

Facility ID: 1677010106 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 1677010106 Emissions Unit ID: N005 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
human crematory-natural gas-fired, multiple chamber incinerator (primary chamber burner heat input @ 0.7 million Btu/hr and secondary chamber burner heat input @ 1.2 million Btu/hr), batch charging, maximum rated charging capacity 200 lbs/hr, burning Types 0 and 4 waste	OAC rule 3745-31-05 (PTI 16-1851)	1% opacity as a 6-minute average from any stack (except during startup)
	OAC rule 3745-17-09	0.10 pound of particulate emissions/100 pounds of waste charged
	OAC rule 3745-17-07(B)	See A.2.b below.

2. **Additional Terms and Conditions**
 - (a) The permittee shall properly operate and maintain the emissions unit covered under this permit in accordance with the manufacturer's recommendations, instructions, and operating manuals. The visible particulate emission limitation required by OAC rule 3745-17-07(B) is less stringent than the visible particulate emission limitation established pursuant to the best available technology requirements specified in OAC rule 3745-31-05.

B. Operational Restrictions

1. The permittee shall employ only natural gas as fuel in this emissions unit.
2. The permittee shall only burn Type 4 (human remains) and associated Type 0 (paper/wood products) waste in this emissions unit. The paper products must be free from all plastics and all other foreign materials, and the wood products must not be preservative-treated wood and also must not contain any foreign materials.
3. This batch incinerator (fully loaded while cold and never opened until the burn cycle is complete) shall incorporate a lockout system, which will prevent the ignition of waste until the exhaust gas temperature of the secondary combustion chamber reaches 1600 degrees Fahrenheit.
4. The secondary combustion chamber shall be maintained at a minimum exhaust gas temperature of 1600 degrees Fahrenheit until the wastes are completely combusted and the burn-down cycle is complete.

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall operate and maintain a continuous temperature monitor and recorder which measures and records the temperature of the exhaust gases from the secondary combustion chamber when the emissions unit is in operation. Units shall be in degrees Fahrenheit. The monitoring and recording devices shall be capable of accurately measuring the temperature. The temperature monitor and recorder shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, with any modifications deemed necessary by the permittee.
2. The permittee shall collect and record the following information for each day the emissions unit is in operation:
 - a. a log of the downtime for the temperature monitoring and/or recording equipment, when the associated emissions unit was in operation; and
 - b. all periods of time during which the temperature of the exhaust gases from the incinerator, when the emissions

unit was in operation, was below the minimum secondary combustion chamber exhaust gas temperature of 1600 degrees Fahrenheit as specified above.

D. Reporting Requirements

1. The permittee shall submit quarterly temperature deviation (excursion) reports that identify all periods of time (except momentary excursions) during which the temperature of the exhaust gases from the secondary combustion chamber does not comply with the temperature limitation specified in section B.4 of these terms and conditions.

E. Testing Requirements

1. Compliance with the emission limitations in section A.1 of these terms and conditions shall be determined in accordance with the following methods:
Emissions Limitation:

0.10 pound of particulate emissions/100 pounds of waste charged

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance based upon the methods and procedures specified in 40 CFR Part 60, Appendix A, Method 5.

Emissions Limitation:

1% opacity as a 6-minute average, except during startup

Applicable Compliance Method:

Compliance shall be demonstrated based upon the procedures specified in 40 CFR Part 60, Appendix A, Method 9.

F. Miscellaneous Requirements

1. None
