

Synthetic Minor Determination and/or  Netting Determination

Permit To Install ~~16-02352~~ 16-02391

**A. Source Description**

The Wrayco Industries, Inc. facility located in Stow, Summit County, OH, is modifying Paint Line #3 (K003) to allow the usage of solvent-based coatings along with current usage of water-based coatings.

**B. Facility Emissions and Attainment Status**

K003 is the only source of volatile organic compound (VOC) emissions at the facility. Therefore, K003 represents the facility for emissions of VOCs. The modification of K003 will increase unrestricted potential facility (K003) VOC emissions from 28.8 tons per year, currently allowed under PTI 16-02352, to 32.5 tons per year, as proposed by PTI 16-02391. Unrestricted potential facility emissions of all other criteria pollutants are under applicable moderate nonattainment and Title V major stationary source threshold levels. Summit County is moderate nonattainment for 8-hour ozone.

**C. Source Emissions**

The modification of K003 will cause unrestricted potential facility (K003) individual hazardous air pollutant (HAP) emissions to exceed 10 tons per year. The facility has opted for synthetic minor status to stay out of the Title V permit program using federally enforceable HAP material usage restrictions. Assuming an individual HAP material usage rate (input) is equivalent to an individual HAP emissions rate, based upon the solvent in the materials employed or applied being emitted, the facility will restrict each individual HAP material usage to 9.5 tons per year, based upon a rolling, 12-month basis, thereby limiting potential facility emissions of any individual HAP to 9.5 tpy, based upon a rolling, 12-month basis. The facility is a natural minor source of combined HAPs, requiring no material usage restrictions.

**D. Conclusion**

If there are no deviations from operational procedures, equipment specifications, or any other associated parameters, as stated in the application, that imperil the effectiveness of the synthetic minor strategy, then ensuring no exceedances of the federally enforceable HAP material usage restrictions for the facility via diligent evaluation, monitoring and record keeping should be sufficient to keep the facility out of the Title V program.

State of Ohio Environmental Protection Agency

**RE: DRAFT PERMIT TO INSTALL  
SUMMIT COUNTY**

**CERTIFIED MAIL**

Street Address:

Lazarus Gov. Center TELE: (614) 644-3020 FAX: (614) 644-2329

Mailing Address:

Center

**Application No:** 16-02391

**Fac ID:** 1677110075

**DATE:** 1/27/2005

Wrayco Industries Inc  
Ritchie Scott  
5010 Hudson Dr  
Stow, OH 44224

You are hereby notified that the Ohio Environmental Protection Agency has made a draft action recommending that the Director issue a Permit to Install for the air contaminant source(s) [emissions unit(s)] shown on the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit public comments on the proposed installation. A public notice concerning the draft permit will appear in the Ohio EPA Weekly Review and the newspaper in the county where the facility will be located. Public comments will be accepted by the field office within 30 days of the date of publication in the newspaper. Any comments you have on the draft permit should be directed to the appropriate field office within the comment period. A copy of your comments should also be mailed to Robert Hodanbosi, Division of Air Pollution Control, Ohio EPA, P.O. Box 1049, Columbus, OH, 43266-0149.

A Permit to Install may be issued in proposed or final form based on the draft action, any written public comments received within 30 days of the public notice, or record of a public meeting if one is held. You will be notified in writing of a scheduled public meeting. Upon issuance of a final Permit to Install a fee of **\$200** will be due. Please do not submit any payment now.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469. If you have any questions about this draft permit, please contact the field office where you submitted your application, or Mike Ahern, Field Operations & Permit Section at (614) 644-3631.

Sincerely,

*Michael W. Ahern*

**SUMMIT COUNTY**

**PUBLIC NOTICE**

**ISSUANCE OF DRAFT PERMIT TO INSTALL 16-02391 FOR AN AIR CONTAMINANT SOURCE FOR  
Wrayco Industries Inc**

On 1/27/2005 the Director of the Ohio Environmental Protection Agency issued a draft action of a Permit To Install an air contaminant source for **Wrayco Industries Inc**, located at **5010 Hudson Dr, Stow, Ohio**.

Installation of the air contaminant source identified below may proceed upon final issuance of Permit To Install 16-02391:

**Modification to K003 - Increase in Emissions and Synthetic Minor Strategy, Replaces PTI 16-02352 issued 5/18/04.**

Comments concerning this draft action, or a request for a public meeting, must be sent in writing to the address identified below no later than thirty (30) days from the date this notice is published. All inquiries concerning this draft action may be directed to the contact identified below.

