

Synthetic Minor Determination and/or Netting Determination

Permit To Install 14-05460

A. Source Description

Leggett and Platt manufactures textile insulator pads at this facility. This emissions unit applies a coating to the pads by use of rolls.

B. Facility Emissions and Attainment Status

The facility is presently a minor facility. With the change in the emissions factor for this emissions unit, the potential Hazardous Air Pollutant (HAP) emissions increases to 21.5 TPY. The facility is located in Hamilton County which is non-attainment for Ozone and attainment for all other pollutants.

C. Source Emissions

The HAP emissions from the facility will be limited to 9.9 TPY for any individual HAP and 24.9 TPY for combined HAPs. The permittee will maintain monthly records and submit annual reports to demonstrate compliance.

D. Conclusion

This permit will also limit the HAP emissions to 9.9 TPY for any individual HAP and 24.9 TPY for combined HAP's. Based on the limits established in this permit, the facility will be a minor facility for HAP's and not subject to the Title V permitting requirements and case by case MACT.

**RE: DRAFT PERMIT TO INSTALL
HAMILTON COUNTY
Application No: 14-05460**

CERTIFIED MAIL

DATE: 7/24/2003

Leggett and Platt Inc
Wayne Hoener
2551 Crescentville Road
Cincinnati, OH 45241

You are hereby notified that the Ohio Environmental Protection Agency has made a draft action recommending that the Director issue a Permit to Install for the air contaminant source(s) [emissions unit(s)] shown on the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the proposed installation. A public notice concerning the draft permit will appear in the Ohio EPA Weekly Review and the newspaper in the county where the facility will be located. Public comments will be accepted by the field office within 30 days of the date of publication in the newspaper. Any comments you have on the draft permit should be directed to the appropriate field office within the comment period. A copy of your comments should also be mailed to Robert Hodanbosi, Division of Air Pollution Control, Ohio EPA, P.O. Box 1049, Columbus, OH, 43266-0149.

A Permit to Install may be issued in proposed or final form based on the draft action, any written public comments received within 30 days of the public notice, or record of a public meeting if one is held. You will be notified in writing of a scheduled public meeting. Upon issuance of a final Permit to Install a fee of **\$750** will be due. Please do not submit any payment now.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469. If you have any questions about this draft permit, please contact the field office where you submitted your application, or Mike Ahern, Field Operations & Permit Section at (614) 644-3631.

Very truly yours,

Michael W. Ahern, Supervisor
Field Operations and Permit Section
Division of Air Pollution Control

PUBLIC NOTICE

**ISSUANCE OF DRAFT PERMIT TO INSTALL 14-05460 FOR AN AIR CONTAMINANT SOURCE FOR
LEGGETT AND PLATT INC**

On 7/24/2003 the Director of the Ohio Environmental Protection Agency issued a draft action of a Permit To Install an air contaminant source for **Leggett and Platt Inc**, located at **2551 Crescentville Road, Cincinnati, Ohio**.

Installation of the air contaminant source identified below may proceed upon final issuance of Permit To Install 14-05460:

Squeeze rolls resin coater with drying oven - Modification to PTI 14-05077.

Comments concerning this draft action, or a request for a public meeting, must be sent in writing to the address identified below no later than thirty (30) days from the date this notice is published. All inquiries concerning this draft action may be directed to the contact identified below.

Harry Schweitering, Hamilton County Department of Environmental Services, 250 William Howard Taft Pkwy, Cincinnati, OH 45219-2660 [(513)946-7777]

**Permit To Install
Terms and Conditions**

**Issue Date: To be entered upon final issuance
Effective Date: To be entered upon final issuance**

DRAFT PERMIT TO INSTALL 14-05460

Application Number: 14-05460
APS Premise Number: 1431424086
Permit Fee: **To be entered upon final issuance**
Name of Facility: Leggett and Platt Inc
Person to Contact: Wayne Hoener
Address: 2551 Crescentville Road
Cincinnati, OH 45241

Location of proposed air contaminant source(s) [emissions unit(s)]:
**2551 Crescentville Road
Cincinnati, Ohio**

Description of proposed emissions unit(s):
Squeeze rolls resin coater with drying oven - Modification to PTI 14-05077.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Leggett and Platt Inc
PTI Application: 14-05460

Facility ID: 1431424086

Issued: To be entered upon final issuance

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any

Leggett and Platt Inc
PTI Application: 14-05460

Facility ID: 1431424086

Issued: To be entered upon final issuance

information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

Leggett and Platt Inc
PTI Application: 14-05460
Issued: To be entered upon final issuance

Facility ID: 1431424086

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

- a. If the permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77, the permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if the proposed new or modified source(s) would be

Emissions Unit ID: **P001**

prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification must be obtained before the operation of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d).

