RE: DRAFT AIR POLLUTION PERMIT-TO-INSTALL AND OPERATE

Facility ID: 1318178701
 Permit Number: P0119920
 Permit Type: Renewal
 County: Cuyahoga

Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate (PTIO) for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the permit. A public notice will appear in the Ohio Environmental Protection Agency (EPA) Weekly Review and the local newspaper, The Plain Dealer. A copy of the public notice and the draft permit are enclosed. This permit can be accessed electronically on the Division of Air Pollution Control (DAPC) Web page, www.epa.ohio.gov/dapc by clicking the "Search for Permits" link under the Permitting topic on the Programs tab. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall and Cleveland Division of Air Quality
 Permit Review/Development Section 2nd Floor
 Ohio EPA, DAPC 75 Erieview Plaza
 50 West Town Street Suite 700 Cleveland, OH 44114
 PO Box 1049
 Columbus, Ohio 43216-1049

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified if a public hearing is scheduled. A decision on issuing a final permit-to-install will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Cleveland Division of Air Quality at (216)664-2297.

Sincerely,

Michael E. Hopkins, P.E.
 Assistant Chief, Permitting Section, DAPC

Permit Strategy Write-Up

1. Check all that apply:

Synthetic Minor Determination (Renewal FEPTIO to avoid Title V)

Netting Determination

2. Source Description:

The Worthington Steel Company has submitted a renewal FEPTIO application for three steel rolling lines (P001 – P003). At each emissions unit, a roll of steel is uncoiled and a rust preventative oil containing VOC is applied to the surface of the steel strip prior to recoiling of the steel. Application of rust preventative oil to flat rolled steel is applied at various pieces of equipment (cold reduction mills, slitters) as a temporary rust preventative until final processing by the customer.

3. Facility Emissions and Attainment Status:

This facility previously had the potential to emit uncontrolled VOC emissions in excess of 100 tons/year which would result in Title V applicability.

Cuyahoga County is currently designated as nonattainment for ozone, PM_{2.5}, and partial nonattainment for lead.

4. Source Emissions:

Emissions units P001 through P003 previously had the potential to emit of 538 tons/year of VOC emissions resulting in Title V applicability. However, a Renewal Federally Enforceable Permit to Install and Operate (FEPTIO) is being issued in order to continue to avoid Title V permitting. The allowable emission limit established in the permit is 75.0 tons/year of VOC emissions as a rolling, 12-month summation for P001 through P003 combined. The total combined oil usage for all three steel rolling lines has been restricted to 60,000 gallons (less water and exempt solvents) per rolling, 12-month period. The annual emission limit is based on the facility-requested voluntary limit of 2.5 lbs VOC/gallon (less water and exempt solvents).

5. Conclusion:

By limiting the rust preventative oil usage rate for emissions units P001 through P003 combined to 60,000 gallons per rolling, 12-month period will restrict the VOC emissions to 75.0 tons/year based on a rolling 12-month summation of the emissions. Therefore, the Worthington Steel Company will not be subject to Title V permitting.

6. Please provide additional notes or comments as necessary:

The amount of VOC emissions at each emissions unit is not the same. The facility estimated that 10%, 20%, and 70% of the VOC emissions are generated by P001, P002 and P003 respectively.

Draft Permit-to-Install and Operate

The Worthington Steel Company

Permit Number: P0119920

Facility ID: 1318178701

Effective Date: To be entered upon final issuance

Authorization

Facility ID: 1318178701
Application Number(s): A0054457, A0054878
Permit Number: P0119920
Permit Description: FEPTIO renewal permit for emissions units P001, P002, and P003 which are mills for rolling steel where a rust preventative oil containing small amounts of VOC is applied to the surface of the coiled steel strip. There is no control device for the VOC emissions.
Permit Type: Renewal
Permit Fee: \$0.00 *DO NOT send payment at this time, subject to change before final issuance*
Issue Date: 3/25/2016
Effective Date: To be entered upon final issuance
Expiration Date: To be entered upon final issuance
Permit Evaluation Report (PER) Annual Date: To be entered upon final issuance

This document constitutes issuance to:

The Worthington Steel Company
4310 East 49 Street
Cuyahoga Heights, OH 44125

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Cleveland Division of Air Quality
2nd Floor
75 Erieview Plaza
Cleveland, OH 44114
(216)664-2297

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Craig W. Butler
Director

Authorization (continued)

Permit Number: P0119920

Permit Description: FEPTIO renewal permit for emissions units P001, P002, and P003 which are mills for rolling steel where a rust preventative oil containing small amounts of VOC is applied to the surface of the coiled steel strip. There is no control device for the VOC emissions.

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Draft Permit-to-Install and Operate
The Worthington Steel Company
Permit Number: P0119920
Facility ID: 1318178701
Effective Date: To be entered upon final issuance

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions of this permit will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Cleveland Division of Air Quality in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Draft Permit-to-Install and Operate
The Worthington Steel Company
Permit Number: P0119920
Facility ID: 1318178701
Effective Date: To be entered upon final issuance

B. Facility-Wide Terms and Conditions

Draft Permit-to-Install and Operate

The Worthington Steel Company

Permit Number: P0119920

Facility ID: 1318178701

Effective Date: To be entered upon final issuance

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.

