

A. Source Description

The Steelcraft Division of Ingersoll Rand Company (Steelcraft) facility manufactures and applies coatings to various types of steel doors and window frames. This air permit to install (PTI) is a Chapter 31 modification to air PTI number 14-05277 for emissions unit K003 issued on June 11, 2002, and air PTI number 14-04987 for emissions unit K010 issued on December 29, 2000. Emissions units K003 and K010 are both miscellaneous metal parts paint booths that apply coatings and clear coat to metal doors. Steelcraft desires to modify the permit's terms and conditions to reduce the amount of record keeping and reporting requirements for each emissions unit by eliminating the currently permitted use of non-compliance coatings, as well as making the requirements as similar as possible for the two emissions units, as both are located in the same building and are used for the same activities.

B. Facility Emissions and Attainment Status

Steelcraft is currently a Title V facility that is major for hazardous air pollutants (HAP) and volatile organic compounds (VOC). The 2006 VOC emissions = 105.69 tons per year (TPY). This facility is subject to the miscellaneous metal parts maximum achievable control technology (MACT) standard (40 CFR Part 63, Subpart Mmmm), which requires a HAP content limitation of 2.6 lb/gallon of coating necessary. The facility is located in Hamilton County which is non-attainment of the 8-hour ozone standard and the particulate matter 2.5 microns or less in diameter (PM_{2.5}) standard and attainment for all other pollutants.

C. Source Emissions

This permit application is to limit the VOC content to 3.5 lbs of VOC/gallon and also eliminate the synthetic minor provisions of previous air PTIs since the facility will comply with the 40 CFR Part 63, Subpart Mmmm. The application also requests an increase in TPY of VOC emissions to 13.61 TPY for emission unit K003 and 16.05 TPY for emission unit K010. The potential to emit (PTE) is 62.95 TPY of VOC for each emission unit included in this PTI. Since the total PTE is greater than 100 TPY of VOC, non-attainment new source review would apply. However, Steelcraft seeks to maintain the VOC synthetic minor source status.

D. Conclusion

The annual VOC emissions will be limited to 13.61 TPY for emissions unit K003 and 16.05 TPY for emissions unit K010 based on a request from Steelcraft. For purposes of this permitting action and the restrictions listed in the permit, the emissions units will not be subject to non-attainment new source review permitting requirements for VOC.

DATE: 8/16/2007

Steelcraft Div of Ingersoll Rand Co
Paul Schubert
9017 Blue Ash Road
Cincinnati, OH 45242

You are hereby notified that the Ohio Environmental Protection Agency has made a draft action recommending that the Director issue a Permit to Install for the air contaminant source(s) [emissions unit(s)] shown on the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the proposed installation. A public notice concerning the draft permit will appear in the Ohio EPA Weekly Review and the newspaper in the county where the facility will be located. Public comments will be accepted by the field office within 30 days of the date of publication in the newspaper. Any comments you have on the draft permit should be directed to the appropriate field office within the comment period. A copy of your comments should also be mailed to Robert Hodanbosi, Division of Air Pollution Control, Ohio EPA, P.O. Box 1049, Columbus, OH, 43216-1049.

A Permit to Install may be issued in proposed or final form based on the draft action, any written public comments received within 30 days of the public notice, or record of a public meeting if one is held. You will be notified in writing of a scheduled public meeting. Upon issuance of a final Permit to Install a fee of **\$400** will be due. Please do not submit any payment now.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469. If you have any questions about this draft permit, please contact the field office where you submitted your application, or Mike Ahern, Field Operations & Permit Section at (614) 644-3631.

Sincerely,

Michael W. Ahern, Manager

PUBLIC NOTICE

ISSUANCE OF DRAFT PERMIT TO INSTALL **14-05897** FOR AN AIR CONTAMINANT SOURCE

FOR Steelcraft Div of Ingersoll Rand Co

On 8/16/2007 the Director of the Ohio Environmental Protection Agency issued a draft action of a Permit To Install an air contaminant source for **Steelcraft Div of Ingersoll Rand Co**, located at **9017 Blue Ash Road, Cincinnati**, Ohio.

