Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit comments on the permit. A public notice will appear in the Ohio EPA Weekly Review and the local newspaper, Medina County Gazette. A copy of the public notice and the draft permit are enclosed. This permit has been posted to the Division of Air Pollution Control Web page <http://www.epa.state.oh.us/dapc> in Microsoft Word and Adobe Acrobat format. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall
Permit Review/Development Section
Ohio EPA, DAPC
122 South Front Street
Columbus, Ohio 43215

and Akron Regional Air Quality Management District
146 South High Street, Room 904
Akron, OH 44308

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified in writing if a public hearing is scheduled. A decision on issuing a final permit-to-install and operate will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install and Operate is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Akron Regional Air Quality Management District at (330)375-2480.

Sincerely,

Michael W. Ahern, Manager

PUBLIC NOTICE
Issuance of Draft Air Pollution Permit-To-Install and Operate
Adhesive Coatings and Laminations Inc

Issue Date: 9/22/2008
Permit Number: 16-02539
Permit Type: Initial Installation
Permit Description: Roll Coater, Two Gas Ovens.
Facility ID: 1652010058
Facility Location: Adhesive Coatings and Laminations Inc
1270 W 130th St Unit 404,
Brunswick, OH 44212
Facility Description: Coated and Laminated Paper Manufacturing

Chris Korleski, Director of the Ohio Environmental Protection Agency, 50 West Town Street, Columbus Ohio has issued a draft action of an air pollution control, federally enforceable permit-to-install and operate (PTIO) for the facility at the location identified above on the date indicated. Comments concerning this draft action, or a request for a public meeting, must be sent in writing no later than thirty (30) days from the date this notice is published. All comments, questions, requests for permit applications or other pertinent documentation, and correspondence concerning this action must be directed to Frank Markunas at Akron Regional Air Quality Management District, 146 South High Street, Room 904 or (330)375-2480. The permit can be downloaded from the Web page: www.epa.state.oh.us/dapc

Permit Strategy Write-Up

1. Check all that apply:

Synthetic Minor Determination

Netting Determination

2. Source Description:

a. Adhesive Coatings and Laminations (ADCAL) is a roll coating operation located in Medina County. Consisting of a roll coater and two natural gas drying ovens. The coater can coat paper, fabric or vinyl roll material.

3. Facility Emissions and Attainment Status:

a. ADCAL has the potential to emit is over 133.5 tons of Volatile Organic Compounds (VOC) per year, based on calculations using coating formulation data and operating rates. The facility also has the potential to emit over 18.5 tons of the HAP toluene per year. All other air pollutants are below Title V thresholds. Summit County is nonattainment for ozone, and fine particulate PM2.5.

4. Source Emissions:

a. This permit will limit the facility-wide VOC and Toluene emissions to 47.7 and 7.2 tons per rolling 12-month period respectively. These limitations allow ADCAL to avoid Title V permitting and the requirements of 40 CFR 63 subpart JJJJ. The permittee has agreed to restrict operating hours of the emission unit to a maximum of 3,133 hours per rolling twelve month period. Compliance with these restrictions will be demonstrated through record keeping over a rolling twelve month period.

5. Conclusion:

a. By establishing operational restrictions on operating hours ADCAL will limit VOC and toluene emissions under the Title V thresholds. The record keeping and reporting requirements will ensure that the facility is in compliance with the emission limitations and operational restrictions.

6. Please provide additional notes or comments as necessary:

a. Toluene emissions were further restricted under OAC 3745-114-01 to 33.9 pounds per day or 6.2 tons per year to comply with the air toxic modeling rule.

