

Facility ID: 0857101954 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0857101954 Emissions Unit ID: P901 Issuance type: Final State Permit To Operate

[Go to the top of this document](#)

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
rotary dryer, hot aggregate elevator, vibrating screens, and weigh hopper	NSPS (40 CFR Part 60 Subpart I)	0.04 gr/dscf of exhaust gases;
		Less than or equal to 20% opacity, from the stack.
	OAC rule 3745-31-05 PTI 08-3781	4.35 TPY particulate; 19.60 lbs/hr, 8.40 TPY CO; 26.25 lbs/hr, 11.25 TPY NOx; 19.60 lbs/hr, 8.40 TPY SO ₂ ; 24.15 lbs/hr, 10.35 TPY OC; 1.0 lb/hr, 0.44 TPY HCl; 0.0012 lb/hr, 4.95 E-4 TPY lead.
		The above TPY limitations are rolling 12-month summations.
		Less than or equal to 20% opacity, as a 3-minute average, from fugitive dust.
	OAC rule 3745-17-11	The limit based on this rule is less stringent than the limit established pursuant to OAC rule 3745-31-05.
	OAC rule 3745-17-07	The limit based on this rule is less stringent than the limit established pursuant to OAC rule 3745-31-05.
	OAC rule 3745-17-08	No visible emissions of fugitive dust from the enclosures for the hot aggregate elevator, vibrating screens, and weigh hopper.
aggregate storage bins and cold aggregate elevator	OAC rule 3745-17-07 OAC rule 3745-17-08	The drop height of the front end loader bucket shall be minimized to the extent possible in order to minimize or eliminate visible emissions of fugitive dust from the elevator loading area. The visible emissions of fugitive dust shall not exceed 20% opacity as a 3-minute average.
	OAC rule 3745-17-08	The aggregate loaded into the storage bins shall have a moisture content sufficient to eliminate the visible emissions of fugitive dust from the elevator and the transfer point to the dryer.

2. Additional Terms and Conditions

- (a) The 19.60 lbs/hr of CO, 26.25 lbs/hr of NOx, 19.60 lbs/hr SO₂, 24.15 lbs/hr OC, 1.0 lb/hr HCl, and 0.0012 lb/hr lead emissions limitations were established to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limits.
This emissions unit has been approved for the use of recycled asphalt products.

B. Operational Restrictions

1. In accordance with the Ohio Administrative Code (OAC) rule 3745-31-05(A)(2), this facility shall comply with all the applicable laws as defined in OAC rule 3745-31-01(F). Therefore, this air permit to operate cannot exempt

the facility from any current or future regulations regarding the disposal or recycling or used oil.

2. All recycled used oil burned at the facility shall meet the following specifications:
 - . Permit Allowable Contaminant/Property Concentrations
 - Arsenic 5 ppm, maximum
 - Cadmium 2 ppm, maximum
 - Chromium 10 ppm, maximum
 - Lead 100 ppm, maximum
 - PCB's 50 ppm, maximum
 - Total Halogens 4000 ppm, maximum
 - Mercury 1 ppm, maximum
 - Flash Point 100 degrees Fahrenheit, minimum
 - Heat Content 135,000 Btu/gallon, minimum
3. This source shall not receive or burn any used oil which does not meet the specifications listed above. An exceedance shall be considered a violation of Ohio Administrative Code 3745-31-02.
4. Used oil containing more than 1000 ppm total halogens is presumed to be a hazardous waste under the rebuttable presumption provided under 40 CFR 266.40(c) and OAC rule 3745-58-50. Therefore, this facility may receive and burn used oil exceeding 1000 ppm of total halogens (but less than 4000 ppm, maximum) only if the supplier [marketer in 40 CFR 266.43(a)] has demonstrated to Ohio EPA's Division of Hazardous Waste Management that the used oil does not contain any hazardous waste.
5. The permittee shall sample each incoming shipment of used oil. The sampling frequency for used oil shall be one properly labeled 500 ml sample for each truck or container delivery. The sample shall be taken and retained for at least 60 days.

The Regional Air Pollution Control Agency (RAPCA) may require and/or conduct periodic, detailed chemical analyses through an independent laboratory of any used oil received at this facility; of any sample retained, as required above; and of any storage tanks at this facility.

