responsible Official as being permanently shut down may resume operation without first applying for and obtaining a permit to install pursuant to OAC Chapter 3745-31.

*(Authority for term: OAC rule 3745-77-01)*

In identifying each deviation, the permittee shall specify the applicable requirement for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. Such records may be maintained in computerized form.

**26. Inspections and Information Requests**

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine

whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

**28. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The Ohio EPA DAPC, Northwest District Office must be notified in writing of any transfer of this permit.

*(Authority for term: OAC rule 3745-77-01(C))*

**29. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations**

If no emission limitation (or control requirement), operational restriction and/or control device parameter limitation deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted by January 31, April 30, July 31, and October 31 of each year; and each report shall cover the previous calendar quarter.

The permittee is not required to submit a quarterly report which states that no deviations occurred during that quarter for the following situations:

- a) where an emissions unit has deviation reporting requirements for a specific emission limitation, operational restriction, or control device parameter limitation that override the deviation reporting requirements specified in Standard Term and Condition A.2.c)(2); or
- b) where an uncontrolled emissions unit has no monitoring, record keeping, or reporting requirements and the emissions unit's applicable emission limitations are established at the potential to emit; or
- c) where the company's Responsible Official has certified that an emissions unit has been permanently shut down.

**30. Submitting Documents Required by this Permit**

All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications, or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the Ohio EPA DAPC, Northwest District Office, and/or any other individual or organization specifically identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the required application, notification or report is considered to be "submitted" on the date the submission is successful using a valid electronic signature. Signature by the Responsible Official may be represented as provided through procedures established in Air Services.

f) Testing Requirements

- (1) Compliance with the emission limitations in section b)(1) of the terms and conditions of this permit shall be determined in accordance with the following methods:

- a. Emission Limitations:  
151.20 lbs VOC/day and 27.59 tons VOC/yr

Applicable Compliance Method:

The daily emissions limitation represents the potential to emit\* for the emissions unit. Therefore, no record keeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

\*The potential to emit for this emissions unit was determined by multiplying a maximum BMC usage rate of 7000 lbs/hr by the maximum daily hours of operation (24 hours), by a maximum VOC (styrene) content of 7.2%, by an emission factor of 1.25%.

Compliance with the 27.59 tons VOC/yr shall be demonstrated based on the record keeping requirements specified in d)(2) of this permit.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- b. Emission Limitations:  
0.02 lb PE/hr and 0.09 ton PE/yr

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly PE limitation by using the following formula:

$$PE \text{ (lb/hr)} = [P \times D \times E \times (1 - C)]$$

where:

P = maximum process weight rate, in lbs/hr (7000 lbs/hr);

D = dry filler content of BMC, in percent by weight;

E = 0.0012 = emission factor (0.12 percent, by weight, of the amount of solids mixed)\*; and

C = operating control efficiency of the baghouse (99.7 percent).

\*emission factor is based on a company study of the dust collected in the mix room

If required, the permittee shall demonstrate compliance with the hourly emission limitation in accordance with Methods 1 through 5 of 40 CFR Part 60, Appendix A.

The TPY emission limitation was developed by multiplying the short-term allowable particulate emission limitation (0.02 lb/hr) by the maximum annual hours of operation (8,760 hours), and then dividing by 2,000 lbs per ton. Therefore, provided compliance is shown with the short-term allowable emission limitation, compliance with the annual emission limitation shall also be demonstrated.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- c. Emission Limitation:  
62.5 tons VOC per rolling, 12-month period for emissions units P004 through P006 and P048, combined

Applicable Compliance Method:

Compliance shall be demonstrated based on the record keeping requirements specified in section d)(3) of this permit.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- d. Emission Limitation:  
The maximum annual styrene usage for emissions units P004 through P006 & P048, combined, shall not exceed 5000 tons per year, based on a rolling, 12-month summation of the styrene usage.