- b. If the permittee is required to apply for permit(s) pursuant to OAC Chapter 3745-35, the source(s) identified in this Permit To Install is (are) permitted to operate for a period of up to one year from the date the source(s) commenced operation. Permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the source(s) covered by this permit.

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
OC	17.39
PM/PM10	0.20
SO2	0.016
NOx	2.63
CO	2.21

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P001 - Squeeze rolls resin coater with drying oven - Modification	OAC rule 3745-31-05(A)(3)	4.92 lbs OC/hr, coatings only 17.1 TPY OC, coatings only See terms A.2.b and B.1.
		Dryer emissions from natural gas: 0.046 lb PM/PM10/hr, 0.20 TPY PM/PM10 0.004 lb SO2/hr, 0.016 TPY SO2 0.6 lb NOx/hr, 2.63 TPY NOx 0.5 lb CO/hr, 2.21 TPY CO 0.066 lb OC/hr, 0.29 TPY OC The requirements of this rule also include compliance with the requirements of OAC rule 3745-31-05(D).
	OAC rule 3745-21-07(G)(2)	
	OAC rule 3745-31-05(D)	Exempt, see term B.2. See term A.2.d

2. Additional Terms and Conditions

- 2.a Compliance with OAC rule 3745-31-05(A)(3) shall be demonstrated by compliance with the emissions limitations, the OC content limitation, the usage limitation and the Air Toxics Policy.

- 2.b** The OC content of the coatings employed in this emissions unit shall not exceed 0.322% by weight.
- 2.c** The hourly emission limitations outlined are based upon the emissions unit's Potential to Emit (PTE). Therefore, no hourly records are required to demonstrate compliance with these limits.
- 2.d** The total allowable usage of Hazardous Air Pollutants (HAPs), as identified in Section 112(b) of Title III of the Clean Air Act, from this facility shall not exceed 9.9* TPY for any single HAP and 24.9* TPY for any combination of HAPs. Compliance with the above limitations shall be based on a rolling, 12-month summation.

* This assumes the HAP's emitted are the same as the amount of HAP's used, since all HAP's used evaporate.

B. Operational Restrictions

- 1. The maximum annual coating usage for this emissions unit shall not exceed 10,577,400 pounds.
- 2. The use of photochemically reactive material as defined in OAC rule 3745-21-01(C)(5) is prohibited.

C. Monitoring and/or Recordkeeping Requirements

- 1. The permittee shall collect and record the following information for each month for this emissions unit:
 - a. The company identification for each coating employed.
 - b. The number of pounds of each coating employed.
 - c. The organic compound content of each coating, in percent by weight.
 - d. The total OC emission rate for all coatings employed, in tons per month $(b \times c) / 2000$.
- 2. The permittee shall collect and record the following information each month:
 - a. the company identification of each liquid organic material employed in this emissions unit; and

Legg**PTI /**Emissions Unit ID: **P001****Issued: To be entered upon final issuance**

- b. a record of each liquid organic material employed in this emissions unit indicating, whether or not the liquid organic material is photochemically reactive as identified in OAC rule 3745-21-01(C)(5).
3. The permit to install for this emissions unit P001 was evaluated based on the actual materials (typically coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources

Legg
PTI

Emissions Unit ID: **P001**

Issued: To be entered upon final issuance

of Air Toxic Emissions" policy("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model(or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Ground-Level Concentration (MAGLC).

