**RE: FINAL PERMIT TO INSTALL CERTIFIED MAIL
HAMILTON COUNTY**

Street Address:

122 S. Front Street

Lazarus Gov. Center TELE: (614) 644-3020 FAX: (614) 644-2329

Mailing Address:

Lazarus Gov. Center
P.O. Box 1049

Application No: 14-04967

DATE: 7/20/00

August Groh and Sons Inc
Richard Groh
8832 Reading Road
Cincinnati, OH 45215

Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
236 East Town Street, Room 300
Columbus, Ohio 43215

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

STATE OF OHIO ENVIRONMENTAL PROTECTION AGENCY

Permit To Install

Issue Date: 7/20/00

FINAL PERMIT TO INSTALL 14-04967

Application Number: 14-04967
APS Premise Number: 1431383478
Permit Fee: **\$200**
Name of Facility: August Groh and Sons Inc
Person to Contact: Richard Groh
Address: 8832 Reading Road
Cincinnati, OH 45215

Location of proposed air contaminant source(s) [emissions unit(s)]:

**8832 Reading Road
Cincinnati, Ohio**

Description of proposed emissions unit(s):

Paint Spray Booth for metal, wood and vinyl furniture.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized

representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio

Environmental Protection Agency if the proposed sources are inadequate or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities prove to be inadequate or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit to Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within thirty (30) days after commencing operation of the emissions unit(s) covered by this permit.

August Groh and Sons Inc
PTI Application: 14-04967
Issued: 7/20/00

Facility ID: 1431383478

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
OC	10.94

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

- 1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
K001 - paint spray booth for metal, wood and vinyl furniture	OAC rule 3745-31-05(A)(3)	14.5 lbs. OC/day and 2.64 TPY OC from coatings for metal parts.
		5.71 lbs. OC/day and 1.0 TPY OC from cleanup.
		7.3 TPY OC from coatings for nonmetal parts.
		10.94 TPY OC
		The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-07(G)(2)
	OAC rule 3745-21-07(G)(2)	8 lbs/hr and 40 lbs/day OC from coatings for non-metal parts
	OAC rule 3745-21-09(I)	Exempt

2. Additional Terms and Conditions

- 2.a The organic compound (OC) content, as applied of each coating employed for metal parts in this emissions unit shall not exceed 5.56 pounds of OC per gallon of coating, including

water and exempt solvents.

- 2.b** The organic compound (OC) content, as applied of each coating employed for non-metal parts in this emissions unit shall not exceed 6.0 pounds of OC per gallon of coating, including water and exempt solvent.
- 2.c** The OC content of each cleanup material employed in this emissions unit shall not exceed 5.71 pounds of OC per gallon.
- 2.d** Compliance with OAC rule 3745-31-05(A)(3) shall be demonstrated by the coating and cleanup material usage limitations, the OC content limitations, emission limitations and compliance with the Air Toxics Policy.

B. Operational Restrictions

- 1. When coating non-metal parts, the maximum coating usage shall not exceed 6.6 gallons per day and 2400 gallons per year.
- 2. When coating metal parts, the maximum coating usage shall not exceed 2.6 gallons per day and 949 gallons per year.
- 3. The maximum cleanup material usage for emissions unit K001 shall not exceed 1 gallon per day and 365 gallons per year.

C. Monitoring and/or Recordkeeping Requirements

- 1. The permittee shall collect and record the following information for each day when coating non-metal parts in emissions unit K001:
 - a. the company identification for each coating employed;
 - b. the total volume, in gallons, of each coating employed;
 - c. the organic compound content of each coating, in pounds per gallon, as applied, including water and exempt solvents;
 - d. the total organic compound emission rate for all coatings (b x c), in pounds per day;
 - e. the total number of hours the emissions unit was in operation; and

- f. the average hourly OC emission rate for all coatings employed to paint non-metal parts (d/e), in pounds per hour (average).
2. The permittee shall collect and record the following information for each day when coating metal parts in emissions unit K001;
 - a. the company identification for each coating employed;
 - b. the total volume, in gallons, of each coating employed;
 - c. the total volume, in gallons, of all coatings employed;
 - d. the organic compound content of each coating, in pounds per gallon, as applied, including water and exempt solvents; and
 - e. the total organic compound emission rate for all coatings employed, in pounds per day (b x d).
3. The permittee shall collect and record the following information for each day for all cleanup materials employed in emission unit K001:
 - a. the company identification for each organic cleanup material employed;
 - b. the total volume, in gallons, of each cleanup material employed;
 - c. the OC content of each cleanup material, in pounds per gallon, as applied; and
 - d. the total OC emission rate for all organic cleanup materials employed, in pounds per day (b x c).
4. The permit to install for this emissions unit was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant:

Pollutant: Toluene

TLV (ug/m3): 188,000

Maximum Hourly Emission Rate (lbs/hr): 5.48

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 608

MAGLC (ug/m3): 4476

Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:

- a. changes in the composition of the materials used or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
- b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
- c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition [other than (VV)(1)(a)(ii)], then the permittee shall obtain a final permit to install prior to the change.