Applicable Compliance Method:

Compliance shall be demonstrated based on the record keeping requirements specified in section d)(3) of this permit.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- e. Emission Limitation:  
 Visible PE shall not exceed 20% opacity, as a 6-minute average.

Applicable Compliance Method:

If required, compliance with the visible emission limitation shall be determined in accordance with Test Method 9 as set forth in “Appendix on Test Methods” in 40 CFR, Part 60 (“Standards of Performance for New Stationary Sources”).

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- (2) Formulation data or USEPA Method 311 shall be used to determine the monomer (VOC) content of each BMC resin.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- (3) The permittee shall comply with the applicable compliance requirements and test requirements as required under 40 CFR, 63 Subpart WWWW, including the following sections:

63.5835(a) and (c)	General compliance requirements
63.5840	Testing and initial compliance requirements – dates performance tests or other initial compliance demonstrations must be conducted

(2) Additional Terms and Conditions

a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to OAC rule 3745-31-05(A)(3), as effective, November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265

changes), such that BAT is no longer required by State regulations for NAAQS pollutant less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of 3745-31-05, then these emission limits/control measures no longer apply.

- b. This rule applies once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the State Implementation Plan.

The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3)(a) do not apply to the volatile organic compounds (VOC) from this air contaminant source since the potential to emit for VOC is less than ten tons per year.

The potential to emit for this emissions unit is 5.87 tons per year and was determined by multiplying a maximum bulk mold compound (BMC) usage rate of 1000 lbs/hr by a maximum VOC (styrene) content of 7.2% by an emission factor of 1.86%, multiplying by 8760 hrs/yr and dividing by 2000 lbs/ton.

- c. The permittee shall comply with the applicable requirements under OAC rule 3745-21-25:

OAC rule 3745-21-25(D)(1), (D)(2), (D)(5), and (D)(6)	VOC control requirements
OAC rule 3745-21-25 (F)(1), (F)(3), (F)(4), and (F)(5)	Calculation of facility's VOC emissions threshold
OAC rule 3745-21-25(R)(1) and (R)(2)	Compliance dates

- d. The permittee shall comply with the applicable standards required for all affected sources at an existing facility pursuant to 40 CFR 63.5805(b). Pursuant to this regulation, this emission unit shall meet the requirements as stated in Table 4 of 40 CFR, Part 63, Subpart WWWW – Work Practice Standards – Item #1 for closed molding operation using injection molding and Item #3 for material storage operation.

- e. The company shall comply with the following applicable requirements under 40 CFR, Part 63, Subpart WWWW:

63.5800	Compliance with the standards in this subpart must be met by the dates specified in Table 2 of this subpart.
---------	--

- c) Operational Restrictions

- a. the company identification of each bulk mold compound employed;
  - b. the pounds of each bulk mold compound employed;
  - c. the VOC (styrene) content, in percent by weight, for each bulk mold compound employed;
  - d. the VOC emissions for each bulk mold compound employed [d)(1)b. times d)(1)c. times 1.86% VOC volatilization emission factor\*];  
  
 \*Emission factor is based on a consolidation of information from the Society of Plastics Industry (SPI) and other sources.
  - e. the total VOC emissions for all bulk mold compounds employed [sum of d)(1)d.]; and

The hourly emissions limitation represents the potential to emit\* for the emissions unit. Therefore, no record keeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

If required, the permittee shall demonstrate compliance with the hourly allowable VOC emission limitation above in accordance with Methods 1-4 and 18, 25 or 25A, as appropriate of 40 CFR, Part 60, Appendix A.

\*The potential to emit for this emissions unit was determined by multiplying a maximum BMC usage rate of 1000 lbs/hr by a maximum VOC (styrene) content of 7.2% and by an emission factor of 1.86%.

