

5/12/2015

Mr. Mitch Killough
Poland-CLL Production Facility
P.O. Box 61229
Houston, TX 77028-1229

RE: FINALAIR POLLUTION PERMIT-TO-INSTALL AND OPERATE
Facility ID: 0250002027
Permit Number: P0118592
Permit Type: Initial Installation
County: Mahoning

Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- How to appeal this permit
• How to save money, reduce pollution and reduce energy consumption
• How to give us feedback on your permitting experience
• How to get an electronic copy of your permit

How to appeal this permit

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
77 South High Street, 17th Floor
Columbus, OH 43215

Certified Mail

Table with 2 columns: Status (No/Yes) and Category (TOXIC REVIEW, SYNTHETIC MINOR TO AVOID MAJOR NSR, CEMS, MACT/GACT, NSPS, NESHAPS, NETTING, MODELING SUBMITTED, SYNTHETIC MINOR TO AVOID TITLE V, FEDERALLY ENFORCABLE PTIO (FEPTIO), SYNTHETIC MINOR TO AVOID MAJOR GHG)

How to save money, reduce pollution and reduce energy consumption

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: www.ohioairquality.org/clean_air

How to give us feedback on your permitting experience

Please complete a survey at www.epa.ohio.gov/survey.aspx and give us feedback on your permitting experience. We value your opinion.

How to get an electronic copy of your permit

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

If you have any questions, please contact Ohio EPA DAPC, Northeast District Office at (330)963-1200 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Erica R. Engel-Ishida, Manager
Permit Issuance and Data Management Section, DAPC

Final Permit-to-Install and Operate
Poland-CLL Production Facility
Permit Number: P0118592
Facility ID: 0250002027
Effective Date: 5/12/2015

Authorization

Facility ID: 0250002027
Application Number(s): A0052971, A0053349
Permit Number: P0118592
Permit Description: Initial installation PTIO for a 1,340-hp Caterpillar G3516LE 4SLB natural gas-fired compressor engine with oxidation catalyst, manufactured on 8/28/2007.
Permit Type: Initial Installation
Permit Fee: \$200.00
Issue Date: 5/12/2015
Effective Date: 5/12/2015
Expiration Date: 6/28/2023
Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15

This document constitutes issuance to:

Poland-CLL Production Facility
East of Cowden Rd and Moore Rd
Poland Twp., OH 44436

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Northeast District Office
2110 East Aurora Road
Twinsburg, OH 44087
(330)963-1200

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Craig W. Butler
Director

Final Permit-to-Install and Operate
Poland-CLL Production Facility
Permit Number: P0118592
Facility ID: 0250002027
Effective Date: 5/12/2015

Authorization (continued)

Permit Number: P0118592

Permit Description: Initial installation PTIO for a 1,340-hp Caterpillar G3516LE 4SLB natural gas-fired compressor engine with oxidation catalyst, manufactured on 8/28/2007.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	P005
Company Equipment ID:	P002
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

Final Permit-to-Install and Operate
Poland-CLL Production Facility
Permit Number: P0118592
Facility ID: 0250002027
Effective Date: 5/12/2015

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the [DO/LAA] in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Final Permit-to-Install and Operate
Poland-CLL Production Facility
Permit Number: P0118592
Facility ID: 0250002027
Effective Date: 5/12/2015

B. Facility-Wide Terms and Conditions

Final Permit-to-Install and Operate

Poland-CLL Production Facility

Permit Number: P0118592

Facility ID: 0250002027

Effective Date: 5/12/2015

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.
2. The Ohio EPA has determined that this facility is subject to the requirements of 40 CFR Part 63 Subpart ZZZZ, National Emission Standards for Hazardous Air Pollutants (NESHAP) for Stationary Reciprocating Internal Combustion Engines at Area Sources. Although Ohio EPA has determined that this Generally Available Control Technology NESHAP (GACT) applies, at this time Ohio EPA does not have the authority to enforce this standard. Instead, U.S. EPA has the authority to enforce this standard. Please be advised, that all requirements associated with this rule are in effect and shall be enforced by U.S. EPA. For more information on the area source rules, please refer to the following U.S. EPA website: <http://www.epa.gov/ttn/atw/area/arearules.html>.