Additionally, the permittee shall provide a plan for documenting that the used oil does not contain any hazardous waste as specified under 40 CFR Parts 261 and 279.
6. To ensure the baghouse is operated according to the manufacturer's specifications and to maintain compliance with the allowable particulate emission rate, a pressure drop across the baghouse of not less than 3 inches or greater than 5 inches of water shall be maintained at all times.
7. The maximum annual production rate for this emissions unit shall not exceed 300,000 tons, based upon a rolling, 12-month summation of the production rates.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall receive a chemical analysis with each shipment of used oil from the supplier. The analysis shall identify the name and address of the supplier, the supplier's U.S. EPA identification number, and the following information:
 - a. date of shipment or delivery
 - b. quantity of used oil received
 - c. the BTU value of the used oil
 - d. the flash point of the used oil
 - e. the arsenic content
 - f. the cadmium content
 - g. the chromium content
 - h. the lead content
 - i. the PCB content
 - j. the total halogen content
 - k. the mercury content

Each analysis shall be kept in a readily accessible location for at least 5 years and shall be made available to the Director (the appropriate Ohio EPA District Office or local air agency) upon verbal or written request. The Director or any authorized representative of the Director may require or may conduct periodic, detailed chemical analyses through an independent laboratory of any used oil shipment received by this facility, of any used oil stored at this facility, or of any used oil sampled at the dryer.
2. The permittee shall maintain monthly records of the asphaltic concrete production rate and the rolling 12-month summation of the production rates.
3. The permittee shall properly operate and maintain a monitoring device capable of accurately measuring the pressure drop across the fabric filter.
4. The permittee shall check the pressure drop once a day and maintain daily records of the pressure drop readings.

D. Reporting Requirements

1. In accordance with Paragraph 3 of the General Terms and Conditions, the permittee shall submit quarterly deviation (excursion) reports which include the following information for this emissions unit:
 - a. An identification of all exceedances of the rolling, 12-month production rate limitation.
 - b. An identification of all exceedances of the above-mentioned allowable pressure drop range for the baghouse.
2. The permittee shall notify the USEPA and the Ohio EPA if any of the used oil exceeds the used oil specifications. An identification number from USEPA shall be obtained prior to the combustion of any used oil.

Before the permittee accepts the first shipment of any off-specification used oil from a marketer, the permittee must provide the marketer a one-time, written and signed notice certifying that:

- a. the company has notified USEPA of its used oil management activities and that the notice included the location and description of those activities; and
- b. the company will burn used oil only in an industrial furnace or boiler identified in 40 CFR Part 266.41(b) and OAC rule 3745-58-42.

A copy of each certificate notice that the permittee sends to a marketer must be kept on file for a minimum of 5 years from the date it last received off-specification used oil from that marketer.

E. Testing Requirements

1. Compliance with the emission limitation(s) specified in Section A.1. of these terms and conditions shall be determined in accordance with the following method(s):

Emission Limitation -
0.04 gr/dscf of exhaust gases

Applicable Compliance Method -
Compliance shall be based upon stack testing per OAC rule 3745-17-03(B)(10).

Emission Limitation-
4.35 TPY Particulate Matter

Applicable Compliance Method-
Compliance shall be determined by multiplying the average hourly emission rate in pounds per ton of asphaltic concrete production from the most recent compliance test by each 12-month production summation, and dividing by 2,000 lbs/ton. Until additional emission tests are conducted, the average hourly emission rate of 0.0114 lb/ton, determined from a performance test conducted on August 5, 1996, shall be used in this calculation.

Emission Limitation-
19.60 lbs/hr CO

Applicable Compliance Method-
Compliance shall be determined by multiplying the maximum hourly production rate of 350 tons/hour by the AP-42 emission factor for CO (0.056 lb/ton). If required, compliance shall be based on conducting a stack test in accordance with USEPA Reference Method 10, of 40 CFR Part 60, Appendix A.

Emission Limitation-
8.40 TPY CO

Applicable Compliance Method-
Compliance shall be based on the record keeping specified in section C.2., multiplying each 12-month production summation by the AP-42 emission factor for CO (0.056 lb/ton), and dividing by 2,000 lbs/ton.

Emission Limitation-
26.25 lbs/hr NOx

Applicable Compliance Method-
Compliance shall be determined by multiplying the maximum hourly production rate of 350 tons/hour by the AP-42 emission factor for NOx (0.075 lb/ton). If required, compliance shall be based on conducting a stack test in accordance with USEPA Reference Method 7 or 7A (as appropriate), of 40 CFR Part 60, Appendix A.

