RE: DRAFT AIR POLLUTION PERMIT-TO-INSTALL AND OPERATE  
Facility ID: 0285030456  
Permit Number: P0104351  
Permit Type: Initial Installation  
County: Wayne

Dear Permit Holder:

A draft of the Ohio Administrative Code (OAC) Chapter 3745-31 Air Pollution Permit-to-Install and Operate for the referenced facility has been issued for the emissions unit(s) listed in the Authorization section of the enclosed draft permit. This draft action is not an authorization to begin construction or modification of your emissions unit(s). The purpose of this draft is to solicit comments on the permit. A public notice will appear in the Ohio EPA Weekly Review and the local newspaper, The Daily Recorder. A copy of the public notice and the draft permit are enclosed. This permit has been posted to the Division of Air Pollution Control Web page <http://www.epa.state.oh.us/dapc> in Microsoft Word and Adobe Acrobat format. Comments will be accepted as a marked-up copy of the draft permit or in narrative format. Any comments must be sent to the following:

Andrew Hall  
Permit Review/Development Section  
Ohio EPA, DAPC  
122 South Front Street  
Columbus, Ohio 43215

and Ohio EPA DAPC, Northeast District Office  
2110 East Aurora Road  
Twinsburg, OH 43087

Comments and/or a request for a public hearing will be accepted within 30 days of the date the notice is published in the newspaper. You will be notified in writing if a public hearing is scheduled. A decision on issuing a final permit-to-install and operate will be made after consideration of comments received and oral testimony if a public hearing is conducted. Any permit fee that will be due upon issuance of a final Permit-to-Install and Operate is indicated in the Authorization section. Please do not submit any payment now. If you have any questions, please contact Ohio EPA DAPC, Northeast District Office at (330)425-9171.

Sincerely,

Michael W. Ahern, Manager  
Permit Issuance and Data Management Section, DAPC

Cc: U.S. EPA Region 5 *Via E-Mail Notification*  
Ohio EPA-NEDO; Canada

## Permit Strategy Write-Up

1. Check all that apply:

Synthetic Minor Determination

Netting Determination

2. Source Description:

Wooster Tool & Supply Company is a manufacturer of oil and gas separators, gas production units and oil and gas drips. NAICS 333132 Oil and Gas Field Machinery and Equipment Manufacturing. The facility currently includes two manual metal part coating operations previously permitted in a state only permit-to-install.

This permit-to-install and operate (PTIO) is for a new manual metal coating booth, K003. The PTIO also contains federally enforceable limits on the three coating operations in order to limit the potential HAP emissions below the Title V and MACT emission thresholds.

3. Facility Emissions and Attainment Status:

The facility is located in Wayne County, which is unclassified for all criteria air pollutants. Actual facility emissions were between 1 and 10 tons per year in previous years prior to the proposed installation.

4. Source Emissions:

K001 is a coating operation to finish metal oil and gas field machinery and equipment including a coating booth with dry overspray filters and one manual, airless spray gun. Parts are manually moved and air dried.

K002 is a manual coating operation to finish metal oil and gas field machinery and equipment. Parts are manually moved and air dried.

K003 is a coating operation to finish metal oil and gas field machinery and equipment including a coating booth with dry overspray filters and two manual, airless spray gun. Parts are manually moved and air dried. Unit not yet installed.

The potential single HAP emissions from a three emissions units combined is greater than 10 tons per year.

5. Conclusion:

The permit includes federally enforceable limits on the coating usage and the clean-up material usage per rolling, 12-month period and includes limits on the single HAP content of both coatings and clean-up materials. The limitations and the associated monthly recordkeeping and quarterly deviation reporting requirements sufficiently limit the potential-to-emit for any one single HAP below the Title V and MACT threshold of 10 tons per year.

6. Please provide additional notes or comments as necessary:

- BAT is applicable to VOC emission: emissions greater than 10 tons per year.
- OAC rule 17-11(C) is not currently applicable to emissions unit K003 because airless spray guns are currently used. Because guns can be changed out easily, the requirement of this rule are being included.
- 40 CFR 63, Subpart XXXXXX, Area Source Standards for Nine Metal Fabrication and Finishing Source Categories. Source is an affected facility but currently does not employ coatings that contain any MFHAP. Requirement was included in the permit to determine if any new coating contains a MFHAP

prior to employing the coating and, if so, apply for a permit to include the requirements of this rule.

- K003 will use compliant coatings according to OAC rule 3745-21-09(U) – 3.5 # VOC/gal
- PER reporting is included

Fee: K003 new installation \$200- PWR 0-1000 lbs/hr

7. Total Permit Allowable Emissions Summary (for informational purposes only):

<u>Pollutant</u>	<u>Tons Per Year</u>
<u>VOC</u>	<u>XXXX</u>

PUBLIC NOTICE  
Issuance of Draft Air Pollution Permit-To-Install and Operate  
Wooster Tool and Supply Co.