Installation of the air contaminant source identified below may proceed upon final issuance of Permit To Install 14-05897:

Changing from non-complying to complying coatings in use for emission units K003 and K010.

Comments concerning this draft action, or a request for a public meeting, must be sent in writing to the address identified below no later than thirty (30) days from the date this notice is published. All inquiries concerning this draft action may be directed to the contact identified below.

Brad Miller, Hamilton County Department of Environmental Services, 250 William Howard Taft Pkwy, Cincinnati, OH 45219-2660 [(513)946-7777]

**Permit To Install

DRAFT PERMIT TO INSTALL 14-05897

Application Number: 14-05897
Facility ID: 1431050879
Permit Fee: **To be entered upon final issuance**
Name of Facility: Steelcraft Div of Ingersoll Rand Co
Person to Contact: Paul Schubert
Address: 9017 Blue Ash Road
Cincinnati, OH 45242

Location of proposed air contaminant source(s) [emissions unit(s)]:

**9017 Blue Ash Road
Cincinnati, Ohio**

Description of proposed emissions unit(s):

Changing from non-complying to complying coatings in use for emission units K003 and K010.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Steelcraft Div of Ingersoll Rand Co
PTI Application: 14-05897
Issued: To be entered upon final issuance
Part I - GENERAL TERMS AND CONDITIONS

Facility ID: 1431050879

A. State and Federally Enforceable Permit-To-Install General Terms and Conditions

1. Monitoring and Related Recordkeeping and Reporting Requirements

- a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
 - i. The date, place (as defined in the permit), and time of sampling or measurements.
 - ii. The date(s) analyses were performed.
 - iii. The company or entity that performed the analyses.
 - iv. The analytical techniques or methods used.
 - v. The results of such analyses.
 - vi. The operating conditions existing at the time of sampling or measurement.
- b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
 - i. Reports of any required monitoring and/or recordkeeping of federally enforceable information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
 - ii. Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be made to the appropriate Ohio EPA District Office or local air agency. The written

Steelcraft Div of Ingersoll Rand Co

Facility ID: 1431050879

PTI Application: 14-05897

Issued: To be entered upon final issuance

reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. See B.9 below if no deviations occurred during the quarter.

- iii. Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted (i.e., postmarked) to the appropriate Ohio EPA District Office or local air agency every six months, by January 31 and July 31 of each year for the previous six calendar months. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.
 - iv. If this permit is for an emissions unit located at a Title V facility, then each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.
- d. The permittee shall report actual emissions pursuant to OAC Chapter 3745-78 for the purpose of collecting Air Pollution Control Fees.

2. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports shall be submitted pursuant to OAC rule 3745-15-06.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

3. Risk Management Plans

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

4. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain,

Steelcraft Div of Ingersoll Rand Co

Facility ID: 1431050879

PTI Application: 14-05897

Issued: To be entered upon final issuance

the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

5. Severability Clause

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

6. General Requirements

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and re-issuance, or modification
- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

7. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable permit-to-install fees within 30 days after the issuance of any permit-to-install. The

Issued: To be entered upon final issuance

permittee shall pay all applicable permit-to-operate fees within thirty days of the issuance of the invoice.

Steelcraft Div of Ingersoll Rand Co

Facility ID: 1431050879

PTI Application: 14-05897

Issued: To be entered upon final issuance

8. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA and the State and by citizens (to the extent allowed by section 304 of the Act) under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

9. Compliance Requirements

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
 - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with ORC section 3704.08.
 - iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
 - iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of

Steelcraft Div of Ingersoll Rand Co

Facility ID: 1431050879

PTI Application: 14-05897

Issued: To be entered upon final issuance

the Ohio EPA. Progress reports shall contain the following:

- i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
- ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

10. Permit-To-Operate Application

- a. If the permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77, the permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or modified source(s) would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).
- b. If the permittee is required to apply for permit(s) pursuant to OAC Chapter 3745-35, the source(s) identified in this permit is (are) permitted to operate for a period of up to one year from the date the source(s) commenced operation. Permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the source(s) covered by this permit.

11. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

12. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

13. Permit-To-Install

A permit-to-install must be obtained pursuant to OAC Chapter 3745-31 prior to "installation" of "any air contaminant source" as defined in OAC rule 3745-31-01, or "modification", as defined in OAC rule 3745-31-01, of any emissions unit included in

B. State Only Enforceable Permit-To-Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping of state-only enforceable information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from state-only required emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

4. Authorization To Install or Modify

If applicable, authorization to install or modify any new or existing emissions unit included in this permit shall terminate within eighteen months of the effective date of the permit if the owner or operator has not undertaken a continuing program of

Steelcraft Div of Ingersoll Rand Co**Facility ID: 1431050879****PTI Application: 14-05897****Issued: To be entered upon final issuance**

installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

5. Construction of New Sources(s)

This permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. This permit does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the application and terms and conditions of this permit. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of this permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Issuance of this permit is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

6. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

7. Applicability

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

8. Construction Compliance Certification

If applicable, the applicant shall provide Ohio EPA with a written certification (see enclosed form if applicable) that the facility has been constructed in accordance with the permit-to-install application and the terms and conditions of the permit-to-install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

9. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)

Steelcraft Div of Ingersoll Rand Co

Facility ID: 1431050879

PTI Application: 14-05897

Issued: To be entered upon final issuance

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly (i.e., postmarked), by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

Part II - FACILITY SPECIFIC TERMS AND CONDITIONS

A. State and Federally Enforceable Permit To Install Facility Specific Terms and Conditions

None

B. State Only Enforceable Permit To Install Facility Specific Terms and Conditions

None

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**A. State and Federally Enforceable Section****I. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (K003) - Miscellaneous Metal Parts Paint Booth

Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
OAC rule 3745-31-05(A)(3)	<p>Volatile organic compounds (VOC) emissions from the application of coatings, clear coatings, and cleanup materials shall not exceed 351.82 pounds per day (lb/day).</p> <p>See term and condition A.I.2.d.</p> <p>The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(1), OAC rule 3745-31-05(C) and 40 CFR Part 63, Subpart Mmmm.</p>
OAC rule 3745-31-05(C) to avoid non-attainment new source review	<p>VOC emissions shall not exceed 13.61 tons per year (TPY) from the application of coatings and cleanup material used in this emissions unit, based on a rolling, 12-month summation.</p> <p>See terms and conditions A.II.1 through A.II.3.</p>
OAC rule 3745-21-09(U)(1)(a)	See term and condition A.I.2.b.
OAC rule 3745-21-09(U)(1)(d)	See term and condition A.I.2.c.
40 CFR Part 63, Subpart Mmmm	<p>See 40 CFR Part 63.3890.</p> <p>Organic hazardous air pollutants (HAP) emissions shall not exceed 2.6 lbs per gallon (lb/gal) during each 12-month compliance period.</p> <p>See term and condition A.I.2.e.</p>
OAC rule 3745-17-11(B)	Particulate emissions (PE) shall not exceed 0.551 pound per hour.

Emissions Unit ID: K003

<p>ORC 3704.03(T)(4)</p>	<p>The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to the particulate emissions (PE), particulate matter emissions 10 microns and less in diameter (PM10) or particulate matter emissions 2.5 microns and less in diameter (PM2.5) from this air contaminant source because the calculated annual emission rate for PE, PM10 and PM2.5 is less than ten tons per year, taking into account the federally enforceable rule limit of 0.551 lb of PE per hour under OAC rule 3745-17-11(B).</p>
<p>OAC rule 3745-17-07(A)(1)</p>	<p>The visible particulate emissions from any stack shall not exceed 20 percent opacity, as a six-minute average, except as specified by rule.</p>

2. Additional Terms and Conditions

2.a The daily VOC emission limitation outlined above is based upon the emissions unit's Potential to Emit (PTE). Therefore, no daily records are required to demonstrate compliance with these limitations.

