RE: DRAFT AIR POLLUTION PERMIT-TO-INSTALL AND OPERATE

Facility ID: 1652010058
 Permit Number: P0119012
 Permit Type: Administrative Modification
 County: Medina

Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate (PTIO) for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the permit. A public notice will appear in the Ohio Environmental Protection Agency (EPA) Weekly Review and the local newspaper, Medina County Gazette. A copy of the public notice and the draft permit are enclosed. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall and Akron Regional Air Quality Management District
 Permit Review/Development Section 1867 West Market St.
 Ohio EPA, DAPC Akron, OH 44313
 50 West Town Street Suite 700
 PO Box 1049
 Columbus, Ohio 43216-1049

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified if a public hearing is scheduled. A decision on issuing a final permit-to-install will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Akron Regional Air Quality Management District at (330)375-2480.

Sincerely,

Michael E. Hopkins, P.E.
 Assistant Chief, Permitting Section, DAPC

PUBLIC NOTICE

The following matters are the subject of this public notice by the Ohio Environmental Protection Agency. The complete public notice, including any additional instructions for submitting comments, requesting information, a public hearing, or filing an appeal may be obtained at: <http://epa.ohio.gov/actions.aspx> or Hearing Clerk, Ohio EPA, 50 W. Town St., Columbus, Ohio 43215. Ph: 614-644-2129 email: HClerk@epa.ohio.gov

Draft Air Pollution Permit-to-Install and Operate Administrative Modification

AdCal - Adhesive Coatings and Laminations, Inc.

1270 W 130th St Unit 404,,Brunswick, OH 44212

ID#:P0119012

Date of Action: 6/26/2015

Permit Desc:Agency-initiated Administrative Modification of FEPTIO P0115444 to remove obsolete OAC rule 3745-21-07 reference and establish federally-enforceable synthetic minor limitations...

The permit and complete instructions for requesting information or submitting comments may be obtained at: <http://epa.ohio.gov/dapc/permitsonline.aspx> by entering the ID # or: Kelly Kanoza, Akron Regional Air Quality Management District, 1867 West Market St., Akron, OH 44313. Ph: (330)375-2480

Permit Strategy Write-Up

1. Check all that apply:

Synthetic Minor Determination

Netting Determination

2. Source Description: Adhesive Coatings and Laminations (AdCal) is a roll coating operation located in Medina County, consisting of a roll coater and two natural gas drying ovens. The coater can coat paper, fabric or vinyl roll material.
3. Facility Emissions and Attainment Status: AdCal has the potential to emit of 134 tons of Volatile Organic Compounds (VOC) per year, based on calculations using coating formulation data and operating rates. The facility also has the potential to emit of 10.33 tons of hazardous air pollutant (HAP) toluene per year. All other air pollutants are below Title V thresholds. Medina County is nonattainment for ozone.
4. Source Emissions: Previously, in the initial permit 16-02539, VOC and toluene emissions were limited to 47.74 and 6.2 tons per rolling 12-month permit, respectively. Those limitations allowed AdCal to avoid Title V permitting and the requirements of 40 CFR 63 subpart JJJJ. This permit will further limit VOC emissions to 24.9 tons per rolling 12-month period to avoid the requirements of OAC rule 3745-21-09(F)(2)a. Toluene emissions limitations will remain the same. Compliance with these limitations will be demonstrated through record keeping.
5. Conclusion: AdCal will limit VOC and toluene emissions under the Title V thresholds. The record keeping and reporting requirements will ensure that the facility is in compliance with the emissions limitations.
6. Please provide additional notes or comments as necessary: A restriction on the operating hours was previously used to limit emissions. Since it would be difficult to further limit the hours, and since limiting operating hours on this coating line is not a feasible method for limiting emissions to begin with, record keeping was chosen as the method to support the emissions limitations. Toluene emissions were restricted under OAC 3745-114-01 to 33.9 pounds per day or 6.2 tons per year to comply with the air toxic modeling rule.
7. Total Permit Allowable Emissions Summary (for informational purposes only):