- b. Emission Limitation:  
5.87 tons VOC/yr

Applicable Compliance Method:

(2) Additional Terms and Conditions

a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to OAC paragraph 3745-31-05(A)(3), as effective November 30, 2001,

in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by State regulations for NAAQS pollutant less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of 3745-31-05, then these emission limits/control measures no longer apply.

- b. This rule applies once U.S. EPA approves December 1, 2006 version of OAC rule 3745-31-05, as part of the State Implementation Plan.

The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to volatile organic compounds from this air contaminant source since the uncontrolled potential to emit for volatile organic compounds is less than ten tons per year.

The potential to emit for this emissions unit is 2.98 tons VOC/yr and was determined by multiplying a maximum resin paste usage rate of 168 lbs/yr by 0.286 lb OC/lb resin paste employed by an emission factor of 0.01 lb OC/lb of OC applied added to a maximum mold release usage rate of 0.20 lb/hr multiplied by 1lb OC/lb mold release employed multiplied by an emission factor of 1 lb OC/lb mold release applied.

- c. Pursuant to OAC rule 3745-21-25, (C)(1) and (C)(2), the resin transfer molding and mold release agents are not affected operations at a reinforced plastic composites production facility and therefore are excluded from the requirements of this rule. The VOC-containing material storage associated with the resin transfer molding is an affected operation and is therefore subject to the requirements of this rule [See b)(2)d. d)(2), and e)(2)].
- d. The permittee shall comply with the applicable requirements under OAC rule 3745-21-25:

OAC rule 3745-21-25(D)(1), (D)(2), (D)(5) and (D)(6)	VOC control requirements
OAC rule 3745-21-25(F)(1), (F)(3), (F)(4), (F)(5)	Calculation of facility's VOC emissions threshold
OAC rule 3745-21-25(R)(1) and (R)(2)	Compliance dates

- e. The permittee shall comply with the applicable standards required for all affected sources at an existing facility pursuant to 40 CFR 63.5805(b). Pursuant to this regulation, this emission unit shall meet the requirements as stated in Table 4 of

40 CFR, Part 63, Subpart WWWW – Work Practice Standards – Item#3 for material storage operation.

- f. The company shall comply with the following applicable requirements under 40 CFR, Part 63, Subpart WWWW:

63.5800	Compliance with the standards in this subpart must be met by the dates specified in Table 2 of this subpart.
---------	--

- g. Pursuant to 40 to 40 CFR 63.5790(c), the application of release agents is excluded from any of the requirements of 40 CFR Part 63, Subpart WWWW.

c) Operational Restrictions

- (1) None.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information each month for the molding operation:
  - a. the company identification for each resin paste/mold release agent employed;
  - b. the amount of each paste/mold release agent employed, in pounds;
  - c. the volatile organic compound content, in percent by weight, for each resin paste/mold release agent employed;
  - d. the volatile organic compound emission rate for each resin paste/mold release agent employed, in lbs/month [i.e., d)(1)b. x d)(1)c. x an emission factor of 0.01 lb VOC/ lb VOC in resin paste employed or 1.0 lb VOC/lb VOC in mold release agent employed] for each resin paste/mold release employed;
  - e. the total volatile organic compound emission rate for all resin pastes/mold release agents employed, in lbs/month [i.e., the sum of d)(1)d.]; and
  - f. the annual year-to-date volatile organic compound emissions from all resin pastes/mold release agents employed, in tons [i.e., the sum of d)(1)e. for each calendar month to date from January to December x 1 ton/2000 lbs].

[OAC rule 3745-77-07(C)(1) and PTI #P0106575]

- (2) The permittee shall comply with the applicable monitoring and record keeping requirements under OAC rule 3745-21-25:

- (1) The permittee shall submit annual reports that specify the total volatile organic compound emissions from emissions unit P052 for the previous calendar year. These reports shall be submitted by January 31 of each year and shall be submitted in accordance with the Standard Terms and Conditions of this permit.