Final Permit-to-Install and Operate
Poland-CLL Production Facility
Permit Number: P0118592
Facility ID: 0250002027
Effective Date: 5/12/2015

C. Emissions Unit Terms and Conditions

1. P005, Compressor Engine

Operations, Property and/or Equipment Description:

1,340-hp Caterpillar G3516LE stationary 4 stroke lean burn (4SLB) spark ignition (SI) internal combustion engine (ICE) with an oxidation catalyst; burning natural gas; manufactured on 8/28/2007; complying with 40 CFR 63, Subpart ZZZZ Table 2d #8; meeting the definition of a remote stationary RICE in 40 CFR 63.6675.

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) **Applicable Emissions Limitations and/or Control Requirements**

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3) June 30, 2008	Particulate emissions (PE) shall not exceed 0.25 ton per month averaged over a 12-month rolling period; Volatile organic compounds (VOC) emissions shall not exceed 0.75 ton per month averaged over a 12-month rolling period; Sulfur dioxide (SO ₂) emissions shall not exceed 0.002 ton per month averaged over a 12-month rolling period; and

Final Permit-to-Install and Operate

Poland-CLL Production Facility

Permit Number: P0118592

Facility ID: 0250002027

Effective Date: 5/12/2015

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		<p>The requirements of this rule also include compliance with the requirements of 40 CFR Part 63, Subpart ZZZZ.</p> <p>See b)(2)a.</p>
b.	<p>OAC rule 3745-31-05(A)(3)(a)(ii) June 30, 2008</p>	<p>The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to the PE, VOC and SO₂ emissions from this air contaminant source since the potential to emit is less than 10 tons/year.</p> <p>See b)(2)b.</p>
c.	<p>ORC 3704.03(T) and OAC rule 3745-31-05(A)(3)</p>	<p>nitrogen oxide (NO_x) emissions shall not exceed 2.15 tons per month averaged over a 12-month rolling period;</p> <p>CO emissions shall not exceed 2.15 tons per month averaged over a 12-month rolling period; and</p> <p>The requirements of this rule also include compliance with the requirements of 40 CFR Part 63, Subpart ZZZZ.</p>
d.	<p>OAC rule 3745-17-11(B)(5)</p>	<p>Particulate emissions (PE) shall not exceed 0.062 lb/MMBtu of actual heat input.</p>
e.	<p>OAC rule 3745-18-04(F)(4)</p>	<p>The sulfur dioxide (SO₂) emission rate from natural gas shall be considered to be equal to 0.0 lb/MMBtu.</p>
f.	<p>OAC rule 3745-17-07(A)(1)</p>	<p>Visible PE from the exhaust stack serving this emissions unit shall not exceed 20% opacity, as a six-minute average, except as specified by rule.</p>

(2) Additional Terms and Conditions

- a. This Best Available Technology (BAT) emission limit applies until U.S. EPA approves Ohio Administrative Code (OAC) paragraph 3745-31-05(A)(3)(a)(ii) (the

less than 10 tons per year BAT exemption) into the Ohio State Implementation Plan (SIP).

- b. These requirements apply once U.S. EPA approves OAC paragraph 3745-31-05(A)(3)(a)(ii) (the less than 10 tons per year BAT exemption) as part of the Ohio SIP.
- c. The permittee shall comply with the following applicable requirements identified in 40 CFR Part 63, Subpart ZZZZ:

Applicable Rule	Requirement
40 CFR 63.6595(a)(1)	The compliance date for Part 63 Subpart ZZZZ for existing SI RICE at an area source is 10/19/13.
Applicable Tables from Part 63, Subpart ZZZZ	Compliance requirements in Table 2d #8; continuous compliance in Table 6 #9; general provision from Subpart A in Table 8.
40 CFR 63.6603(a)	Maintain compliance with operational limitations in Table 2d #8 (inspection and maintenance requirements) to Part 63 Subpart ZZZZ.
40 CFR 63.6665	Meet all of the general provisions of Subpart A, from Sections 63.1 through 63.15, that apply to the SI RICE, as identified in Table 8 to Subpart ZZZZ.
40 CFR 63.6603(f)	Must meet the definition of remote stationary RICE in 40 CFR 63.6675.