Lynn Malcolm, Akron Regional Air Quality Management District, 146 South High Street, Room 904, Akron, OH 44308 [(330)375-2480]

**Permit To Install  
Terms and Conditions**

**Issue Date: To be entered upon final issuance  
Effective Date: To be entered upon final issuance**

**DRAFT PERMIT TO INSTALL 16-02391**

Application Number: 16-02391  
Facility ID: 1677110075  
Permit Fee: **To be entered upon final issuance**  
Name of Facility: Wrayco Industries Inc  
Person to Contact: Ritchie Scott  
Address: 5010 Hudson Dr  
Stow, OH 44224

Location of proposed air contaminant source(s) [emissions unit(s)]:

**5010 Hudson Dr  
Stow, Ohio**

Description of proposed emissions unit(s):

**Modification to K003 - Increase in Emissions and Synthetic Minor Strategy, Replaces PTI 16-02352 issued 5/18/04.**

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

Wrayco Industries Inc

Facility ID: 1677110075

PTI Application: 16-02391

Issued: To be entered upon final issuance

**Part I - GENERAL TERMS AND CONDITIONS**

**A. Permit to Install General Terms and Conditions**

**1. Compliance Requirements**

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

**2. Reporting Requirements**

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

**3. Records Retention Requirements**

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

**4. Inspections and Information Requests**

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any

**Issued: To be entered upon final issuance**

information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

**5. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

**6. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

**7. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

**8. Termination of Permit to Install**

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

**9. Construction of New Sources(s)**

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

Wrayco Industries Inc

Facility ID: 1677110075

PTI Application: 16-02391

Issued: To be entered upon final issuance

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

**10. Public Disclosure**

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

**11. Applicability**

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

**12. Best Available Technology**

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

**13. Source Operation and Operating Permit Requirements After Completion of Construction**

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the emissions unit(s) covered by this permit.

8

**Wrayco Industries Inc**

**PTI Application: 16-02391**

**Issued: To be entered upon final issuance**

**Facility ID: 1677110075**

Issued: To be entered upon final issuance

**14. Construction Compliance Certification**

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

**15. Fees**

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

**B. Permit to Install Summary of Allowable Emissions**

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

**SUMMARY (for informational purposes only)**  
**TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS**

<u>Pollutant</u>	<u>Tons Per Year</u>
VOCs	32.5
Individual HAPs	9.5

**PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)**

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	represents the facility for VOC emissions. The facility is a natural minor source of VOCs, combined hazardous air pollutants (HAPs), and all other criteria air pollutants. The application includes facility-requested federally enforceable Synthetic Minor Title V (SMTV) HAP material usage restrictions to limit the potential to emit individual HAPs below major source emission thresholds, thus avoiding Title V program requirements.	<u>Applicable Rules/Requirements</u>
<p>K003 (Paint Line #3) miscellaneous metal parts coating line, includes: paint spray booth with filtered exhaust to control paint overspray, HVLP paint application method, extreme performance coatings using solvent-based/ water-based coatings, and two (2) natural gas-fired curing ovens, each rated under 0.5 million Btu/hour heat input, air emissions of volatile organic compounds (VOCs) uncontrolled.</p> <p>This permit modifies K003 to allow the use of solvent-based coatings along with the current use of water-based coatings.</p> <p>K003 is the only VOC emissions source at the facility and, therefore,</p>		OAC rule 3745-31-05(A)(3)
		OAC rule 3745-21-09(U)(1)(c)

11

**Wrayco Industries Inc**  
**PTI Application: 16-02201**  
**Issued**

**Facility ID: 1677110075**

Emissions Unit ID: **K003**

OAC rule 3745-35-07(B)  
(to avoid Title V program  
requirements)

Issued: To be entered upon final issuance

Applicable Emissions  
Limitations/Control Measures

The permittee shall not exceed the following VOC emissions limitations:

175 pounds/day from coating;  
and 32.5 tons/year from coating  
& cleanup.

The permittee shall employ a filtered spray booth exhaust system that effectively controls paint overspray at all times the emissions unit is in operation.

The requirements of OAC rule 3745-31-05(A)(3) also include compliance with the requirements of OAC rule 3745-21-09(U)(1)(c), OAC rule 3745-35-07(B), and Part II, Sections A.2 and B.1 below.

3.5 pounds of VOCs per gallon of coating, excluding water and exempt solvents, for an extreme performance coating.

