

Facility ID: 0125232395 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

\*\*\*THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION\*\*\*

Facility ID: 0125232395 Emissions Unit ID: R001 Issuance type: Final State Permit To Operate

**Part II - Special Terms and Conditions**

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
  - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
  - (a) None.

**A. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Forty-inch, six-color non-heatset, sheetfed lithographic printing press with coater	OAC rule 3745-31-05 (PTI 01-7851)	Organic compound emissions shall not exceed 2.31 lbs per hour, 40 lbs per day, and 7.3 tons per year, including cleanup.

See A.2.a. below.

OAC rule 3745-21-07(G)(2)

2. **Additional Terms and Conditions**
  - (a) The organic compound emissions limits established by OAC rule 3745-21-07(G)(2) are less stringent than those established by BAT.

**B. Operational Restrictions**

1. None

**C. Monitoring and/or Record Keeping Requirements**

1. The permittee shall collect and record the following information for each day for the coating operation:
  - a. The company identification for each coating and photochemically reactive cleanup material employed.
  - b. The number of gallons of each coating and photochemically reactive cleanup material employed.
  - c. The organic compound content of each coating and photochemically reactive cleanup material, in pounds per gallon.
  - d. The total organic compound emission rate for all coatings and photochemically reactive cleanup materials, in pounds per day.
  - e. The total number of hours the emissions unit was in operation.
  - f. The average hourly organic compound emission rate for all coatings and photochemically reactive cleanup materials, i.e., (d)/(e), in pounds per hour (average).

[Note: The coating information must be for the coatings as employed, including any thinning solvents added at the emissions unit. Also, the definition of "photochemically reactive material" is based upon OAC rule 3745-21-01(C)(5).]
2. The permittee shall collect and record the following information on a monthly basis for the purpose of determining annual organic compound emissions:
  - a. The company identification for each nonphotochemically reactive cleanup material employed.
  - b. The number of gallons of each nonphotochemically reactive cleanup material employed.
  - c. The organic compound content of each nonphotochemically reactive cleanup material, in pounds per gallon.

d. The total organic compound emission rate for all nonphotochemically reactive cleanup materials, in pounds.

**D. Reporting Requirements**

1. The permittee shall submit deviation (excursion) reports which include the following information:
  - a. An identification of each day during which the average hourly organic compound emissions from the coatings and photochemically reactive cleanup materials exceeded 2.31 pounds per hour, and the actual average hourly organic compound emissions for each such day.
  - b. An identification of each day during which the organic compound emissions from the coatings and photochemically reactive cleanup materials exceeded 40 pounds per day, and the actual organic compound emissions for each such day.
2. The permittee shall also submit annual reports which specify the total organic compound emissions from this emissions unit for the previous calendar year. These reports shall be submitted by January 31 of each year.

**E. Testing Requirements**

1. Compliance with the emission limitation(s) in Section A.I. of these terms and conditions shall be determined in accordance with the following method(s):

Emissions Limitation:

Allowable hourly organic compound emissions from this emissions unit shall not exceed 2.31 lbs OC per hour.

Applicable Compliance Method:

Compliance with the hourly organic compound limit shall be determined through daily record keeping as specified in Section C.1.
2. Emissions Limitation:

Allowable daily organic compound emissions from this emissions unit shall not exceed 40 lbs OC per day.

Applicable Compliance Method:

Compliance with the daily organic compound limit shall be determined through daily record keeping as specified in Section C.1.
3. Emissions Limitation:

Allowable annual organic compound emissions from this emissions unit shall not exceed 7.3 tons OC per year.

Applicable Compliance Method:

Compliance with this annual OC limit shall be determined through daily and monthly recordkeeping as specified in Section C.1 and C.2. Formulation data or USEPA Method 24 shall be used to determine the organic compound contents of the coatings and cleanup materials. Annual emissions shall be calculated by the summation of the daily recordkeeping requirements as specified in Section C.1 and the monthly recordkeeping requirements as specified in C.2.

**F. Miscellaneous Requirements**

1. None
