Dear Permit Holder:

Enclosed please find a final Ohio Environmental Protection Agency (EPA) Air Pollution Permit-to-Install (PTI) which will allow you to install or modify the described emissions unit(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, we urge you to read it carefully. Because this permit contains conditions and restrictions, please read it very carefully. In this letter you will find the information on the following topics:

- **How to appeal this permit**
- **How to save money, reduce pollution and reduce energy consumption**
- **How to give us feedback on your permitting experience**
- **How to get an electronic copy of your permit**
- **What should you do if you notice a spill or environmental emergency?**

**How to appeal this permit**

The issuance of this PTI is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Josh Mandel," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
77 South High Street, 17th Floor  
Columbus, OH 43215

## **How to save money, reduce pollution and reduce energy consumption**

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. Additionally, all or a portion of the capital expenditures related to installing air pollution control equipment under this permit may be eligible for financing and State tax exemptions through the Ohio Air Quality Development Authority (OAQDA) under Ohio Revised Code Section 3706. For more information, see the OAQDA website: [www.ohioairquality.org/clean\\_air](http://www.ohioairquality.org/clean_air)

## **How to give us feedback on your permitting experience**

Please complete a survey at [www.epa.ohio.gov/survey.aspx](http://www.epa.ohio.gov/survey.aspx) and give us feedback on your permitting experience. We value your opinion.

## **How to get an electronic copy of your permit**

This permit can be accessed electronically via the eBusiness Center: Air Services in Microsoft Word format or in Adobe PDF on the Division of Air Pollution Control (DAPC) Web page, [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc) by clicking the "Search for Permits" link under the Permitting topic on the Programs tab.

## **What should you do if you notice a spill or environmental emergency?**

Any spill or environmental emergency which may endanger human health or the environment should be reported to the Emergency Response 24-HOUR EMERGENCY SPILL HOTLINE toll-free at (800) 282-9378. Report non-emergency complaints to the appropriate district office or local air agency.

If you have any questions regarding your permit, please contact Regional Air Pollution Control Agency at (937)225-4435 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469.

Sincerely,

Michael E. Hopkins, P.E.  
Assistant Chief, Permitting Section, DAPC

Wright-Patterson Air Force Base  
**Permit Number:** P0121270  
**Facility ID:** 0829700441  
**Effective Date:** 10/18/2016

## Authorization

Facility ID: 0829700441  
Facility Description: national security  
Application Number(s): M0004004  
Permit Number: P0121270  
Permit Description: Administrative Modification to derate the nominal heat input capacity of two natural gas-fired hot water boilers from 169 MMBtu/hour to 105 MMBtu/hour according to OAC rule 3745-17-10(B)(3).  
Permit Type: Administrative Modification  
Permit Fee: \$1,000.00  
Issue Date: 10/18/2016  
Effective Date: 10/18/2016

This document constitutes issuance to:

Wright-Patterson Air Force Base  
88 CEG/CEIE  
1450 Littrell Road - Bldg 22  
Fairborn, OH 45433-5209

of a Permit-to-Install for the emissions unit(s) identified on the following page.

Ohio Environmental Protection Agency (EPA) District Office or local air agency responsible for processing and administering your permit:

Regional Air Pollution Control Agency  
117 South Main Street  
Dayton, OH 45422-1280  
(937)225-4435

The above named entity is hereby granted a Permit-to-Install for the emissions unit(s) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

  
Craig W. Butler  
Director

**Final Permit-to-Install**  
Wright-Patterson Air Force Base

**Effective Date:** 10/18/2016

## Authorization (continued)

Permit Number: P0121270

Permit Description: Administrative Modification to derate the nominal heat input capacity of two natural gas-fired hot water boilers from 169 MMBtu/hour to 105 MMBtu/hour according to OAC rule 3745-17-10(B)(3).

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

**Group Name: Derated Boilers - Building 1240**

<b>Emissions Unit ID:</b>	<b>B607</b>
Company Equipment ID:	2012
Superseded Permit Number:	P0119472
General Permit Category and Type:	Not Applicable
<b>Emissions Unit ID:</b>	<b>B608</b>
Company Equipment ID:	2016
Superseded Permit Number:	P0119472
General Permit Category and Type:	Not Applicable

**Final Permit-to-Install**  
Wright-Patterson Air Force Base  
**Permit Number:** P0121270  
**Facility ID:** 0829700441  
**Effective Date:** 10/18/2016

