

Facility ID: 1409040905 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
miscellaneous metal parts dip tank, with bake ovens	OAC rule 3745-31-05(A)(3) (PTI 14-04772)	28.8 lbs of volatile organic compound (VOC) emissions/day 5.3 tons per year (TPY) of VOC emissions See Section A.2 below. The VOC content limitation specified by this rule is less stringent than the VOC content limitation established pursuant to OAC rule 3745-31-05(A)(3).
	OAC rule 3745-21-09(U)(1)(i)	

2. Additional Terms and Conditions

- (a) The VOC content, as applied, of each coating employed in this emissions unit shall not exceed 1.0 pound of VOC per gallon of coating, excluding water and exempt solvents.
The daily VOC emission limitation specified above is based upon the emissions unit's potential to emit. Therefore, no daily record keeping or reporting is required to demonstrate compliance with this emission limitation.

B. Operational Restrictions

1. The permittee shall employ good housekeeping and engineering practices when operating this emissions unit, including covering the dip tank when the dip tank is not in use, to minimize VOC emissions.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the dip tank and bake ovens:
 - a. the name and identification number of each coating, as applied;
 - b. the volume, in gallons, of all coatings employed, excluding water and exempt solvents; and
 - c. the VOC content of each coating, as applied, in pounds per gallon, excluding water and exempt solvents.
2. The permittee shall maintain annual records of the total volume, in gallons, of all coatings employed for the calendar year, excluding water and exempt solvents (summation of C.1.b for each month of the calendar year).

D. Reporting Requirements

1. The permittee shall notify the Hamilton County Department of Environmental Services, in writing, of any monthly record showing the use of noncomplying coating (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Hamilton County Department of Environmental Services within 30 days following the end of the calendar month.

E. Testing Requirements

1. Compliance with the VOC emission limitations and the VOC content limitation specified in Sections A.1 and A.2 shall be determined by the following methods:
VOC Emission Limitations: 28.8 lbs of VOC emissions/day; 5.3 TPY of VOC emissions

Applicable Compliance Method: The daily VOC emission limitation is based upon the emissions unit's potential to emit and was established by considering the maximum number of gallons (28.8 gallons) to be employed per

day, multiplied by a maximum VOC content of 1 lb/gallon. Compliance with the annual VOC emission limitation is ensured if compliance is maintained with the daily VOC emission limitation.

VOC Content Limitation: 1.0 lb/gallon of VOC, excluding water and exempt solvents

Applicable Compliance Method: Compliance with the VOC content limitation shall be determined by the record keeping requirements specified in Section C.1. If, pursuant to Section 4.3 of Method 24, 40 CFR, Part 60, Appendix A, the permittee determines that Method 24 cannot be used for a particular coating, the permittee shall so notify the Administrator of the U.S. EPA and shall use formulation data for that coating to demonstrate compliance until the U.S. EPA provides alternative analytical procedures or alternative precision statements for Method 24.

F. Miscellaneous Requirements

1. None