(Authority for Term: OAC rule 3745-31-05(A)(3))

2.b The VOC content for each clear coating employed in this emissions unit shall not exceed 4.3 pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.

(Authority for Term: OAC rule 3745-21-09(U)(1)(a))

2.c The VOC content for each coating employed in this emissions unit that is dried at temperatures not exceeding two hundred degrees Fahrenheit shall not exceed 3.5 pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.

(Authority for Term: OAC rule 3745-21-09(U)(1)(d))

2.d The VOC content for each cleanup material employed in this emissions unit shall not exceed 7.3 pounds of VOC per gallon of cleanup material.

(Authority for Term: OAC rule 3745-31-05(A)(3))

2.d Compliance with OAC rule 3745-31-05(A)(3) shall be demonstrated by compliance with the emission limitations, OC content limitations and usage limitations.

2.e Compliance with 40 CFR Part 63, Subpart Mmmm shall be demonstrated by one of the compliance options listed in 40 CFR Part 63, Subpart Mmmm, section

Issued: To be entered upon final issuance
63.3891.

II. Operational Restrictions

1. The amount of coating used in this emissions unit shall not exceed 4500 gallons excluding water and exempt solvents per year. Compliance with the above limitation shall be based on a rolling, 12 month-summation. The permittee has existing records to demonstrate compliance with this limitation upon permit issuance.

(Authority for Term: OAC rule 3745-31-05(C))

2. The amount of clear coating used in this emissions unit shall not exceed 1880 gallons excluding water and exempt solvents per year. Compliance with the above limitation shall be based on a rolling, 12 month-summation. The permittee has existing records to demonstrate compliance with this limitation upon permit issuance.

(Authority for Term: OAC rule 3745-31-05(C))

3. The amount of cleanup material used in this emissions unit shall not exceed 450 gallons per year. Compliance with the above limitation shall be based on a rolling, 12 month-summation. The permittee has existing records to demonstrate compliance with this limitation upon permit issuance.

(Authority for Term: OAC rule 3745-31-05(C))

III. Monitoring and/or Recordkeeping Requirements

1. The permittee shall collect and record the following information each month for the emission unit:
 - a. the name and identification number of each coating and cleanup material;
 - b. the VOC content of each cleanup material, as applied;
 - c. the VOC content of each coating material used, excluding water and exempt solvents, as applied.;
 - d. the number of gallons of each coating, excluding water and exempt solvents, as applied and cleanup material employed;
 - e. the updated rolling twelve month total combined coatings, in gallons excluding

Emissions Unit ID: K003

water and exempt solvents, as applied and cleanup materials employed, in gallons; and

- f. the updated rolling twelve month total combined VOC emissions from all coatings and cleanup materials employed, in tons.

(Authority for Term: OAC rule 3745-31-05(A)(3) and OAC rule 3745-31-05(C))

2. See 40 CFR Part 63, Subpart Mmmm (40 CFR 63.3881-3981).

IV. Reporting Requirements

1. The permittee shall notify the Hamilton County Department of Environmental Services in writing of any monthly record showing the use of noncomplying coatings or cleanup materials. The notification shall include a copy of such record and shall be sent to the Hamilton County Department of Environmental Services within 30 days following the end of the calendar month in which the use of noncomplying coatings was recorded.

(Authority for Term: OAC rule 3745-21-09(B)(3))

2. The permittee shall notify the Hamilton County Department of Environmental Services of any exceedance of the rolling, 12-month VOC emission limitation set forth in term and condition A.I.1 or the coating or cleanup usage limitation in terms and conditions A.II.1, A.II.2, and A.II.3. The reports shall be submitted to the Director (the Hamilton County Department of Environmental Services) by January 31, April 30, July 31 and October 31 of each year and shall cover the previous three calendar months (October through December, January through March, April through June and July through September, respectively.)

If no exceedances occurred, the permittee shall state so in the report.

(Authority for Term: OAC rule 3745-31-05(C))

3. The permittee shall submit annual reports to the Hamilton County Department of Environmental Services quantifying the total VOC emissions from this emissions unit and the number of gallons of coating, excluding water and exempt solvents, as applied and cleanup materials used from this emissions unit. This report is due by January 31 of each year and shall cover the previous calendar year.