- d. The existing non-emergency SI 4SLB stationary RICE with a site rating of more than 500 HP located at area sources of HAP must meet the definition of remote stationary RICE in 40 CFR 63.6675 on the initial compliance date for the engine, October 19, 2013, in order to be considered a remote stationary RICE under this subpart. The permittee shall reevaluate the status of the stationary RICE every 12 months to document that it meets the definition of a remote stationary RICE. If the evaluation indicates that the stationary RICE no longer meets the definition of remote stationary RICE in 40 CFR 63.6675, the engine must meet all of the requirements for existing non-emergency SI 4SLB stationary RICE, located at an area source of HAP, with a site rating of more than 500 HP, that are not remote stationary RICE within 1 year of the evaluation.

[40 CFR 63.6603(f)]

- e. In order to meet the definition of and maintain the status of a Remote stationary RICE, the stationary RICE must meet any of the following criteria*:
 - i. the RICE is located in an offshore area that is beyond the line of ordinary low water along that portion of the coast of the United States that is in direct contact with the open seas and beyond the line marking the seaward limit of inland waters; or
 - ii. the RICE is located on a pipeline segment with 10 or fewer buildings intended for human occupancy and no buildings with four or more stories

within 220 yards (200 meters) on either side of the centerline of any continuous 1-mile (1.6 kilometers) length of pipeline. Each separate dwelling unit in a multiple dwelling unit building is counted as a separate building intended for human occupancy; and

the pipeline segment does not lie within 100 yards (91 meters) of either a building or a small, well-defined outside area (such as a playground, recreation area, outdoor theater, or other place of public assembly) that is occupied by 20 or more persons on at least 5 days a week for 10 weeks in any 12-month period. The days and weeks need not be consecutive. The building or area is considered occupied for a full day if it is occupied for any portion of the day: or

- iii. the stationary RICE is not located on gas pipelines and has 5 or fewer buildings intended for human occupancy and no buildings with four or more stories within a 0.25 mile radius around the engine.

*The term pipeline segment means all parts of those physical facilities through which gas moves in transportation, including but not limited to pipe, valves, and other appurtenance attached to pipe, compressor units, metering stations, regulator stations, delivery stations, holders, and fabricated assemblies; and includes stationary RICE located within 50 yards (46 meters) of the pipeline segment providing power for equipment on a pipeline segment.

*Transportation of gas means the gathering, transmission, or distribution of gas by pipeline, or the storage of gas.

*A building is intended for human occupancy if its primary use is for a purpose involving the presence of humans. And a building or area is considered occupied for a full day if it is occupied for any portion of the day.

[40 CFR 63.6675]

c) Operational Restrictions

- (1) Following the compliance date of the NESHAP, 10/19/13, unless meeting the requirements of 40 CFR 63.6625(j), the permittee shall change the oil and filter every 2,160 hours of operation or annually, whichever comes first; shall inspect the spark plugs every 2,160 hours of operation or annually, whichever comes first; and shall inspect all hoses and belts every 2,160 hours of operation or annually, whichever comes first, and replace them as necessary. A log shall be maintained for the hours of operation between each oil, filter, and spark plug change and the date of each required inspection.