## **A. Standard Terms and Conditions**

**1. Federally Enforceable Standard Terms and Conditions**

- a) All Standard Terms and Conditions are federally enforceable, with the exception of those listed below which are enforceable under State law only:
  - (1) Standard Term and Condition A.2.a), Severability Clause
  - (2) Standard Term and Condition A.3.c) through A. 3.e) General Requirements
  - (3) Standard Term and Condition A.6.c) and A. 6.d), Compliance Requirements
  - (4) Standard Term and Condition A.9., Reporting Requirements
  - (5) Standard Term and Condition A.10., Applicability
  - (6) Standard Term and Condition A.11.b) through A.11.e), Construction of New Source(s) and Authorization to Install
  - (7) Standard Term and Condition A.14., Public Disclosure
  - (8) Standard Term and Condition A.15., Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations
  - (9) Standard Term and Condition A.16., Fees
  - (10) Standard Term and Condition A.17., Permit Transfers

**2. Severability Clause**

- a) A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.
- b) All terms and conditions designated in parts B and C of this permit are federally enforceable as a practical matter, if they are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA and the State and by citizens (to the extent allowed by section 304 of the Act) under the Act. Terms and conditions in parts B and C of this permit shall not be federally enforceable and shall be enforceable under State law only, only if specifically identified in this permit as such.

**3. General Requirements**

- a) Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and re-issuance, or modification.

- b) It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c) This permit may be modified, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d) This permit does not convey any property rights of any sort, or any exclusive privilege.
- e) The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

#### **4. Monitoring and Related Record Keeping and Reporting Requirements**

- a) Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
  - (1) The date, place (as defined in the permit), and time of sampling or measurements.
  - (2) The date(s) analyses were performed.
  - (3) The company or entity that performed the analyses.
  - (4) The analytical techniques or methods used.
  - (5) The results of such analyses.
  - (6) The operating conditions existing at the time of sampling or measurement.
- b) Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c) Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
  - (1) Reports of any required monitoring and/or recordkeeping of federally enforceable information shall be submitted to the Regional Air Pollution Control Agency.

- (2) Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be made to the Regional Air Pollution Control Agency. The written reports shall be submitted (i.e., postmarked) quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. See A.15. below if no deviations occurred during the quarter.
  - (3) Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted to the Regional Air Pollution Control Agency every six months, by January 31 and July 31 of each year for the previous six calendar months. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.
  - (4) This permit is for an emissions unit located at a Title V facility. Each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.
- d) The permittee shall report actual emissions pursuant to OAC Chapter 3745-78 for the purpose of collecting Air Pollution Control Fees.

## **5. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the Regional Air Pollution Control Agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports shall be submitted pursuant to OAC rule 3745-15-06.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

## **6. Compliance Requirements**

- a) All applications, notifications or reports required by terms and conditions in this permit to be submitted or "reported in writing" are to be submitted to Ohio EPA through the Ohio EPA's eBusiness Center: Air Services web service ("Air Services"). Ohio EPA will accept hard copy submittals on an as-needed basis if the permittee cannot submit the required documents through the Ohio EPA eBusiness Center. In the event of an alternative hard copy submission in lieu of the eBusiness Center, the post-marked date or the date the document is delivered in person will be recognized as the date submitted. Electronic submission of applications, notifications or reports required to be submitted to Ohio EPA fulfills the requirement to submit the required information to the Director, the appropriate Ohio EPA District Office or contracted

local air agency, and/or any other individual or organization specifically identified as an additional recipient identified in this permit unless otherwise specified. Consistent with OAC rule 3745-15-03, the electronic signature date shall constitute the date that the required application, notification or report is considered to be "submitted". Any document requiring signature may be represented by entry of the personal identification number (PIN) by responsible official as part of the electronic submission process or by the scanned attestation document signed by the Authorized Representative that is attached to the electronically submitted written report.

Any document (including reports) required to be submitted and required by a federally applicable requirement in this permit shall include a certification by a Responsible Official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.

- b) Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
- (1) At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
  - (2) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with ORC section 3704.08.
  - (3) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
  - (4) As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c) The permittee shall submit progress reports to the Regional Air Pollution Control Agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
- (1) Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
  - (2) An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

## **7. Best Available Technology**

As specified in OAC Rule 3745-31-05, new sources that must employ Best Available Technology (BAT) shall comply with the Applicable Emission Limitations/Control Measures identified as BAT for each subject emissions unit.

**8. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

**9. Reporting Requirements**

The permittee shall submit required reports in the following manner:

- a) Reports of any required monitoring and/or recordkeeping of state-only enforceable information shall be submitted to the Regional Air Pollution Control Agency.
- b) Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from state-only required emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the Regional Air Pollution Control Agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

**10. Applicability**

This Permit-to-Install is applicable only to the emissions unit(s) identified in the Permit-to-Install. Separate application must be made to the Director for the installation or modification of any other emissions unit(s) not exempt from the requirement to obtain a Permit-to-Install.

