

Facility ID: 1431080082 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 1431080082 Emissions Unit ID: T018 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
630,000-gallon external floating roof storage tank	OAC rule 3745-31-05(A)(3) (PTI 14-768)	14 tons per year (TPY) of organic compound (OC)
	OAC rule 3745-21-09(Z) 40 CFR, Part 60, Subpart Kb	The requirements of this PTI also include compliance with the requirements of OAC rule 3745-21-09(Z). See terms and conditions A.2.a through A.2.g below. See terms and conditions A.2.b through A.2.e below.

2. Additional Terms and Conditions

- (a) Any welded external floating roof storage tank equipped with a mechanical shoe primary seal and a rim-mounted secondary seal shall meet the following requirements:
 - i. there shall be no visible holes, tears, or other openings in the seal or seal fabric;
 - ii. for the primary seal, the total seal gap area shall not exceed 10.0 square inches per foot of tank diameter; and
 - iii. for the secondary seal, the total seal gap area shall not exceed 1.0 square inch per foot of tank diameter.

The permittee may change the seal types during the term of this permit provided that a written notification and revised "emission activity category" form, including the results of the latest seal gap measurements, are submitted to the Hamilton County Department of Environmental Services within 30 days after the change occurs.

Any opening in the external floating roof, except automatic bleeder vents, rim space vents, leg sleeves, stub drains, and slotted gauging/sampling wells, shall be equipped with:

 - i. a cover, seal, or lid which remains in the closed position at all times without any visible gaps, except when the opening is in actual use; and
 - ii. a projection into the tank below the liquid surface.

Any automatic bleeder vent shall remain in the closed position, except when the external floating roof is floated off or landed on the roof leg supports.

Any rim vent shall be set to open at the manufacturer's recommended setting, except when the external floating roof is being floated off the roof leg supports.

Any emergency roof drain shall be equipped with a slotted membrane fabric cover or other device which covers at least 90 percent of the area of the opening.

Any stub drain shall be equipped with a projection into the tank below the liquid surface.

Any slotted gauging/sampling well shall be equipped with an object that floats on the liquid surface within the well and that covers at least 90 percent of the area of the well opening.

B. Operational Restrictions

1. None

C. Monitoring and/or Record Keeping Requirements

1. The seal and seal fabric shall be inspected annually for visible holes, tears, or other openings.

2. The secondary seal gap shall be measured annually in accordance with the method specified in paragraph (I) of OAC rule 3745-21-10.
 3. The primary seal gap shall be measured at least once every 5 years, in accordance with the method specified in paragraph (I) of OAC rule 3745-21-10.
 4. The permittee shall maintain records of the following information:
 - a. the dates and results of any seal and seal fabric inspections and any seal gap measurements;
 - b. the types of petroleum liquids stored in the tank;
 - c. the annual throughput of any petroleum liquid stored in the tank, in gallons; and
 - d. the maximum true vapor pressure (in pounds per square inch absolute), as stored, of each liquid that has a maximum true vapor pressure greater than 1.0 pound per square inch absolute.
 5. The permittee shall collect and record the annual OC emissions, in tons, for this emissions unit.
- D. Reporting Requirements**
1. The permittee shall notify the Hamilton County Department of Environmental Services within 30 days of any seal and seal fabric inspection or any seal gap measurement which documents a violation of the applicable control equipment requirements. The notification shall also describe the corrective actions which have been or will be taken to achieve compliance.
 2. The permittee shall submit annual reports that summarize the actual annual VOC emissions, in tons, from this emissions unit. These reports shall be submitted by January 31 of each year and cover the previous calendar year.
- E. Testing Requirements**
1. OC Emission Limitation: 14 TPY of OC

Applicable Compliance Method: Compliance with the OC emissions limitation shall be determined by using the emission factors furnished in the permit to install (PTI) application (PTI-768) submitted by the permittee and the record keeping performed in Section C.4.c.
 2. Compliance with the secondary and primary seal gap area limitations specified in Section A.2.a shall be determined by the measurements performed pursuant to Sections C.2 and C.3.
- F. Miscellaneous Requirements**
1. Material Change Notification

Should the permittee wish to store a material other than gasoline or light hydrocarbons in this emissions unit, the Hamilton County Department of Environmental Services shall be notified in writing at least 15 days prior to the change.

If, in the opinion of the Hamilton County Department of Environmental Services, the material proposed to be stored in this emissions unit will emit a toxic air contaminant, the permittee shall obtain a PTI before the material can be stored in this emissions unit.