(Authority for Term: OAC rule 3745-31-05(C))

4. See 40 CFR Part 63, Subpart Mmmm (40 CFR 63.3881-3981)

V. Testing Requirements

Issued: To be entered upon final issuance

1. Compliance with the emission limitations in Section A.I.1 of these terms and conditions shall be determined in accordance with the following method(s):
 - a. Emission Limitation:
Volatile organic compounds (VOC) emissions from the application of coatings, clear coatings, and cleanup material shall not exceed 351.82 pounds per day (lb/day).

Applicable Compliance Method:

Compliance with the above VOC daily emission limitation shall be determined by multiplying the VOC content of the coating, clear coating, and cleanup material,

Issued: To be entered upon final issuance

excluding water and exempt solvents, as applied by the daily usage rate, excluding water and exempt solvents, as applied.

(Authority for Term: OAC rule 3745-31-05(A)(3))

b. Emission Limitation:

VOC emissions shall not exceed 13.61 tons per year (TPY) from the application of coatings and cleanup material used in this emissions unit, based on a rolling, 12-month summation.

Applicable Compliance Method:

Compliance with the above VOC annual emission limitation shall be determined by multiplying the VOC content of the coating, clear coating, and cleanup materials by each of their respective annual usage rates. This amount is then divided by 2,000 pounds to convert to tons of VOC per year. The tons of VOC per rolling, 12-month from the coating, clear coating, and cleanup material are then added together to give the total tons of VOC per year.

(Authority for Term: OAC rule 3745-31-05(C))

c. Emission Limitation:

The VOC content for each clear coating employed in this emissions unit shall not exceed 4.3 pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.

The VOC content for each coating employed in this emissions unit that is dried at temperatures not exceeding two hundred degrees Fahrenheit shall not exceed 3.5 pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.

The VOC content for each cleanup material employed in this emissions unit shall not exceed 7.3 pounds of VOC per gallon of cleanup material.

Applicable Compliance Method:

If required, USEPA methods 24 and 24A shall be used to determine the VOC content for coatings. If, pursuant 40 CFR Part 60, Appendix A, an owner or operator determines that Method 24 or 24A cannot be used for a particular coating, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24 or 24A.

Emissions Unit ID: K003

(Authority for Term: OAC rule 3745-21-09(U)(1)(a), OAC rule 3745-21-09(U)(1)(d))

- d. Emission Limitation:
Particulate emissions (PE) shall not exceed 0.551 pound per hour.

Applicable Compliance Method:

The hourly PE rate limitation is based on Table 1 in OAC rule 3745-17-11.

To determine the worst case PE rate, the following equation shall be used:

$E = \text{maximum coating solids usage rate, in pounds per hour,} \times (1-TE) \times (1-CE)$

where E = PE rate (lbs/hr);

TE = fractional transfer efficiency, which is the ratio of the amount of coating solids deposited on the coated part to the amount of coating solids used (0.55); and

CE = fractional control efficiency of the control equipment (0.99).

When requested by the Ohio EPA, the permittee shall demonstrate compliance with the above emissions limitation pursuant to OAC rule 3745-17-03(B)(10).

(Authority for Term: OAC rule 3745-17-11(B))

- e. Emission Limitation:
Organic hazardous air pollutants (HAP) emissions shall not exceed 2.6 lb per gallon (lb/gal) during each 12-month compliance period.

Applicable Compliance Method:

See 40 CFR Part 63, Subpart M (40 CFR 63.3881-3981)

- f. Emission Limitation:
Visible particulate emissions shall not exceed 20 percent opacity, as a six-minute average, except as provided by the rule.

Applicable Compliance Method:

If required, compliance shall be determined through visible emissions observations performed in accordance with 40 CFR Part 60, Appendix A, Method 9, and the procedures specified in OAC rule 3745-17-03(B)(1).

- g. Emission Limitation:
The controlled potential to emit for PE, PM10 and PM2.5 is less than ten tons per year.