**11. Construction of New Sources(s) and Authorization to Install**

- a) This permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. This permit does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the application and terms and conditions of this permit. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of this permit does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Issuance of this permit is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.
- b) If applicable, authorization to install any new emissions unit included in this permit shall terminate within eighteen months of the effective date of the permit if the owner or operator has not undertaken a continuing program of installation or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation. This deadline may be extended by up to 12 months if application is made to the

Director within a reasonable time before the termination date and the permittee shows good cause for any such extension.

- c) The permittee may notify Ohio EPA of any emissions unit that is permanently shut down (i.e., the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31) by submitting a certification from the authorized official that identifies the date on which the emissions unit was permanently shut down. Authorization to operate the affected emissions unit shall cease upon the date certified by the authorized official that the emissions unit was permanently shut down. At a minimum, notification of permanent shut down shall be made or confirmed by marking the affected emissions unit(s) as "permanently shut down" in "Air Services" along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update electronically will constitute notifying the Director of the permanent shutdown of the affected emissions unit(s).
- d) The provisions of this permit shall cease to be enforceable for each affected emissions unit after the date on which an emissions unit is permanently shut down (i.e., emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31). All records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, must be maintained in accordance with law. All reports required by this permit must be submitted for any period an affected emissions unit operated prior to permanent shut down. At a minimum, the permit requirements must be evaluated as part of the reporting requirements identified in this permit covering the last period the emissions unit operated.

Unless otherwise exempted, no emissions unit certified by the responsible official as being permanently shut down may resume operation without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31 and OAC Chapter 3745-77 if the restarted operation is subject to one or more applicable requirements.

- e) The permittee shall comply with any residual requirements related to this permit, such as the requirement to submit a deviation report, air fee emission report, or other any reporting required by this permit for the period the operating provisions of this permit were enforceable, or as required by regulation or law. All reports shall be submitted in a form and manner prescribed by the Director. All records relating to this permit must be maintained in accordance with law.

## **12. Permit-To-Operate Application**

The permittee is required to apply for a Title V permit pursuant to OAC Chapter 3745-77. The permittee shall submit a complete Title V permit application or a complete Title V permit modification application within twelve (12) months after commencing operation of the emissions units covered by this permit. However, if operation of the proposed new or modified source(s) as authorized by this permit would be prohibited by the terms and conditions of an existing Title V permit, a Title V permit modification of such new or modified source(s) pursuant to OAC rule 3745-77-04(D) and OAC rule 3745-77-08(C)(3)(d) must be obtained before operating the source in a manner that would violate the existing Title V permit requirements.

**13. Construction Compliance Certification**

The applicant shall identify the following dates in the "Air Services" facility profile for each new emissions unit identified in this permit.

- a) Completion of initial installation date shall be entered upon completion of construction and prior to start-up.
- b) Commence operation after installation or latest modification date shall be entered within 90 days after commencing operation of the applicable emissions unit.

**14. Public Disclosure**

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

**15. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations**

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

**16. Fees**

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable permit-to-install fees within 30 days after the issuance of any permit-to-install. The permittee shall pay all applicable permit-to-operate fees within thirty days of the issuance of the invoice.

**17. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The new owner must update and submit the ownership information via the "Owner/Contact Change" functionality in "Air Services" once the transfer is legally completed. The change must be submitted through "Air Services" within thirty days of the ownership transfer date.

**18. Risk Management Plans**

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

**19. Title IV Provisions**

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

**Final Permit-to-Install**  
Wright-Patterson Air Force Base  
**Permit Number:** P0121270  
**Facility ID:** 0829700441  
**Effective Date:** 10/18/2016

## **B. Facility-Wide Terms and Conditions**

1. All the following facility-wide terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only:
  - a) None.
2. This facility is subject to 40 CFR Part 63, Subpart DDDDD, National Emission Standards for Hazardous Air Pollutants (NESHAP) for Major Sources: Industrial, Commercial, and Institutional Boilers and Process Heaters.

As defined in 40 CFR Part 63.7575 the “Unit designed to burn gas 1 subcategory” includes any boiler or process heater that burns only natural gas, refinery gas, and/or other gas 1 fuels; with the exception of liquid fuels used for periodic testing not to exceed a combined total of 48 hours during any calendar year, or during periods of gas curtailment and gas supply emergencies.

Emissions units B307, B308, B309, and B310 only use natural gas fuel and must comply with the Boiler MACT requirements in the table below before January 31, 2016.

Emissions units B607, B608, and B609 only use natural gas fuel or will be converted from coal to natural gas fuel only before January 31, 2017\* and must comply with the Boiler MACT requirements in the table below before January 31, 2017\*.