[40 CFR 63.6603(a)], [40 CFR 63.6625(j)], and [Part 63, Subpart ZZZZ Table 2d #8]

- (2) The permittee shall comply with the following applicable requirements identified in 40 CFR Part 63, Subpart ZZZZ:

Applicable Rule	Requirement
40 CFR 63.6605	General duty to minimize emissions, with good air pollution control practices for minimizing emissions; and compliance required at all times.
40 CFR 63.6625(e)	Operate & maintain RICE according to mfg. instructions and develop a facility maintenance plan for the RICE that meets the requirements of Subpart ZZZZ Table 2d #8.
40 CFR 63.6625(h)	Minimize idle and startup time, not to exceed 30 minutes.
40 CFR 63.6625(j)	Oil analysis program, option to extend the oil change frequency.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall maintain a record of the natural gas burned in this RICE during each calendar year. The natural gas usage can be calculated at the end of each year using the best method available to estimate the annual throughput which might include, but shall not be limited to: readings from the facility's natural gas meter, the facility's natural gas bill, and/or the recorded or estimated hours of operation along with the manufacture's documentation on the maximum natural gas fuel flow rate.

- (2) The permittee must keep records of the initial and each annual evaluation of the status of the engine as a remote stationary RICE.

[40 CFR 63.6603(f)]

- (3) The permittee shall comply with the following applicable requirements identified in 40 CFR Part 63, Subpart ZZZZ:

Applicable Rule	Requirement
40 CFR 63.6640(a) and 40 CFR 63.6655(d)	Keep the records required in #9 of Table 6 to Subpart ZZZZ to demonstrate continuous compliance.
40 CFR 63.6655(e)(3)	Records of maintenance and inspections conducted in order to demonstrate compliance with Table 2d and to demonstrate that the RICE was operated and maintained according to the facility's maintenance plan.
40 CFR 63.6625(h)	Maintain a record of each idle and/or startup time that exceeded 30 minutes.
40 CFR 63.6660	Records readily available and retained for at least 5 years after the date of occurrence or date of report according to 63.10(b)(1).

e) Reporting Requirements

- (1) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the appropriate district office or local air agency.
- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section

of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.

- (3) The permittee shall comply with the following applicable requirements identified in 40 CFR Part 63, Subpart ZZZZ:

Applicable Rule	Requirement
40 CFR 63.6640(b); and OAC rule 3745-15-03(B)(2) and (D)	Submit in the PER each instance in which the operational requirements in Table 2d were not met.
40 CFR 63.6640(e) and OAC rule 3745-15-03(B)(2) and (D)	Submit in the PER each instance in which the applicable requirements in Table 8 to Subpart ZZZZ, the general provisions from Subpart A, were not met.

f) Testing Requirements

- (1) Compliance with the emission limitations in b)(1) of these terms and conditions shall be determined in accordance with the following methods:

a. Opacity Limitation:

Visible particulate emissions from the exhaust stack serving this emissions unit shall not exceed 20% opacity, as a six-minute average, except as specified by rule.

Applicable Compliance Method:

If required, compliance shall be determined through visible emission observations performed in accordance with U.S. EPA Reference Method 9 in 40 CFR, Part 60, Appendix A.

[OAC rule 3745-17-07(A)(1)]

b. Emission Limitations:

0.062 lb PE/MMBtu from RICE greater than 600 HP

PE shall not exceed 0.25 ton per month averaged over a 12-month rolling period.

Applicable Compliance Method:

The particulate emission limitation is from OAC rule 3745-17-11(B)(5) for stationary internal combustion engines.

Compliance with the 12-month rolling period PE emissions limitation shall be determined by the following calculation:

$$0.062 \text{ lb PE/MMBtu} \times 10.94 \text{ MMBtu/hr} = 0.678 \text{ lb PE/hr}$$

$0.678\text{lb PE/hr} \times 8760\text{ hours/year} \times 1\text{ ton}/2000\text{ lbs} = 2.97\text{ tons PE/year}$

$2.97\text{ tons PE/year} \times 1\text{ year}/12\text{ months} = 0.25\text{ ton per month averaged over a 12-month rolling period}$

If required, the permittee shall demonstrate compliance with the emission limitations through exhaust emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 5.

