RE: FINALAIR POLLUTION PERMIT-TO-INSTALL AND OPERATE

Facility ID: 1576050794
Permit Number: P0120277
Permit Type: OAC Chapter 3745-31 Modification
County: Stark

Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**
- **What should you do if you notice a spill or environmental emergency?**

How to appeal this permit

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
77 South High Street, 17th Floor
Columbus, OH 43215

How to save money, reduce pollution and reduce energy consumption

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: www.ohioairquality.org/clean_air

How to give us feedback on your permitting experience

Please complete a survey at www.epa.ohio.gov/survey.aspx and give us feedback on your permitting experience. We value your opinion.

How to get an electronic copy of your permit

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

What should you do if you notice a spill or environmental emergency?

Any spill or environmental emergency which may endanger human health or the environment should be reported to the Emergency Response 24-HOUR EMERGENCY SPILL HOTLINE toll-free at (800) 282-9378. Report non-emergency complaints to the appropriate district office or local air agency.

If you have any questions regarding your permit, please contact Canton City Health Department at (330)489-3385 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Michael E. Hopkins, P.E.
Assistant Chief, Permitting Section, DAPC

Cc: Canton

Final Permit-to-Install and Operate
United Surface Finishing
Permit Number: P0120277
Facility ID: 1576050794
Effective Date: 2/25/2016

Authorization

Facility ID: 1576050794
Application Number(s): A0055276
Permit Number: P0120277
Permit Description: Chapter 31 modification permit for the reconstruction of two (2) hard chrome electroplating tanks including replacement of control equipment, rectifiers, chillers, and tank liners.
Permit Type: OAC Chapter 3745-31 Modification
Permit Fee: \$400.00
Issue Date: 2/25/2016
Effective Date: 2/25/2016
Expiration Date: 10/30/2023
Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15

This document constitutes issuance to:

United Surface Finishing
2202 GILBERT AVE N E
CANTON, OH 44705

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Canton City Health Department
420 Market Avenue
Canton, OH 44702-1544
(330)489-3385

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Craig W. Butler
Director

Final Permit-to-Install and Operate
United Surface Finishing
Permit Number: P0120277
Facility ID: 1576050794
Effective Date: 2/25/2016

Authorization (continued)

Permit Number: P0120277

Permit Description: Chapter 31 modification permit for the reconstruction of two (2) hard chrome electroplating tanks including replacement of control equipment, rectifiers, chillers, and tank liners.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	P001
Company Equipment ID:	Chrome Plating tank # 9
Superseded Permit Number:	P0101214
General Permit Category and Type:	Not Applicable
Emissions Unit ID:	P003
Company Equipment ID:	Chrome Plating tank # 10
Superseded Permit Number:	P0101214
General Permit Category and Type:	Not Applicable

Final Permit-to-Install and Operate
United Surface Finishing
Permit Number: P0120277
Facility ID: 1576050794
Effective Date: 2/25/2016

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the [DO/LAA] in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Final Permit-to-Install and Operate
United Surface Finishing
Permit Number: P0120277
Facility ID: 1576050794
Effective Date: 2/25/2016

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.
2. The following emissions units contained in this permit are subject to 40 CFR Part 63, Subpart N, National Emissions Standards for Hazardous Air Pollutants (NESHAP) for Chromium Emissions from Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks: P001 and P003. The complete NESHAP requirements, including the Subpart A General Provisions, may be accessed via the internet from the Electronic Code of Federal Regulations (e-CFR) website at <http://ecfr.gpoaccess.gov> or by contacting the Canton City Health Department, Air Pollution Control Division (CCHD, APCD).

The permittee must comply with all applicable requirements of 40 CFR Part 63, Subpart N. The permittee shall also comply with all applicable requirements of 40 CFR Part 63, Subpart A (General Provisions) as identified in Table 1 of 40 CFR Part 63, Subpart N. Compliance with all applicable requirements shall be achieved by the dates set forth in 40 CFR Part 63, Subpart N, and Subpart A.
3. The Ohio EPA has determined that this facility may be subject to the requirements of an area source MACT/GACT rule (National Emission Standards for Hazardous Air Pollutants (NESHAP) for Plating and Polishing Operations, 40 CFR Part 63, Subpart WWWW) that the Ohio EPA does not have the delegated authority to implement. Although Ohio EPA has determined that an area source MACT (also known as the GACT) may apply, at this time Ohio EPA does not have the authority to enforce this standard. Instead, U.S. EPA has the authority to enforce this standard. Please be advised that all requirements associated with these rules are in effect and are enforceable by U.S. EPA. For more information on the area source rules, please refer to the following U.S. EPA website: <http://www.epa.gov/ttn/atw/area/arearules.html>.

