

Facility ID: 0857092053 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0857092053 Emissions Unit ID: P001 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Plastisol rota-dip process with ESP control (24 machines)	OAC rule 3745-31-05(A)(3) PTI 08-2326	The combined particulate emissions from all 24 machines that make up this emissions unit shall not exceed 13.2 pounds per hour and 13.5 tons per year (TPY).
	OAC rule 3745-17-07(A)(1)	Compliance with the requirements of this rule also include compliance with the requirements of OAC rules 3745-17-07(A) and 3745-17-11(B)(1). The visible particulate emissions from any stack shall not exceed 20 percent opacity as a six-minute average.
	OAC rule 3745-17-11(B)(1)	The particulate emissions from any plastisol dip machine in this emissions unit shall not exceed 0.551 pound per hour.

2. Additional Terms and Conditions

- (a) The 13.2 lbs/hour particulates limitation was established for PTI purposes to reflect the potential to emit for these plastisol machines. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with this limit.

B. Operational Restrictions

1. The maximum annual operating hours for this emissions unit shall not exceed 2,040 for each machine.
2. The permittee shall operate the ESP system for control of particulate emissions whenever this emissions unit is in operation.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall maintain monthly records of the operating hours for each machine of this emissions unit.
2. The permittee shall perform inspections of the ESP control equipment associated with this emissions unit. These inspections shall assure the proper operation of the control equipment and identify any necessary repairs to the control system.
3. The permittee shall maintain daily records that document any time periods when the ESP was not in service when the emissions unit was in operation.

D. Reporting Requirements

1. The permittee shall submit annual reports which identify any exceedances of the annual operating hours limitation, as well as the corrective actions that were taken to achieve compliance. These reports shall be submitted by January 31 of each year.
2. The permittee shall notify the Director (appropriate District Office or local air agency) in writing of any record showing that the ESP was not in service when this emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (appropriate District Office or local air agency) within 30 days after the event occurs.

E. Testing Requirements

1. Compliance with the emission limitation(s) in Section A.1. of these terms and conditions shall be determined in accordance with the following method(s):
 - Emission Limitation -
The particulate emissions from any plastisol dip machine in this emissions unit shall not exceed 0.551 pound per hour.
 - Applicable Compliance Method -
Compliance shall be determined by multiplying the maximum hourly plastisol usage rate by the company derived loss factor of 1% and by the ESP control efficiency of 50% (1 - 0.50). If required, compliance shall be based upon stack testing in accordance with OAC rule 3745-17-03(B)(10).
 - Emission Limitation -
The particulate emissions from this emissions unit shall not exceed 13.2 pounds per hour.
 - Applicable Compliance Method -
Compliance shall be determined by multiplying the maximum hourly emissions rate (0.551 lb/hour in accordance with OAC rule 3745-17-11(B)(1)) from each plastisol dip machine by the total of 24 dip machines.
 - Emission Limitation -
The particulate emissions from this emissions unit shall not exceed 13.5 tons per year.
 - Applicable Compliance Method -
The 13.5 TPY limitation was developed by multiplying the hourly allowable emission limitation of 0.551 lb/hour for each machine by the total number of machines (24 machines) and the maximum annual operating schedule of 2040 hours/year. Compliance shall be determined by multiplying the hourly emission rate by the total hours of operation for all 24 machines for the calendar year, divided by 2,000 pounds per ton.
 - Emissions Limitation -
Visible particulate emissions from any stack shall not exceed 20 percent opacity as a six-minute average.
 - Applicable Compliance Method

Compliance shall be determined through visible emission observations performed in accordance with 40 CFR Part 60, Appendix A, Method 9 and the procedures specified in OAC rule 3745-17-03(B)(1).
 - Emission Limitation -
The maximum annual operating hours for this emissions unit shall not exceed 2040 for each machine.
 - Applicable Compliance Method -
Compliance shall be based upon record keeping as specified in C.1.

F. **Miscellaneous Requirements**

1. None