The facility shall limit emissions of any individual HAP to no more than 9.5 tpy, based upon a rolling, 12-month summation of the monthly emissions, per the federally enforceable HAP material usage restrictions of Part II, Section B.1 below.

**Issued: To be entered upon final issuance**

**2. Additional Terms and Conditions**

**2.a** The 175 pounds/day and 32.5 tons/year VOC emissions limitations established pursuant to OAC rule 3745-31-05(A)(3) are based upon the potential to emit for this emissions unit. Therefore, no monitoring, record keeping, or reporting requirements are necessary to ensure ongoing compliance with these emissions limitations.

However, if any proposed change(s), such as with production capacity, the types and/or quantities of coatings and/or solvents used, or anything else that increase(s) the potential emissions of any air pollutant, then the permittee shall apply for and obtain either a modification to the permit to install or a new final permit to install prior to the change(s).

**2.b** As a way to reduce air emissions of VOCs, all coatings, thinners, cleanup solvents/rags, and other solvent containing materials shall be properly identified and held in tightly closed containers at all times when not in use or waiting for appropriate off-site disposal.

**2.c** The emissions of any individual HAP from the facility (K003) shall not exceed 9.5 tons per year, based upon a rolling, 12-month summation of the monthly facility (K003) emissions.

To ensure enforceability during the first 12 calendar months of operation following the issuance of this permit, the permittee shall not exceed the facility (K003) emission levels specified in the following table:

<u>Month(s)</u>	<u>Maximum Allowable Cumulative Individual HAP Emissions (tons)</u>
1	0.8
1-2	1.6
1-3	2.4
1-4	3.2
1-5	4.0
1-6	4.8
1-7	5.6
1-8	6.4
1-9	7.2
1-10	8.0
1-11	8.8
1-12	9.5

After the first 12 calendar months of operation following the issuance of this permit,

**Issued: To be entered upon final issuance**

compliance with the annual individual HAP emission limitation shall be based upon a rolling, 12-month summation of the monthly individual HAP emission figures.

**B. Operational Restrictions**

1. The maximum annual individual HAP material usage\* (from coatings, thinners, and cleanup materials) for the facility (K003) shall not exceed 9.5 tons, based upon a rolling, 12-month summation of the monthly individual HAP material usage figures.

\*Annual individual HAP material usage rate (input) is equivalent to an annual individual HAP emissions rate and is based upon the solvent in the materials employed or applied being emitted.

To ensure enforceability during the first 12 calendar months of operation following the issuance of this permit, the permittee shall not exceed the individual HAP material usage levels specified in the following table:

<u>Month(s)</u>	<u>Maximum Allowable Cumulative Individual HAP Material Usage (tons)</u>
1	0.8
1-2	1.6
1-3	2.4
1-4	3.2
1-5	4.0
1-6	4.8
1-7	5.6
1-8	6.4
1-9	7.2
1-10	8.0
1-11	8.8
1-12	9.5

After the first 12 calendar months of operation following the issuance of this permit, compliance with the annual individual HAP material usage limitation shall be based upon a rolling, 12-month summation of the monthly individual HAP material usage figures.

**C. Monitoring and/or Recordkeeping Requirements**

1. The permittee shall collect and record the following information each day for the line:
  - a. the name and identification number of each coating, as applied, per final blend formulation;

and

b. the VOC content of each coating (excluding water and exempt solvents), as applied, per final blend formulation, in pounds of VOCs per gallon of coating.

USEPA Method 24 shall be used to determine the VOC content of each coating, as applied, per final blend formulation.

2. The permittee shall collect/record the following information each month for the facility (K003):
- a. the name and identification number of each coating, thinner, and cleanup material employed;
  - b. the weight, in pounds per month, of each coating, as applied;
  - c. the weight, in pounds per month, of each thinner, as applied;
  - d. the weight, in pounds per month, of each cleanup material, as applied;
  - e. the individual HAP content for each HAP of each coating, as applied, in percent by weight;
  - f. the individual HAP content for each HAP of each thinner, as applied, in percent by weight;
  - g. the individual HAP content for each HAP of each cleanup material, as applied, in percent by weight;
  - h. the total individual HAP material usage for each HAP of all coatings, as applied, in pounds per month, i.e.,  $h = \sum[b \times e]$  for all coatings;
  - i. the total individual HAP material usage for each HAP of all thinners, as applied, in pounds per month, i.e.,  $i = \sum[c \times f]$  for all thinners;
  - j. the total individual HAP material usage for each HAP of all cleanup materials, as applied, in pounds per month, i.e.,  $j = \sum[d \times g]$  for all cleanup materials;
  - k. the total individual HAP material usage for each HAP of all coatings, thinners, and cleanup materials, as applied, in tons per month, i.e.,  $k = [h + i + j]/2000$ ;
  - l. the total individual HAP emissions for each HAP of all coatings, thinners, and cleanup materials, as applied, in tons per month, i.e.,  $l = k$ , since emissions rate equals usage rate;