[OAC rule 3745-77-07(C)(1) and PTI #P0106575]

- (2) The permittee shall submit semiannual reports and other such notifications and reports to the appropriate Ohio EPA District Office or local air agency as required by OAC rule 3745-21-25:

f) Testing Requirements

(1) Compliance with the emission limitations specified in section b)(1) of these terms and conditions shall be determined in accordance with the following methods:

a. Emission Limitation:  
 0.68 lb VOC/hr

Applicable Compliance Method:

The hourly VOC emission limitation was developed by multiplying a maximum resin paste usage rate of 168 lbs/yr by 0.286 lb VOC/lb resin paste employed by an emission factor of 0.01 lb VOC/lb of VOC applied added to a maximum mold release usage rate of 0.20 lb/hr multiplied by 1lb VOC/lb mold release employed multiplied by an emission factor of 1 lb VOC/lb VOC in mold release applied.

Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures

(2) Additional Terms and Conditions

a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to OAC paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by State regulations for NAAQS

pollutant less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of 3745-31-05, then these emission limits/control measures no longer apply.

- b. This rule applies once U.S. EPA approves December 1, 2006 version of OAC rule 3745-31-05, as part of the State Implementation Plan.

The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to volatile organic compounds from this air contaminant source since the uncontrolled potential to emit for volatile organic compounds is less than ten tons per year.

The potential to emit for this emissions unit is 1.49 tons VOC/yr and was determined by multiplying a maximum emission rate of 0.34 lb VOC/hr by a maximum operating rate of 8760 hrs/yr and dividing by 2000 lbs/ton. The maximum lb/hr emission rate was determined using the following:

Raw Material	Maximum Throughput (lb/hr)	VOC Employed	VOC Content (lb VOC/lb thinned gelcoat or adhesive)	Emission Factor lb VOC emitted/lb VOC applied	Lb/hr VOC emitted
Thinned Gelcoat	0.8	Styrene	0.299	0.1257	0.03
Thinned Gelcoat	0.8	MMA	0.034	0.2118	0.006
Thinned Gelcoat	0.8	Acetone	0.125	1	0.10
Adhesive	4	MMA	0.60	0.05	0.12
Adhesive	4	MAA	0.40	0.05	0.08
Total					0.34

- c. The permittee shall comply with the applicable requirements under OAC rule 3745-21-25:

OAC rule 3745-21-25(R)(1) and (R)(2)	Compliance dates

d. The permittee shall comply with the applicable standards required for all affected sources at an existing facility pursuant to 40 CFR 63.5805(b). Pursuant to this regulation, this emissions unit shall meet the requirements as stated in Table 3 of 40 CFR, Part 63, Subpart WWWW – Organic HAP Emissions Limits for Existing Open Molding Sources, New Open Molding Sources Emitting less than 100 TPY of HAP, and New and Existing Centrifugal Casting and Continuous Lamination/Casting Sources that Emit Less Than 100 TPY of HAP item #6 and Table 4 of 40 CFR, Part 63, Subpart WWWW – Work Practice Standards – Item #3 for HAP-containing materials storage operations.

e. The company shall comply with the following applicable requirements under 40 CFR, Part 63, Subpart WWWW:

63.5800	Compliance with the standards in this subpart must be met by the dates specified in Table 2 of this subpart.

f) Testing Requirements

- (1) Compliance with the emission limitations in section b)(1) of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- a. Emission Limitations:  
 32.14 lbs VOC/day and 5.87 tons VOC/yr from P022 – P030, P049 and P050, individually

Applicable Compliance Method:

The daily emissions limitation represents the potential to emit\* foreach emissions unit. Therefore, no record keeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

\*The potential to emit for this emissions unit was determined by multiplying a maximum BMC usage rate of 1000 lbs/hr by the maximum daily hours of operation (24 hours), by a maximum VOC (styrene) content of 7.2%, by an emission factor of 1.86%.

