

Facility ID: 1413020455 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 1413020455 Emissions Unit ID: F002 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
F002 - Storage Piles - Modification	OAC rule 3745-31-05(A)(3) (PTI 14-05376)	Fugitive particulate emissions (PE) shall not exceed 15.39 TPY. Fugitive particulate matter emissions 10 microns in diameter and less (PM10) shall not exceed 7.29 TPY. No visible particulate emissions except for thirteen minutes during any 60-minute observation period.

2. **Additional Terms and Conditions**
 - (a) Compliance with OAC rule 3745-31-05(A)(3) shall be demonstrated by the use of water suppression, minimized drop heights and visible emission limits.

B. Operational Restrictions

1. The annual throughput of material shall not exceed 400,000 tons per year.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall maintain monthly records of the amount of material received at this facility in tons.

D. Reporting Requirements

1. The permittee shall submit annual reports that identify any exceedances of the annual throughput limitation, as well as the corrective actions that were taken to achieve compliance. If no exceedances occurred, then the permittee shall state so in the report. These reports shall be submitted by January 31 of each year.

E. Testing Requirements

1. Compliance with the emission limitation(s) in Section A.1. of these terms and conditions shall be determined in accordance with the following method(s):
 - a. Emission Limitation
No visible particulate emissions except for thirteen minutes during any 60-minute observation period.

Applicable Compliance Method:
Compliance with the visible emission limitation for the material storage piles identified in this permit shall be determined in accordance with U.S. EPA Method 22, with the following modifications:
 1. if the observer's view is obscured and observations must be terminated prior to completing the necessary or desired observation period, the observer shall note this fact on the observation form; and the observation period shall be completed when the view of the storage pile is no longer obscured;
 2. the observer shall identify all interruptions due to rest breaks on the observation form; and
 3. observations, excluding break periods and periods of obscure vision, shall be considered continuous for the purpose of determining compliance with the visible emission limitation.
 - b. Emission Limitation
Fugitive particulate emissions (PE) shall not exceed 15.39 TPY.

Fugitive particulate matter emissions 10 microns in diameter and less (PM10) shall not exceed 7.29 TPY.

Applicable Compliance Method:

Compliance with the above emission limitations for the material storage piles were determined using AP-42 Section 13.2.4 dated 01/95.

2. Compliance with the throughput limit in section B.1 shall be determined based upon the record keeping in section C.1.

F. **Miscellaneous Requirements**

1. None