**Issued: To be entered upon final issuance**

- m. the rolling, 12-month summation of the monthly individual HAP material usage rates for each HAP of all coatings, thinners, and cleanup materials, as applied, in tons per year;
  - n. the rolling, 12-month summation of the monthly individual HAP emissions rates for each HAP of all coatings, thinners, and cleanup materials, as applied, in tons per year, i.e.,  $n = m$ , since emissions rate equals usage rate.
3. The permit to install for K003 was evaluated based on the actual materials (typically coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxics Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: methyl n-amyl ketone CAS 110-43-0

TLV (ug/m3): 233,000

Maximum Average Hourly Emission Rate (lbs/hr): 20.0

Predicted 1-Hour Maximum Ground-Level Concentration at 39 m (ug/m3): 575

MAGLC (ug/m3): 5548

4. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxics Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxics Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxics Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxics Policy" include the following:
- a. changes in the composition of the materials used (typically for coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
  - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and

- c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01 solely due to the emissions of any type of toxic air contaminant not previously emitted, and a modification of the existing permit to install will not be required, even if the toxic air contaminant emissions are greater than the de minimis level in OAC rule 3745-15-05. If the change(s) is (are) defined as a modification under other provisions of the modification definition, then the permittee shall obtain a final permit to install prior to the change.

5. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the emissions unit, if changed as outlined above, will still satisfy the "Air Toxics Policy":
  - a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
  - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxics Policy"; and
  - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxics Policy" for the change.

#### **D. Reporting Requirements**

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing the use of noncomplying coatings. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
2. The permittee shall submit deviation (excursion) reports that identify all exceedances of the facility 9.5 tpy individual HAP material usage restriction using the methodology specified in Section C.2 above, as well as the corrective actions that were taken to achieve compliance.
3. The permittee shall submit deviation (excursion) reports that identify all exceedances of the facility 9.5 tpy individual HAP emissions limitation using the methodology specified in Section C.2 above, as well as the corrective actions that were taken to achieve compliance.
4. The deviation (excursion) reports shall be submitted in accordance with the requirements specified

in Part I - General Term and Condition A.2 of this permit.

## E. Testing Requirements

1. Compliance with the emissions limitations in Section A.1 of these special terms and conditions shall be determined in accordance with the following methods:

- a. Emission Limitation: 175 pounds of VOCs/day, from coating

Applicable Compliance Method: the above daily VOC emissions limit is based upon the potential to emit, as demonstrated below.

$$D = CV;$$

Where:

$$D = 175 \text{ pounds of VOCs/day [daily potential to emit from coating];}$$

$$C = 50 \text{ gallons/day [potential coating rate]; and}$$

$$V = 3.5 \text{ pounds/gallon [maximum daily weighted average coating VOC content].}$$

- b. Emission Limitation: 32.5 tons of VOCs/year, from coating & cleanup

Applicable Compliance Method: the above yearly VOC emissions limit is based on the potential to emit, as demonstrated below.

$$Y = [D(365 \text{ days/year}) + M(12 \text{ months/year})](1 \text{ ton}/2000 \text{ pounds});$$

Where:

$$Y = 32.5 \text{ tons of VOCs/year [yearly potential to emit from coating \& cleanup]}$$

$$D = 175 \text{ pounds of VOCs/day [daily potential to emit from coating]; and}$$

$$M = 86 \text{ pounds of VOCs/month [maximum emissions from cleanup].}$$

- c. Emission Limitation: 9.5 tons per year for any individual HAP from the facility (K003), based upon a rolling, 12-month summation of the monthly facility (K003) emissions.

Applicable Compliance Method: Compliance shall be based upon the record keeping requirements of section C.2 above.

## F. Miscellaneous Requirements

Wray

PTI A

Emissions Unit ID: **K003**

**Issued: To be entered upon final issuance**

1. PTI 16-02391 supersedes all of the requirements of PTI 16-02352 issued 5/18/04.
2. Except for C.3 through C.5 of these special terms and conditions, all of the terms and conditions of this permit are federally enforceable, pursuant to OAC rule 3745-35-07(B).