Compliance with the 5.87 tons VOC/yremission limitation shall be demonstrated based on the record keeping requirements specified in d)(2) of this permit.

[OAC rule 3745-77-07(C)(1) and PTI# P0103671]

f) Testing Requirements

- (1) Compliance with the emissions limitations in section b)(1) of these terms and conditions shall be determined in accordance with the following methods:

- a. Emission Limitations:  
0.30 lb VOC /hr and 1.32 tons VOC /yr from P043 and P044, individually

Applicable Compliance Method:

The emission limitations are based on the emission units' potential to emit\*. Therefore, no recordkeeping, deviation reporting or compliance method calculations are required to demonstrate compliance with this limitation.

\*The potentials to emit for these emissions units are based on a maximum throughput of 225 lbs BMC per hour, multiplied by a maximum resin content of 0.24 lb resin per lb BMC (24%), then multiplied by a maximum resin styrene (VOC monomer) content of 0.30 (30%), then multiplied by an emission factor of 0.0186 (1.86%) (the emission factor is based on a consolidation of information from the Society of the Plastics Industry (SPI) and other sources).

The annual allowable VOC emission limitation was developed by multiplying the hourly limitation by 8760, and then dividing by 2000. Therefore, provided compliance is shown with the short-term allowable emission limitation, compliance with the annual emission limitation shall also be demonstrated.

[OAC rule 3745-77-07(C)(1) and PTI #03-16162]

- (2) Formulation data or USEPA Method 311 shall be used to determine the monomer (VOC) content of each BMC resin.

(2) Additional Terms and Conditions

- a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to OAC rule 3745-31-05(A)(3), as effective, November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by State regulations for NAAQS pollutant less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of 3745-31-05, then these emission limits/control measures no longer apply.

- b. This rule applies once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the State Implementation Plan.

The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3)(a) do not apply to the volatile organic compounds (VOC) from this air contaminant source since the potential to emit for VOC is less than ten tons per year.

The potential to emit for this emissions unit is 1.47 tons per year and was determined by multiplying a maximum bulk mold compound (BMC) usage rate of 250 lbs/hr by a maximum VOC (styrene) content of 7.2% by an emission factor of 1.86%, multiplying by 8760 hrs/yr and dividing by 2000 lbs/ton.

- c. The permittee shall comply with the applicable requirements under OAC rule 3745-21-25:

OAC rule 3745-21-25(D)(1), (D)(2), (D)(5), and (D)(6)	VOC control requirements
OAC rule 3745-21-25 (F)(1), (F)(3), (F)(4), and (F)(5)	Calculation of facility's VOC emissions threshold
OAC rule 3745-21-25(R)(1) and (R)(2)	Compliance dates

- d. The permittee shall comply with the applicable standards required for all affected sources at an existing facility pursuant to 40 CFR 63.5805(b). Pursuant to this regulation, this emission unit shall meet the requirements as stated in Table 4 of 40 CFR, Part 63, Subpart WWWW – Work Practice Standards – Item #1 for closed molding operation using compression molding and Item #3 for material storage operation.

- e. The company shall comply with the following applicable requirements under 40 CFR, Part 63, Subpart WWWW:

63.5800	Compliance with the standards in this subpart must be met by the dates specified in Table 2 of this subpart.
---------	--

c) Operational Restrictions

- b. the pounds of each bulk mold compound employed;
- c. the VOC (styrene) content, in percent by weight, for each bulk mold compound employed;
- d. the VOC emissions for each bulk mold compound employed [d)(1)b. times d)(1)c. times 1.86% VOC volatilization emission factor\*];  
  
 \*Emission factor is based on a consolidation of information from the Society of Plastics Industry (SPI) and other sources.
- e. the total VOC emissions for all bulk mold compounds employed [sum of d)(1)d.]; and
- f. the annual, year-to-date VOC emissions from all bulk mold compounds employed, in tons, [sum of d)(1)e. for each calendar month to date from January to December times 1 ton/2000 lbs].

