Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the permit. A public notice will appear in the Ohio Environmental Protection Agency (EPA) Weekly Review and the local newspaper, The Coshocton Tribune. A copy of the public notice and the draft permit are enclosed. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall
 Permit Review/Development Section
 Ohio EPA, DAPC
 50 West Town Street, Suite 700
 P.O. Box 1049
 Columbus, Ohio 43216-1049

and Ohio EPA DAPC, Southeast District Office
 2195 Front Street
 Logan, OH 43138

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified in writing if a public hearing is scheduled. A decision on issuing a final permit-to-install will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Ohio EPA DAPC, Southeast District Office at (740)385-8501.

Sincerely,

Michael E. Hopkins, P.E.
 Assistant Chief, Permitting Section, DAPC

PUBLIC NOTICE

The following matters are the subject of this public notice by the Ohio Environmental Protection Agency. The complete public notice, including any additional instructions for submitting comments, requesting information, a public hearing, or filing an appeal may be obtained at: <http://epa.ohio.gov/actions.aspx> or Hearing Clerk, Ohio EPA, 50 W. Town St., Columbus, Ohio 43215. Ph: 614-644-2129 email: HClerk@epa.ohio.gov

Draft Air Pollution Permit-to-Install OAC Chapter 3745-31 Modification

McWane Ductile - Ohio

2266 South Sixth Street, P. O. Box 6001, Coshocton, OH 43812-6001

ID#: P0118320

Date of Action: 8/6/2015

Permit Desc: McWane Ductile - Ohio will be expanding the size of its fittings paint booth. This permit will serve as a Chapter 31 modification of PTI 06-07432. Synthetic minor restrictions have been established to avoid a major modification and maintain the facility's current facility wide synthetic minor restrictions..

The permit and complete instructions for requesting information or submitting comments may be obtained at: <http://epa.ohio.gov/dapc/permitsonline.aspx> by entering the ID # or: Scott Winograd, Ohio EPA DAPC, Southeast District Office, 2195 Front Street, Logan, OH 43138. Ph: (740)385-8501

Permit Strategy Write-Up

1. Check all that apply:

Synthetic Minor Determination

Netting Determination

2. Source Description:

McWane Ductile – Ohio (formerly Clow Water Systems) (0616010006), is an existing facility located in Coshocton County, Ohio. McWane Ductile – Ohio is proposing to perform a Chapter 31 modification of K002, fitting painting operations, to allow for larger pipe and pipe fitting sizes.

3. Facility Emissions and Attainment Status:

McWane Ductile – Ohio and McWane Poles are stationary facilities located in Tuscarawas Township, Coshocton County, Ohio which is currently in attainment for all criteria pollutants. McWane Ductile - Ohio is considered a multi-facility establishment, as determined according to Engineering Guide 58, with McWane Poles (0616015010). The company has requested federally enforceable restrictions because the maximum potential to emit, at 8,760 hours per year, for K002 would trigger a major modification for volatile organic compound emissions and major source classification for HAPs. Federally enforceable restrictions of 9,000 gallons of coating and 500 gallons of cleanup per rolling 12-month period will lower the potential VOC emissions to less than 40 tons per year for this project. The updated federally enforceable restrictions, applicable facility-wide, will ensure that HAP emissions will continue to be limited to less than 25 tons per year for combined HAPs and less than 10 tons per year for any single HAP for McWane Ductile – Ohio and McWane Poles combined. These restrictions will keep the company an area source, as defined by 40 CFR Part 63.

PM10 emissions restrictions were previously taken in PTI 06-07432, issued July 8, 2009, to ensure the modeled emission rates were below Ohio's significance rate, protective of the NAAQS and PSD significance levels. The restrictions taken in this permit of 9,000 gallons of coating and 500 gallons of cleanup per rolling, 12-month period, ensure PM10 emissions will meet modeled emission rates determined to ensure Ohio's significance rate, protect the NAAQS, and ensure PSD significance levels.

4. Source Emissions:

McWane Ductile - Ohio is currently a source of PE/PM₁₀/PM_{2.5}, CO, SO₂, NO_x, VOC, HAPs. This facility has requested federally enforceable restrictions for this project to limit the project wide VOC emissions to below major modification thresholds, and to continue limiting the facility-wide, including McWane Poles, annual HAP emissions to 24.9 TPY total HAPS and 9.9 TPY for any single HAP. These restrictions allow the avoidance of a major modification for VOC emissions and major source definition for HAP emissions.

5. Conclusion:

The operational restrictions, emission limits, emissions testing, record keeping, and reporting requirements of this permit are sufficient to provide federally enforceable limitations to limit the potential

to emit of particulate emissions from all sources at the facility to below major modification thresholds and major source HAP thresholds.