7. Total Permit Allowable Emissions Summary (for informational purposes only):

| <u>Pollutant</u> | <u>Tons Per Year</u> |
|------------------|----------------------|
| <u>VOC</u> | <u>47.7</u> |
| <u>Toluene</u> | <u>6.2</u> |

Application Number(s): A0011886
Permit Number: 16-02539
Permit Description: Roll Coater, Two Gas Ovens.
Permit Type: Initial Installation
Permit Fee: \$200.00 *DO NOT send payment at this time - subject to change before final issuance*
Issue Date: 9/22/2008
Effective Date: To be entered upon final issuance
Expiration Date: To be entered upon final issuance
Permit Evaluation Report (PER) Annual Date: To be entered upon final issuance

This document constitutes issuance to:

Adhesive Coatings and Laminations Inc
1270 W 130th St Unit 404
Brunswick, OH 44212

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Akron Regional Air Quality Management District
146 South High Street, Room 904
Akron, OH 44308
(330)375-2480

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski

Draft Permit-to-Install and Operate

Permit Number: 16-02539

Facility ID: 1652010058

Effective Date: To be entered upon final issuance

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Akron Regional Air Quality Management District in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

State of Ohio Environmental Protection Agency
Division of Air Pollution Control

Draft Permit-to-Install and Operate

Permit Number: 16-02539

Facility ID: 1652010058

Effective Date: To be entered upon final issuance

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Division of Air Pollution Control

Draft Permit-to-Install and Operate

Permit Number: 16-02539

Facility ID: 1652010058

Effective Date: To be entered upon final issuance

C. Emissions Unit Terms and Conditions

1. K001, Roll Coater

Operations, Property and/or Equipment Description:

Roll coater with two natural gas dryers

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. b)(2)b, d)(4),(5), and (6) and e)(2).

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

| | Applicable Rules/Requirements | Applicable Emissions Limitations/Control Measures |
|----|--|---|
| a. | OAC rule 3745-31-05(A)(3) | Organic compound (OC) emissions shall not exceed 63.5 lbs/hour and 99.9 tons per year. 33.9 lbs toluene/day [see b)(2)] Volatile organic compound (VOC) emissions shall not exceed 30.5 lbs/hour. |
| b. | OAC rule 3745-21-09(F) (when coating paper) | The VOC content of the coatings employed shall not exceed 2.9 lbs per gallon, as applied, excluding water and exempt solvents. |
| c. | OAC rule 3745-21-09(G) (when coating fabrics) | The VOC content of the coatings employed shall not exceed 2.9 lbs per gallon, as applied, excluding water and exempt solvents. |
| d. | OAC rule 3745-21-09(H) | The VOC content of the coatings employed shall not exceed 4.8 lbs per |

| | Applicable Rules/Requirements | Applicable Emissions Limitations/Control Measures |
|----|--|---|
| | (when coating vinyl) | gallon, as applied, excluding water and exempt solvents. |
| e. | OAC rule 3745-31-05(D) [federally enforceable restrictions to avoid Title V and 40 CFR 63 (JJJJ)] | Annual hours of operation shall not exceed 3,133 hours based on a rolling 12-month summation of the operating hours, when employing coating containing any VOC. The VOC emissions shall not exceed 47.8 tons per rolling, 12-month period. |
| f. | OAC rule 3745-114-01 ORC 3704.03(F) | See d)(4),(5), and (6) and e)(2). |

(2) Additional Terms and Conditions

- a. The permittee shall not employ any cleanup solvents that contain any photochemically reactive material, as defined in OAC rule 3745-21-01(C)(5), in this emissions unit.

[The hourly OC emission limitation represents the emissions unit's potential to emit. Therefore, no monitoring, record keeping, and/or reporting requirements are necessary to ensure compliance with this limitation.]

- b. In order to demonstrate compliance with the AToxic Air Contaminant Statute, the Director has established, per ORC 3704.03(F)(4)(c), a limit for toluene, which shall not exceed 33.9 pounds per day. This daily allowable emissions rate was calculated by multiplying the approved daily operating schedule submitted in the permit application, by the emission rate modeled (to determine the ground level concentration).

c) Operational Restrictions

- (1) The maximum annual operating hours for this emissions unit shall not exceed 3,133, based upon a rolling, 12-month summation of the monthly operating hours.