<u>Pollutant</u>	<u>Tons Per Year</u>
VOC	24.9
Toluene	6.2

This document constitutes issuance to:

AdCal - Adhesive Coatings and Laminations, Inc.
1270 W 130th St Unit 404
Brunswick, OH 44212

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Akron Regional Air Quality Management District
1867 West Market St.
Akron, OH 44313
(330)375-2480

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Craig W. Butler
Director

Draft Permit-to-Install and Operate
AdCal - Adhesive Coatings and Laminations, Inc.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	K001
Company Equipment ID:	Jones Coater
Superseded Permit Number:	P0115444
General Permit Category and Type:	Not Applicable

Draft Permit-to-Install and Operate
AdCal - Adhesive Coatings and Laminations, Inc.
Permit Number: P0119012
Facility ID: 1652010058
Effective Date: To be entered upon final issuance

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Akron Regional Air Quality Management District in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Draft Permit-to-Install and Operate
AdCal - Adhesive Coatings and Laminations, Inc.
Permit Number: P0119012
Facility ID: 1652010058
Effective Date: To be entered upon final issuance

B. Facility-Wide Terms and Conditions

Draft Permit-to-Install and Operate
AdCal - Adhesive Coatings and Laminations, Inc.
Permit Number: P0119012
Facility ID: 1652010058
Effective Date: To be entered upon final issuance

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.

Draft Permit-to-Install and Operate
AdCal - Adhesive Coatings and Laminations, Inc.
Permit Number: P0119012
Facility ID: 1652010058
Effective Date: To be entered upon final issuance

C. Emissions Unit Terms and Conditions

1. K001, Jones Coater

Operations, Property and/or Equipment Description:

Roll Coater and 2 Natural Gas Drying Ovens

- a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - (1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - a. b)(1)f.
 - (2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - a. b)(1)b.
- b) Applicable Emissions Limitations and/or Control Requirements
 - (1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	Organic compound (OC) emissions shall not exceed 63.5 pounds per hour and 99.5 tons per year. Volatile organic compound (VOC) emissions shall not exceed 30.5 pounds per hour. See b)(2)a. and b)(2)b.
b.	OAC rule 3745-31-05(D) [Synthetic minor to avoid Title V and 40 CFR Part 63, Subpart JJJJ]	VOC emissions shall not exceed 24.9 tons per year, based upon a rolling, 12-month summation of the monthly emissions.
c.	OAC rule 3745-21-09(F) [Paper Coating Lines]	The VOC content of the coatings employed shall not exceed 2.9 pounds per gallon, as applied, excluding water and exempt solvents. See b)(2)c. and c)(1)

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
d.	OAC rule 3745-21-09(G) [FabricCoating Lines]	The VOC content of the coatings employed shall not exceed 2.9 pounds per gallon, as applied, excluding water and exempt solvents.
e.	OAC rule 3745-21-09(H) [Vinyl Coating Lines]	See b)(2)d.
f.	OAC rule 3745-114-01 ORC 3704.03(F)	See b)(2)e., d)(4) through d)(6) and e)(2).

(2) Additional Terms and Conditions

- a. The requirements established pursuant to this rule include compliance with the requirements established pursuant to ORC 3704.03(F)(4)(c).
- b. The hourly OC and VOC emission limitations represent the emissions unit's potential to emit. Therefore, no monitoring, record keeping, and/or reporting requirements are necessary to ensure compliance with these limitations.
- c. The requirements of OAC rule 3745-21-09(F)(2)(a) do not apply since this emissions unit has potential VOC emissions that are less than 25 tons per year.
- d. The VOC content of the coatings employed in the vinyl coating line, as determined under paragraph (B) of rule 3745-21-10 of the Administrative Code, does not exceed the following limitation:
 - i. 4.8 pounds of VOC per gallon of vinyl coating, excluding water and exempt solvents; or
 - ii. Twenty-five per cent VOC by volume of the volatile matter of the vinyl coating.
- e. In order to demonstrate compliance with the "Toxic Air Contaminant Statute", the Director has established, per ORC 3704.03(F)(4)(c), a limit for toluene, which shall not exceed 33.9 pounds per day. This daily allowable emissions rate was calculated by multiplying the approved daily operating schedule submitted in the permit application, by the emission rate modeled (to determine the ground level concentration).