Emission Limitation-
11.25 TPY NOx

Applicable Compliance Method-
Compliance shall be based on the record keeping specified in section C.2., multiplying each 12-month production summation by the AP-42 emission factor for NOx (0.075 lb/ton), and dividing by 2,000 lbs/ton.

Emission Limitation-
19.60 lbs/hr SO2

Applicable Compliance Method-
Compliance shall be determined by multiplying the maximum hourly production rate of 350 tons/hour by the AP-42 emission factor for SO2 (0.056 lb/ton). If required, compliance shall be based on conducting a stack test in accordance with OAC rule 3745-18-04(E).

Emission Limitation-
8.40 TPY SO2

Applicable Compliance Method-
Compliance shall be based on the record keeping specified in section C.2., multiplying each 12-month production summation by the AP-42 emission factor for SO2 (0.056 lb/ton), and dividing by 2,000 lbs/ton.

Emission Limitation-
24.15 lbs/hr OC

Applicable Compliance Method-
Compliance shall be determined by multiplying the maximum hourly production rate of 350 tons/hour by the AP-42 emission factor for OC (0.069 lb/ton). If required, compliance shall be based on conducting a stack test in accordance with either USEPA Reference Method 25 or 25A (as appropriate), of 40 CFR Part 60, Appendix A.

Emission Limitation-
10.35 TPY OC

Applicable Compliance Method-
Compliance shall be based on the record keeping specified in section C.2., multiplying each 12-month production summation by the AP-42 emission factor for OC (0.069 lb/ton), and dividing by 2,000 lbs/ton.

Emission Limitation-
1.0 lb/hr HCl

Applicable Compliance Method-
Compliance shall be determined by multiplying the maximum hourly production rate of 350 tons/hr times an

emission factor of 0.0029 lb/ton. (This emission factor was based assuming a 1.0 lb/hr emission from previous Barrett No. 142 stack test.) If required, compliance shall be based upon stack testing employing USEPA Reference Method 26 or 26A (as appropriate), of 40 CFR Part 60, Appendix A.

Emission Limitation-
0.44 TPY HCl

Applicable Compliance Method-

Compliance shall be based on the record keeping specified in section C.2., multiplying the 12-month production summation by the 0.0029 lb/ton emission factor and dividing by 2,000 lbs/ton.

Emission Limitation-
0.0012 lb/hr lead

Applicable Compliance Method-

Compliance shall be determined by multiplying the maximum hourly production rate of 350 tons/hour by the AP-42 emission factor for lead (3.3 E-6 lb/ton). If required, compliance shall be based upon stack testing employing USEPA Reference Method 12 of 40 CFR Part 60, Appendix A.

Emission Limitation-
4.95 E-4 TPY lead

Applicable Compliance Method-

Compliance shall be based on the record keeping specified in section C.2., multiplying each 12-month production summation by the AP-42 emission factor for lead (3.3 E-6 lb/ton), and dividing by 2,000 lbs/ton.

Emission Limitation-
20% opacity as a 6-minute average

Applicable Compliance Method-

OAC rule 3745-17-03(B)(1)

Emission Limitation-
20% opacity as a 3-minute average

Applicable Compliance Method-

OAC rule 3745-17-03(B)(3)

2. During the last full production season which this permit is effective, the permittee shall conduct, or have conducted, an emission test(s) for this emissions unit in order to demonstrate compliance with the allowable mass emission rate(s) for particulates. The particulates test(s) shall be conducted in accordance with the test methods and procedures specified in "USEPA Reference Method 5, of 40 CFR Part 60, Appendix A" while the emissions unit is operating at or near maximum capacity and using only "virgin aggregate".

During the last full production season which this permit is effective, the permittee shall conduct, or have conducted, an emission test(s) for this emissions unit in order to demonstrate compliance with the allowable mass emission rate(s) for lead. The lead test(s) shall be conducted in accordance with test methods and procedures specified in "USEPA Reference Method 12, of 40 CFR Part 60, Appendix A" while the emissions unit is operating at or near maximum capacity and using only "virgin aggregate".

Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the field office's refusal to accept the results of the emissions test(s).

Personnel from the Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment and acquire data and information regarding the emissions unit operating parameters.

A comprehensive written report on the results of the emission test(s) shall be submitted within 30 days following completion of the test(s).

F. **Miscellaneous Requirements**

1. The permittee is hereby notified that this permit, and all agency records concerning the operation of this permitted emissions unit are subject to public disclosure in accordance with OAC rule 3745-19-03.