6. Please provide additional notes or comments as necessary:

None

7. Total Permit Allowable Emissions Summary (for informational purposes only):

<u>Pollutant</u>	<u>Tons Per Year</u>
VOC	7.68
PE/PM ₁₀	0.02
Total HAP (combined with McWane Poles)	24.9
Single HAP (combined with McWane Poles)	9.9

This document constitutes issuance to:

McWane Ductile - Ohio
2266 South Sixth Street
P. O. Box 6001
Coshocton, OH 43812-6001

of a Permit-to-Install for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Southeast District Office
2195 Front Street
Logan, OH 43138
(740)385-8501

The above named entity is hereby granted a Permit-to-Install for the emissions unit(s) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

A. Standard Terms and Conditions

1. Federally Enforceable Standard Terms and Conditions

- a) All Standard Terms and Conditions are federally enforceable, with the exception of those listed below which are enforceable under State law only:
 - (1) Standard Term and Condition A.2.a), Severability Clause
 - (2) Standard Term and Condition A.3.c) through A. 3.e) General Requirements
 - (3) Standard Term and Condition A.6.c) and A. 6.d), Compliance Requirements
 - (4) Standard Term and Condition A.9., Reporting Requirements
 - (5) Standard Term and Condition A.10., Applicability
 - (6) Standard Term and Condition A.11.b) through A.11.e), Construction of New Source(s) and Authorization to Install
 - (7) Standard Term and Condition A.14., Public Disclosure
 - (8) Standard Term and Condition A.15., Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations
 - (9) Standard Term and Condition A.16., Fees
 - (10) Standard Term and Condition A.17., Permit Transfers

2. Severability Clause

- a) A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.
- b) All terms and conditions designated in parts B and C of this permit are federally enforceable as a practical matter, if they are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA and the State and by citizens (to the extent allowed by section 304 of the Act) under the Act. Terms and conditions in parts B and C of this permit shall not be federally enforceable and shall be enforceable under State law only, only if specifically identified in this permit as such.

3. General Requirements

- a) Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and re-issuance, or modification.

- b) It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c) This permit may be modified, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d) This permit does not convey any property rights of any sort, or any exclusive privilege.
- e) The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

4. Monitoring and Related Record Keeping and Reporting Requirements

- a) Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
 - (1) The date, place (as defined in the permit), and time of sampling or measurements.
 - (2) The date(s) analyses were performed.
 - (3) The company or entity that performed the analyses.
 - (4) The analytical techniques or methods used.
 - (5) The results of such analyses.
 - (6) The operating conditions existing at the time of sampling or measurement.
- b) Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c) Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
 - (1) Reports of any required monitoring and/or recordkeeping of federally enforceable information shall be submitted to the Ohio EPA DAPC, Southeast District Office.

- (2) Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be made to the Ohio EPA DAPC, Southeast District Office. The written reports shall be submitted quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. See A.15. below if no deviations occurred during the quarter.
 - (3) Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted to the Ohio EPA DAPC, Southeast District Office every six months, by January 31 and July 31 of each year for the previous six calendar months. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.
 - (4) This permit is for an emissions unit located at a Title V facility. Each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.
- d) The permittee shall report actual emissions pursuant to OAC Chapter 3745-78 for the purpose of collecting Air Pollution Control Fees.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the Ohio EPA DAPC, Southeast District Office in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports shall be submitted pursuant to OAC rule 3745-15-06.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

6. Compliance Requirements

- a) All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the appropriate Ohio EPA District Office or contracted

local air agency, and/or any other individual or organization specifically identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the electronic signature date shall constitute the date that the required application, notification or report is considered to be "submitted". Any document requiring signature may be represented by entry of the personal identification number (PIN) by responsible official as part of the electronic submission process or by the scanned attestation document signed by the Authorized Representative that is attached to the electronically submitted written report.

Any document (including reports) required to be submitted and required by a federally applicable requirement in this permit shall include a certification by a Responsible Official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete

- b) Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - (1) At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
 - (2) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with ORC section 3704.08.
 - (3) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
 - (4) As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c) The permittee shall submit progress reports to the Ohio EPA DAPC, Southeast District Office concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
 - (1) Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - (2) An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

7. Best Available Technology

As specified in OAC Rule 3745-31-05, new sources that must employ Best Available Technology (BAT) shall comply with the Applicable Emission Limitations/Control Measures identified as BAT for each subject emissions unit.

8. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

9. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a) Reports of any required monitoring and/or recordkeeping of state-only enforceable information shall be submitted to the Ohio EPA DAPC, Southeast District Office.
- b) Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from state-only required emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the Ohio EPA DAPC, Southeast District Office. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

10. Applicability

This Permit-to-Install is applicable only to the emissions unit(s) identified in the Permit-to-Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s) not exempt from the requirement to obtain a Permit-to-Install.

11. Construction of New Sources(s) and Authorization to Install

- a) This permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. This permit does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the application and terms and conditions of this permit. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of this permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Issuance of this permit is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.
- b) If applicable, authorization to install any new emissions unit included in this permit shall terminate within eighteen months of the effective date of the permit if the owner or operator has not undertaken a continuing program of installation or has not entered into a binding contractual

obligation to undertake and complete within a reasonable time a continuing program of installation. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the permittee shows good cause for any such extension.