The requirements for the “unit designed to burn gas 1 subcategory” as identified in the following table:

40 CFR 63.7521(f) through (i)	Fuel analyses and specifications for fuels other than natural gas
40 CFR 63.7530 (d) through (g)	Initial compliance demonstration
40 CFR 63.7540(a) and (c)	Continuous compliance with emissions limitations, fuel specifications and work practice standards
40 CFR 63.7545(a) through (c), (e) and (f)	Notification requirements
40 CFR 63.7550	Reporting requirements
40 CFR 63.7560	Records form and retention
40 CFR 63.7565	General provisions
40 CFR 63.7575	Definitions

\* Wright Patterson Air Force Base (WPAFB) was granted a compliance deadline extension by Ohio EPA on September 9, 2015 for emissions units B607 and B608. This extension allows for conversion of emissions units B607 and B608 from coal to natural gas fuel until January 31, 2017.

3. This facility is subject to 40 CFR Part 63, Subpart A, NESHAP: General Provisions. The applicable provisions of 40 CFR Part 63, Subpart A (required for compliance with 40 CFR Part 63, Subpart DDDDD) are identified in Table 10. of 40 CFR Part 63, Subpart DDDDD

**Final Permit-to-Install**  
Wright-Patterson Air Force Base  
**Permit Number:** P0121270  
**Facility ID:** 0829700441  
**Effective Date:** 10/18/2016

## **C. Emissions Unit Terms and Conditions**

**1. Emissions Unit Group -Derated Boilers - Building 1240: B607,B608,**

<b>EU ID</b>	<b>Operations, Property and/or Equipment Description</b>
B607	Facility 31240, boiler No. 5; natural gas-fired; 105 million BTU per hour nominal heat input
B608	Facility 31240, boiler No. 6; natural gas-fired; 105 million BTU per hour nominal heat input

a) The following emissions unit terms and conditions are federally enforceable with the exception of those listed below which are enforceable under state law only:

(1) b)(1)h.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3) June 30, 2008	The nitrogen oxides (NOx) emissions from each emissions unit shall not exceed 0.10 pound per million Btu actual heat input.  The carbon monoxide (CO) emissions from each emissions unit shall not exceed 0.10 pound per million Btu of actual heat input.  See b)(2)a.
b.	OAC rule 3745-31-05(A)(3) June 30, 2008	<u>Emissions Units B607 and B608:</u>  The particulate emissions from each emissions unit shall not exceed 3.50 tons on a rolling 12-month basis (the particulate emissions consist of the particulate matter less than 10 microns (PM-10), particulate matter less than 2.5 microns (PM-2.5) and condensable particulate matter fractions).  The sulfur dioxide (SO <sub>2</sub> ) emissions from each emissions unit shall not exceed 0.28 ton on a rolling 12-month basis.  The volatile organic compound (VOC)

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		emissions from each emissions unit shall not exceed 2.53 tons on a rolling 12-month basis.  See b)(2)b. and b)(2)c.  Compliance with this rule also includes compliance with OAC rules 3745 -17-07(A) and 3745-17-10(B), 40 CFR Part 60, Subpart Dc and 40 CFR Part 63, Subpart DDDDD.
c.	OAC rule 3745-31-05(A)(3)(a)(ii) June 30, 2008	See b)(2)d.
d.	OAC rule 3745-31-05(D) Synthetic Minor to avoid major new source review	The combined NOx emissions from emissions units B607, B608 and B609 shall not exceed 120.0 tons on a rolling 12-month basis.  The combined CO emissions from emissions units B607, B608 and B609 shall not exceed 120.0 tons on a rolling 12-month basis.  The combined particulate emissions from emissions units B607, B608 and B609 shall not exceed 9.12 tons on a rolling 12-month basis (the particulate emissions consist of the PM-10, PM-2.5 and condensable particulate matter fractions).  See b)(2)e.
e.	OAC rule 3745-17-07(A)(1)	Visible particulate emissions from any stack serving each emissions unit shall not exceed 20 percent opacity as a six-minute average, except as provided by rule.
f.	OAC rule 3745-17-10(B)(1)	The particulate emissions from each emissions unit shall not exceed 0.02 pound per million Btu of actual heat input.
g.	OAC rule 3745-17-10(B)(3)	See b)(2)f and c)(2).
h.	OAC rule 3745-114-01 and ORC 3704.03(F)	See d)(5) through d)(8) and e)(3)
i.	40 CFR Part 60, Subpart Dc	See b)(2)g.
j.	40 CFR Part 63, Subpart DDDDD	See Section B.2. and b)(2)b.