Final Permit-to-Install and Operate
United Surface Finishing
Permit Number: P0120277
Facility ID: 1576050794
Effective Date: 2/25/2016

C. Emissions Unit Terms and Conditions

1. Emissions Unit Group –Hard Chrome Electroplating Tanks 9 & 10: P001 & P003

Each tank in this group is controlled by ScrubAir 3 stage composite mesh pad, mist eliminator with 4th stage HEPA filter. Hard chromium plating is performed using hexavalent chromium solution at elevated temperatures, typically in the range of 115-150 degrees Fahrenheit. Each tank has its own dedicated heating system comprised of a small natural gas-fired hot water boiler, circulation pump and one or more titanium heat exchangers submerged in the chromic acid solution.

EU ID	Operations, Property and/or Equipment Description
P001	Hard Chrome Plating Tank #9, 33"x60"x198", Rectifier #9 (10000 Amp), a 0.37 mmBtu/hr natural gas-fired hot water boiler and connected to ScrubAir 3 stage composite mesh pad, mist eliminator with 4 th stage HEPA filter.
P003	Hard Chrome Plating Tank #10, 52" dia x 120", Rectifier #10 (10000 Amp), a 0.14 mmBtu/hr hot natural gas-fired water boiler and connected to ScrubAir 3 stage composite mesh pad, mist eliminator with 4 th stage HEPA filter.

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. b)(1)b and b)(2)b.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3) June 30, 2008 [Best Available Technology (BAT)] [For P001 and P003 only, this permit supersedes permit P0101214 issued on 10/30/2013]	The BAT requirements of this rule for particulate emissions are equivalent to the requirements of 40 CFR Part 63, Subpart N. See b)(2)a. below

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
b.	OAC rule 3745-31-05(A)(3)(a)(ii) June 30, 2008 [Less than 10 TPY BAT exemption]	The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to the particulate emissions from this air contaminant source since the uncontrolled potential to emit is less than 10 tons/year. See b)(2)b. below
c.	40 CFR Part 63, Subpart N (40 CFR 63.340 – 63.348) See b)(2)c. below.	These emission units shall comply with all the applicable requirements of 40 CFR Part 63, Subpart N. See b)(2)d-f and c)(1) below.
d.	40 CFR Part 63, Subpart A (40 CFR 63.1 – 63.16)	Table 1 to Subpart N of 40 CFR Part 63 – General Provisions Applicability to Subpart N shows which parts of the General Provisions in 40 CFR 63.1-63.15 applies.
e.	OAC rule 3745-17-07(A)(1)	Visible particulate emissions from any stacks serving these emission units shall not exceed 20 percent opacity as a six-minute average.
f.	OAC rule 3745-17-11(B)(1)	The emissions limitation established by this rule is less stringent than the emissions limitation established by 40 CFR Part 63, Subpart N.

(2) Additional Terms and Conditions

- a. This Best Available Technology (BAT) emission limit applies until U.S. EPA approves Ohio Administrative Code (OAC) paragraph 3745-31-05(A)(3)(a)(ii) (the less than 10 tons per year BAT exemption) into the Ohio State Implementation Plan (SIP).
- b. These requirements apply once U.S. EPA approves OAC paragraph 3745-31-05(A)(3)(a)(ii) (the less than 10 tons per year BAT exemption) as part of the Ohio SIP.
- c. Per 40 CFR 63.341, this emission unit group is defined as new open surface, hard chromium electroplating tanks located at an existing large hard chromium electroplating facility (that has a maximum cumulative potential rectifier capacity of greater than or equal to 60 million ampere-hours/year).

- d. The permittee shall use a composite mesh pad air pollution control device. The following system is installed and used to control emissions from P001 and P003 :
 - i. ScrubAir 3 stage composite mesh pad, mist eliminator with 4th stage HEPA filter, 6975 cfm design.

- e. [40 CFR 63.342(c)(1)(iv)]
 The composite mesh-pad system controls multiple affected emissions units, Tanks (9,10), subject to the emission limitation, as follows:

- i. The permittee shall not allow the concentration of total chromium emissions in the exhaust gas stream discharged to the atmosphere to exceed 0.006 mg/dscm (2.6×10^{-6} gr/dscf) of ventilation air for all open surface hard chromium electroplating tank(s) located at a large hard chromium electroplating facility.