- c) The permittee may notify Ohio EPA of any emissions unit that is permanently shut down (i.e., the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31) by submitting a certification from the authorized official that identifies the date on which the emissions unit was permanently shut down. Authorization to operate the affected emissions unit shall cease upon the date certified by the authorized official that the emissions unit was permanently shut down. At a minimum, notification of permanent shut down shall be made or confirmed by marking the affected emissions unit(s) as "permanently shut down" in "Air Services" along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update electronically will constitute notifying the Director of the permanent shutdown of the affected emissions unit(s).
- d) The provisions of this permit shall cease to be enforceable for each affected emissions unit after the date on which an emissions unit is permanently shut down (i.e., emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31). All records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, must be maintained in accordance with law. All reports required by this permit must be submitted for any period an affected emissions unit operated prior to permanent shut down. At a minimum, the permit requirements must be evaluated as part of the reporting requirements identified in this permit covering the last period the emissions unit operated.

Unless otherwise exempted, no emissions unit certified by the responsible official as being permanently shut down may resume operation without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31 and OAC Chapter 3745-77 if the restarted operation is subject to one or more applicable requirements.

- e) The permittee shall comply with any residual requirements related to this permit, such as the requirement to submit a deviation report, air fee emission report, or other any reporting required by this permit for the period the operating provisions of this permit were enforceable, or as required by regulation or law. All reports shall be submitted in a form and manner prescribed by the Director. All records relating to this permit must be maintained in accordance with law.

12. Permit-To-Operate Application

The permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77. The permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if operation of the proposed new or modified source(s) as authorized by this permit would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d) must be obtained before operating the source in a manner that would violate the existing Title V permit requirements.

13. Construction Compliance Certification

The applicant shall identify the following dates in the "Air Services" facility profile for each new emissions unit identified in this permit.

- a) Completion of initial installation date shall be entered upon completion of construction and prior to start-up.
- b) Commence operation after installation or latest modification date shall be entered within 90 days after commencing operation of the applicable emissions unit.

14. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

15. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

16. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable permit-to-install fees within 30 days after the issuance of any permit-to-install. The permittee shall pay all applicable permit-to-operate fees within thirty days of the issuance of the invoice.

17. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The new owner must update and submit the ownership information via the "Owner/Contact Change" functionality in "Air Services" once the transfer is legally completed. The change must be submitted through "Air Services" within thirty days of the ownership transfer date.

18. Risk Management Plans

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

19. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding

Draft Permit-to-Install
McWane Ductile - Ohio
Permit Number: P0118320
Facility ID: 0616010006

Effective Date: To be entered upon final issuance

any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

B. Facility-Wide Terms and Conditions

1. All the following facility-wide terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only:

a) None.

2. Facility-Wide Emission Limitations

a) McWane Poles (0616015010) and McWane Ductile - Ohio (0616010006) have been determined to be one facility for permitting purposes under 40 CFR Part 52.21, OAC Chapter 3745-31, and OAC Chapter 3745-77.

The facility-wide (McWane Poles (0616015010) and McWane Ductile - Ohio (0616010006) combined) individual HAP and the facility-wide total combined HAP emissions shall not exceed 9.9 and 24.9 tons per year, respectively, based upon a rolling, 12-month summation of the emission rates from all HAP emitting emissions units at the facility.

(Authority for term: OAC rule 3745-31-05(D))

3. Operational Restrictions

a) The following annual operational restrictions are in place in PTI P0116276 to maintain facility-wide HAPs compliance for McWane Ductile - Ohio (0616010006):

(1) 275,000 tons of total metal melted.

(Authority for term: OAC rule 3745-31-05(D))

b) In order to maintain compliance with the facility-wide emission limitations established in PTI P0116276 on HAPS, only materials that contain no organic HAP are to be used at the following McWane Ductile - Ohio (0616010006) emissions units:

(1) Pipe Paint Operations (K006);

(2) Pipe Painting Operation – Large Line (K015)

c) The following annual operational restrictions are in place in PTI P0119009 to maintain compliance with the facility-wide emission limitations on HAPs for McWane Poles (0616015010):

(1) 2,190 gallons of coating (K022);

(2) 27,000 tons of poles (P902-P906);

(3) 19.5 tons of electrode (P907);

(4) 19.5 tons of electrode (P908);

(5) 180 tons of grit (P909);

(6) 6,000 hours of operation for Cartridge Filter A, controlling emissions units P902-P904, and P912;

- (7) 6,000 hours of operation for Filter C, controlling emissions units P906 and P907;
- (8) 6,000 hours of operation and 54,000 million Btu of natural gas at drying oven (R008);
- (9) 108,000 gallons of coating and 250 gallons of cleanup material (R008).