Draft Permit-to-Install and Operate
The Worthington Steel Company
Permit Number: P0119920
Facility ID: 1318178701
Effective Date: To be entered upon final issuance

C. Emissions Unit Terms and Conditions

1. Emissions Unit Group -strip steel rolling mills: P001,P002,P003,

EU ID	Operations, Property and/or Equipment Description
P001	32" Temper Mill for rolling steel. A rust preventative oil containing VOC is applied to the steel coil.
P002	42" Reduction Mill for rolling steel. A rust preventative oil containing VOC is applied to the steel coil.
P003	56" Reduction Mill for rolling steel. A rust preventative oil containing VOC is applied to the steel coil.

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. b)(1)c., c)(1), d)(2), f)(1)b.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(F)	2.5 lbs of VOC per gallon of coating, excluding water and exempt solvents The requirements of this rule also include compliance with the requirements of OAC rule 3745-31-05(D)(1)(b). See b)(2)a. below.
b.	OAC rule 3745-31-05(A)(3), as effective 11/30/01	See b)(2)b. below.

Draft Permit-to-Install and Operate

The Worthington Steel Company

Permit Number: P0119920

Facility ID: 1318178701

Effective Date: To be entered upon final issuance

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
c.	OAC rule 3745-31-05(D)(1)(b) (Synthetic Minor to avoid Title V and PSD)	The combined annual VOC emissions from emissions units P001 through P003 shall not exceed 75.0 tons/year as a rolling, 12-month summation. See c)(1) below.

(2) Additional Terms and Conditions

- a. Permit to Install and Operate (PTIO) P0119920 for this emissions unit takes into account the voluntary restrictions as proposed by the permittee in b)(1)a. and c)(1) for the purpose of establishing legally and practically enforceable limitations representing the potential to emit for VOC emissions.
- b. BAT requirements for this emissions unit have been determined to be compliance with the voluntary restrictions established in accordance with OAC rule 3745-31-05(F) [see b)(2)a.]. The voluntary restrictions were intentionally established to be consistent with the BAT requirements under OAC rule 3745-31-05(A)(3), as effective 11/30/01. Therefore, compliance with the voluntary restrictions will fulfill the BAT requirement.

c) Operational Restrictions

- (1) The maximum annual oil coating usage for emissions units P001 through P003 combined shall not exceed 60,000 gallons/year (excluding water and exempt solvents) based upon a rolling, 12-month summation of the oil coating usage figures.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information on a monthly basis for the oil coating applied in this emissions unit:
 - a. the name and identification number of each coating, as applied;
 - b. the number of gallons of each coating (excluding water and exempt solvents) applied during the month;
 - c. the VOC content (excluding water and exempt solvents) of each coating, as applied;
 - d. the total VOC emissions from all coatings applied, i.e., the summation of the products of b. times c. for all the individual oil coatings applied during the month;

- e. the total rolling, 12-month summation of VOC emissions from all coatings employed, in pounds or tons.

These monthly records shall be maintained for the purpose of determining annual VOC emissions for the emissions unit.

- (2) The permittee shall maintain monthly records of the following information:
 - a. the combined oil coating usage rate for P001 through P003, in gallons (excluding water and exempt solvents), for each month of operations; and
 - b. the rolling, 12-month summation of the combined oil coating usage rate for P001 through P003, in gallons (excluding water and exempt solvents).

e) Reporting Requirements

- (1) The permittee shall notify the Cleveland Division of Air Quality (Cleveland DAQ) in writing of any monthly record showing that the VOC content of any material exceeded the applicable limitation. The notification shall include a copy of such record and shall be sent to the Cleveland DAQ within 30 days following the end of the calendar month.
- (2) The permittee shall submit quarterly deviation (excursion) reports that identify:
 - a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - i. all exceedances of the rolling, 12-month oil coating usage limitation.
 - b. the probable cause of each deviation (excursion);
 - c. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
 - d. the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Cleveland DAQ.

- (3) The permittee shall submit an annual Permit Evaluation Report (PER) to the Ohio EPA. The PER must be submitted by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.

- (4) Unless other arrangements have been approved by the Director, all notifications and reports shall be submitted through the Ohio EPA's eBusiness Center: Air Services online web portal.

- f) Testing Requirements
 - (1) Compliance with the Emissions Limitations and/or Control Requirements specified in b) of these terms and conditions shall be determined in accordance with the following methods:
 - a. Emission Limitation:
2.5 lbs of VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping and reporting requirements in d)(1) and e)(1) respectively. USEPA Method 24 shall be used to determine the VOC contents of the rust preventative oil employed.
 - b. Emission Limitation:
The combined annual VOC emissions from emissions units P001 through P003 shall not exceed 75.0 tons/year as a rolling, 12-month summation.

Applicable Compliance Method:
Compliance shall be determined based upon the record keeping and reporting requirements in d)(1), d)(2) and e)(2) respectively. The monthly VOC emissions shall be summed on a rolling, 12-month basis for all of the emissions units combined.

- g) Miscellaneous Requirements
 - (1) None.