To ensure enforceability during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall not exceed the operating hours levels specified in the following table:

| <u>Month(s)</u> | <u>Maximum Allowable Cumulative Operating Hours</u> |
|-----------------|---|
| 1 | 376 |
| 1-2 | 752 |
| 1-3 | 1128 |
| 1-4 | 1504 |
| 1-5 | 1880 |
| 1-6 | 2256 |
| 1-7 | 2632 |

| | |
|------|------|
| 1-8 | 3008 |
| 1-9 | 3133 |
| 1-10 | 3133 |
| 1-11 | 3133 |
| 1-12 | 3133 |

After the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, compliance with the annual operating hours restriction shall be based upon a rolling, 12-month summation of the monthly operating hours.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall collect and record the following information each day for the coating line for each substrate coated on that day:
 - a. The type of substrate coated (i.e. fabric, paper or vinyl).
 - b. The name and identification number of each coating employed.
 - c. The VOC and toluene contents (excluding water and exempt solvents) of each coating, as applied.
 - d. The number of gallons (excluding water and exempt solvents) of each coating, as applied.
 - e. The calculated daily total VOC emissions from all the coatings employed, in pounds.
 - f. The calculated daily total toluene emissions from all the coatings employed, in pounds.
 - g. The total number of hours this emissions unit was in operation.
 - h. The average hourly VOC emissions from all coatings employed, in pounds [i.e., the quotient of d)(1)e divided by d)(1)g].
- (2) The permittee shall collect and record the following information each month for this emissions unit:
 - a. The company identification of each cleanup material employed.
 - b. The number of gallons of each cleanup material employed.
 - c. The VOC content of each cleanup material employed, in pounds per gallon.
 - d. The total VOC emissions from all the cleanup materials employed, in pounds [i.e., the sum of d) (2) b. times d) (2) c. for each cleanup material employed].
 - e. The amount of cleanup materials recovered, in pounds.
 - f. The total monthly VOC emissions from cleanup operations, in pounds [i.e., d)(2)d. – d)(2)e.].

- (3) The permittee shall record and maintain each month the following information for this emissions unit:
 - a. the number of operating hours;
 - b. during the first 12 months of operation following the issuance of this permit, the monthly cumulative numbers of hours of operation;
 - c. beginning after the first 12 calendar months of operation, the rolling, 12-month summation of the monthly operating hours;
 - d. the total VOC emissions [i.e., the sum of the daily VOC emission rates from the coating materials (from in d)(2) for the calendar month plus the sum of the monthly emissions from cleanup materials (from d)(3)) for the month]; and
 - e. the rolling, 12-month VOC emissions, in tons.

- (4) The federally enforceable permit-to-install and operate (FEPTIO) application for this emissions unit **K001** was evaluated based on the actual materials and the design parameters of the emissions unit's(s') exhaust system, as specified by the permittee. The ΔToxic Air Contaminant Statute, ORC 3704.03(F), was applied to this/these emissions unit(s) for each toxic air contaminant listed in OAC rule 3745-114-01, using data from the permit application; and modeling was performed for each toxic air contaminant(s) emitted using an air dispersion model such as SCREEN3, AERMOD, or ISCST3, or other Ohio EPA approved model. The predicted 1-hour maximum ground-level concentration result(s) from the approved air dispersion model, was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC), calculated as described in the Ohio EPA guidance document entitled ΔReview of New Sources of Air Toxic Emissions, Option A, as follows:
 - a. the exposure limit, expressed as a time-weighted average concentration for a conventional 8-hour workday and a 40-hour workweek, for each toxic compound(s) emitted from the emissions unit(s), (as determined from the raw materials processed and/or coatings or other materials applied) has been documented from one of the following sources and in the following order of preference (TLV was and shall be used, if the chemical is listed):
 - i. threshold limit value (TLV) from the American Conference of Governmental Industrial Hygienists= (ACGIH) ΔThreshold Limit Values for Chemical Substances and Physical Agents Biological Exposure Indices; or
 - ii. STEL (short term exposure limit) or the ceiling value from the American Conference of Governmental Industrial Hygienists= (ACGIH) ΔThreshold Limit Values for Chemical Substances and Physical Agents Biological Exposure Indices; the STEL or ceiling value is multiplied by 0.737 to convert the 15-minute exposure limit to an equivalent 8-hour TLV.
 - b. The TLV is divided by ten to adjust the standard from the working population to the general public (TLV/10).