(2) Additional Terms and Conditions

- a. The BAT determination for these emissions units includes:
  - i. Use of only natural gas as fuel;
  - ii. The use of low NOx burners and a continuous oxygen trim system to control air-to-fuel ratio; and
  - iii. Employment of good combustion practices and a continuous oxygen trim system to control air-to-fuel ratio to reduce CO emissions.
- b. This Best Available Technology (BAT) emissions limitation applies until U.S. EPA approves the Ohio Administrative Code (OAC) paragraph 3745-31-05(A)(3)(ii) (the less than 10 tons per year BAT exemption) into the Ohio State Implementation Plan (SIP).
- c. The particulate, SO<sub>2</sub>, and VOC emissions limitations for each emissions unit were established to reflect the potential to emit for each emissions unit. Therefore, it is not necessary to establish monitoring or record keeping for these emissions limitations.
- d. The requirements of this rule apply once U.S. EPA approves OAC paragraph 3745-31-05(A)(3)(a)(ii) (the less than 10 tons per year BAT exemption) as part of the Ohio SIP. The BAT requirements of OAC rule 3745-31-05(A)(3) do not apply to the particulate, VOC and SO<sub>2</sub> emissions from these emissions units because the uncontrolled potential emissions are less than 10 tons per year.
- e. The combined volume of natural gas used in emissions units B607, B608 and B609 shall not exceed 2,400 MMscf on a rolling 12-month basis. To ensure enforceability during the first 12 months of operation, the permittee shall not exceed the fuel use volume specified in the following table:

<u>Month</u>	<u>Cumulative natural gas use (MMscf)</u>
1	600
1-2	1,200
1-3	1,800
1-4	2,400
1-5	2,400
1-6	2,400
1-7	2,400
1-8	2,400
1-9	2,400
1-10	2,400
1-11	2,400
1-12	2,400

After the first 12 months of operation compliance with the rolling 12-month natural gas use limitation shall be based on a rolling 12-month sum of the actual natural gas use rates for the previous 12 months.

These federally enforceable emissions limitations and fuel usage limitations were previously established in PTI P0119472 issued December 30, 2015. Emissions Unit B609 is not included in this administrative modification PTI and shall continue to operate in accordance with PTI P0119472.

- f. The nominal heat input rate for B607 and B608 is derated from 169 MMBtu/hour to 105 MMBtu/hour for each boiler. Each boiler must be equipped with electronic combustion controls that will prevent its heat input rate from ever exceeding 105 MMBtu/hour. The electronic combustion controls shall be designed so that boiler operators cannot increase the heat input rate for the boilers above 105 MMBtu/hour.

Because the boilers must be equipped with electronic combustion controls that will prevent the heat input rate for each boiler from ever exceeding 105 MMBtu/hour, additional monitoring and recordkeeping to ensure compliance is not required.

Because the boilers are natural gas fired, the allowable particulate emissions rate for each boiler in accordance with OAC rule 3745-17-10(B)(1) is 0.02 pound per MMBtu actual heat input.

c) **Operational Restrictions**

- (1) The permittee shall burn only natural gas in these emissions units.
- (2) At no time shall the heat input rate from B607 and B608 exceed 105 MMBtu per hour as an average over any one-hour period.

d) **Monitoring and/or Recordkeeping Requirements**

- (1) For each day during which the permittee burns a fuel other than natural gas, the permittee shall maintain a record of the type and quantity of fuel used in these emissions units.
- (2) The permittee shall install, operate, and maintain equipment to monitor and record the natural gas flow rates to these emissions units, in standard cubic feet per hour (scfh). The monitoring device and any recorder shall be installed, calibrated, operated, and maintained in accordance with manufacturer recommendations, instructions, and operating manuals and/or the permittee's established protocols for proper operation. The flow monitoring equipment shall have an accuracy of within plus or minus five percent (5%). The monitoring device and any recorder shall be maintained in continuous operation when these emissions units are in operation, except during periods of calibration, adjustment, or repair conducted in accordance with the maintenance and calibration schedules provided by the permittee, unless otherwise specified in the applicable monitoring requirements of 40 CFR Part 60 for these emissions units.

- (3) The permittee shall maintain monthly records of the following information for each emissions unit\*:
- a. the total quantity of natural gas used in each emissions unit, each month, in MMscf, in accordance with d)(2);
  - b. the average heat content, in Btu per cubic foot, of the natural gas combusted in each emissions unit;
  - c. the actual heat input, in MMBtu, for each emissions unit [(d)(3)a. multiplied by d)(3)b. divided by one million];
  - d. the total NO<sub>x</sub> emissions for each month, in tons (determined by multiplying the total heat input for each month (as determined in d)(3)c.) by the emission rate, in pound NO<sub>x</sub>/MMBtu heat input determined in the last stack test that showed each emissions unit was in compliance divided by 2,000 pounds per ton);
  - e. the total CO emissions for each month, in tons (determined by multiplying the total heat input for each month (as determined in d)(3)c.) by the emission rate, in pound CO/MMBtu heat input determined in the last stack test that showed each emissions unit was in compliance divided by 2,000 pounds per ton);
  - f. the total particulate emissions for each month, in tons, determined by multiplying the total natural gas use for each month (as determined in d)(3)a.) by the emission rate, in pounds particulate/MMScf for each fraction (PM-10 and condensable) divided by 2,000 pound per ton.