Issued: To be entered upon final issuance

Applicable Compliance Method:

The annual PE, PM10 and PM2.5 emission rate is based on this emission unit's potential to emit. The annual PE, PM10 and PM2.5 emission rate is calculated by multiplying the maximum hourly emission rate by 8760 hours per year/2000 pounds per ton. The PM10 and PM2.5 emission rates are assumed to be less than or equal to the PE rate.

2. Compliance with the requirements of terms and conditions A.II.1, A.II.2, and A.II.3 shall be demonstrated by the record keeping required in term and condition A.III.1.

(Authority for Term: OAC rule 3745-31-05(C))

VI. Miscellaneous Requirements

1. The terms and conditions of this air permit to install shall supercede the terms and conditions of air permit to install number 14-05277 issued on June 11, 1996.

Emissions Unit ID: K003

B. State Only Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Part III - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

Operations, Property, and/or Equipment - (K010) - Miscellaneous Metal Parts Paint Line

Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
OAC rule 3745-31-05(A)(3)	<p>Volatile organic compounds (VOC) emissions from the application of coatings, clear coatings, and cleanup materials shall not exceed 351.82 pounds per day (lb/day).</p> <p>See term and condition A.I.2.d.</p> <p>The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(1), OAC rule 3745-31-05(C) and 40 CFR Part 63, Subpart Mmmm.</p>
OAC rule 3745-31-05(C) to avoid non-attainment new source review	<p>VOC emissions shall not exceed 16.05 tons per year (TPY) from the application of coatings and cleanup material used in this emissions unit, based on a rolling, 12-month summation.</p> <p>See terms and conditions A.II.1 through A.II.3.</p>
OAC rule 3745-21-09(U)(1)(a)	See term and condition A.I.2.b.
OAC rule 3745-21-09(U)(1)(d)	See term and condition A.I.2.c.
40 CFR Part 63, Subpart Mmmm	<p>See 40 CFR Part 63.3890.</p> <p>Organic hazardous air pollutants (HAP) emissions shall not exceed 2.6 lbs per gallon (lb/gal) during each 12-month compliance period.</p> <p>See term and condition A.I.2.e.</p>
OAC rule 3745-17-11(B)	Particulate emissions (PE) shall not exceed 0.551 pound per hour.

Issued: To be entered upon final issuance

ORC 3704.03(T)(4)	The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to the particulate emissions (PE), particulate matter emissions 10 microns and less in diameter (PM10) or particulate matter emissions 2.5 microns and less in diameter (PM2.5) from this air contaminant source because the calculated annual emission rate for PE, PM10 and PM2.5 is less than ten tons per year, taking into account the federally enforceable rule limit of 0.551 lb of PE per hour under OAC rule 3745-17-11(B).
OAC rule 3745-17-07(A)(1)	The visible particulate emissions from any stack shall not exceed 20 percent opacity, as a six-minute average, except as specified by rule.

2. Additional Terms and Conditions

- 2.a** The daily VOC emission limitation outlined above is based upon the emissions unit's Potential to Emit (PTE). Therefore, no daily records are required to demonstrate compliance with these limitations.

(Authority for Term: OAC rule 3745-31-05(A)(3))

- 2.b** The VOC content for each clear coating employed in this emissions unit shall not exceed 4.3 pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.

(Authority for Term: OAC rule 3745-21-09(U)(1)(a))

- 2.c** The VOC content for each coating employed in this emissions unit that is dried at temperatures not exceeding two hundred degrees Fahrenheit shall not exceed 3.5 pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.

(Authority for Term: OAC rule 3745-21-09(U)(1)(d))

- 2.d** The VOC content for each cleanup material employed in this emissions unit shall not exceed 7.3 pounds of VOC per gallon of cleanup material.

(Authority for Term: OAC rule 3745-31-05(A)(3))

- 2.d** Compliance with OAC rule 3745-31-05(A)(3) shall be demonstrated by compliance with the emission limitations, OC content limitations and usage

Emissions Unit ID: K010

limitations.

