Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate (PTIO) for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the permit. A public notice will appear in the Ohio Environmental Protection Agency (EPA) Weekly Review and the local newspaper, Dayton Daily News. A copy of the public notice and the draft permit are enclosed. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall
Permit Review/Development Section
Ohio EPA, DAPC
50 West Town Street Suite 700
PO Box 1049
Columbus, Ohio 43216-1049

and Regional Air Pollution Control Agency
117 South Main Street
Dayton, OH 45422-1280

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified if a public hearing is scheduled. A decision on issuing a final permit-to-install will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Regional Air Pollution Control Agency at (937)225-4435.

Sincerely,

Erica R. Engel-Ishida, Manager
Permit Issuance and Data Management Section, DAPC

PUBLIC NOTICE

3/19/2015 Issuance of Draft Air Pollution Permit-To-Install and Operate

Rubber Seal

5751 N. WEBSTER STREET,

Dayton, OH 45414

Montgomery County

FACILITY DESC.: Paint and Coating Manufacturing

PERMIT #: P0118432

PERMIT TYPE: Initial Installation

PERMIT DESC: Installation PTIO for two liquid polish and wax mixing units.

The Director of the Ohio Environmental Protection Agency issued the draft permit above. The permit and complete instructions for requesting information or submitting comments may be obtained at: <http://epa.ohio.gov/dapc/permitonline.aspx> by entering the permit # or: Andrew Weisman, Regional Air Pollution Control Agency, 117 South Main Street, Dayton, OH 45422-1280. Ph: (937)225-4435

Permit Strategy Write-Up

1. Check all that apply:

Synthetic Minor Determination

Netting Determination

2. Source Description:

Rubber Seal is a paints and allied products manufacturing facility located in Dayton, Ohio. Rubber Seal has submitted a PTIO application to manufacture polishes and waxes in two new 400 gallon mixing tanks. The new mixing tanks have been identified as Ohio EPA emissions unit P023 and P024.

3. Facility Emissions and Attainment Status:

Rubber seal is located in Montgomery County which is currently designated as attainment for all criteria pollutants. Facility-wide potential uncontrolled emissions of volatile organic compounds (VOC) are 336 tons per year. A variety of hazardous air pollutants (HAP) are included in the VOCs used at Rubber Seal and potential emissions of individual and combined HAP are in excess of 10 and 25 tons respectively. Potential Emissions of all other criteria pollutants from the trivial sources at the facility are well below major source thresholds.

Rubber Seal has previously established synthetic minor emissions limitations in a federally enforceable PTIO (PTIO P0114940 issued 8/27/13) to limit air emissions from the facility on a rolling 12-month basis to 37.4 tons VOC, 9.9 tons individual HAP and 24.9 tons combined HAP on a rolling 12-month basis to preclude compliance with major new source review, Title V major source permitting and maximum achievable control technology (MACT) requirements.

4. Source Emissions:

Potential uncontrolled annual VOC emissions from each new polish and wax mixer (emissions units P023 and P024) are 24.1 tons each and 48.2 tons combined. This emissions rate is based on maximum annual production rates (300,000 gallons each, 600,000 gallons combined) with no production restrictions. In order to make VOC emissions reflect projected actual production, Rubber Seal has elected to limit production to 200,000 gallons combined for emissions units P023 and P024. By limiting annual polish and wax production annual VOC emissions will be reduced to 11.0 tons combined.

Adding the 11.0 tons per year VOC to the previously established 37.4 tons rolling 12-month VOC emissions will increase the synthetic minor emissions limitation for the facility to 48.4 tons VOC on a rolling 12-month basis. Potential uncontrolled VOC emissions and the rolling 12-month VOC emissions limitations for Rubber Seal are summarized in the table attached to this write up.

5. Conclusion:

The VOC emissions increase of 11.0 tons on a rolling 12-month basis from the installation of new emissions units P023 and P024 will cause the combined emissions from Rubber Seal to increase to

48.4 tons on a rolling 12-month basis. Individual and combined HAP emissions will continue to be limited to less than 9.9 tons and 24.9 tons, respectively on a rolling 12-month basis. The VOC and HAP emissions limitations combined with the previously established rolling 12-month production limitations will preclude compliance with major source (Title V, MACT and NSR) air emissions permitting requirements for Rubber Seal.