- c. This standard is/was then adjusted to account for the duration of the exposure or the operating hours of the emissions unit(s), i.e., **8** hours per day and **6** days per week, from that of 8 hours per day and 5 days per week. The resulting calculation was (and shall be) used to determine the Maximum Acceptable Ground-Level Concentration (MAGLC):

$$TLV/10 \times 8/X \times 5/Y = 4 TLV/XY = MAGLC$$

- d. The following summarizes the results of dispersion modeling for the significant toxic contaminants or **worst case** toxic contaminant(s):

Toxic Contaminant: Toluene w/ option* to list all toxics, covered under the worst-case toxic modeled.

TLV (mg/m3): 75.4 (Toluene)

Maximum Hourly Emission Rate (lbs/hr): 4.24

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 6,045

MAGLC (ug/m3): **6,283**

The permittee, having demonstrated that emissions of Toluene, from emissions unit(s) K001, is estimated to be equal or greater than eighty per cent, but less than 100 per cent of the maximum acceptable ground level concentration (MAGLC), shall not operate the emissions unit(s) at a rate that would exceed the daily emissions rate, process weight rate, and/or restricted hours of operations, as allowed in this permit; and any new raw material or processing agent shall not be applied without evaluating each component toxic air contaminant in accordance with the **Toxic Air Contaminant Statute**, ORC 3704.03(F).

- (5) Prior to making any physical changes to or changes in the method of operation of the emissions unit(s), that could impact the parameters or values that were used in the predicted 1-hour maximum ground-level concentration, the permittee shall re-model the change(s) to demonstrate that the MAGLC has not been exceeded. Changes that can affect the parameters/values used in determining the 1-hour maximum ground-level concentration include, but are not limited to, the following:
 - a. changes in the composition of the materials used or the use of new materials, that would result in the emission of a new toxic air contaminant with a lower Threshold Limit Value (TLV) than the lowest TLV previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any toxic air contaminant listed in OAC rule 3745-114-01, that was modeled from the initial (or last) application; and
 - c. physical changes to the emissions unit(s) or its/their exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the **Toxic Air Contaminant Statute**, ORC 3704.03(F), will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to

be a "modification" under OAC rule 3745-31-01 solely due to a non-restrictive change to a parameter or process operation, where compliance with the AToxic Air Contaminant Statute[®], ORC 3704.03(F), has been documented. If the change(s) meet(s) the definition of a "modification", the permittee shall apply for and obtain a final PTI, PTIO, or FEPTIO (as applicable) prior to the change. The Director may consider any significant departure from the operations of the emissions unit, described in the permit application, as a modification that results in greater emissions than the emissions rate modeled to determine the ground level concentration; and he/she may require the permittee to submit a permit application for the increased emissions.

(6) The permittee shall collect, record, and retain the following information for each toxic evaluation conducted to determine compliance with the AToxic Air Contaminant Statute[®]:

- a. a description of the parameters/values used in each compliance demonstration and the parameters or values changed for any re-evaluation of the toxic(s) modeled (the composition of materials, new toxic contaminants emitted, change in stack/exhaust parameters, etc.);
- b. the Maximum Acceptable Ground-Level Concentration (MAGLC) for each significant toxic contaminant or worst-case contaminant, calculated in accordance with the AToxic Air Contaminant Statute[®], ORC 3704.03(F);
- c. a copy of the computer model run(s), that established the predicted 1-hour maximum ground-level concentration that demonstrated the emissions unit(s) to be in compliance with the AToxic Air Contaminant Statute[®], ORC 3704.03(F), initially and for each change that requires re-evaluation of the toxic air contaminant emissions; and
- d. the documentation of the initial evaluation of compliance with the AToxic Air Contaminant Statute[®], ORC 3704.03(F), and documentation of any determination that was conducted to re-evaluate compliance due to a change made to the emissions unit(s) or the materials applied.

e) Reporting Requirements

(1) The permittee shall submit quarterly deviation (excursion) reports, in accordance with the Standard Terms and Conditions of this permit, that identify the following information:

- a. all exceedances of the rolling, 12-month VOC emission limitation ; and
- b. all exceedances of the rolling, 12-month restriction on the numbers of hours of operation.