- 2.e** Compliance with 40 CFR Part 63, Subpart M MMM shall be demonstrated by one of the compliance options listed in 40 CFR Part 63, Subpart M MMM, section 63.3891.

II. Operational Restrictions

1. The amount of coating used in this emissions unit shall not exceed 5500 gallons excluding water and exempt solvents per year. Compliance with the above limitation shall be based on a rolling, 12 month-summation. The permittee has existing records to demonstrate compliance with this limitation upon permit issuance.

(Authority for Term: OAC rule 3745-31-05(C))

2. The amount of clear coating used in this emissions unit shall not exceed 2200 gallons excluding water and exempt solvents per year. Compliance with the above limitation shall be based on a rolling, 12 month-summation. The permittee has existing records to demonstrate compliance with this limitation upon permit issuance.

(Authority for Term: OAC rule 3745-31-05(C))

3. The amount of cleanup material used in this emissions unit shall not exceed 450 gallons per year. Compliance with the above limitation shall be based on a rolling, 12 month-summation. The permittee has existing records to demonstrate compliance with this limitation upon permit issuance.

(Authority for Term: OAC rule 3745-31-05(C))

III. Monitoring and/or Recordkeeping Requirements

1. The permittee shall collect and record the following information each month for the emission unit:
- the name and identification number of each coating and cleanup material;
 - the VOC content of each cleanup material, as applied;
 - the VOC content of each coating material used, excluding water and exempt solvents, as applied.;
 - the number of gallons of each coating, excluding water and exempt solvents, as applied and cleanup material employed;
 - the updated rolling twelve month total combined coatings, in gallons excluding water and exempt solvents, as applied and cleanup materials employed, in

Issued: To be entered upon final issuance

gallons; and

- f. the updated rolling twelve month total combined VOC emissions from all coatings and cleanup materials employed, in tons.

(Authority for Term: OAC rule 3745-31-05(A)(3) and OAC rule 3745-31-05(C))

2. See 40 CFR Part 63, Subpart M (40 CFR 63.3881-3981).

IV. Reporting Requirements

1. The permittee shall notify the Hamilton County Department of Environmental Services in writing of any monthly record showing the use of noncomplying coatings or cleanup materials. The notification shall include a copy of such record and shall be sent to the Hamilton County Department of Environmental Services within 30 days following the end of the calendar month in which the use of noncomplying coatings was recorded.

(Authority for Term: OAC rule 3745-21-09(B)(3))

2. The permittee shall notify the Hamilton County Department of Environmental Services of any exceedance of the rolling, 12-month VOC emission limitation set forth in term and condition A.I.1 or the coating or cleanup usage limitation in terms and conditions A.II.1, A.II.2, and A.II.3. The reports shall be submitted to the Director (the Hamilton County Department of Environmental Services) by January 31, April 30, July 31 and October 31 of each year and shall cover the previous three calendar months (October through December, January through March, April through June and July through September, respectively.)

If no exceedances occurred, the permittee shall state so in the report.

(Authority for Term: OAC rule 3745-31-05(C))

3. The permittee shall submit annual reports to the Hamilton County Department of Environmental Services quantifying the total VOC emissions from this emissions unit and the number of gallons of coating, excluding water and exempt solvents, as applied and cleanup materials used from this emissions unit. This report is due by January 31 of each year and shall cover the previous calendar year.

(Authority for Term: OAC rule 3745-31-05(C))

Emissions Unit ID: K010

4. See 40 CFR Part 63, Subpart M MMM (40 CFR 63.3881-3981)

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I.1 of these terms and conditions shall be determined in accordance with the following method(s):

- a. Emission Limitation:

Volatile organic compounds (VOC) emissions from the application of coatings, clear coatings, and cleanup material shall not exceed 351.82 pounds per day (lb/day).

Applicable Compliance Method:

Compliance with the above VOC daily emission limitation shall be determined by multiplying the VOC content of the coating, clear coating, and cleanup material,

Issued: To be entered upon final issuance

excluding water and exempt solvents, as applied by the daily usage rate, excluding water and exempt solvents, as applied.

