RE: FINALAIR POLLUTION PERMIT-TO-INSTALL AND OPERATE

Facility ID: 0448010313
 Permit Number: P0119227
 Permit Type: Administrative Modification
 County: Lucas

Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**

How to appeal this permit

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
 77 South High Street, 17th Floor
 Columbus, OH 43215

How to save money, reduce pollution and reduce energy consumption

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: www.ohioairquality.org/clean_air

How to give us feedback on your permitting experience

Please complete a survey at www.epa.ohio.gov/survey.aspx and give us feedback on your permitting experience. We value your opinion.

How to get an electronic copy of your permit

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

If you have any questions, please contact Toledo Department of Environmental Services at (419)936-3015 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Michael E. Hopkins, P.E.
Assistant Chief, Permitting Section, DAPC

Final Permit-to-Install and Operate
ADM GRAIN COMPANY
Permit Number: P0119227
Facility ID: 0448010313
Effective Date: 7/27/2015

Authorization

Facility ID: 0448010313
Application Number(s): M0003455
Permit Number: P0119227
Permit Description: Administrative modification to remove terms for 40 CFR 60, Subpart IIII and terms for a bi-fuel conversion kit which was never installed
Permit Type: Administrative Modification
Permit Fee: \$100.00
Issue Date: 7/27/2015
Effective Date: 7/27/2015
Expiration Date: 4/6/2019
Permit Evaluation Report (PER) Annual Date: Apr 1 - Mar 31, Due May 15

This document constitutes issuance to:

ADM GRAIN COMPANY
1308 MIAMI ST
Toledo, OH 43605

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Toledo Department of Environmental Services
348 South Erie Street
Toledo, OH 43604
(419)936-3015

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Craig W. Butler
Director

Final Permit-to-Install and Operate
ADM GRAIN COMPANY
Permit Number: P0119227
Facility ID: 0448010313
Effective Date: 7/27/2015

Authorization (continued)

Permit Number: P0119227
Permit Description: Administrative modification to remove terms for 40 CFR 60, Subpart IIII and terms for a bi-fuel conversion kit which was never installed

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	P006
Company Equipment ID:	shipping leg generator
Superseded Permit Number:	P0117968
General Permit Category and Type:	Not Applicable

Final Permit-to-Install and Operate
ADM GRAIN COMPANY
Permit Number: P0119227
Facility ID: 0448010313
Effective Date: 7/27/2015

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the [DO/LAA] in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Final Permit-to-Install and Operate
ADM GRAIN COMPANY
Permit Number: P0119227
Facility ID: 0448010313
Effective Date: 7/27/2015

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.
2. The Ohio EPA has determined that this facility is subject to the requirements of 40 CFR Part 63 Subpart ZZZZ, National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines. Although Ohio EPA has determined that this Generally Available Control Technology NESHAP (GACT) applies, at this time Ohio EPA does not have the authority to enforce this standard. Instead, U.S. EPA has the authority to enforce this standard. Please be advised, that all requirements associated with this rule are in effect and shall be enforced by U.S. EPA. For more information on the area source rules, please refer to the following U.S. EPA website: <http://www.epa.gov/ttn/atw/area/arearules.html>.

Final Permit-to-Install and Operate
ADM GRAIN COMPANY
Permit Number: P0119227
Facility ID: 0448010313
Effective Date: 7/27/2015

C. Emissions Unit Terms and Conditions

1. P006, shipping leg generator

Operations, Property and/or Equipment Description:

