RE: FINALAIR POLLUTION PERMIT-TO-INSTALL AND OPERATE

Facility ID: 0679000308  
 Permit Number: P0118409  
 Permit Type: Initial Installation  
 County: Tuscarawas

Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**

**How to appeal this permit**

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
 77 South High Street, 17th Floor  
 Columbus, OH 43215

## **How to save money, reduce pollution and reduce energy consumption**

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: [www.ohioairquality.org/clean\\_air](http://www.ohioairquality.org/clean_air)

## **How to give us feedback on your permitting experience**

Please complete a survey at [www.epa.ohio.gov/survey.aspx](http://www.epa.ohio.gov/survey.aspx) and give us feedback on your permitting experience. We value your opinion.

## **How to get an electronic copy of your permit**

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc) by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

If you have any questions, please contact Ohio EPA DAPC, Southeast District Office at (740)385-8501 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Michael E. Hopkins, P.E.  
Assistant Chief, Permitting Section, DAPC

Schlabach Finishing  
**Permit Number:** P0118409  
**Facility ID:** 0679000308  
**Effective Date:** 7/9/2015

## Authorization

Facility ID: 0679000308  
Application Number(s): A0052771  
Permit Number: P0118409  
Permit Description: Initial PTIO for a natural gas-fired engine used to provide primary power to the facility.  
Permit Type: Initial Installation  
Permit Fee: \$25.00  
Issue Date: 7/9/2015  
Effective Date: 7/9/2015  
Expiration Date: 3/5/2019  
Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15

This document constitutes issuance to:

Schlabach Finishing  
8261 Winklepleck Road NW  
Dundee, OH 44624

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Southeast District Office  
2195 Front Street  
Logan, OH 43138  
(740)385-8501

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

  
Craig W. Butler  
Director

**Final Permit-to-Install and Operate**  
Schlabach Finishing  
**Permit Number:** P0118409  
**Facility ID:** 0679000308  
**Effective Date:** 7/9/2015

## Authorization (continued)

Permit Number: P0118409  
Permit Description: Initial PTIO for a natural gas-fired engine used to provide primary power to the facility.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

<b>Emissions Unit ID:</b>	<b>P003</b>
Company Equipment ID:	Natural Gas Engine #1
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

**Final Permit-to-Install and Operate**  
Schlabach Finishing  
**Permit Number:** P0118409  
**Facility ID:** 0679000308  
**Effective Date:** 7/9/2015

## **A. Standard Terms and Conditions**

**1. What does this permit-to-install and operate ("PTIO") allow me to do?**

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

**2. Who is responsible for complying with this permit?**

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

**3. What records must I keep under this permit?**

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

**4. What are my permit fees and when do I pay them?**

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

**5. When does my PTIO expire, and when do I need to submit my renewal application?**

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

**6. What happens to this permit if my project is delayed or I do not install or modify my source?**

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

**7. What reports must I submit under this permit?**

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

**8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?**

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

**9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?**

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

**10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?**

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the [DO/LAA] in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

**11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?**

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

**12. What happens if one or more emissions units operated under this permit is/are shut down permanently?**

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

**13. Can I transfer this permit to a new owner or operator?**

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

**14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?**

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

**15. What happens if a portion of this permit is determined to be invalid?**

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

**Final Permit-to-Install and Operate**  
Schlabach Finishing  
**Permit Number:** P0118409  
**Facility ID:** 0679000308  
**Effective Date:** 7/9/2015

## **B. Facility-Wide Terms and Conditions**

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - (1) None.
  - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - (1) None.
2. The following emissions unit contained in this permit is subject to 40 CFR Part 60, Subpart JJJJ: P003. The complete NSPS requirements, including the NSPS General Provisions may be accessed via the internet from the Electronic Code of Federal Regulations (e-CFR) website <http://ecfr.gpoaccess.gov> or by contacting the appropriate Ohio EPA District office or local air agency.
3. The Ohio EPA has determined that this facility is subject to the requirements of 40 CFR Part 63 Subpart ZZZZ, National Emission Standards for Hazardous Air Pollutants (NESHAP) for Stationary Reciprocating Internal Combustion Engines for Area Sources. Although Ohio EPA has determined that this Generally Available Control Technology NESHAP (GACT) applies, at this time Ohio EPA does not have the authority to enforce this standard. Instead, U.S. EPA has the authority to enforce this standard. Please be advised, that all requirements associated with this rule are in effect and shall be enforced by U.S. EPA. For more information on the area source rules, please refer to the following U.S. EPA website: <http://www.epa.gov/ttn/atw/area/arearules.html>