[OAC rule 3745-17-11(B)(5)]

c. Emission Limitations:

NO_x emissions shall not exceed 2.15 tons per month averaged over a 12-month rolling period;

CO emissions shall not exceed 2.15 tons per month averaged over a 12-month rolling period; and

VOC emissions shall not exceed 0.75 ton per month averaged over a 12-month rolling period.

Applicable Compliance Method:

The following calculation may be used to demonstrate compliance with the monthly average 12-month rolling BAT determination, using the applicable short term limit, the manufacturer's emission factor (if operating under certified conditions), a test-based emission factor, or the AP-42 emission factor from Chapter 3.2 for Natural Gas-fired Reciprocating Engines, Table 3.2-2, "Uncontrolled Emission Factors for 4-Stroke Lean-Burn Engines", as applicable, where no other limit or emissions restriction applies:

NO_x:

$2.0\text{ g NOx/hp-hr} \times 1340\text{ hp} \times 1\text{ lb}/453.6\text{ g} = 5.91\text{ lbs NOx/hr}$

$5.91\text{lbs NOx/hr} \times 8760\text{ hours/year} \times 1\text{ ton}/2000\text{ lbs} \times 1\text{ year}/12\text{ months} = 2.15\text{ tons per month averaged over a 12-month rolling period}$

CO:

$2.0\text{ g CO/hp-hr} \times 1340\text{ hp} \times 1\text{ lb}/453.6\text{ g} = 5.91\text{ lbs CO/hr}$

$5.91\text{lbs CO/hr} \times 8760\text{ hours/year} \times 1\text{ ton}/2000\text{ lbs} \times 1\text{ year}/12\text{ months} = 2.15\text{ tons per month averaged over a 12-month rolling period}$

VOC:

$0.7\text{ g VOC/hp-hr} \times 1340\text{ hp} \times 1\text{ lb}/453.6\text{ g} = 2.07\text{ lbs NOx/hr}$

$2.07\text{lbs VOC/hr} \times 8760\text{ hours/year} \times 1\text{ ton}/2000\text{ lbs} \times 1\text{ year}/12\text{ months} = 0.75\text{ ton}$
per month averaged over a 12-month rolling period

If required, the permittee shall demonstrate compliance with the emission limitations through exhaust emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4, and Method 7 for NO_x, Method 10 for CO, Method 25 for VOC, and/or other approved method as appropriate.

[OAC rule 3745-31-05(A)(3)] or [ORC 3704.03(T)]

d. Emission Limitations:

0.000588 lb SO₂/MMBtu

SO₂ emissions shall not exceed 0.002 ton per month averaged over a 12-month rolling period.

Applicable Compliance Method:

The SO₂ emissions limit is based on using the AP-42 emission factor of 0.000588 lb SO₂/MMBtu from Chapter 3.2 for Natural Gas-fired Reciprocating Engines, Table 3.2-2, "Uncontrolled Emission Factors for 4-Stroke Lean-Burn Engines".

Compliance with the ton per year SO₂ emissions limitation shall be determined by the following calculation:

$$0.000588\text{ lb SO}_2/\text{MMBtu} \times 10.94\text{MMBtu/hr} = 0.006\text{lb SO}_2/\text{hr}$$

$$0.006\text{lb SO}_2/\text{hr} \times 8760\text{ hours/year} \times 1\text{ ton}/2000\text{ lbs} = 0.028\text{ tons SO}_2/\text{year}$$

$$0.028\text{ tons SO}_2/\text{year} \times 1\text{ year}/12\text{ months} = 0.002\text{ ton per month averaged over a 12-month rolling period}$$

* The heating value of natural gas may be adjusted to that provided by the supplier.

g) Miscellaneous Requirements

- (1) Any amendment to 40 CFR Part 63, Subpart ZZZZ shall supersede the Subpart ZZZZ compliance limitations and/or compliance options contained in this permit.