diesel fueled electric generator

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. b(1)b., b(2)e., c(2), d(3), e(2)b.,f(1)c., f(1)e.,f(1)h., f(1)j., f(1)l. and f(1)o.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	emissions from the stack serving this emissions unit shall not exceed: 3.23 pounds per hour of carbon monoxide (CO), 14.99 pounds per hour of nitrogen oxide (NOx), 1.06 pounds per hour of particulate emissions (PE), 1.06 pounds per hour particulate emissions equal to, or less than, 10 microns in diameter (PM10), 0.99 pound per hour of sulfur dioxide (SO2), 1.19 pounds per hour of volatile organic compound (VOC), 10% opacity, as a 6-minute average, and see b)(2)a. through b)(2)d.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
b.	OAC rule 3745-31-05(E)	emissions from the stack serving this emissions unit shall not exceed: 2.51 tons per year of CO, 11.62 tons per year of NOx, 0.83 ton per year of PE, 0.83 ton per year of PM10, 0.77 ton per year of SO2, 0.93 ton per year of VOC, and see b)(2)e.
c.	OAC rule 3745-17-07(A)(1)	see b)(2)f.
d.	OAC rule 3745-17-11(B)(5)(A)	emissions from the stack serving this emissions unit shall not exceed 0.310 pound per mmBtu of actual heat input
e.	OAC rule 3745-18-06(B)	exemption from sulfur dioxide limitations; less than 10 mmBtu per hour
f.	OAC rule 3745-110-03(F)(3)	exemption pursuant to OAC rule 3745-110-03(K)(17).
g.	40 CFR 80.510(c)	The sulfur content of the diesel fuel burned in this emissions unit shall not exceed 15 ppm or 0.0015% sulfur by weight.

(2) Additional Terms and Conditions

- a. The quality of No. 2 diesel fuel burned in this emissions unit shall meet the following U.S. EPA's specifications for Ultra Low Sulfur Diesel (ULSD) found in 40 CFR 80.510(c), on an 'as received' basis:
 - i. Sulfur content. 15 ppm maximum.
 - ii. Cetane index or aromatic content, as follows:
 - (a) A minimum cetane index of 40; or
 - (b) A maximum aromatic content of 35 volume percent.
- b. No. 2 diesel fuel delivered to the facility shall be stored only in dedicated vessels that are clearly identified for storage of No. 2 diesel fuel.
- c. The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-11(B)(5)(a).

- d. The hourly emission limitations specified above are based upon the emissions unit's potential to emit. Therefore, no hourly records are required to be maintained to demonstrate compliance with these limitations.
 - e. The annual emission limitations specified above are based upon the emissions unit's potential to emit at 1550 hours of operation. Therefore, only records of the annual hours of operation are required to be maintained to demonstrate compliance with these limitations.
 - f. The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
- c) Operational Restrictions
- (1) Diesel fuel burned in this emissions unit shall not exceed the limit for sulfur as specified by 40 CFR 80.510(c), i.e. the maximum sulfur content of diesel fuel shall not exceed 15 ppm or 0.0015% sulfur by weight.
 - (2) The maximum annual hours of operation for this emissions unit shall not exceed 1,550 hours.
- d) Monitoring and/or Recordkeeping Requirements
- (1) For each day during which the permittee burns a fuel other than no. 2 diesel fuel, the permittee shall maintain a record of the type, per cent sulfur content, and quantity of fuel burned in this emissions unit.
 - (2) The permittee shall maintain documents provided by the oil supplier for each shipment of no. 2 fuel oil to demonstrate compliance with the ULSD requirement. These documents must include the receipt or bill of lading that includes confirmation that the fuel meets the no. 2 diesel fuel ULSD standard.
 - (3) The permittee shall maintain records of the cumulative hours of operation for each calendar year.
 - (4) The permittee shall perform weekly checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the stack serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emissions incident; and
 - e. any corrective actions taken to minimize or eliminate the visible emissions.

If visible emissions are present, a visible emissions incident has occurred. The observer does not have to document the exact start and end times for the visible emissions incident under item (d) above or continue the daily check until the incident has ended. The observer may indicate that the visible emissions incident was continuous during the observation period (or, if known, continuous during the operation of the emissions unit). With respect to the documentation of corrective actions, the observer may indicate that no corrective actions were taken if the visible emissions were representative of normal operations, or specify the minor corrective actions that were taken to ensure that the emissions unit continued to operate under normal conditions, or specify the corrective actions that were taken to eliminate abnormal visible emissions.