c) Operational Restrictions

- (1) The permittee shall comply with the following work practice standards for cleaning materials when using an organic solvent for cleanup:
 - a. Store all VOC containing cleaning materials and used shop towels in closed containers;

- b. Ensure that mixing and storage containers used for VOC-containing cleaning materials are kept closed at all times except when depositing or removing these materials;
 - c. Minimize spills of VOC-containing cleaning materials;
 - d. Convey VOC-containing cleaning materials from one location to another in closed containers or pipes; and
 - e. Minimize VOC emission from cleaning of storage, mixing, and conveying equipment.
- d) **Monitoring and/or Recordkeeping Requirements**
- (1) The permittee shall collect and record the following information each day for the coating line for each substrate coated on that day:
 - a. The type of substrate coated (i.e. fabric, paper or vinyl);
 - b. The name and identification number of each coating employed;
 - c. The OC, VOC and toluene contents (excluding water and exempt solvents) of each coating, as applied (or for vinyl coatings, the percent VOC by volume of the volatile matter);
 - d. The number of gallons (excluding water and exempt solvents) of each coating, as applied;
 - e. The daily OC emissions from all the coatings employed, in pounds, [i.e., the sum of d)(2)c. times d)(2)d. for each coating employed];
 - f. The daily VOC emissions from all the coatings employed, in pounds, [i.e., the sum of d)(2)c. times d)(2)d. for each coating employed]; and
 - g. The daily toluene emissions from all the coatings employed, in pounds, [i.e., the sum of d)(2)c. times d)(2)d. for each coating employed].
 - (2) The permittee shall collect and record the following information each month for this emissions unit:
 - a. The company identification of each cleanup material employed;
 - b. The number of gallons of each cleanup material employed;
 - c. The OC and VOC contents of each cleanup material employed, in pounds per gallon;
 - d. The monthly OC emissions from all the cleanup materials employed, in pounds [i.e., the sum of d)(2)b. times d)(2)c. for each cleanup material employed];

- e. The monthly VOC emissions from all the cleanup materials employed, in pounds [i.e., the sum of d)(2)b. times d)(2)c. for each cleanup material employed];
 - f. The total monthly VOC emissions, in pounds [i.e., the sum of the daily VOC emissions from coating materials in d)(1)f. for the month plus the monthly VOC emissions from cleanup materials in d)(2)e.]; and
 - g. The rolling, 12-month summation of the monthly VOC emissions, in tons [the total VOC emissions for the current calendar month in d)(2)f., plus the total VOC emissions from the previous eleven calendar months, divided by a conversion factor of 2,000 pounds per ton].
- (3) The permittee shall calculate and record the total annual OC emissions from coatings and cleanup materials, in tons [i.e., the sum of daily OC emissions from coating materials in d)(1)e. plus the sum of the monthly emissions from cleanup materials in d)(2)d. for the calendar year, divided by a conversion factor of 2,000 pounds per ton].
- (4) The federally enforceable permit-to-install and operate (FEPTIO) application for this emissions unit, K001, was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee. The "Toxic Air Contaminant Statute", ORC 3704.03(F), was applied to this emissions unit for each toxic air contaminant listed in OAC rule 3745-114-01, using data from the permit application; and modeling was performed for each toxic air contaminant(s) emitted using an air dispersion model such as SCREEN3, AERMOD, or ISCST3, or other Ohio EPA approved model. The predicted 1-hour maximum ground-level concentration result(s) from the approved air dispersion model, was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC), calculated as described in the Ohio EPA guidance document entitled "Review of New Sources of Air Toxic Emissions, Option A", as follows:
- a. The exposure limit, expressed as a time-weighted average concentration for a conventional 8-hour workday and a 40-hour workweek, for each toxic compound(s) emitted from the emissions unit, (as determined from the raw materials processed and/or coatings or other materials applied) has been documented from one of the following sources and in the following order of preference (TLV was and shall be used, if the chemical is listed):
 - i. Threshold Limit Value (TLV) from the American Conference of Governmental Industrial Hygienists' (ACGIH) "Threshold Limit Values for Chemical Substances and Physical Agents Biological Exposure Indices"; or
 - ii. Short Term Exposure Limit (STEL) or the ceiling value from the American Conference of Governmental Industrial Hygienists' (ACGIH) "Threshold Limit Values for Chemical Substances and Physical Agents Biological Exposure Indices"; the STEL or ceiling value is multiplied by 0.737 to convert the 15-minute exposure limit to an equivalent 8-hour TLV.
 - b. The TLV is divided by ten to adjust the standard from the working population to the general public (TLV/10).

