

Facility ID: 1431113998 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 1431113998 Emissions Unit ID: F003 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Aggregate processing	OAC rule 3745-31-05 (PTI 14-4513)	20.87 LBS/HR PM 15.65 TPY PM 10.44 LBS/HR PM10 7.83 TPY PM10 See A.2.

The above hourly emission limitations are based upon the emissions unit's potential to emit. Therefore, no hourly records are required to demonstrate compliance with these limits.

40 CFR, Part 60, Subpart OOO

Same as or less stringent than the visible emission limitation established pursuant to OAC rule 3745-31-05

OAC rule 3745-17-07(B)(1)

Because this unit is not located in an area specified in Appendix A of this rule, it is exempt from the regulations of this rule.

OAC rule 3745-17-08(B)

Because this unit is not located in an area specified in Appendix A of this rule, it is exempt from the regulations of this rule.

2. Additional Terms and Conditions

- (a) Visible particulate emissions of fugitive dust from transfer points and screening and conveying operations shall not exceed 10% opacity.
Visible particulate emissions of fugitive dust from crushing operations shall not exceed 15% opacity.
Except as otherwise specified by terms and conditions A.2.a. and A.2.b., visible particulate emissions of fugitive dust shall not exceed 20% percent opacity, as a three-minute average.

B. Operational Restrictions

1. The maximum hourly and annual production rate for emissions units F002, aggregate storage piles, and F003, aggregate processing, shall not exceed 400 tons per hour and 600,000 tons per year.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall maintain monthly records which document the total amount of aggregate processed through emissions units F002 and F003.

D. Reporting Requirements

1. The permittee shall submit annual reports which specify the total PM and PM10 emissions for the previous calendar year. These reports shall be submitted by January 30 of each year.
2. The permittee shall submit annual reports that identify any exceedances of the annual production rate limitation, as well as any corrective actions that were taken to achieve compliance. These reports shall be submitted by January 30 of each year.

E. Testing Requirements

1. Compliance with the visible emission limitations in terms and conditions A.2.b. and A.2.c. shall be determined in

accordance with Test Method 9 as set forth in "Appendix on Test Methods" in 40 CFR, Part 60, Appendix A ("Standards of Performance for New Stationary Sources"), except that an averaging time of three minutes shall be used.

2. Compliance with the annual production limitation given in Section B shall be determined by the records maintained pursuant to Section C.1.
3. Compliance with the PM and PM10 emission limitations specified in this permit shall be determined by the emission factors and the operational parameters specified in the PTO application submitted on September 5, 1997.

F. **Miscellaneous Requirements**

1. None