d) In order to maintain compliance with the facility-wide emission limitations on HAPs, the facility, McWane Ductile – Ohio (0616010006), is limited to the following annual operational restrictions:

- (1) 9,000 gallons of coating and 500 gallons of cleanup (K002);
- (2) 14,000 gallons of coating and 250 gallons of cleanup (K024);
- (3) 400 gallons of coating (K025);
- (4) 4,000 tons of material blasted (P911);

(Authority for term: OAC rule 3745-31-05(D))

4. Facility-Wide Monitoring and/or Record Keeping Requirements

a) The following information must be maintained each month for McWane Ductile - Ohio (0616010006):

- (1) the quantity of metal melted, in tons;
- (2) the rolling, 12-month summation of the quantity of metal melted, in tons; and
- (3) the rolling, 12-month summation of the facility-wide individual HAP and facility-wide total combined HAP emissions, in tons;
- (4) the throughput of coating and cleanup, in gallons, for each month (K002);
- (5) beginning after the first 12 calendar months of operation, the rolling 12-month summation of the throughput of coating and cleanup, in gallons (K002)
- (6) also during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of coating and cleanup, in gallons for each calendar month (K002);
- (7) the throughput of coating and cleanup, in gallons, for each month (K024);
- (8) beginning after the first 12 calendar months of operation, the rolling 12-month summation of the throughput of coating and cleanup, in gallons (K024)
- (9) also during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of coating and cleanup, in gallons for each calendar month (K024);
- (10) the throughput of coating, in gallons, for each month (K025);

- (11) beginning after the first 12 calendar months of operation, the rolling 12-month summation of the throughput of coating, in gallons (K025)
- (12) also during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of coating, in gallons for each calendar month (K025);
- (13) the throughput of material blasted, in tons, for each month (P911);
- (14) beginning after the first 12 calendar months of operation, the rolling 12-month summation of the throughput of material blasted, in tons (P911);
- (15) also during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of material blasted, in tons, for each calendar month (P911); and
- (16) the facility-wide individual HAP and facility-wide total combined HAP emissions, in tons.

(Authority for term: OAC rule 3745-31-05(D))

- b) As required by PTI P0116276, the following information shall be collected and recorded each month for each of the HAP emitting emissions units located at McWane Ductile - Ohio (0616010006):

- (1) For any month that a material containing organic HAP is used:
 - a. the company identification for each HAP-containing coating and cleanup material employed during the month;
 - b. the number of gallons of each HAP-containing coating or cleanup material employed during the month;
 - c. the organic HAP content of each coating and cleanup material, in pounds per gallon; and
 - d. the total organic HAP emission rate for all coatings and cleanup materials, in tons.

(Authority for term: OAC rule 3745-31-05(D))

- (2) For any month that a material containing no organic HAP is used:
 - a. the company identification for each coating or cleanup material employed that contains no organic HAP employed during the month (a coating may be assumed to be employed during the month if it is purchased or released); and
 - b. the Material Safety Data Sheet or coating sheet for the coating or cleanup material identified in 4.b)(2)a.

(Authority for term: OAC rule 3745-31-05(D))

- c) As required by PTI P0119009, the following information shall be recorded each month for McWane Poles (0616015010):
- (1) the throughput of coating and cleanup material usage, in gallons, for each month (K022);
 - (2) beginning after the first 12 calendar months of operation, the rolling, 12-month summation of the throughput of coating and cleanup material usage (K022);
 - (3) also, during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of coating and cleanup material usage, for each calendar month (K022);
 - (4) the throughput of poles, in tons, for each month (P902-P906);
 - (5) beginning after the first 12 calendar months of operation, the rolling, 12-month summation of the throughput of poles, in tons (P902-P906);
 - (6) also, during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of poles, in tons, for each calendar month (P902-P906);
 - (7) the operating hours for Cartridge Filter A and Cartridge Filter C;
 - (8) beginning after the first 12 calendar months of operation, the rolling, 12-month summation of the operating hours of Cartridge Filter A and Cartridge Filter C;
 - (9) also, during the first 12 calendar months of operation, the permittee shall record the cumulative operating hours of Cartridge Filter A and Cartridge Filter C for each calendar month;
 - (10) the throughput of electrode, in tons, for each month (P907 and P908);
 - (11) beginning after the first 12 calendar months of operation, the rolling, 12-month summation of the throughput of electrode, in tons (P907 and P908);
 - (12) also, during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of electrode, in tons for each calendar month (P907 and P908);
 - (13) the throughput of grit, in tons, for each month (P909);
 - (14) beginning after the first 12 calendar months of operation, the rolling, 12-month summation of the throughput of grit, in tons (P909);
 - (15) also, during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of grit, in tons for each calendar month (P909);
 - (16) the throughput of topcoat, in gallons, for each month (R008);
 - (17) beginning after the first 12 calendar months of operation, the rolling, 12-month summation of the throughput of topcoat, in gallons (R008);