\*For emissions units B607 and B608 these requirements shall become effective for each emissions unit upon completion of its conversion to natural gas fuel.

- (4) The permittee shall maintain monthly records of the following information as a combined total for emissions units B607, B608 and B609\*:
- a. the total quantity of natural gas used, each month, in MMscf on a rolling 12-month basis or during the first 12 calendar months of operation the cumulative natural gas use for each calendar month (i.e., the sum of the monthly natural gas use rates for each emissions unit calculated in d)(3)a. above for the previous 12 months),
  - b. the total NO<sub>x</sub> emissions, for each month, in tons, on a rolling 12-month basis or during the first 12 calendar months of operation the cumulative NO<sub>x</sub> emissions for each calendar month (i.e., the sum of the monthly emissions rates for each emissions unit calculated in d)(3)d. above for the previous 12-months);
  - c. the total CO emissions, for each month, in tons, on a rolling 12-month basis or during the first 12 calendar months of operation the cumulative CO emissions for each calendar month (i.e., the sum of the monthly emissions rates for each emissions unit calculated in d)(3)e. above for the previous 12-months);

- d. the total particulate emissions, for each month, in tons, on a rolling 12-month basis or during the first 12 calendar months of operation the cumulative particulate emissions for each calendar month (i.e., the sum of the monthly emissions rates for each emissions unit calculated in d)(3)f. above for the previous 12-months).

\*For emissions units B607 and B608 these requirements shall become effective for each emissions unit upon completion of its conversion to natural gas fuel.

- (5) The PTI application for emissions units, B607 and B608, was evaluated based on the actual materials and the design parameters of the emissions unit(s)' exhaust system, as specified by the permittee. The "Toxic Air Contaminant Statute", ORC 3704.03(F), was applied to this/these emissions unit(s) for each toxic air contaminant listed in OAC rule 3745-114-01, using data from the permit application; and modeling was performed for each toxic air contaminant(s) emitted at over one ton per year using an air dispersion model such as SCREEN3, AERMOD, or ISCST3, or other Ohio EPA approved model. The predicted 1-hour maximum ground-level concentration result(s) from the approved air dispersion model, was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC), calculated as described in the Ohio EPA guidance document entitled "Review of New Sources of Air Toxic Emissions, Option A", as follows:

- a. the exposure limit, expressed as a time-weighted average concentration for a conventional 8-hour workday and a 40-hour workweek, for each toxic compound(s) emitted from the emissions unit(s), (as determined from the raw materials processed and/or coatings or other materials applied) has been documented from one of the following sources and in the following order of preference (TLV was and shall be used, if the chemical is listed):
- i. threshold limit value (TLV) from the American Conference of Governmental Industrial Hygienists (ACGIH) "Threshold Limit Values for Chemical Substances and Physical Agents Biological Exposure Indices"; or
  - ii. STEL (short term exposure limit) or the ceiling value from the American Conference of Governmental Industrial Hygienists (ACGIH) "Threshold Limit Values for Chemical Substances and Physical Agents Biological Exposure Indices"; the STEL or ceiling value is multiplied by 0.737 to convert the 15-minute exposure limit to an equivalent 8-hour TLV.
- b. The TLV is divided by ten to adjust the standard from the working population to the general public (TLV/10).
- c. This standard is/was then adjusted to account for the duration of the exposure or the operating hours of the emissions unit(s), i.e., "X" hours per day and "Y" days per week, from that of 8 hours per day and 5 days per week. The resulting calculation was (and shall be) used to determine the Maximum Acceptable Ground-Level Concentration (MAGLC):

$$TLV/10 \times 8/X \times 5/Y = 4 TLV/XY = MAGLC$$

- d. The following summarizes the results of dispersion modeling for the significant toxic contaminants (emitted at 1 or more tons/year) or “worst case” toxic contaminant(s):

Toxic Contaminant: Hexane.

TLV (mg/m<sup>3</sup>): 176

Maximum Hourly Emission Rate (pounds/hour): 0.60

Predicted 1-Hour Maximum Ground-Level Concentration (µg/m<sup>3</sup>): 0.80

MAGLC (µg/m<sup>3</sup>): 4,200

The permittee, has demonstrated that emissions of hexane, from emissions units B607 and B608, are calculated to be less than eighty per cent of the maximum acceptable ground level concentration (MAGLC); any new raw material or processing agent shall not be applied without evaluating each component toxic air contaminant in accordance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F).