6. Please provide additional notes or comments as necessary:

None

7. Total Permit Allowable Emissions Summary (for informational purposes only):

<u>Pollutant</u>	<u>Tons Per Year</u>
<u>VOC</u>	<u>11.0</u>

Emission Unit	Product Description	Potential VOC Emissions (tons/year)	Rolling 12-month VOC Emissions Limit (tons) ¹	Rolling 12-Month Production Limitation (gallons) ²
P001	Clear Products	4.76	4.89	600,000
P002		4.76		
P003		4.76

P024		24.1		
		SubTotal	25.6	
P009	Tank Cleanup	5.32	5.32	n/a
P013	Silicones	7.67	7.67	n/a
K001 (Exempt)	QC Spray Booth Bldg 2	3.00	3.00	n/a
K002 (Exempt)	R&D Spray Booth Bldg 1	3.00	3.00	n/a
Exempt	QC R&D Spray Booth Bldg 2	3.00	3.00	n/a
De Minimis	Planetary gray	0.11	0.11	n/a
De Minimis	Panetary silver	0.11	0.11	n/a
De Minimis	Dispenser gray	0.00	0.00	n/a
De Minimis	Dispenser blue	0.00	0.00	n/a
De Minimis	Pony Mixer	0.63	0.63	n/a
Total:		336	48.4	n/a

¹ Rubber Seal previously established rolling 12-month HAP emissions limitations, 9.9 tons individual HAP and 24.9 tons combined HAP for the whole facility.

² Only the emissions units with rolling 12-month production limitations require rolling 12-month VOC emissions limitations. All other emissions units are permitted at their potential to emit for VOC.

Permit Evaluation Report (PER) Annual Date: To be entered upon final issuance

This document constitutes issuance to:

Rubber Seal
5751 N. WEBSTER STREET
Dayton, OH 45414

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Regional Air Pollution Control Agency
117 South Main Street
Dayton, OH 45422-1280
(937)225-4435

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Craig W. Butler
Director

Authorization (continued)

Permit Number: P0118432

Permit Description: Installation PTIO for two liquid polish and wax mixing units.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Group Name: Polish and wax mixers

Emissions Unit ID:	P023
Company Equipment ID:	Polish and Wax Mixing Unit 1
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable
Emissions Unit ID:	P024
Company Equipment ID:	Polish and Wax Mixing Unit 2
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

Draft Permit-to-Install and Operate

Rubber Seal

Permit Number: P0118432

Facility ID: 0857733184

Effective Date: To be entered upon final issuance

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Regional Air Pollution Control Agency in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Draft Permit-to-Install and Operate

Rubber Seal

Permit Number: P0118432

Facility ID: 0857733184

Effective Date: To be entered upon final issuance

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) B.2. through B.8.

2. The combined VOC emissions from the emissions unit groups identified below shall not exceed the rolling 12-month limitations listed in the following table:

	Emissions Unit Identification Numbers	Emissions Unit Group Description	Rolling 12-Month VOC Emissions Limitation (tons)	Rolling 12-Month Production Limitation (gallons)
a)	P001, P002, P003, P004, P008, P011	Clear Products Manufacturing	4.89	600,000
b)	P005	Water Based Primer Manufacturing	1.24	120,000
c)	P006, P010, P012, P022	Primer Products Manufacturing	6.55	185,000
d)	P007	Undercoat Products	0.66	20,000
e)	P019, P020, P021	Sand Mills	1.26	35,000
f)	P023, P024	Polish and Wax Mixers	11.0	200,000

3. The permittee shall collect and record the following information each month for each emissions unit group listed in the table [2.a) through 2.f)], above:
 - a) The VOC emission rate for each emissions unit, in tons, (calculated according to the applicable PTIO for each emissions unit);
 - b) The combined VOC emission rate for each emissions unit group, in tons, (the sum of the monthly VOC emissions rates for all the emissions units in each emissions unit group);
 - c) The rolling 12-month VOC emissions rate, in tons, for each or emissions unit group (the sum of the VOC emissions calculated according to 3.b) for the previous 12-months).