- (18) also, during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of topcoat, in gallons, for each calendar month (R008);
- (19) the throughput of cleanup, in gallons for each month (R008);
- (20) beginning after the first 12 calendar months of operation, the rolling, 12-month summation of the throughput of cleanup, in gallons (R008);
- (21) also, during the first 12 calendar months of operation, the permittee shall record the cumulative throughput of cleanup, in gallons, for each calendar month (R008);
- (22) the maximum heat input of the drying oven, in million BTU, for each month (R008);
- (23) beginning after the first 12 calendar months of operation, the rolling 12-month summation of the maximum heat input of the drying oven, in million BTU (R008);
- (24) also during the first 12 calendar months of operation, the permittee shall record the cumulative maximum heat input of the drying oven, in million BTU, for each calendar month (R008); and,
- (25) the rolling, 12-month summation of the facility-wide individual HAP and facility-wide total combined HAP emissions, in tons.

(Authority for term: OAC rule 3745-31-05(D))

- d) The permittee shall maintain monthly records of the rolling, 12-month summation of the facility-wide, McWane Poles (0616015010) and McWane Ductile - Ohio (0616010006) combined, HAP and facility-wide total combined HAP emissions, in tons (Summation of 4.a)(4), 4.b)(1)d., and 4.c)(25)). The facility, McWane Ductile - Ohio (0616010006) combined with McWane Poles (0616015010), has sufficient records to begin calculating and tracking compliance with the rolling emissions limitations and operational restrictions upon issuance of this permit.

(Authority for term: OAC rule 3745-31-05(D))

5. Reporting Requirements

- a) Unless other arrangements have been approved by the Director, all notifications and reports shall be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal.

(Authority for term: OAC rule 3745 15 03(B)(1)(a), OAC rule 3745 15 03(C), and OAC rule 3745-31-05(D))

- b) The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the rolling, 12-month summations of facility-wide individual HAP and facility-wide total combined HAP emissions limitations in 2.a). The quarterly deviation (excursion) reports shall be submitted in accordance with the reporting requirements of the Standard Terms and Conditions of this permit.

(Authority for term: OAC rule 3745-31-05(D))

- c) The permittee shall notify the Ohio EPA, Southeast District Office of any monthly record showing an exceedance of the rolling, 12-month operational restrictions in 3.a) and 3.c) or any deviation from the no organic HAP coating restrictions specified in 3.b). A copy of such record shall be sent to the Ohio EPA, Southeast District Office within 30 days following the end of the calendar month.

(Authority for term: OAC rule 3745-31-05(D))

6. Testing Requirements

- a) Compliance with the facility-wide (i.e. McWane Ductile - Ohio (0616010006) and McWane Poles (0616015010) combined) individual HAP and total combined HAP emission limitations shall be based upon a rolling, 12-month summation of the monthly emissions figures determined in accordance with the recordkeeping requirements in 4.a) and 4.b)(1)(d) for all HAP emitting emission units. Calculations shall follow the methodology presented in Attachment 2 of the amended permit-to-install application received on November 21, 2006, for McWane Ductile - Ohio (0616010006), and the methodology presented in the calculations attachment of the amended permit-to-install application received December 10, 2013, for McWane Poles (0616015010) and any subsequent revisions to that methodology approved by Ohio EPA.

(Authority for term: OAC rule 3745-31-05(D))

- b) Compliance with the annual operational restrictions (throughputs, hours of operation, and input of the drying oven) shall be based upon a rolling, 12-month summation of the monthly usage figures determined in accordance with the recordkeeping requirements in 4.a) and 4.c).

(Authority for term: OAC rule 3745-31-05(D))

- c) Compliance with the no organic HAP coatings restrictions shall be demonstrated based upon the record keeping requirements specified in 4.b).

(Authority for term: OAC rule 3745-31-05(D))

Draft Permit-to-Install
McWane Ductile - Ohio
Permit Number: P0118320
Facility ID: 0616010006
Effective Date: To be entered upon final issuance

C. Emissions Unit Terms and Conditions

1. K002, Fittings Painting

Operations, Property and/or Equipment Description:

Fittings painting operation employing airless coating with a booth equipped with a dry particulate filter with a maximum coating throughput of 18.6 gallons/hr, and a synthetic minor restriction of 3,000 gallons of epoxy coating/rolling, 12-month period, 6,000 gallons of water based coating/rolling, 12-month period, and 500 gallons of cleanup material/rolling, 12-month period.

This unit was installed in 1965 so an initial installation permit was not required. The permittee has requested Chapter 31 modification to allow for larger metal products and has requested federally-enforceable restrictions on PM₁₀ for this unit to ensure continued compliance with facility-wide emission rates protective of the National Ambient Air Quality Standards (NAAQS) and federally-enforceable restrictions on VOC emissions to avoid a major modification. (Supersedes PTI 06-07432 issued 7/8/2009)

a) The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only.