The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: Acrylamide

TLV (ug/m3): 30

Maximum Hourly Emission Rate (lbs/hr): 0.00003

Predicted 1-Hour Maximum Ground-Level

Concentration (ug/m3): 0.00187

MAGLC (ug/m3): 0.714

Pollutant: Formaldehyde

TLV (ug/m3): 368 (Ceiling Value)

Maximum Hourly Emission Rate (lbs/hr): 0.06

Predicted 1-Hour Maximum Ground-Level

Concentration (ug/m3): 3.7

MAGLC (ug/m3): 6.5

Physical changes to or in the method of operation of the emissions unit after it's installation or modification could affect the parameters used to determine whether or not the "Air Toxics Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in the "Air Toxic Policy" include the following:

- a. Changes in the composition of the materials used (typically for coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
- b. Changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and

Leggett and Platt Inc
PTI Application 14-05460
Issue

Facility ID: 1431424086

Emissions Unit ID: **P001**

- c. Physical changes to the emissions unit or its exhaust parameters (e.g., increased/decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

Issued: To be entered upon final issuance

If the permittee determines that the "Air Toxic Policy" will be satisfied with the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is(are) defined as a modification under other provisions of the modification definition [other than (VV)(1)(a)(ii)], then the permittee shall obtain a final permit to install prior to the change.

The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will satisfy the Air Toxic Policy:"

- a. A description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. Documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. When the computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.
4. The permittee shall collect and record the following information each month for the entire facility:
- a. the name and identification number of each coating, employed;
 - b. the individual Hazardous Air Pollutant (HAP) content for each HAP of each coating in pounds of individual HAP per gallon of coating, as applied;
 - c. the total combined HAP content of each coating in pounds of combined HAPs per gallon of coating, as applied [sum all the individual HAP contents from (b)];
 - d. the number of gallons of each coating employed;
 - e. the name and identification of each cleanup material employed;
 - f. the individual HAP content for each HAP of each cleanup material, in pounds of individual HAP per gallon of cleanup material, as applied;
 - g. the total combined HAP content of each cleanup material, in pounds of combined HAPs per gallon of cleanup material, as applied [sum all the individual HAP contents from (f)];
 - h. the number of gallons of each cleanup material employed;

15

Legg

PTI /

Issued: To be entered upon final issuance

Emissions Unit ID: **P001**

Legg
PTI

Emissions Unit ID: **P001**

Issued: To be entered upon final issuance

- i. the total individual HAP usage for each HAP from all coatings and cleanup materials employed, in pounds or tons per month [for each HAP the sum of (b) times (d) for each coating plus the sum of (f) times (h) for each cleanup material];
- j. the total combined HAP usage from all coatings and cleanup materials employed, in pounds or tons per month [the sum of (c) times (d) for each coating plus the sum of (g) times (h) for each cleanup material];
- k. the updated rolling, 12-month summation of usage for each individual HAP emissions**, in pounds or tons. This shall include the information for the current month and the preceding eleven calendar months.
- l. the updated rolling, 12-month summation of usage for total combined HAP emissions**, in pounds or tons. This shall include the information for the current month and the preceding eleven calendar months.

* A listing of the HAPs can be found in Section 112(b) of the Clean Air Act or can be obtained by contacting your Hamilton County Department of Environmental Services contact. This information does not have to be kept on a individual emissions unit basis.

** This assumes the HAP(s) emitted are the same as the amounts of HAP(s) used since all HAP(s) used evaporated.

D. Reporting Requirements

1. The permittee shall submit annual reports which identify any exceedance of the annual coating usage or OC content limitation, as well as the corrective actions that were taken to achieve compliance. These reports shall be submitted by January 31 of each year. If no exceedances occurred during the reporting period then a report is required stating so.
2. The permittee shall notify the Hamilton County Department of Environmental Services in writing identifying each day during which any photochemically reactive material [as defined in OAC rule 3745-21-01(C)(5)] was employed in this emissions unit. This report shall identify the cause for the use of the photochemically reactive material(s) and the estimated total quantity of material(s) emitted each such day. This report shall be submitted to the Hamilton County Department of Environmental Services within 45 days after the exceedance occurs.
3. The permittee shall notify the Hamilton County Department of Environmental Services of any exceedance of the HAP usage limitations set forth in term A.2.d. The permittee shall submit annual reports which identify all exceedances of these limitations, as well as the corrective actions

Emissions Unit ID: **P001**

that were taken to achieve compliance. These reports shall be submitted by January 31 of each year. If no exceedances occurred during the reporting period then a report is required stating so.