This emission limitation applies during tank operation and tank startup and shutdown operations.

- f. The permittee shall comply with the requirements required under 40 CFR Part 63, Subpart N, including the following sections:

342(b)	applicability of emissions limitations
343(a)	compliance dates

c) Operational Restrictions

- (1) The permittee shall comply with the applicable operational restrictions required under 40 CFR Part 63, Subpart N, including the following sections:

63.342(f)(1) and (2)	operation and maintenance practices
63.342(f)(3)	prepare an operation and maintenance plan to be implemented no later than the startup of the unit or the compliance date
63.342(g)	the standards in this section that apply to chromic acid baths shall not be met by using a reducing agent to change the form of chromium from hexavalent to trivalent
Table 1 to 63.342	work practice standards for the packed-bed scrubber and composite mesh-pad control system work practice standards to ensure the accuracy of the monitoring instrument, if a pitot tube or stalagmometer is used for monitoring the plating tank
Table 2 to 63.342	Housekeeping Practices

d) Monitoring and/or Recordkeeping Requirements

- (1) In addition to fulfilling all record keeping requirements contained in the General Provisions to 40 CFR Part 63, Subpart A, as they apply to the chromium electroplating tank(s), the permittee shall comply with the applicable monitoring and record keeping requirements required under 40 CFR Part 63, Subpart N, including the following sections:

63.342(f)	Operation and Maintenance Practices
63.343(c)(1)	Monitoring to demonstrate continuous compliance for sources controlling emissions using composite mesh pad systems
63.343(c)(1)(ii)	Monitoring and recording pressure drop. The composite mesh-pad system shall be operated within ± 2 inches of water column of the pressure drop value established during the most recent compliance performance test.
63.343(d)	The requirement to operate a composite mesh-pad system within the pressure drop range does not apply during automatic washdown cycles of the composite mesh-pad system.
63.344(d)(2)	For monitoring equipment purchased from a vendor, verification of the operational status of the monitoring equipment including execution of the manufacturer's written specifications or recommendations for installation, operation, and calibration of the system
63.344(d)(5)	Installation requirements for pressure drop device
63.346(a), (b), (c)	Record keeping requirements
Table 1 to 40 CFR Part 63, Subpart N	General Provisions Applicability to Subpart N

e) Reporting Requirements

- (1) The reports required by this permit may be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal; or they may be mailed as a hard copy to the Canton City Health Department Air Pollution Control Division.
- (2) The permittee shall comply with the applicable reporting requirements required under 40 CFR Part 63, Subpart N, including the following sections:

63.342(f)	Operation and Maintenance Practices
63.345(b)	Notification of construction
63.347(a)	Reporting requirements
63.347(c)(2)	Additionally reporting requirements of notification of construction or reconstruction was commenced and actual date of startup of the source.
63.347(d)	Notification of performance tests
63.347(e)	Notification of compliance status
63.347(f)	Reports of performance test results
63.347(h)	Ongoing compliance status reports for area sources
63.347(h)(2)(i)-(iii)	Submittal of semiannual reports
63.347(h)(3)	Request to reduce frequency of ongoing compliance status reports.

- (3) The owner or operator of each affected source subject to these standards shall fulfill all reporting requirements outlined in the General Provisions to 40 CFR part 63, according to the applicability of subpart A as identified in Table 1 of subpart N. These reports shall be made to the Administrator at the appropriate address as identified in 40 CFR 63.13 or to the delegated State authority.
- (4) The permittee shall submit an annual Permit Evaluation Report (PER) to the Canton City Health Department Air Pollution Control Division by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve-months for each air contaminant source identified in this permit. It is recommended that the PER is submitted electronically through the Ohio EPA's "e-Business Center: Air Services" although PERs can be submitted via U.S. postal service or can be hand delivered.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations and/or Control Requirements specified in section b) of these terms and conditions shall be determined in accordance with the following methods:
 - a. Emission Limitation:
 0.006 mg/dscm(2.6×10^{-6} gr/dscf) chromium emissions

Applicable Compliance Method:

The permittee shall conduct performance testing to demonstrate compliance with the standards to the Part 63, Subpart N as specified in f)(2) and f)(3) below.

The operating parameter value(s) to be established during the compliant performance testing completed within 180 days of startup, and monitored in accordance with 40 CFR 63.343(c), along with the other record keeping requirements specified in d)(1) shall be used to demonstrate the chromium electroplating tank(s) to be in compliance with the amended NESHAP.