(Authority for Term: OAC rule 3745-31-05(A)(3))

- b. Emission Limitation:
VOC emissions shall not exceed 16.05 tons per year (TPY) from the application of coatings and cleanup material used in this emissions unit, based on a rolling, 12-month summation.

Applicable Compliance Method:

Compliance with the above VOC annual emission limitation shall be determined by multiplying the VOC content of the coating, clear coating, and cleanup materials by each of their respective annual usage rates. This amount is then divided by 2,000 pounds to convert to tons of VOC per year. The tons of VOC per rolling, 12-month from the coating, clear coating, and cleanup material are then added together to give the total tons of VOC per year.

(Authority for Term: OAC rule 3745-31-05(C))

- c. Emission Limitation:
The VOC content for each clear coating employed in this emissions unit shall not exceed 4.3 pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.

The VOC content for each coating employed in this emissions unit that is dried at temperatures not exceeding two hundred degrees Fahrenheit shall not exceed 3.5 pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.

The VOC content for each cleanup material employed in this emissions unit shall not exceed 7.3 pounds of VOC per gallon of cleanup material.

Applicable Compliance Method:

If required, USEPA methods 24 and 24A shall be used to determine the VOC content for coatings. If, pursuant 40 CFR Part 60, Appendix A, an owner or operator determines that Method 24 or 24A cannot be used for a particular coating, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24 or 24A.

Issued: To be entered upon final issuance

(Authority for Term: OAC rule 3745-21-09(U)(1)(a), OAC rule 3745-21-09(U)(1)(d))

- d. Emission Limitation:
Particulate emissions (PE) shall not exceed 0.551 pound per hour.

Applicable Compliance Method:
The hourly PE rate limitation is based on Table 1 in OAC rule 3745-17-11.

To determine the worst case PE rate, the following equation shall be used:

$E = \text{maximum coating solids usage rate, in pounds per hour,} \times (1-TE) \times (1-CE)$

where $E = \text{PE rate (lbs/hr)}$;

$TE = \text{fractional transfer efficiency, which is the ratio of the amount of coating solids deposited on the coated part to the amount of coating solids used (0.55)}$; and

$CE = \text{fractional control efficiency of the control equipment (0.99)}$.

When requested by the Ohio EPA, the permittee shall demonstrate compliance with the above emissions limitation pursuant to OAC rule 3745-17-03(B)(10).

(Authority for Term: OAC rule 3745-17-11(B))

- e. Emission Limitation:
Organic hazardous air pollutants (HAP) emissions shall not exceed 2.6 lb per gallon (lb/gal) during each 12-month compliance period.

Applicable Compliance Method:
See 40 CFR Part 63, Subpart M (40 CFR 63.3881-3981)

- f. Emission Limitation:
Visible particulate emissions shall not exceed 20 percent opacity, as a six-minute average, except as provided by the rule.

Applicable Compliance Method:
If required, compliance shall be determined through visible emissions observations performed in accordance with 40 CFR Part 60, Appendix A,

Emissions Unit ID: K010

Method 9, and the procedures specified in OAC rule 3745-17-03(B)(1).

g. Emission Limitation:

The controlled potential to emit for PE, PM10 and PM2.5 is less than ten tons per year.

Applicable Compliance Method:

The annual PE, PM10 and PM2.5 emission rate is based on this emission unit's potential to emit. The annual PE, PM10 and PM2.5 emission rate is calculated by multiplying the maximum hourly emission rate by 8760 hours per year / 2000 pounds per ton. The PM10 and PM2.5 emission rates are assumed to be less than or equal to the PE rate.

Issued: To be entered upon final issuance

2. Compliance with the requirements of terms and conditions A.II.1, A.II.2, and A.II.3 shall be demonstrated by the record keeping required in term and condition A.III.1.

(Authority for Term: OAC rule 3745-31-05(C))

VI. Miscellaneous Requirements

1. The terms and conditions of this air permit to install shall supercede the terms and conditions of air permit to install number 14-04987 issued on December 28, 2000.

Issued: To be entered upon final issuance

B. State Only Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures.