E. Testing Requirements

1. Compliance with the coating usage limitation in term B.1 shall be demonstrated by the required recordkeeping in term C.1.
2. Formulation data or USEPA method 24 shall be used to determine the organic compound contents of the coatings employed in this emissions unit.
3. Compliance with the HAP emissions limitation in term A.2.d will be demonstrated by the record keeping in section C.4.
4. Emissions Limitation:
4.92 lbs/hr OC
17.1 TPY OC

Applicable Compliance Method:

The OC emissions are calculated by multiplying the pounds of coating used by the maximum OC content, by weight, as identified in term A.2.b. The annual limit is determined by multiplying the maximum usage rate identified in term B.1 by maximum OC content, by weight, as identified in term A.2.b, and dividing by 2000 lb/ton.

5. Emissions Limitation:
0.046 lb/hr PM/PM10
0.20 TPY PM/PM10

Applicable Compliance Method:

The hourly limit is determined by multiplying the AP-42, Fifth Edition, Section 1.4, Table 1.4-2 (revised 7/98) emission factor of 7.6 lbs PM/MM ft³ by the maximum natural gas usage rate of 0.006 MM ft³/hr. The annual limit is determined by multiplying the hourly rate by the maximum hours of operation, 8760 hr/yr, and dividing by 2000 lb/ton.

6. Emissions limitation:
0.004 lb/hr SO₂
0.016 TPY SO₂

Applicable Compliance Method:

The hourly limit is determined by multiplying the AP-42, Fifth Edition, Section 1.4, Table 1.4-2 (revised 7/98) emission factor of 0.6 lbs SO₂/MM ft³ times the natural gas usage of 0.006 MM

Legg

PTI

Emissions Unit ID: **P001**

Issued: To be entered upon final issuance

ft³/hr. The annual limit is determined by multiplying the hourly rate by the maximum hours of operation, 8760 hr/yr, and dividing by 2000 lb/ton.

**Legg
PTI**

Emissions Unit ID: **P001**

Issued: To be entered upon final issuance

7. Emissions limitation:
0.066 lb/hr OC
0.29 TPY OC

Applicable Compliance Method:

The hourly limit is determined by multiplying the AP-42, Fifth Edition, Section 1.4, Table 1.4-2 (revised 7/98) emission factor of 11 lbs VOC/MM ft³ times the natural gas usage of 0.006 MM ft³/hr. The annual limit is determined by multiplying the hourly rate by the maximum hours of operation, 8760 hr/yr, and dividing by 2000 lb/ton.

8. Emissions limitation:
0.6 lb/hr NO_x
2.63 TPY NO_x

Applicable Compliance Method:

The hourly limit is determined by multiplying the AP-42, Fifth Edition, Section 1.4, Table 1.4-1 (revised 7/98) emission factor of 100 lbs NO_x/MM ft³ times the natural gas usage of 0.006 MM ft³/hr. The annual limit is determined by multiplying the hourly rate by the maximum hours of operation, 8760 hr/yr, and dividing by 2000 lb/ton.

9. Emissions limitation:
0.5 lb/hr CO
2.21 TPY CO

Applicable Compliance Method:

The hourly limit is determined by multiplying the AP-42, Fifth Edition, Section 1.4, Table 1.4-1 (revised 7/98) emission factor of 84.0 lbs CO/MM ft³ times the natural gas usage 0.006 MM ft³/hr. The annual limit is determined by multiplying the hourly rate by the maximum hours of operation, 8760 hr/yr, and dividing by 2000 lb/ton.

10. Compliance with the operational restriction in term B.2 shall be demonstrated by the record keeping in term C.2.

F. Miscellaneous Requirements

1. The terms and conditions in this PTI supercede the terms and conditions in PTI 14-05077 issued on February 27, 2001.
2. The following terms and conditions of this permit are federally enforceable: A., B., C.1, C.2, C.4 D. and E.
