

Facility ID: 0857173128 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

\*\*\*THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION\*\*\*

Facility ID: 0857173128 Emissions Unit ID: K001 Issuance type: Final State Permit To Operate

**Part II - Special Terms and Conditions**

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
  - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
  - (a) None.

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Auto body refinish and repair shop (miscellaneous metal parts)	OAC rule 3745-31-05 See F.2.	less than 3 gallons/day coating usage; 18.03 lbs/day and 4.49 TPY volatile organic compounds (VOC), including cleanup
	OAC rule 3745-17-11(B)(1) See F.2.	0.551 lb/hour particulates
	OAC rule 3745-21-09(U)(2)(e) See F.2.	See A.2.a. below

**2. Additional Terms and Conditions**

- (a) The limit based on this rule is less stringent than the limit established pursuant to OAC rule 3745-31-05 above.

**B. Operational Restrictions**

1. None

**C. Monitoring and/or Record Keeping Requirements**

1. The permittee shall collect and record the following information each day for the coating line:
  - a. The name and identification of each coating employed.
  - b. The volume, in gallons, of each coating employed.
  - c. The total volume, in gallons, of all of the coatings employed.
2. The permittee shall collect and record the following information for the purpose of determining the annual VOC emissions:
  - a. The name and identification of each cleanup material employed.
  - b. The number of gallons of each cleanup material employed.
  - c. The VOC content of each cleanup material, in pounds per gallon.
  - d. The VOC content of each coating, as applied, in pounds per gallon.
  - e. The total VOC emissions from all coatings and cleanup materials employed, in pounds or tons.

**D. Reporting Requirements**

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing that the coating line employs more than the applicable maximum daily coating usage limit. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 45 days after the exceedance occurs.

**E. Testing Requirements**

1. Compliance with the emission limitation(s) in section A.1. of these terms and conditions shall be determined in accordance with the following method(s):

Emissions Limitation -  
18.03 lbs/day VOC

Applicable Compliance Method -

Compliance shall be based upon record keeping as specified in term and condition C.1., and shall be determined by multiplying the maximum VOC content of all coatings employed by the maximum daily coating usage of 3 gallons.

Emissions Limitation -  
4.49 TPY VOC, including cleanup

Applicable Compliance Method -

Compliance shall be based upon record keeping as specified in term and conditions C.1. and C.2., and shall be the sum of the VOC emission rates for the calendar year divided by 2,000 pounds per ton.

Emissions Limitation -  
0.551 lb/hour particulates

Applicable Compliance Method -

To determine actual worst case emissions rates for particulate matter, the following equation shall be used:

$E = \text{maximum coating solids usage rate in pounds per hour} \times (1 - TE) \times (1 - CE)$

E = particulate matter emissions rate (pounds/hour)

TE = transfer efficiency, which is the ratio of the amount of coating solids deposited on the coating part to the amount of coating solids used

CE = control efficiency of the control equipment

F. **Miscellaneous Requirements**

1. The permittee is hereby notified that this permit, and all agency records concerning the operation of this permitted emissions unit are subject to public disclosure in accordance with OAC rule 3745-49-03.
2. The following terms and condition shall supersede all the air pollution control requirements for this emissions unit contained in permit to install 08-3747, as issued on January 7, 1998: A.1., C.1., C.2., D.1., and E.
