

Facility ID: 1677010196 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Applied polymerization laboratory - 1, 2 and 10-gallon reactors; 30 and 80-gallon strippers, drying ovens, tanks, and feed preparation columns.	PTI #16-1628 OAC 3745-21-07 (G)	4.0 pounds per hour of 1,3 - butadiene See A.2.a below. 8.0 pounds per hour of organic materials 40.0 pounds per day of organic materials See A.2.b below.

2. **Additional Terms and Conditions**
 - (a) The 1,3 butadiene emissions are included in the organic materials allowable mass emission rates. The organic materials emission limitations shall apply unless the organic materials emissions have been reduced by at least 85%.

B. Operational Restrictions

1. None

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall perform calculations, using a mass balance approach, which document the estimated organic material and 1,3 - butadiene emissions rates under "worst case" conditions (reactions fail in all reactors simultaneously, and all unreacted material is stripped in a half day) and demonstrate that under "worst case" conditions the organic material and 1,3 - butadiene emissions are in compliance with allowable emission requirements.
2. The permittee shall document and maintain records showing that the emissions unit did not exceed "worst case" conditions for each operating day.
3. The permittee shall document and keep on file any changes in the "worst case" conditions for the emissions unit.

D. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports which include the following information:
 - a. any exceedance of the 1,3 - butadiene hourly mass emission limitation; and
 - b. any exceedance of both the hourly and daily organic materials emission limitation in which the emissions were not reduced by at least 85%.

These reports shall be submitted within 45 days after the exceedance occurs.

E. Testing Requirements

1. Compliance with the emission limitations in Section A.1 of these terms and conditions shall be determined in accordance with the following method:
Emission Limitations:

8.0 pounds per hour of organic materials (unless reduced by at least 85%)
40 pounds per day of organic materials (unless reduced by at least 85%)
4.0 pounds per hour of 1,3 - butadiene

Applicable Compliance Method:

The permittee shall perform calculations, using a mass balance approach, which document the estimated organic compound and 1,3 - butadiene emission rates under "worst case" conditions (reactions fail in all reactors simultaneously, and all unreacted material is stripped in a half day) and demonstrate that under "worst case" conditions the organic compound and 1,3 - butadiene emissions are in compliance with allowable emission requirements.

F. **Miscellaneous Requirements**

1. The permittee requests that all calculations and records relating to emissions unit operations and conditions be afforded trade secret protection as specified in OAC 3745-49-03(A) and OAC 3745-49-031(C) and (D).