e) Reporting Requirements

- (1) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA District Office or Local Air Agency by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.
- (2) The permittee shall identify the following information in the annual permit evaluation report:
 - a. any period of time (date and number of hours) that the quality of oil burned in this emissions unit did not meet the requirements established in 40 CFR 80.510(b), based upon the required fuel records, and the amount of non-compliant fuel burned on each such occasion.
 - b. all exceedances of the maximum allowable cumulative operating hours.
- (3) The permittee shall identify the following information in the annual permit evaluation report in accordance with the monitoring requirements for visible emissions in term number d(3) above:
 - a. all days during which any visible particulate emissions were observed from the stack serving this emissions unit; and
 - b. any corrective actions taken to eliminate the visible particulate emissions.
- (4) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the appropriate district office or local air agency.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:
 - a. Emission Limitation:

Visible emissions of particulate from the stack shall not exceed 10% opacity as a six-minute average.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with this emission limitation through visible emission observations performed in accordance with Method 9 of 40 CFR Part 60, Appendix A using the methods and procedures specified in OAC rule 3745-17-03(B)(1).

b. Emission Limitation:

The emissions of CO shall not exceed 3.23 pounds per hour.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time calculation utilizing the maximum hourly fuel input (3.4 mmBtu/hr) and the uncontrolled emissions factor listed in AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors, Section 3.3, Table 3.3-1. Emissions Factors for Uncontrolled Gasoline and Diesel Industrial Engines, dated 10/96, (0.95 lb CO/mmBtu).

If required, the permittee shall demonstrate compliance with this emission limitation through emission testing performed in accordance with Methods 1 thru 4 and 10 of 40 CFR Part 60 Appendix A. Alternate, equivalent methods may be used upon approval by the Toledo Division of Environmental Services.

c. Emission Limitation:

The emissions of CO shall not exceed 2.51 tons per year.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time calculation utilizing maximum annual operating period (1,550 hours/yr) and the maximum allowable hourly emissions rate (3.23 pounds per hour), divided by 2000 pounds per ton.

d. Emission Limitation:

The emissions of NOx shall not exceed 14.99 pounds per hour.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time emissions calculation utilizing the maximum hourly fuel input (3.4 mmBtu/hr) and the uncontrolled emissions factor listed in AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors, Section 3.3, Table 3.3-1. Emissions Factors for Uncontrolled Gasoline and Diesel Industrial Engines, dated 10/96, (4.41 lb NOx/mmBtu).

If required, the permittee shall demonstrate compliance with this emission limitation through emission testing performed in accordance with Methods 1 thru 4 and 7 of 40 CFR Part 60 Appendix A. Alternate, equivalent methods may be used upon approval by the Toledo Division of Environmental Services.

e. Emission Limitation:

The emissions of NO_x shall not exceed 11.62 tons per year.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time calculation utilizing maximum annual operating period (1,550 hours/yr) and the maximum allowable hourly emissions rate (14.99 pounds per hour), divided by 2000 pounds per ton.

f. Emission Limitation:

0.310 pound of PE per mmBtu of actual heat input

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by the uncontrolled emissions factor listed in AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors, Section 3.3, Table 3.3-1. Emissions Factors for Uncontrolled Gasoline and Diesel Industrial Engines, dated 10/96, (0.31 lb PE/mmBtu).

If required, the permittee shall demonstrate compliance with this emission limitation through emission testing performed in accordance with Methods 1 thru 5 of 40 CFR Part 60 Appendix A using the methods and procedures specified in OAC rule 3745-17-03(B)(9). Alternate, equivalent methods may be used upon approval by the Toledo Division of Environmental Services.

g. Emission Limitation:

The emissions of PE shall not exceed 1.06 pounds per hour.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time emissions calculation utilizing the maximum hourly fuel input (3.4 mmBtu/hr) and the uncontrolled emissions factor listed in AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors, Section 3.3, Table 3.3-1. Emissions Factors for Uncontrolled Gasoline and Diesel Industrial Engines, dated 10/96, (0.31 lb PE/mmBtu).