These reports shall be submitted by January 31 of each year and shall be submitted in accordance with the Standard Terms and Conditions of this permit.

[OAC rule 3745-77-07(C)(1), and PTI #P0106576]

- (2) The permittee shall submit semiannual reports and other such notifications and reports to the appropriate Ohio EPA District Office or local air agency as required by OAC rule 3745-21-25:

f) Testing Requirements

- (1) Compliance with the emission limitations specified in section b)(1) of these terms and conditions shall be determined in accordance with the following methods:

- a. Emission Limitation:  
0.34 lb VOC/hr from each emissions unit, individually

Applicable Compliance Method:

The hourly emissions limitation represents the potential to emit\* for the emissions unit. Therefore, no record keeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

\*The potential to emit for this emissions unit was determined by multiplying a maximum BMC usage rate of 250 lbs/hr by a maximum VOC (styrene) content of 7.2% and by an emission factor of 1.86%.

b. Emission Limitation:

1.47 tons VOC/yr from each emission unit, individually

(2) Additional Terms and Conditions

- a. The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to OAC rule 3745-31-05(A)(3), as effective, November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by State regulations for NAAQS pollutant less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio’s State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of 3745-31-05, then these emission limits/control measures no longer apply.
- b. This rule applies once U.S. EPA approves the December 1, 2006 version of OAC rule 3745-31-05 as part of the State Implementation Plan.

The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3)(a) do not apply to the volatile organic compounds (VOC) from this air contaminant source since the potential to emit for VOC is less than ten tons per year.

The potential to emit for this emissions unit is 2.93 tons per year and was determined by multiplying a maximum bulk mold compound (BMC) usage rate of 500 lbs/hr by a maximum VOC (styrene) content of 7.2% by an emission factor of 1.86%, multiplying by 8760 hrs/yr and dividing by 2000 lbs/ton.

- c. The permittee shall comply with the applicable requirements under OAC rule 3745-21-25:

OAC rule 3745-21-25(D)(1), (D)(2), (D)(5), and (D)(6)	VOC control requirements

f) Testing Requirements

- (1) Compliance with the emission limitations in section b)(1) of the terms and conditions of this permit shall be determined in accordance with the following methods:

a. Emission Limitations:

119.88 lbs VOC/day and 21.88 tons VOC/yr from P004, P006, and P048 individually

Applicable Compliance Method:

The daily emissions limitation represents the potential to emit\* for the emissions unit. Therefore, no record keeping, deviation reporting, or compliance method calculations are required to demonstrate compliance with this limitation.

\*The potential to emit for this emissions unit was determined by multiplying a maximum BMC usage rate of 5550 lbs/hr by the maximum daily hours of operation (24 hours), by a maximum VOC (styrene) content of 7.2%, by an emission factor of 1.25%.

Compliance with the 27.59 tons VOC/yr shall be demonstrated based on the record keeping requirements specified in d)(2) of this permit.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- b. Emission Limitations:  
0.01 lb PE/hr and 0.05 ton PE/yr from P004, P006, and P048, for each individually

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly PE limitation by using the following formula:

$$PE \text{ (lb/hr)} = [P \times D \times E \times (1 - C)]$$

where:

P = maximum process weight rate, in lbs/hr (5550 lbs/hr);

D = dry filler content of BMC, in percent by weight;

E = 0.0012 = emission factor (0.12 percent, by weight, of the amount of solids mixed)\*; and

C = operating control efficiency of the baghouse (99.7 percent).

\*emission factor is based on a company study of the dust collected in the mix room

If required, the permittee shall demonstrate compliance with the hourly emission limitation in accordance with Methods 1 through 5 of 40 CFR Part 60, Appendix A.