(1) None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(D) (to avoid major modification for VOC and to protect NAAQS for PM ₁₀)	<p>Volatile organic compound (VOC) emissions shall not exceed 7.68 tons per rolling, 12-month period, from coating and cleanup material combined.</p> <p>PE/PM₁₀ emissions shall not exceed 0.02 ton per rolling, 12-month period.</p>
b.	OAC rule 3745-31-05(A)(3) June 30, 2008	<p>The VOC emissions limitation established pursuant to this rule is equivalent to the emissions limitation established pursuant to OAC rule 3745-31-05(D).</p> <p>Install a dry particulate filter for the control of PE/PM₁₀ with a minimum of 90% capture efficiency and 99.87% control efficiency.</p> <p>See b)(2)a. below.</p>
c.	OAC rule 3745-31-05(A)(3)(a)(ii)	The Best Available Technology (BAT)

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
	June 30, 2008	requirements of OAC rule 3745-31-05(A)(3) do not apply to the VOC and PE/PM ₁₀ emissions from this air contaminant source since the potential to emit is less than 10 tons/year taking into account the federally enforceable restriction in b)(1)a. above. See b)(2)b. below.
d.	OAC rule 3745-21-09(U)(1)(d)	The VOC content of the coatings employed shall not exceed a daily volume-weighted average of 3.5 pounds per gallon, as applied, excluding water and exempt solvents for the coatings dried at temperatures not to exceed 200 degrees Fahrenheit.
e.	OAC rules 3745-17-11(B)(1) and (C) and 3745-17-07(A)	See b)(2)c. below.

(2) Additional Terms and Conditions

- a. This BAT emissions limit applies until U.S. EPA approves Ohio Administrative Code (OAC) paragraph 3745-31-05(A)(3)(b) (the less than 10 tons per year BAT exemption) into the Ohio State Implementation Plan (SIP).
- b. These requirements apply once U.S. EPA approves OAC paragraph 3745-31-05(A)(3)(a)(ii) (the less than 10 tons per year BAT exemption) as part of the Ohio SIP.
- c. Pursuant to OAC rule 3745-17-11(A)(1)(j), OAC rule 3745-17-11 does not apply to this source because an airless application method is used. Pursuant to OAC rule 3745-17-07(A)(3)(j), the visible particulate emission (PE) limitations in OAC rule 3745-17-07(A)(1) do not apply to a source that is not subject to a mass emission limitation in OAC rule 3745-17-11.

c) Operational Restrictions

- (1) The permittee has requested a federally enforceable limitation on the maximum annual throughput of coating and cleanup for this emissions unit in order to restrict the federally enforceable potential to emit to avoid major modification status for VOC. The maximum annual throughput for this emissions unit shall not exceed 3,000 gallons of epoxy coating, 5,000 gallons of water based coating, and 500 gallons of clean-up, based upon a rolling, 12-month summation of the throughput.

To ensure enforceability during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall not exceed the throughput levels specified in the following table:

Month(s)	Maximum Allowable Cumulative Throughput of Epoxy Coating (gallons)	Maximum Allowable Cumulative Throughput of Water Based Coating (gallons)	Maximum Allowable Cumulative Throughput of Cleanup Material (gallons)
1	250	500	42
1-2	500	1,000	83
1-3	750	1,500	125
1-4	1,000	2,000	167
1-5	1,250	2,500	208
1-6	1,500	3,000	250
1-7	1,750	3,500	292
1-8	2,000	4,000	333
1-9	2,250	4,500	375
1-10	2,500	5,000	417
1-11	2,750	5,500	458
1-12	3,000	6,000	500

After the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, compliance with the annual throughput limitation shall be based upon a rolling, 12-month summation of the throughput.

- (2) The permittee shall install and operate a dry particulate filter for the control of PE/PM₁₀ whenever this emissions unit is in operation and shall maintain the dry particulate filter in accordance with the manufacturer's recommendations, instructions, and/or operating manual(s), with any modifications deemed necessary by the permittee.
- (3) In the event the dry particulate filter is not operating in accordance with the manufacturer's recommendations, instructions, or operating manual, with any modifications deemed necessary by the permittee, the control device shall be expeditiously repaired or otherwise returned to these documented operating conditions.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information each month for the coating line:

- a. the name, identification number, and type (i.e., water-based or epoxy) of each coating applied;
- b. the volume, in gallons, of each coating applied;
- c. the VOC content, in pounds per gallon, of each coating, as applied (including any additives or thinners, if applicable);
- d. the VOC emissions from coating (VOC), in tons of VOC per month calculated as follows:

$$VOC \left(\frac{tons}{month} \right) = \frac{\sum_{i=1}^n (G \times C)}{2,000 \frac{lbs}{ton}}$$

Where:

G = volume of each coating applied, in gallons, as recorded in d)(1)b. above;

C = VOC content of each coating, as applied, in pounds per gallon, as recorded in d)(1)c. above; and,

n = total number of coatings employed during the month.