**Final Permit-to-Install and Operate**  
Schlabach Finishing  
**Permit Number:** P0118409  
**Facility ID:** 0679000308  
**Effective Date:** 7/9/2015

## **C. Emissions Unit Terms and Conditions**

**1. P003, Natural Gas Engine #1**

**Operations, Property and/or Equipment Description:**

Natural gas-fired 4SRB stationary RICE with a three way catalyst for the control of NOx, CO, and VOC emissions- Model ZYP NA690 (model year 2014, construction/order date 10/1/2014, installation date t.b.d.) for use as a primary power source; Maximum of 1.39 MMBtu/hr, 123 KW, rated at 166 HP @ 2,200 rpm; Certified under EPA Family EZPPB08.8NAS

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. g)(1), b)(1)b., and b)(2)b.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3) June 30, 2008	Install a certified engine designed to meet 0.07 g/hp-hr of nitrogen oxides (NOx) emissions (2,200 rpm).  Install a certified engine designed to meet 0.28 g/hp-hr of carbon monoxide (CO) emissions (2,200 rpm).  Install a certified engine designed to meet 0.01 g/hp-hr of volatile organic compound (VOC) emissions (2,200 rpm).  Particulate emissions (PE) shall not exceed 0.0048 ton per month averaged over a 12-month rolling period.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		See b)(2)a. below
b.	OAC rule 3745-31-05(A)(3)(a)(ii) June 30, 2008	The Best Available Technology (BAT) requirements under 3745-31-05(A)(3) do not apply to the NO <sub>x</sub> , CO, or VOC emissions since the calculated annual emissions rate is less than 10 tons per year taking into account the federally enforceable requirements of 40 CFR Part 63, Subpart JJJJ, including 40 CFR §60.4243(g).  The BAT requirements under OAC rule 3745-31-05(A)(3) do not apply to the particulate emissions from this air contaminant source since the potential to emit is less than 10 tons/year.  See b)(2)b. below.
c.	40 CFR Part 60, Subpart JJJJ (40 CFR 60.4230 – 60.4248)  [In accordance with 40 CFR 60.4230(a)(4)(iii), this emissions unit is a stationary non-emergency spark ignition (SI) internal combustion engine (ICE), for which construction commenced after 6/12/2006 and was manufactured on or after July 1, 2008 and with a maximum engine power less than 500 HP and is subject to the emissions limitations and control requirements specified in this section.]	NO <sub>x</sub> emissions shall not exceed 1.0 g/HP-hr or 82 ppmvd at 15% O <sub>2</sub> .  CO emissions shall not exceed 2.0 g/HP-hr or 270 ppmvd at 15% O <sub>2</sub> .  VOC emissions shall not exceed 0.7 g/HP-hr or 60 ppmvd at 15% O <sub>2</sub> .  [60.4233(e) and 40 CFR Part 60, Subpart JJJJ, Table 1]
d.	40 CFR 60.1-19 (40 CFR 60.4246)	Table 3 to Subpart JJJJ of 40 CFR Part 60 – Applicability of General Provisions of Subpart JJJJ shows which parts of the General Provisions in 40 CFR 60.1-19 apply.
e.	OAC rule 3745-17-11(B)(5)(a)	PE from the engine's exhaust shall not exceed 0.310 pound per million Btu of actual heat input.
f.	OAC rule 3745-17-07(A)(1)(a)	Visible PE from any stack shall not exceed twenty percent opacity, as a six-minute average.
g.	OAC rule 3745-18-06	Exempt pursuant to OAC rule 3745-18-06(A).

(2) Additional Terms and Conditions

- a. This Best Available Technology (BAT) emission limit applies until U.S. EPA approves Ohio Administrative Code (OAC) paragraph 3745-31-05(A)(3)(a)(ii) (the less than 10 tons per year BAT exemption) into the Ohio State Implementation Plan (SIP).
- b. These requirements apply once U.S. EPA approves OAC paragraph 3745-31-05(A)(3)(a)(ii) (the less than 10 tons per year BAT exemption) as part of the Ohio SIP.