If required, additional performance testing shall be conducted in accordance with the test methods and procedures specified in 40 CFR Part 63, Subpart N. See f)(2).

b. Emission Limitation:

Visible particulate emissions shall not exceed 20% opacity as a 6-minute average, except as provided by rule.

Applicable Compliance Method:

Initially and periodically thereafter, compliance shall be demonstrated by the performance testing required in f)(3) below.

For ongoing compliance, if requested, compliance shall be determined through visible emissions observations performed in accordance with 40 CFR Part 60, Appendix A, Method 9 and the procedures specified in OAC rule 3745-17-03(B)(1).

- (2) The permittee shall comply with the applicable testing requirements required under 40 CFR Part 63, Subpart N, including the following sections:

63.343(a)	compliance dates
63.343(b)(1)	Initial performance test requirements per 63.7 and 63.344
63.344(a), (c), (e)	performance test requirements
63.344(d)	establishing site-specific operating parameter values during performance test
63.347(d)	notification of performance test
63.347(f)	reports of performance test results including the use of the Electronic Reporting Tool.
Table 1 to 40 CFR Part 63, Subpart N	General Provisions Applicability to Subpart N

- (3) Emission Testing Requirements - The permittee shall conduct, or have conducted, emission testing for this emission unit in accordance with the following requirements:
- a. The emission testing shall be conducted within 60 days of achieving the maximum production rate at which the emissions unit(s) will be operated, but not later than 180 days after initial startup and as required by the Director.
 - b. The emission testing shall be conducted to demonstrate compliance with the chromium emission limitation listed in f)(1)a. and the opacity limitation listed in f)(1)b.
 - c. One of the following test methods shall be employed to demonstrate compliance with the allowable mass emission:
 - i. Method 306 or Method 306A, "Determination of Chromium Emissions From Decorative and Hard Chromium Electroplating and Anodizing Operations", from Appendix A of Part 63, shall be used to determine the chromium concentration from the chromium electroplating tank(s), and testing must meet the following requirements:
 - (a) the sampling time and sample volume for each run of Methods 306 and 306A shall be at least 120 minutes and 1.70 dscm (60 dscf), respectively;
 - (b) Methods 306 and 306A allow the measurement of either total chromium or hexavalent chromium emissions;
 - (c) for chromic acid baths compliance must be demonstrated by measuring total chromium; and
 - (d) A minimum of three separate runs of the test method must be conducted in order to demonstrate compliance. All the applicable performance testing requirements of 40 CFR 63.7 must also be met.
 - ii. The California Air Resources Board (CARB) Method 425 shall be used to determine the chromium concentration from the electroplating tank(s) if the following conditions are met:
 - (a) if a colorimetric analysis method is used, the sampling time and volume shall be sufficient to result in 33-66 micrograms of catch in the sampling train;
 - (b) if an Atomic Absorption Graphite Furnace (AAGF) or Ion Chromatography with a Post-column Reactor (ICPCR) analyses is used, the sampling time and volume should be sufficient to result in a sample catch that is 5 to 10 times the minimum detection limit of the analytical method (i.e., 1.0 microgram per liter of sample for AAGF and 0.5 microgram per liter of sample for ICPCR); and

- (c) a minimum of three separate runs of the test method must be conducted in order to demonstrate compliance. All the applicable performance testing requirements of 40 CFR 63.7 must also be met.
- iii. Alternate test methods may also be used if the method has been validated using Method 301, appendix A of 40 CFR part 63 and if approved by U.S. EPA. Procedures for requesting and obtaining approval are contained in §63.7(f).
- d. The following test methods shall be employed to demonstrate compliance with the opacity rates:
 - i. To demonstrate initial compliance with the opacity limitation, opacity observations shall be conducted at the outlet stack during all test runs using Method 9 from 40 CFR Part 60, Appendix A
 - ii. Alternative U.S. EPA approved test methods may be used with prior approval from the Ohio EPA
- e. The test(s) shall be conducted while both the emissions units P001 and P003, which are vented to the same control device, are operating at or near their maximum capacity, unless otherwise specified or approved by the appropriate Canton City Health Department, Air Pollution Control Division.
- f. The tests shall follow all applicable requirements from 40 CFR part 63, Subpart N as listed in f)(2).
- g. Not later than 60 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission test(s).
- h. Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.
- i. A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the appropriate Ohio EPA District Office or local air agency.

Final Permit-to-Install and Operate
United Surface Finishing
Permit Number: P0120277
Facility ID: 1576050794
Effective Date: 2/25/2016

- g) Miscellaneous Requirements
 - (1) None.