- c. This standard is/was then adjusted to account for the duration of the exposure or the operating hours of the emissions unit, i.e., “8” hours per day and “6” days per week, from that of 8 hours per day and 5 days per week. The resulting calculation was (and shall be) used to determine the Maximum Acceptable Ground-Level Concentration (MAGLC):

$$TLV/10 \times 8/X \times 5/Y = 4 TLV/XY = MAGLC$$

- d. The following summarizes the results of dispersion modeling for the significant toxic contaminants or “worst case” toxic contaminant(s):

Toxic Contaminant: Toluene

TLV (mg/m³): 75.4

Maximum Hourly Emission Rate (lbs/hr): 4.24

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m³): 6,045

MAGLC (ug/m³): 6,283

The permittee, having demonstrated that emissions of toluene, from emissions unit K001, is estimated to be equal or greater than eighty per cent, but less than 100 per cent of the maximum acceptable ground level concentration (MAGLC), shall not operate the emissions unit at a rate that would exceed the daily emissions rate, as allowed in this permit; and any new raw material or processing agent shall not be applied without evaluating each component toxic air contaminant in accordance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F).

- (5) Prior to making any physical changes to or changes in the method of operation of the emissions unit that could impact the parameters or values that were used in the predicted 1-hour maximum ground-level concentration, the permittee shall re-model the change(s) to demonstrate that the MAGLC has not been exceeded. Changes that can affect the parameters/values used in determining the 1-hour maximum ground-level concentration include, but are not limited to, the following:
- a. changes in the composition of the materials used or the use of new materials, that would result in the emission of a new toxic air contaminant with a lower Threshold Limit Value (TLV) than the lowest TLV previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any toxic air contaminant listed in OAC rule 3745-114-01, that was modeled from the initial (or last) application; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the “Toxic Air Contaminant Statute”, ORC 3704.03(F), will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a “modification” under OAC rule 3745-31-01 solely due to a non-restrictive change to a parameter or process operation, where compliance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F), has been documented. If the change(s) meet(s) the definition of a “modification”, the permittee shall apply for and obtain a final FEPTIO prior

to the change. The Director may consider any significant departure from the operations of the emissions unit, described in the permit application, as a modification that results in greater emissions than the emissions rate modeled to determine the ground level concentration; and he/she may require the permittee to submit a permit application for the increased emissions.

- (6) The permittee shall collect, record, and retain the following information for each toxic evaluation conducted to determine compliance with the "Toxic Air Contaminant Statute":
- a. a description of the parameters/values used in each compliance demonstration and the parameters or values changed for any re-evaluation of the toxic(s) modeled (the composition of materials, new toxic contaminants emitted, change in stack/exhaust parameters, etc.);
 - b. the Maximum Acceptable Ground-Level Concentration (MAGLC) for each significant toxic contaminant or worst-case contaminant, calculated in accordance with the "Toxic Air Contaminant Statute", ORC 3704.03(F);
 - c. a copy of the computer model run(s), that established the predicted 1-hour maximum ground-level concentration that demonstrated the emissions unit to be in compliance with the "Toxic Air Contaminant Statute", ORC 3704.03(F), initially and for each change that requires re-evaluation of the toxic air contaminant emissions; and
 - d. the documentation of the initial evaluation of compliance with the "Toxic Air Contaminant Statute", ORC 3704.03(F), and documentation of any determination that was conducted to re-evaluate compliance due to a change made to the emissions unit or the materials applied.