The TPY emission limitation was developed by multiplying the short-term allowable particulate emission limitation (0.02 lb/hr) by the maximum annual hours of operation (8,760 hours), and then dividing by 2,000 lbs per ton. Therefore, provided compliance is shown with the short-term allowable emission limitation, compliance with the annual emission limitation shall also be demonstrated.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- c. Emission Limitation:  
62.5 tons VOC per rolling, 12-month period for emissions units P004 through P006 and P048, combined

Applicable Compliance Method:

Compliance shall be demonstrated based on the record keeping requirements specified in section d)(3) of this permit.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- d. Emission Limitation:  
 The maximum annual styrene usage for emissions units P004 through P006 & P048, combined, shall not exceed 5000 tons per year, based on a rolling, 12-month summation of the styrene usage.

Applicable Compliance Method:

Compliance shall be demonstrated based on the record keeping requirements specified in section d)(3) of this permit.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- e. Emission Limitation:  
 Visible PE shall not exceed 20% opacity, as a 6-minute average.

Applicable Compliance Method: If required, compliance with the visible PE limitation shall be determined in accordance with Test Method 9 as set forth in "Appendix on Test Methods" in 40 CFR, Part 60 ("Standards of Performance for New Stationary Sources").

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- (2) Formulation data or USEPA Method 311 shall be used to determine the monomer (VOC) content of each BMC resin.

[OAC rule 3745-77-07(C)(1) and PTI #03-17421]

- (3) The permittee shall comply with the applicable compliance requirements and test requirements as required under 40 CFR, 63 Subpart WWWW, including the following sections:

63.5835(a) and (c)	General compliance requirements

(2) Additional Terms and Conditions

a. The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3), as effective 11/30/01 are equivalent to the requirements of 40 CFR, Part 63, Subpart WWWW.

The permittee has satisfied the Best Available Technology (BAT) requirements pursuant to OAC paragraph 3745-31-05(A)(3), as effective November 30, 2001, in this permit. On December 1, 2006, paragraph (A)(3) of OAC rule 3745-31-05 was revised to conform to ORC changes effective August 3, 2006 (S.B. 265 changes), such that BAT is no longer required by State regulations for NAAQS pollutant less than ten tons per year. However, that rule revision has not yet been approved by U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-31-05, the requirement to satisfy BAT still exists as part of the federally-approved SIP for Ohio. Once U.S. EPA approves the December 1, 2006 version of 3745-31-05, then these emission limits/control measures no longer apply.

- b. This rule paragraph applies once U.S. EPA approves December 1, 2006 version of OAC rule 3745-31-05, as part of the State Implementation Plan.

The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to volatile organic compounds from this air contaminant source since the uncontrolled potential to emit for volatile organic compounds is less than ten tons per year.

The potential to emit for this emissions unit is 2.93 tons VOC/yr and was determined by multiplying a maximum BMC usage rate of 500 lbs/hr by a maximum VOC (styrene) content of 7.2% by an emission factor of 1.86%, multiplying by 8760 hrs/yr and dividing by 2000 lbs/ton.

- c. The permittee shall comply with the applicable requirements under OAC rule 3745-21-25:

OAC rule 3745-21-25(D)(1), (D)(2), (D)(5), and (D)(6)	VOC control requirements
OAC rule 3745-21-25 (F)(1), (F)(3), (F)(4), and (F)(5)	Calculation of facility's VOC emissions threshold
OAC rule 3745-21-25(R)(1) and (R)(2)	Compliance dates

- d. The permittee shall comply with the applicable standards required for all affected sources at an existing facility pursuant to 40 CFR 63.5805(b). Pursuant to this regulation, this emission unit shall meet the requirements as stated in Table 4 of 40 CFR, Part 63, Subpart WWWW – Work Practice Standards – Item #1 for closed molding operation using compression molding and Item #3 for material storage operation.

- e. The company shall comply with the following applicable requirements under 40 CFR, Part 63, Subpart WWWW:

63.5800	Compliance with the standards in this subpart must be met by the dates specified in Table 2 of this subpart.