If required, the permittee shall demonstrate compliance with this emission limitation through emission testing performed in accordance with Methods 1 thru 5 of 40 CFR Part 60 Appendix A using the methods and procedures specified in OAC rule 3745-17-03(B)(9). Alternate, equivalent methods may be used upon approval by the Toledo Division of Environmental Services.

h. Emission Limitation:

The emissions of PE shall not exceed 0.83 ton per year.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time calculation utilizing maximum annual operating period (1,550 hours/yr) and the maximum allowable hourly emissions rate (1.06 pounds per hour), divided by 2000 pounds per ton.

i. Emission Limitation:

The emissions of PM10 shall not exceed 1.06 pounds per hour.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time emissions calculation utilizing the maximum hourly fuel input (3.4 mmBtu/hr) and the uncontrolled emissions factor listed in AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors, Section 3.3, Table 3.3-1. Emissions Factors for Uncontrolled Gasoline and Diesel Industrial Engines, dated 10/96, (0.31 lb PM10/mmBtu).

If required, the permittee shall demonstrate compliance with this emission limitation in accordance with Methods 201 and 202 of 40 CFR Part 51, Appendix M. Alternate, equivalent methods may be used upon approval by the Toledo Division of Environmental Services.

j. Emission Limitation:

The emissions of PM10 shall not exceed 0.83 ton per year.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time calculation utilizing maximum annual operating period (1,550 hours/yr) and the maximum allowable hourly emissions rate (1.06 pounds per hour), divided by 2000 pounds per ton.

k. Emission Limitation:

The emissions of SO2 shall not exceed 0.99 pound per hour.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time emissions calculation utilizing the maximum hourly fuel input (3.4 mmBtu/hr) and the uncontrolled emissions factor listed in AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors, Section 3.3, Table 3.3-1. Emissions Factors for Uncontrolled Gasoline and Diesel Industrial Engines, dated 10/96, (0.29 lb SO₂/mmBtu).

If required, the permittee shall demonstrate compliance with this emission limitation through emission testing performed in accordance with Methods 1 thru 4 and 6 of 40 CFR Part 60 Appendix A using the methods and procedures specified in OAC rule 3745-18-04. Alternate, equivalent methods may be used upon approval by the Toledo Division of Environmental Services.

I. Emission Limitation:

The emissions of SO₂ shall not exceed 0.77 ton per year.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time calculation utilizing maximum annual operating period (1,550 hours/yr) and the maximum allowable hourly emissions rate (0.99 pound per hour), divided by 2000 pounds per ton.

m. Sulfur Content Limitations for Diesel Fuel:

Sulfur content 15 ppm or < 0.0015% by weight sulfur

Applicable Compliance Method:

Compliance shall be demonstrated through the record keeping requirements for the sulfur content of each shipment of diesel oil received. If meeting the standards in 40 CFR 80.510(b), this calculates to approximately 0.0015lb SO₂/MMBtu.

n. Emission Limitation:

The emissions of VOC shall not exceed 1.19 pounds per hour.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time emissions calculation utilizing the maximum hourly fuel input (3.4 mmBtu/hr) and the uncontrolled emissions factor listed in AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors, Section 3.3, Table 3.3-1. Emissions Factors for Uncontrolled Gasoline and Diesel Industrial Engines, dated 10/96, (0.35 lb VOC/mmBtu).

Final Permit-to-Install and Operate
ADM GRAIN COMPANY
Permit Number: P0119227
Facility ID: 0448010313
Effective Date: 7/27/2015

If required, the permittee shall demonstrate compliance with this emission limitation through emission testing performed in accordance with Methods 1 thru 4 and 25 of 40 CFR Part 60 Appendix A using the methods and procedures specified in OAC rule 3745-21-10. Alternate, equivalent methods may be used upon approval by the Toledo Division of Environmental Services.

o. Emission Limitation:

The emissions of VOC shall not exceed 0.93 ton per year.

Applicable Compliance Method:

This emissions limitation was established as the potential to emit for this emissions unit by a one-time calculation utilizing maximum annual operating period (1,550 hours/yr) and the maximum allowable hourly emissions rate (1.19 pound per hour), divided by 2000 pounds per ton.

g) Miscellaneous Requirements

(1) None.
