Lazarus Gov. Center TELE: (614) 644-3020 FAX: (614) 644-2329

Mailing Address:

Lazarus Gov. Center
P.O. Box 1049

Application No: 15-01427

DATE: 8/8/2000

RC Miller Refuse Services Inc
Randy Bodnar/Allied Waste
118 Scott Road
Pittsburgh, PA 15239

Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
236 East Town Street, Room 300
Columbus, Ohio 43215

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

Canton LAA

Permit To Install

STATE OF OHIO ENVIRONMENTAL PROTECTION AGENCY

FINAL PERMIT TO INSTALL 15-01427

Application Number: 15-01427
APS Premise Number: 1576001654
Permit Fee: **\$200**
Name of Facility: RC Miller Refuse Services Inc
Person to Contact: Randy Bodnar/Allied Waste
Address: 118 Scott Road
Pittsburgh, PA 15239

Location of proposed air contaminant source(s) [emissions unit(s)]:
3766 Tulane Avenue
Nimishillen Twp, Ohio

Description of proposed emissions unit(s):
Paint spray booth.

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Part I - GENERAL TERMS AND CONDITIONS

A. Permit to Install General Terms and Conditions

1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized

representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Termination of Permit to Install

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

9. Construction of New Sources(s)

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio

RC Miller Refuse Services Inc
PTI Application: 15-01427
Issued: 8/8/2000

Facility ID: 1576001654

Environmental Protection Agency if the proposed sources are inadequate or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities prove to be inadequate or cannot meet applicable standards.

10. Public Disclosure

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

11. Applicability

This Permit to Install is applicable only to the emissions unit(s) identified in the Permit to Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s).

12. Best Available Technology

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

13. Source Operation and Operating Permit Requirements After Completion of Construction

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within thirty (30) days after commencing operation of the emissions unit(s) covered by this permit.

RC Miller Refuse Services Inc
PTI Application: 15-01427
Issued: 8/8/2000

Facility ID: 1576001654

14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

SUMMARY (for informational purposes only)
TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS

<u>Pollutant</u>	<u>Tons Per Year</u>
VOC	2

PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
K001 - Paint spray booth	OAC rule 3745-31-05(A)(3)	Volatile organic compound emissions shall not exceed 4 pounds/hour and 2 tons/year, including cleanup material. See section A.2.a below. See section B.1 below. See section A.2 .b below.
	OAC rule 3745-21-09(U)(2)(c)	See section A.2.c below.
	OAC rule 3745-21-09(U)(2)(e)(iii)	See section A.2.c below.

2. Additional Terms and Conditions

- 2.a The 4 pounds of VOC per hour limitation for this emissions unit was established to reflect hourly potential to emit. Therefore, it is necessary to develop record keeping and/or reporting requirements to ensure compliance with this limit.
- 2.b The permittee shall utilize water based coatings when painting metal waste containers.
- 2.c The VOC content limit requirements of OAC rule 3745-21-09(U)(1) do not apply.

B. Operational Restrictions

1. The permittee shall operate the dry filtration system whenever this emissions unit is in operation.

C. Monitoring and/or Recordkeeping Requirements

1. The permittee shall collect and record the following information on a monthly basis for the purpose of determining annual VOC emissions:

- a. the name and identification of each coating and cleanup material employed;
 - b. the number of gallons of each coating and cleanup material employed;
 - c. the number of gallons of each cleanup material drummed for shipment offsite;
 - d. the VOC content of each cleanup material, in pounds of VOC per gallon of coating
 - e. the VOC content of each coating, as applied, in pounds per gallon; and
 - f. the total VOC emissions from all coatings and cleanup materials employed, in pounds or tons; that is, the sum of all coatings times the respective VOC content plus the amount of cleanup material employed minus the gallons drummed for shipment offsite times the VOC content of the cleanup material.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.
 3. The permittee shall maintain daily records that document any time periods when a non water based coating material is used to paint waste containers.

D. Reporting Requirements

1. The permittee shall submit annual reports which specify the total VOC emissions from this emissions unit for the previous calendar year. These reports shall be submitted by January 31 of each year. If annual emissions are less than 2 tons per year, no annual reporting is necessary.
2. The permittee shall notify the Canton laa in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Canton laa within 30 days after the event occurs.
3. The permittee shall notify the Canton laa in writing of any daily record showing that a non-water based coating material is used to paint a waste container. The notification shall include a copy of such a record and shall be sent to the Canton laa within 30 days after the event occurs.

E. Testing Requirements

1. Compliance with the emission limitation(s) in Section A.1 of these terms and conditions shall be determined in accordance with the following method(s):

- a. Emission Limitation:
Volatile organic compound emissions shall not exceed 4 pounds/hour.
- Applicable Compliance Method:
Compliance shall be demonstrated by multiplying the maximum VOC content of the coating material by the maximum gallons used:
For used light duty trucks: $(3.6 \text{ pounds VOC per gallon of coating material}) \times (1 \text{ gallon of coating material per hour}) = 3.6 \text{ pounds VOC per hour}$
- For metal waste containers: $(2.7 \text{ pounds VOC per gallon of coating material}) \times (1.3 \text{ gallon of coating material}) = 3.5 \text{ pounds VOC per hour.}$
- b. Emission Limitation:
Volatile organic compound emissions shall not exceed 2 tons per year, including cleanup materials.
- Applicable Compliance Method:
Compliance shall be demonstrated by the record keeping requirements in section C.1.

F. Miscellaneous Requirements

None

NSR Discussion

This emissions unit is a paint booth that is used to paint used light duty trucks and large metal waste containers. It is equipped with a dry filtration system. Only one container or truck is painted at any time.

Truck Painting

The coating material used for painting the trucks is a mixture of chemical compounds each containing a different VOC content. The paint is applied as the mixture. The resultant total VOC emissions calculated for the mixture is 14.3 lbs VOC when 4 gallons of coating is used to paint a single vehicle. The maximum usage rate for the paint is 1 gallon/hour. Therefore, the maximum VOC emission rate when painting a truck is

$$(14.3 \text{ lbs VOC}/4 \text{ gallons coating material}) \times 1 \text{ gallon/hour} = 3.6 \text{ lbs VOC/hour}$$

The annual emission rate was calculated by multiplying the maximum hourly emission rate by the maximum hours of operation as shown below:

$$(3.6 \text{ lbs VOC/hour}) \times (8 \text{ hours/month}) \times (12 \text{ months/year}) / 2000 \text{ lbs/ton} = 0.17 \text{ tons/year}$$

Metal waste container painting

The coating materials used are water based. The maximum application rate for the coating when painting a waste container is 1.3 gallons coating/hour. The maximum VOC emission rate for coating a single container is

$(2.7 \text{ lbs VOC/gallon of coating}) \times 1.3 \text{ gallons of coating/hour} = 3.5 \text{ lbs VOC/hour}$. The annual emission rate was calculated by multiplying the maximum hourly emission rate by the maximum hours of operation as shown below: $(3.5 \text{ lbs VOC/hour}) \times (1040 \text{ hours/year}) / 2000 \text{ lbs/ton} = 1.8 \text{ tons VOC/year}$

BAT consists of the use of the dry paint filter during operation of the booth, use of a water based coating material when painting waste containers, and VOC emission limits of 4 lbs VOC/hour and 2 tons VOC/year, including cleanup materials. This source's VOC emission rate limitations maintain air toxic and HAP emission rates below applicable