With the exception of new emissions units P023 and P024, the emissions units at the facility have been in operation for more than 12 months and, as such, the permittee has existing records to generate the rolling 12-month VOC emissions rates and production limitations, upon issuance of this permit. The monthly VOC emissions rates and production limitations for the first 12 months of operation for new emissions units P023 and P024 are addressed in the Emissions Unit Terms and Conditions (Section C.) for those emissions units.

4. The permittee shall submit quarterly deviation (excursion) reports, in accordance with the Standard Terms and Conditions of this permit, of the following information:
- a) An identification of each month during which the rolling, 12-month VOC emissions rate from the emissions unit groups listed in 2.a) through 2.e) exceeds its rolling 12-month emissions limit and the actual rolling, 12-month VOC emissions rate for that month.

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency). Unless other arrangements have been approved by the Director, all notifications and reports shall be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal

5. The emissions of hazardous air pollutants (HAPs), as defined in Section 112(b) of Title III of the Clean Air Act, from all the emissions units at this facility, shall not exceed 9.9 TPY for any individual HAP, as a rolling, 12-month sum, and 24.9 TPY for any combination of HAPs, as a rolling 12-month sum.
6. The permittee shall collect and record the following information each month for each emissions unit at the facility:
- a) The identification and formulation of each product manufactured and each cleanup material employed.
 - b) The individual HAP content of each product manufactured and each cleanup material employed, in pounds of individual HAP per gallon of material.
 - c) The volume, in gallons, of each product manufactured and cleanup material employed.
 - d) The total individual HAP emissions, in tons, from all products manufactured, and cleanup materials. (i.e., the sum of 6.b) x 6.c) x (appropriate loss factor for each product manufactured) for each individual HAP, divided by 2,000 lbs/ton.)
 - e) The rolling, 12-month summation of the total individual HAP emissions from all emissions units at the facility, in tons (the sum of the emissions from 6.d) for the previous 12 months for each individual HAP).
 - f) The total combined HAP emissions, in tons, from all products manufactured, and cleanup materials, (the sum of the emissions from 6.d) for all HAPs combined).
 - g) The rolling, 12-month summation of the total combined HAP emissions from all emissions units at the facility, in tons. (the sum of the emissions from 6.f) for the previous 12 months).

With the exception of new emissions units P023 and P024, the emissions units at the facility have been in operation for more than 12 months and, as such, the permittee has existing records to generate the rolling, 12-month emissions rates, upon issuance of this permit. The

HAP emissions for new emissions units P023 and P024 will be added to the monthly HAP emissions calculations upon completion of installation.

7. The permittee shall submit quarterly deviation (excursion) reports, in accordance with the Standard Terms and Conditions, of this permit, of the following information:
 - a) An identification of each month during which the rolling, 12-month individual HAP emissions rate (from the facility) exceeded 9.9 tons, and the actual rolling, 12-month sum of each individual HAP emissions rate (from the facility) for each such month.
 - b) An identification of each month during which the rolling, 12-month combination of all HAP emissions rates (from the facility) exceeded 24.9 tons, and the actual rolling, 12-month sum of the combination of all HAP emissions rates (from the facility) for each such month.

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency). Unless other arrangements have been approved by the Director, all notifications and reports shall be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal.

8. The permittee shall submit annual reports that summarize the annual emissions of each individual HAP and the combined emissions of all the HAPs for the facility. The reports shall be submitted by April 15 of each year. This reporting requirement may be satisfied by including and identifying the specific emission data for this emissions unit in the annual Synthetic Minor Title V Fee Emission Report.
9. The Ohio EPA has determined that this facility may be subject to the requirements of 40 CFR Part 63 Subpart CCCCCC, National Emission Standards for Hazardous Air Pollutants (NESHAP) for Paints and Allied Products Manufacturing Area Sources. Although Ohio EPA has determined that this Generally Available Control Technology NESHAP (GACT) may apply, at this time Ohio EPA does not have the authority to enforce this standard. Instead, U.S. EPA has the authority to enforce this standard. Please be advised, that all requirements associated with this rule are in effect and shall be enforced by U.S. EPA. For more information on the area source rules, please refer to the following U.S. EPA website: <http://www.epa.gov/ttn/atw/area/arearules.html>.