e) Reporting Requirements

- (1) The permittee shall submit quarterly deviation (excursion) reports that identify:
- a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - i. all exceedances of the rolling, 12-month VOC emission limitation.
 - b. the probable cause of each deviation (excursion);
 - c. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
 - d. the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

- (2) The permittee shall submit quarterly deviation reports, to the appropriate Ohio EPA District Office or local air agency, documenting any exceedance of the daily limitation on toxic air emissions as established by the Director in order to maintain any toxic air contaminant below its MAGLC. The permittee shall also report any changes made, during the calendar quarter, to a parameter or value entered into the dispersion model that was used to maintain compliance with the "Toxic Air Contaminant Statute", ORC 3704.03(F), through the predicted 1-hour maximum ground-level concentration. These quarterly reports shall be submitted by April 30, July 31, October 31, and January 31, and shall cover the records for the previous calendar quarters.
- (3) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be submitted by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (4) All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications, or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the District Office or Local Air Agency, and/or any other individual or organization specifically identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the required application, notification or report is considered to be "submitted" on the date the submission is successful using a valid electronic signature. Signature by the signatory authority may be represented as provided through procedures established in Air Services.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:
 - a. Emission Limitations:

The VOC content of the coatings employed in the coating of paper and fabric shall not exceed 2.9 lbs/gallon, as applied, excluding water and exempt solvents.

The VOC content of the coatings employed in the coating of vinyl shall not exceed 4.8 lbs/gallon, excluding water and exempt solvents; or twenty-five per cent VOC by volume of the volatile matter of the vinyl coating.

Applicable Compliance Method:

Compliance with the VOC emission limitations above shall be based upon the record keeping requirements specified in d)(1)c. of this permit.

b. Emission Limitation:

VOC emissions shall not exceed 30.5 pounds per hour and 24.9 tons per year, based upon a rolling, 12-month summation of the monthly emissions.

Applicable Compliance Method:

If required, compliance with the hourly allowable VOC emission limitation shall be demonstrated in accordance with Methods 1- 4, 18, 25, or 25a, as appropriate, of 40 CFR Part 60, Appendix A.

Compliance with the rolling, 12-month VOC emission limitation shall be based upon the record keeping requirements specified in d)(2)g. of this permit.

c. Emission Limitations:

OC emissions shall not exceed 63.5 pounds per hour and 99.5 tons per year.

Applicable Compliance Method:

If required, compliance with the hourly allowable OC emission limitation shall be demonstrated in accordance with Methods 1- 4, 18, 25, or 25a, as appropriate, of 40 CFR Part 60, Appendix A.

Compliance with the annual OC emission limitation shall be based upon the record keeping requirements specified in d)(3) of this permit.

d. Emission Limitations:

Toluene emissions shall not exceed 33.9 pounds per day.

Applicable Compliance Method:

Compliance with the daily toluene emission limitation shall be based upon the record keeping requirements specified in d)(1)g. of this permit.

- (2) USEPA Methods 24 and 24A shall be used to determine the VOC contents for (a) coatings and (b) flexographic and rotogravure printing inks and related coatings, respectively. If, pursuant to Method 24 as outlined in 40 CFR Part 60, Appendix A, an owner or operator determines that Method 24 or 24A cannot be used for a particular coating or ink, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating or ink to demonstrate compliance until the USEPA

Draft Permit-to-Install and Operate
AdCal - Adhesive Coatings and Laminations, Inc.
Permit Number: P0119012
Facility ID: 1652010058
Effective Date: To be entered upon final issuance

provides alternative analytical procedures or alternative precision statements for Method 24 or 24A.

- g) Miscellaneous Requirements
 - (1) None.