- (6) Prior to making any physical changes to or changes in the method of operation of the emissions unit(s), that could impact the parameters or values that were used in the predicted 1-hour maximum ground-level concentration, the permittee shall re-model the change(s) to demonstrate that the MAGLC has not been exceeded. Changes that can affect the parameters/values used in determining the 1-hour maximum ground-level concentration include, but are not limited to, the following:
- a. changes in the composition of the materials used or the use of new materials, that would result in the emission of a new toxic air contaminant with a lower Threshold Limit Value (TLV) than the lowest TLV previously modeled;
  - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any toxic air contaminant listed in OAC rule 3745-114-01, that was modeled from the initial (or last) application; and
  - c. physical changes to the emissions unit(s) or its/their exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the “Toxic Air Contaminant Statute” will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a “modification” under OAC rule 3745-31-01 solely due to a non-restrictive change to a parameter or process operation, where compliance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F), has been documented. If the change(s) meet(s) the definition of a “modification”, the permittee shall apply for and obtain a final PTI prior to the change. The Director may consider any significant departure from the operations of the emissions unit, described in the permit application, as a modification that results in greater emissions than the emissions rate modeled to determine the ground level concentration; and he/she may require the permittee to submit a permit application for the increased emissions.

- (7) The permittee shall collect, record, and retain the following information for each toxic evaluation conducted to determine compliance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F):
- a. a description of the parameters/values used in each compliance demonstration and the parameters or values changed for any re-evaluation of the toxic(s) modeled (the composition of materials, new toxic contaminants emitted, change in stack/exhaust parameters, etc.);
  - b. the Maximum Acceptable Ground-Level Concentration (MAGLC) for each significant toxic contaminant or worst-case contaminant, calculated in accordance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F);
  - c. a copy of the computer model run(s), that established the predicted 1-hour maximum ground-level concentration that demonstrated the emissions unit(s) to be in compliance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F), initially and for each change that requires re-evaluation of the toxic air contaminant emissions; and
  - d. the documentation of the initial evaluation of compliance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F), and documentation of any determination that was conducted to re-evaluate compliance due to a change made to the emissions unit(s) or the materials applied.
- (8) The permittee shall maintain a record of any change made to a parameter or value used in the dispersion model, used to demonstrate compliance with the “Toxic Air Contaminant Statute”, ORC 3704.03(F), through the predicted 1-hour maximum ground level concentration. The record shall include the date and reason(s) for the change and if the change would increase the ground-level concentration.
- e) Reporting Requirements
- (1) The permittee shall submit deviation reports that identify each day when a fuel other than natural gas was used in each emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
  - (2) The permittee shall submit quarterly deviation reports that identify the following:
    - a. all exceedances of the 2,400 MMscf rolling 12-month natural gas use limitation;
    - b. all exceedances of the 120.0 tons NO<sub>x</sub> rolling 12-month emissions limitation;
    - c. all exceedances of the 120.0 tons CO rolling 12-month emissions limitation;
    - d. all exceedances of the 9.12 tons particulate rolling 12-month emissions limitation;
    - e. all exceedances of the 105 MMBtu/hour heat input restriction for B607 and B608;
    - f. the probable cause of each deviation;

- g. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations; and
- h. the magnitude and duration of each deviation.

If no deviations occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

- (3) The permittee shall submit annual reports that include any changes to any parameter or value used in the dispersion model used to demonstrate compliance with the Toxic Air Contaminant Statute, ORC 3704.03(F), through the predicted 1 hour maximum concentration. The report should include:
  - a. the original model input;
  - b. the updated model input;
  - c. the reason for the change(s) to the input parameter(s); and
  - d. a summary of the results of the updated modeling, including the input changes; and
  - e. a statement that the model results indicate that the 1-hour maximum ground-level concentration is less than 80% of the MAGLC.
- (4) If no changes to the emissions, emissions units, or the exhaust stack have been made during the reporting period, then the report shall include a statement to that effect.

f) Testing Requirements

- (1) Compliance with the Emissions Limitations specified in b) shall be determined in accordance with the following methods:

- a. Emissions Limitation –

The NO<sub>x</sub> emissions from each emissions unit shall not exceed 0.10 pound per million Btu of actual heat input.

Applicable Compliance Method –

Compliance shall be based on emissions testing conducted according to U.S. EPA Reference Methods 1 through 4 and 7E of 40 CFR Part 60, Appendix A. See f)(2).

b. Emissions Limitation –

The CO emissions from each emissions unit shall not exceed 0.10 pound per million Btu of actual heat input.

Applicable Compliance Method –

Compliance shall be based on emissions testing conducted according to U.S. EPA Reference Methods 1 through 4 and 10 of 40 CFR Part 60, Appendix A. See f)(2).

c. Emissions Limitation –

The particulate emissions from each emissions unit (B607 and B608) shall not exceed 3.50 tons on a rolling 12-month basis.