c) Operational Restrictions

- (1) This emissions unit shall employ a catalytic converter (three-way catalyst) and air-to-fuel ratio control to control NO<sub>x</sub>, CO and VOC emissions at all times when the emissions unit is in operation.
- (2) This emissions unit shall only burn natural gas, except as provided by 40 CFR 40.4243(e).
- (3) The permittee shall comply with the applicable operational restrictions under 40 CFR Part 60, Subpart JJJJ, including the following sections:

60.4234	Maintain compliance with emissions standards over the entire life of the engine
60.4243(a)(1) and (b)(1)	Purchase a certified engine and operate and maintain engine according to manufacturer's instructions
60.4243(e)	<ul style="list-style-type: none"> <li>a) Use of propane during an emergency for a maximum of 100 hours per year</li> <li>b)</li> <li>c) If this emissions unit is operated using propane greater than 100 hours per year and is not certified for propane, the permittee must comply with the performance testing requirements of 40 CFR 60.4243(e) and 60.4244 to demonstrate compliance with 40 CFR 60.4233.</li> </ul>
60.4243(f) and 60.4243(a)(2)	If the certified natural gas engine is not maintained and operated in accordance with the manufacturer's emission-related written instructions, the engine will be considered a non-certified engine and must

	the permittee must conduct an initial performance test in accordance with 40 CFR 60.4243(a)(2)(ii) and 60.4244 within one year of engine startup to demonstrate compliance with 40 CFR 60.4233.
60.4243(g)	Use and maintenance of air fuel ratio controllers with a three-way catalyst

d) Monitoring and/or Recordkeeping Requirements

- (1) For each day this emissions unit burns a fuel other than natural gas, except as provided by 40 CFR 60.4243(e), the permittee shall maintain a record of the type and quantity of fuel burned.
- (2) The permittee shall comply with the applicable monitoring and recordkeeping requirements under 40 CFR Part 60, Subpart JJJJ, including the following sections:

60.4245(a)(1)	Maintain records of all notifications submitted to comply with this subpart and all documentation supporting any notification
60.4243(b)(1) and 60.4245(a)(2)	Maintain records of conducted maintenance for certified engines
60.4243(e)	Keep records of propane use in emergency situations
60.4245(a)(3) and (4)	Keep records of engine certification or documentation that the engine meets the emissions standards for certified engines operated in a non-certified manner

e) Reporting Requirements

- (1) All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications, or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the District Office or Local Air Agency, and/or any other individual or organization specifically

identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the required application, notification or report is considered to be "submitted" on the date the submission is successful using a valid electronic signature. Signature by the signatory authority may be represented as provided through procedures established in Air Services.

- (2) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be submitted by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (3) The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b)(1) of these terms and conditions shall be determined in accordance with the following methods:

a. Emissions Limitations:

PE shall not exceed 0.0048 ton per month averaged over a 12-month rolling period.

PE from the engine's exhaust shall not exceed 0.310 pound per million Btu of actual heat input.

Applicable Compliance Method

Compliance with the monthly limitation is demonstrated by multiplying the AP-42 emissions factor found in Table 3.2-3 for PM (9.5 E-03 lb/MMBtu) by the maximum rating of the engine (1.39 MMBtu/hr) multiplied by the maximum hours per year (8,760) and divided by 2,000 lbs/ton and divided by 12 months/year.

Compliance with the emissions limitation of 0.310 lb/MMBtu of actual heat input shall be demonstrated by the emissions factor found in AP-42 Table 3.2-3 for PM of 9.5 E-03 lb/MMBtu.

If required, PE shall be determined according to test Methods 1 - 5, as set forth in the "Appendix on Test Methods" in 40 CFR, Part 60 "Standards of Performance for New Stationary Sources", and the procedures specified in OAC rule 3745-17-03(B)(10). Alternative U.S. EPA-approved test methods may be used with prior approval from Ohio EPA, Southeast District Office.

b. Emissions Limitations:

Install a certified engine designed to meet 0.07 g/hp-hr of NOX emissions (2,200 rpm).

NO<sub>x</sub> emissions shall not exceed 1.0 g/HP-hr or 82 ppmvd at 15% O<sub>2</sub>.