The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will satisfy the "Air Toxic Policy:"

- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);

- b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy;" and
- c. when the computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

D. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports which include the following information for emissions unit K001:
 - a. an identification of each day during which a non-metal parts were coated and the average hourly organic compound emissions from the coatings exceeded 8 pounds per hour, and the actual average organic compound emissions for each such day;
 - b. an identification of each day during which a non-metal parts were coated and the organic compound emissions from the coatings exceeded 40 pounds per day, and the actual organic compound emissions for each such day; and
 - c. an identification of each day during which the average organic compound emissions from the organic cleanup material exceeded 5.71 pounds per day, and the average OC emissions for each such day; and
 - d. An identification of each day during which a metal parts were coated and the organic compound emissions from the coatings exceeded 14.5 pounds per day, and the actual organic compound emissions for each such day.
2. The permittee shall notify the Hamilton County Department of Environmental Services in writing of any daily record showing that the coating line employs more than the applicable maximum daily coating or cleanup material usage limit.

The notification shall include a copy of such record and shall be sent to the Hamilton County Department of Environmental Services within 45 days after the exceedance occurs.

3. The permittee shall submit an annual deviation (excursion) report which identify all exceedances of the annual coating and cleanup material usage limitation and/or the VOC content limitations. If no exceedances occurred during the reporting period then a report is required stating so. These reports shall be submitted by January 31 of each year.
4. The permittee shall submit annual reports to the Hamilton County Department of Environmental

Services which summarize the following for emissions unit K001:

- a. the total organic compound emissions from this emissions unit for the previous calendar year;
- b. the total number of gallons of coatings employed for metal and non-metal parts in this emissions unit for the previous calendar year; and
- c. the total number of gallons of cleanup materials employed in this emissions unit for the previous calendar year.

These reports shall be submitted by January 31 of each year.

5. The deviation reports shall be submitted in accordance with the reporting requirements of the General Terms and Conditions of this permit.

E. Testing Requirements

1. The permittee shall calculate the OC emission rate by multiplying the OC content of each coating and organic cleanup material employed (in pounds per gallon, as applied, including water and exempt solvents) by the coating and organic cleanup material usage rate (in gallons) and taking the sum for all coatings and organic cleanup material.
2. USEPA Methods 24 and 24A shall be used to determine the VOC contents for the coatings and cleanup materials employed in this emissions unit. If, pursuant to section 4.3 of Method 24, 40 CFR Part 60, Appendix A, an owner or operator determines that Method 24 or 24A cannot be used for a particular coating or ink, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating or ink to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24 or 24A.
3. Compliance with the usage and emissions limits cited in terms B.1., B.2., and B.3. shall be demonstrated by the record keeping in term C.1., C.2. and C.3.

F. Miscellaneous Requirements

1. The terms and conditions of this permit to install shall supersede the terms and conditions of permit to install number 14-2477 for emissions unit K001.

NSR Discussion

Permit Review Narrative
PTI 14-04967

August Groh and Sons, Inc.
8832 Reading Road
Cincinnati, OH 45215

PN: 1431383478

August Groh and Sons manufactures wood, metal and vinyl furniture. This permit to install is for a spray booth to coat the metal, wood and vinyl furniture and it is a modification to previous PTI 14-2477. August Groh and Sons has changed coatings and needs an emissions increase and a VOC content increase in the coatings for metal and non-metal furniture. The emissions will increase from 1.8 tons per year to 10.94 tons per year including cleanup. The coatings VOC content for metal will increase from 5.2 pounds per gallon to 5.56 pounds per gallon and the VOC content for non-metal parts will increase from 5.67 pounds per gallon to 6.0 pounds per gallon. The VOC content for cleanup solvents will remain the same.

The applicable OAC rules are 3745-31-05, 3745-21-07(G) and 3745-21-09(I). This emission unit is exempt from the requirements of 40 CFR Part 60 Subpart EE because the coating usage is less than 1015 gallons. BAT is coating and cleanup materials usage limitations, the OC content limitations and emission limitations.

An air toxic screening analysis was performed for toluene. The analysis indicates that this emissions unit is in compliance with the current Ohio EPA Air Toxics Policy.