- e. the solids content, in pounds per gallon, of each coating, as applied (including any additives or thinners, if applicable);
- f. the particulate emissions from coating (PE/PM₁₀), in tons of PE/PM₁₀ per month calculated as follows:

$$PE/PM_{10} \left(\frac{tons}{month} \right) = \frac{\sum_{i=1}^n (G \times C \times T \times (1 - \text{Capture}))}{2,000 \frac{lbs}{ton}} + \frac{\sum_{i=1}^n (G \times C \times T \times (\text{Capture}) \times (1 - \text{Control}))}{2,000 \frac{lbs}{ton}}$$

Where:

G = volume of each coating applied, in gallons, as recorded in d)(3)b. above;

C = solids content of each coating, as applied, in pounds per gallon, as recorded in d)(3)c. above;

T = transfer efficiency (50% as submitted in permittee's application)

Capture = capture efficiency (90% as submitted in permittee's application)

Control = control efficiency (99.87% as submitted in permittee's application)

n = total number of coatings employed during the month.

- (2) The permittee shall collect and record the following information for each month for all cleanup material employed in this emissions unit:
- a. The name and identification of each cleanup material;
 - b. The VOC content, as applied, in pounds per gallon for each cleanup material;
 - c. The amount of each cleanup material employed, in gallons;
 - d. The monthly VOC emissions, as applied, from cleanup material, in pounds,
 - e. if cleanup materials are collected for off-site disposal and/or recovery, the following records shall be maintained if a credit is to be applied to the monthly VOC emissions:
 - i. the amount of cleanup material recovered during the month* for off-site disposal and/or recovery, in gallons (or pounds, if records of recovered cleanup material is maintained by weight and VOC content in percent by weight);
 - ii. the VOC content of the recovered cleanup material shall be based on the lowest VOC content of any cleanup material collected, in pounds per gallon (or percent by weight); or it may be based upon a laboratory analyses provided by the facility to which the waste solvent is shipped;
 - iii. the date the recovered cleanup material was shipped, the amount shipped (minus the container), and the name and address of the receiving, disposal, and/or recovery facility; and
 - f. the total monthly VOC emission from cleanup operations, in tons.
- * A daily log may be required for recovered waste cleanup solvents, where a record of the monthly total volume or weight of the collected material cannot be accurately maintained. This amount shall be adjusted if the volume or weight shipped is less than the sum of the monthly recovered solvent added to the container.
- (3) The permittee shall maintain monthly records of the following:
- a. the total monthly emissions of VOC (calculated by summing (d)(1)d. and d)(2)f.) from this emissions unit;
 - b. the total monthly emissions of PE/PM₁₀ (as recorded in d)(1)f. above) from this emissions unit;
 - c. during the first 12 calendar months of operation, the permittee shall record the following:
 - i. the cumulative throughput of epoxy coating, in gallons, for each calendar month;

- ii. the cumulative throughput of water based coating, in gallons, for each calendar month;
 - iii. the cumulative throughput of cleanup material, in gallons, for each calendar month;
 - iv. the cumulative emissions of VOC for each calendar month; and
 - v. the cumulative emissions of PE/PM₁₀ for each calendar month.
- d. beginning after the first 12 calendar months of operation, the permittee shall record the following from this emissions unit:
- i. the rolling, 12-month summation of the throughput of epoxy coating, in gallons;
 - ii. the rolling, 12-month summation of the throughput of water based coating, in gallons;
 - iii. the rolling, 12-month summation of the throughput of cleanup material, in gallons;
 - iv. the rolling, 12-month summation of VOC emissions; and
 - v. the rolling, 12-month summation of PE/PM₁₀ from this emissions unit.
- (4) The permittee, having chosen to demonstrate compliance by means of compliant coatings, shall collect and record the following information each day for the coating line:
- a. the name and identification number of each coating, as applied; and
 - b. the mass of VOC per volume of each coating, in pounds per gallon, excluding water and exempt solvents, as applied, calculated as follows for C_{VOC,2}:

$$C_{VOC,2} = (D_C)(W_{VOC}) / V_S + V_{VOC}$$

Where:

D_C = the density of coating, in pounds of coating per gallon of coating;

W_{VOC} = W_{VM} - W_W - W_{ES};

V_S = volume fraction of solids in coating, in gallons of solids per gallon of coating;

V_{VOC} = V_{VM} - V_W - V_{ES};

W_{VM} = weight fraction of volatile matter in coating, in pound of volatile matter per pound of coating;

W_W = weight fraction of water in coating, in pound of water per pound of coating;

W_{ES} = weight fraction of exempt solvent in coating, in pound of exempt solvent per pound of coating;

V_{VM} = volume fraction of volatile matter in coating, in gallon of volatile matter per gallon of coating;

V_W = volume fraction of water in coating, in gallon of water per gallon of coating;
and

V_{ES} = volume fraction of exempt solvent in coating, in gallon of exempt solvent per gallon of coating.