Permit Number: P0118432

Facility ID: 0857733184

Effective Date: To be entered upon final issuance

C. Emissions Unit Terms and Conditions

1. Emissions Unit Group -Polish and wax mixers: P023,P024,

EU ID	Operations, Property and/or Equipment Description
P023	400 gallon polish and wax products mix tank
P024	400 gallon polish and wax products mix tank

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. b)(1)b.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	The volatile organic compound (VOC) content of any product manufactured in these emissions units shall not exceed 5.5 pounds VOC per gallon.
b.	OAC rule 3745-31-05(D) (Synthetic Minor to avoid Title V, MACT and PSD)	The VOC content of any product manufactured in these emissions units shall not exceed 5.5 pounds VOC per gallon. The combined VOC emissions from these emissions units shall not exceed 11.0 tons on a rolling 12-basis. See Sections B.2. through B.8. and b)(2)a.

(2) Additional Terms and Conditions

- a. The combined volume of polish and wax products manufactured in emissions units P023 and P024 shall not exceed 200,000 gallons on a rolling 12-month basis.

To ensure enforceability during the first 12 calendar months of operation following the issuance of this permit, the permittee shall not exceed the production levels specified in the following table:

Month	Maximum Allowable Cumulative Production (gallons)
1	25,000
1-2	50,000
2-3	75,000
3-4	100,000
4-5	125,000
5-6	150,000
6-7	175,000
7-8	200,000
8-9	200,000
9-10	200,000
10-11	200,000
11-12	200,000

c) Operational Restrictions

- (1) None.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information each month for emissions units P023 and P024:
 - a. The company identification and formulation for each product manufactured in each emissions unit;
 - b. The VOC content, in pounds per gallon, of each product manufactured in each emissions units unit;

- c. The volume, in gallons, of each product manufactured in each emissions unit;
 - d. The total volume, in gallons, of all products manufactured in each emissions unit (the sum of the volume of all the products manufactured in each emissions unit from d)(1)c.);
 - e. The combined volume, in gallons, of all products manufactured in both emissions units (the sum of all products manufactured from d)(1)d. for both emissions units);
 - f. The VOC emissions from each emissions unit, in tons per month, (the sum of d)(1)b. multiplied by d)(1)c. multiplied by a solvent loss factor of 2% (0.02) for all of the products manufactured in each emissions unit);
 - g. The combined VOC emissions, in tons per month, for both emissions units (the sum of the monthly VOC emissions for each emissions unit from d)(1)f.); and
 - h. the combined rolling 12-month VOC emissions rate for both emissions units (the sum of the monthly VOC emissions rates from d)(1)f. for the previous 12-months).
- (2) Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745 114 01, will be less than 1.0 ton per year. OAC Chapter 3745 31 requires a permittee to apply for and obtain a new or modified PTIO prior to making a "modification" as defined by OAC rule 3745 31 01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new PTIO.
- e) Reporting Requirements
- (1) The permittee shall submit quarterly deviation (excursion) reports that identify:
 - a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - i. 5.5 pounds VOC per gallon concentration limitation for any product manufactured;
 - ii. Any exceedances of the 200,000 gallons rolling 12-month production limitation; and
 - iii. Any exceedances of the 11.0 tons VOC rolling 12-month emissions limitation.

- b. the probable cause of each deviation (excursion);
- c. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
- d. the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be submitted by the due date identified in the Authorization section of this permit. The PER shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.

All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications, or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the District Office or Local Air Agency, and/or any other individual or organization specifically identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the required application, notification or report is considered to be "submitted" on the date the submission is successful using a valid electronic signature. Signature by the signatory authority may be represented as provided through procedures established in Air Services.

f) **Testing Requirements**

- (1) Compliance with the Emissions Limitations specified in b) shall be determined in accordance with the following methods:

- a. Emissions Limitation:

The VOC content of any product manufactured in these emissions units shall not exceed 5.5 pounds VOC per gallon.

Applicable Compliance Method:

Compliance shall be based on the formulation of each product manufactured and the record keeping specified in d)(1).

If requested, the VOC content of the materials manufactured in these emissions units shall be determined in accordance with OAC rule 3745-21-10 and U.S. EPA Reference Method 24 of 40 CFR Part 60, Appendix A.

b. Emissions Limitation:

The combined VOC emissions from these emissions units shall not exceed 11.0 tons on a rolling 12-basis. .

Applicable Compliance Method:

Compliance shall be based on the record keeping specified in d)(1).

g) Miscellaneous Requirements

(1) None.