Applicable Compliance Method –

This emissions limitation is based on the maximum natural gas fuel use in each emissions unit (0.105 MMscf/hour) multiplied by the emission factor of 7.6 pounds particulate/MMscf (the sum of the 5.7 pounds filterable particulate/MMscf plus 1.9 pounds condensable particulate/MMscf from U.S. EPA, AP-42, Table 1.4-2, 7/98) and multiplying the hourly emissions rate by 8,760 hours per year and dividing by 2,000 pounds per ton.

d. Emissions Limitation –

The SO<sub>2</sub> emissions from each emissions unit (B607 and B608) shall not exceed 0.28 ton on a rolling 12-month basis.

Applicable Compliance Method –

This emissions limitation is based on the maximum natural gas fuel use in each emissions unit (0.105 MMscf/hour) multiplied by the emission factor of 0.6 pound/MMscf (from U.S. EPA, AP-42, Table 1.4-2, 7/98) and multiplying the hourly emissions rate by 8,760 hours per year and dividing by 2,000 pounds per ton.

e. Emissions Limitation –

The VOC emissions from each emissions unit (B607 and B608) shall not exceed 2.53 tons on a rolling 12-month basis.

Applicable Compliance Method –

This emissions limitation is based on the maximum natural gas fuel use in each emissions unit (0.105 MMscf/hour) multiplied by the emission factor of 5.5 pounds/MMscf (from U.S. EPA, AP-42, Table 1.4-2, 7/98) and multiplying the hourly emissions rate by 8,760 hours per year and dividing by 2,000 pounds per ton.

f. Emissions Limitation – B607, B608 and B609 combined

The combined volume of natural gas used in these emissions units shall not exceed 2,400 MMscf on a rolling 12-month basis.

The combined NOx emissions from these emissions units shall not exceed 120.0 tons on a rolling 12-month basis.

The combined CO emissions from these emissions units shall not exceed 120.0 tons on a rolling 12-month basis.

The combined particulate emissions from these emissions units shall not exceed 9.12 tons on a rolling 12-month basis.

Applicable Compliance Method –

Compliance will be based on the monitoring and record keeping requirements of d)(3) and d)(4).

g. Emissions Limitation –

Visible particulate emissions from any stack serving each emissions unit shall not exceed 20 percent opacity as a six-minute average, except as provided by rule.

Applicable Compliance Method –

If requested, compliance will be demonstrated based on the results of emissions testing according to U.S. EPA Reference Method 9 of 40 CFR Part 60, Appendix A and OAC rule 3745-17-03(B)(1).

h. Emissions Limitation –

The particulate emissions from each emissions unit shall not exceed 0.02 pound per million Btu of actual heat input.

Applicable Compliance Method –

If requested, compliance will be demonstrated based on the results of emissions testing according to U.S. EPA Reference Method 5 of 40 CFR Part 60, Appendix A and OAC rule 3745-17-03(B)(9).

(2) The permittee shall conduct, or have conducted, emission testing for each emissions unit (B607, B608 and B609) in accordance with the following requirements:

a. The emission testing shall be conducted during either the 2016 - 2017 heating season (November 2016 through March 2017) or the early in the 2017 – 2018 heating season (November or December 2017).

b. The emission testing shall be conducted to demonstrate compliance with the 0.10 pound NOx per million Btu actual heat input and 0.10 pound CO per million Btu actual heat input.

- c. The following test method(s) shall be employed to demonstrate compliance with the allowable mass emission rate(s):
- NOx - U.S. EPA Reference Methods 1 through 4 and 7E of 40 CFR Part 60, Appendix A
- CO - U.S. EPA Reference Methods 1 through 4 and 10 of 40 CFR Part 60, Appendix A
- Alternative U.S. EPA approved test methods may be used with prior approval from the Ohio EPA.
- d. During the emissions testing, the emissions unit shall be operated under operational conditions approved in advance by the appropriate Ohio EPA District Office or local air agency. Operational conditions that may need to be approved include, but are not limited to, the heat input rate and hot water production rates, or control equipment operational limitations. In general, testing shall be completed under "worst case" conditions expected during the life of the permit. As part of the information provided in the "Intent to Test" notification form the permittee shall provide a description of the emissions unit operational conditions they will meet during the emissions testing and describe why they believe "worst case" operating conditions will be met. Prior to conducting the test(s), the permittee shall confirm with the appropriate Ohio EPA District Office or local air agency that the proposed operating conditions constitute "worst case". Failure to test under the approved conditions may result in Ohio EPA not accepting the test results as a demonstration of compliance.
- e. Not later than 60 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission test(s).
- f. Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.
- g. A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the appropriate Ohio EPA District Office or local air agency.

**Final Permit-to-Install**  
Wright-Patterson Air Force Base  
**Permit Number:** P0121270  
**Facility ID:** 0829700441  
**Effective Date:** 10/18/2016

- g) Miscellaneous Requirements
  - (1) None.