If the permittee mixes compliant coatings, it is not necessary to record the VOC content of the resulting mixture.

- (5) The permittee shall maintain documentation of the manufacturer's recommendations, instructions, or operating manuals for the dry particulate filter, along with documentation of any modifications deemed necessary by the permittee. These documents shall be maintained at the facility and shall be made available to the appropriate Ohio EPA District Office or local air agency upon request.
- (6) The permittee shall conduct periodic inspections of the dry particulate filter system to determine whether it is operating in accordance with the manufacturer's recommendations, instructions, or operating manuals with any modifications deemed necessary by the permittee or operator. These inspections shall be performed at a frequency that shall be based upon the recommendation of the manufacturer and the permittee shall maintain a copy of the manufacturer's recommended inspection frequency and it shall be made available to the Ohio EPA upon request.
- (7) In addition to the recommended periodic inspections, not less than once each calendar year the permittee shall conduct a comprehensive inspection of the dry particulate filter system while the emissions unit is shut down and perform any needed maintenance and repair to ensure that it is operated in accordance with the manufacturer's recommendations.
- (8) The permittee shall document each inspection (periodic and annual) of the dry particulate filter system and shall maintain the following information:
 - a. the date of the inspection;
 - b. a description of each/any problem identified and the date it was corrected;
 - c. a description of any maintenance and repairs performed; and
 - d. the name of person who performed the inspection.

These records shall be maintained at the facility for not less than five years from the date the inspection and any necessary maintenance or repairs were completed and shall be made available to the appropriate Ohio EPA District Office or local air agency upon request.

- (9) The permittee shall maintain records that document any time periods when the dry particulate filter was not in service when the emissions unit was in operation, as well as, a record of all operations during which the dry particulate filter was not operated according to the manufacturer's recommendations with any documented modifications made by the permittee. These records shall be maintained for a period of not less than five years and shall be made available to the Ohio EPA upon request.

e) Reporting Requirements

- (1) Unless other arrangements have been approved by the Director, all notifications and reports shall be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal.
- (2) The permittee shall submit quarterly deviation (excursion) reports that identify:
- a. any exceedance of the annual epoxy coating, water based coating, and cleanup usage limitations;
 - b. all exceedances of the rolling, 12-month limitation on:
 - i. the throughput of epoxy coating for this emissions unit;
 - ii. the throughput of water based coating for this emissions unit;
 - iii. the throughput of cleanup for this emissions unit;
 - c. for the first 12 calendar months of operation, all exceedances of the maximum allowable cumulative throughput of:
 - i. epoxy coating for this emissions unit;
 - ii. water based coating for this emissions unit;
 - iii. cleanup for this emissions unit;
 - d. all exceedances of the rolling, 12-month limitation of VOC;
 - e. all exceedances of the rolling, 12-month limitation of PE/PM10.

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

- (3) The permittee shall submit quarterly reports that identify:
- a. any daily record showing that the dry particulate filter was not in service or not operated according to manufacturer's recommendations (with any documented modifications made by the permittee) when the emissions unit(s) was/were in operation.

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

- (4) The permittee shall notify the Director (appropriate District Office or local air agency) in writing of each daily record showing the application of a coating with greater than 3.5 pounds VOC per gallon, excluding water and exempt solvents. The notification shall include a copy of each such record and it shall be sent to the appropriate District Office or local air agency within 30 days following the end of the calendar month during which the non-compliant coating was applied.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:

a. Emission Limitation:

VOC emissions shall not exceed 7.68 tons per rolling, 12-month period, from coating and cleanup material combined.

Applicable Compliance Method:

Compliance with this emissions limitations shall be determined based on the recordkeeping specified in d)(1)a.-d. and d)(3) above.

b. Emission Limitation:

PE/PM₁₀ emissions shall not exceed 0.02 ton per rolling, 12-month period.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the recordkeeping specified in d)(1)a., d)(1)b., d)(1)e. and d)(1)f. above.

c. Emission Limitation:

Install a dry particulate filter for the control of PE/PM₁₀ with a minimum of 90% capture efficiency and 99.87% control efficiency.

Applicable Compliance Method:

Compliance with this emissions limitation shall be demonstrated by the manufacturer's guaranteed specifications.

d. Emission Limitation:

The VOC content of the coatings employed shall not exceed a daily volume-weighted average of 3.5 pounds per gallon, as applied, excluding water and exempt solvents for the coatings dried at temperatures not to exceed 200 degrees Fahrenheit.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the recordkeeping specified in d)(4).

- (2) Formulation data or USEPA Method 24 shall be used to determine the volatile compound contents of the coatings.

g) **Miscellaneous Requirements**

Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum increase in annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires a permittee to apply for and obtain a new or modified permit-to-install (PTI) prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new PTI.
