

Facility ID: 1431283324 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
sawdust unloading	OAC rule 3745-31-05 (PTI 14-4778)	1.20 lbs/hour particulate matter (PM) 2.50 TPY PM 0.38 lb/hour PM10 0.80 TPY PM10

See A.2.

2. Additional Terms and Conditions

- (a) Visible fugitive particulate emissions from emissions unit F001 shall not exceed 20 percent opacity, as a three-minute average.
The permittee shall minimize to the extent possible the drop height of the unloading operation in order to minimize or eliminate visible emissions of fugitive dust pursuant to the best available technology requirement of OAC rule 3745-31-05.
The hourly PM/PM10 emission limitations outlined in A.1. are based upon the emissions unit's potential to emit. Therefore, no hourly records are required to demonstrate compliance with these limits.

B. Operational Restrictions

1. The maximum amount of sawdust unloaded in this emissions unit shall not exceed 2500 tons per year.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall maintain monthly records of the amount of sawdust unloaded, in tons, in this emissions unit.

D. Reporting Requirements

1. The permittee shall submit annual reports that identify any exceedances of the restriction on annual sawdust unloaded, as well as the corrective actions that were taken to achieve compliance. These reports shall be submitted by January 31 of each year, covering the previous calendar year.

E. Testing Requirements

1. Compliance with the annual PM/PM10 emission limitations in these terms and conditions shall be determined by the required record keeping specified in term and condition (T&C) C.1., and shall be the sum of the monthly amounts of sawdust unloaded for the calendar year, in tons, multiplied by an emission factor of 2 lbs PM/ton of sawdust (or 0.64 lb PM10/ton of sawdust), and divided by 2000 lbs/ton.
2. Compliance with the restriction on the amount of sawdust unloaded in T&C B.1. shall be determined by the record keeping in T&C C.1.
3. Compliance with the visible emissions limitation shall be determined in accordance with Test Method 9 as set forth in "Appendix on Test Methods" in 40 CFR, Part 60 ("Standards of Performance for New Stationary Sources"), except that an averaging time of three minutes shall be used.

F. Miscellaneous Requirements

1. None