(2) The permittee shall submit quarterly deviation reports, to the appropriate Ohio EPA District Office or local air agency, documenting any exceedance of the daily limitation on toxic air emissions or any deviation from a restriction on the process or hours of operation, as established by the Director in order to maintain any toxic air contaminant below its MAGLC. The permittee shall also report any changes made, during the calendar quarter, to a parameter or value entered into the dispersion model that demonstrate compliance with the AToxic Air Contaminant Statute[®], ORC 3704.03(F).

These quarterly reports shall be submitted by April 30, July 31, October 31, and January 31, and shall cover the records for the previous calendar quarters.

- (3) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the director by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve-months for each air contaminant source identified in this permit.

f) Testing Requirements

- (1) Compliance with the emission limitations in section 1.b)1. of these terms and conditions shall be determined in accordance with the following methods:

a. Emission Limitations:

Emissions of VOC resulting from the coating of paper and fabric substrates shall not exceed 2.9 lbs per gallon, as applied, excluding water and exempt solvents.

Emissions of VOC resulting from the coating of vinyl substrates shall not exceed 4.8 lbs per gallon, as applied, excluding water and exempt solvents.

Applicable Compliance Method:

Compliance with the VOC emission limitations above shall be based upon the record keeping requirements specified in d)(1) of this permit.

b. Operational Restriction:

The maximum annual number of hours of operation shall not exceed 3,133 per rolling, 12-month summation of the monthly numbers of hours of operation.

Applicable Compliance Method:

Compliance with the operational restriction above shall be based upon the record keeping requirements specified in d)(3) of this permit.

c. Emission Limitation:

47.9 tons VOC per rolling, 12-month summation

Applicable Compliance Method:

Compliance with the VOC emission limitation above shall be based upon the record keeping requirements specified in d)(3) of this permit.

d. Emission Limitations:

OC emissions shall not exceed 63.5 lbs/hour, or 99.9 tons OC per year.

Applicable Compliance Method:

Compliance with the hourly OC emission limitation shall be determined by multiplying the maximum OC content of all the coatings by the maximum hourly number of gallons of coatings employed.

The annual OC limitation was established by multiplying the hourly limitation by the annual restriction on the number of hours. Therefore, as long as compliance with the hourly limitation and the annual restriction on the number of hours of operation is maintained, compliance with the annual limitation shall be assumed.

If required, compliance with the hourly allowable OC emission limitation shall be demonstrated in accordance with Methods 1- 4, 18, 25, or 25a, as appropriate, of 40 CFR Part 60, Appendix A.

e. Emission Limitations:

toluene emissions shall not exceed 33.9 pounds per day.

VOC emissions shall not exceed 30.5 lbs/hour.

Applicable Compliance Method:

Compliance with the allowable emission limitations above shall be based upon the record keeping requirements specified in d)1 of this permit.

If required, compliance with the hourly allowable VOC emission limitation shall be demonstrated in accordance with Methods 1- 4, 18, 25, or 25a, as appropriate, of 40 CFR Part 60, Appendix A.

USEPA Methods 24 and 24A shall be used to determine the VOC contents for (a) coatings and (b) flexographic and rotogravure printing inks and related coatings, respectively. If, pursuant to Method 24 as outlined in 40 CFR Part 60, Appendix A, an owner or operator determines that Method 24 or 24A cannot be used for a particular coating or ink, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating or ink to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24 or 24A.

g) Miscellaneous Requirements

(1) None.