**Applicable Compliance Method**

- i. Permittee will demonstrate compliance with these limits by purchasing an engine certified to meet these emissions standards. The engine must be installed and configured according to the manufacturer's emission-related specifications.
- ii. If permittee does not install, configure, operate, and maintain your engine and control device according to the manufacturer's emission-related instructions, or permittee changes emission-related settings in a way that is not permitted by the manufacturer, permittee must demonstrate compliance as follows:

Keep a maintenance plan and records of conducted maintenance and to the extent practicable, maintain and operate the engine in a manner consistent with good air pollution control practice for minimizing emissions. In addition, you must conduct an initial performance test to demonstrate compliance with the applicable emission standards within 1 year of startup, or within 1 year after an engine and control device is no longer installed, configured, operated, and maintained in accordance with the manufacturer's emission-related written instructions, or within 1 year after you change emission-related settings in a way that is not permitted by the manufacturer.

If required, NO<sub>x</sub> emissions shall be determined according to test Methods 1 - 4, and 7 as set forth in the "Appendix on Test Methods" in 40 CFR, Part 60 "Standards of Performance for New Stationary Sources". Alternative U.S. EPA-approved test methods may be used with prior approval from Ohio EPA, Southeast District Office.

- c. Emissions Limitations:

Install a certified engine designed to meet 0.28 g/hp-hr of CO emissions (2,200 rpm).

CO emissions shall not exceed 2.0 g/HP-hr or 270 ppmvd at 15% O<sub>2</sub>.

**Applicable Compliance Method**

- i. Permittee will demonstrate compliance with these limits by purchasing an engine certified to meet these emissions standards. The engine must be installed and configured according to the manufacturer's emission-related specifications.
- ii. If permittee does not install, configure, operate, and maintain your engine and control device according to the manufacturer's emission-related instructions, or permittee changes emission-related settings in a way that

is not permitted by the manufacturer, permittee must demonstrate compliance as follows:

Keep a maintenance plan and records of conducted maintenance and to the extent practicable, maintain and operate the engine in a manner consistent with good air pollution control practice for minimizing emissions. In addition, you must conduct an initial performance test to demonstrate compliance with the applicable emission standards within 1 year of startup, or within 1 year after an engine and control device is no longer installed, configured, operated, and maintained in accordance with the manufacturer's emission-related written instructions, or within 1 year after you change emission-related settings in a way that is not permitted by the manufacturer.

If required, CO emissions shall be determined according to test Methods 1 - 4, and 10 as set forth in the "Appendix on Test Methods" in 40 CFR, Part 60 "Standards of Performance for New Stationary Sources". Alternative U.S. EPA-approved test methods may be used with prior approval from Ohio EPA, Southeast District Office.

d. Emissions Limitations:

Install a certified engine designed to meet 0.01 g/hp-hr of VOC emissions (2,200 rpm).

VOC emissions shall not exceed 0.7 g/HP-hr or 60 ppmvd at 15% O<sub>2</sub>.

Applicable Compliance Method

i. Permittee will demonstrate compliance with these limits by purchasing an engine certified to meet these emissions standards. The engine must be installed and configured according to the manufacturer's emission-related specifications.

ii. If permittee does not install, configure, operate, and maintain your engine and control device according to the manufacturer's emission-related instructions, or permittee changes emission-related settings in a way that is not permitted by the manufacturer, permittee must demonstrate compliance as follows:

Keep a maintenance plan and records of conducted maintenance and to the extent practicable, maintain and operate the engine in a manner consistent with good air pollution control practice for minimizing emissions. In addition, you must conduct an initial performance test to demonstrate compliance with the applicable emission standards within 1 year of startup, or within 1 year after an engine and control device is no longer installed, configured, operated, and maintained in accordance with the manufacturer's emission-related written instructions, or within 1 year after you change emission-related settings in a way that is not permitted by the manufacturer.

**Final Permit-to-Install and Operate**

Schlabach Finishing

**Permit Number:** P0118409

**Facility ID:** 0679000308

**Effective Date:** 7/9/2015

If required, VOC emissions shall be determined according to test Methods 1 - 4, and 18, 25, or 25A as set forth in the "Appendix on Test Methods" in 40 CFR, Part 60 "Standards of Performance for New Stationary Sources". Alternative U.S. EPA-approved test methods may be used with prior approval from Ohio EPA, Southeast District Office.

e. Emissions Limitation:

Visible PE from any stack shall not exceed twenty percent opacity, as a six-minute average.

Applicable Compliance Method

If required, visible PE shall be determined according to USEPA Method 9.

g) Miscellaneous Requirements

- (1) Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745 114 01, will be less than 1.0 ton per year. OAC Chapter 3745 31 requires a permittee to apply for and obtain a new or modified permit to install and operate (PTIO) prior to making a "modification" as defined by OAC rule 3745 31 01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new PTIO.