Issue Date: 1/27/2009  
Permit Number: P0104351  
Permit Type: Initial Installation  
Permit Description: Federally enforceable PTIO for the installation of a metal coating operation  
Facility ID: 0285030456  
Facility Location: Wooster Tool and Supply Co.  
899 Venture Blvd.,  
Wooster, OH 44691  
Facility Description: Oil and Gas Field Machinery and Equipment Manufacturing

Chris Korleski, Director of the Ohio Environmental Protection Agency, 50 West Town Street, Columbus Ohio has issued a draft action of an air pollution control, federally enforceable permit-to-install and operate (PTIO) for the facility at the location identified above on the date indicated. Comments concerning this draft action, or a request for a public meeting, must be sent in writing no later than thirty (30) days from the date this notice is published. All comments, questions, requests for permit applications or other pertinent documentation, and correspondence concerning this action must be directed to Amysue O'Reilly at Ohio EPA DAPC, Northeast District Office, 2110 East Aurora Road or (330)425-9171. The permit can be downloaded from the Web page: [www.epa.state.oh.us/dapc](http://www.epa.state.oh.us/dapc)

# Authorization

Facility ID: 0285030456  
Application Number(s): A0036734  
Permit Number: P0104351  
Permit Description: Federally enforceable PTIO for the installation of a metal coating operation  
Permit Type: Initial Installation  
Permit Fee: \$200.00 *DO NOT send payment at this time - subject to change before final issuance*  
Issue Date: 1/27/2009  
Effective Date: To be entered upon final issuance  
Expiration Date: To be entered upon final issuance  
Permit Evaluation Report (PER) Annual Date: To be entered upon final issuance

This document constitutes issuance to:

Wooster Tool and Supply Co.  
899 Venture Blvd.  
Wooster, OH 44691

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Northeast District Office  
2110 East Aurora Road  
Twinsburg, OH 43087  
(330)425-9171

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and Federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski  
Director

## Authorization (continued)

Permit Number: P0104351

Permit Description: Federally enforceable PTIO for the installation of a metal coating operation

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

<b>Emissions Unit ID:</b>	<b>K003</b>
Company Equipment ID:	Paint Booth 02
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Draft Permit-to-Install and Operate**

**Permit Number:** P0104351

**Facility ID:** 0285030456

**Effective Date:** To be entered upon final issuance

## **A. Standard Terms and Conditions**

**1. What does this permit-to-install and operate ("PTIO") allow me to do?**

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

**2. Who is responsible for complying with this permit?**

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

**3. What records must I keep under this permit?**

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

**4. What are my permit fees and when do I pay them?**

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

**5. When does my PTIO expire, and when do I need to submit my renewal application?**

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

**6. What happens to this permit if my project is delayed or I do not install or modify my source?**

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

**7. What reports must I submit under this permit?**

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

**8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?**

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

**9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?**

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

**10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?**

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Ohio EPA DAPC, Northeast District Office in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

**11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?**

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

**12. What happens if one or more emissions units operated under this permit is/are shut down permanently?**

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

**13. Can I transfer this permit to a new owner or operator?**

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Draft Permit-to-Install and Operate**

**Permit Number:** P0104351

**Facility ID:** 0285030456

**Effective Date:** To be entered upon final issuance

**14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?**

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

**15. What happens if a portion of this permit is determined to be invalid?**

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Draft Permit-to-Install and Operate**

**Permit Number:** P0104351

**Facility ID:** 0285030456

**Effective Date:** To be entered upon final issuance

## **B. Facility-Wide Terms and Conditions**

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - (1) Applicable Rules/Requirements  
 ORC 3704.03(F)(3)(c) and F(4)
    - (2) Monitoring Requirements
      - a. The permit-to-install and operate application for these emissions unit(s), all listed air toxic contaminants were evaluated based on the actual materials and the design parameters of the emissions unit's(s') exhaust system, as specified by the permittee. The   Toxic Air Contaminant Statute, ORC 3704.03(F), was applied to this/these emissions unit(s) for each toxic air contaminant listed in OAC rule 3745-114-01, using data from the permit application; and modeling was performed for each toxic air contaminant(s) emitted at over one ton per year using an air dispersion model such as SCREEN3, AERMOD, or ISCST3, or other Ohio EPA approved model. The predicted 1-hour maximum ground-level concentration result(s) from the approved air dispersion model, was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC), calculated as described in the Ohio EPA guidance document entitled   Review of New Sources of Air Toxic Emissions, Option A, as follows:
        - i. the exposure limit, expressed as a time-weighted average concentration for a conventional 8-hour workday and a 40-hour workweek, for each toxic compound(s) emitted from the emissions unit(s), (as determined from the raw materials processed and/or coatings or other materials applied) has been documented from one of the following sources and in the following order of preference (TLV was and shall be used, if the chemical is listed):
          - (a) threshold limit value (TLV) from the American Conference of Governmental Industrial Hygienists= (ACGIH)   Threshold Limit Values for Chemical Substances and Physical Agents Biological Exposure Indices; or
          - (b) STEL (short term exposure limit) or the ceiling value from the American Conference of Governmental Industrial Hygienists= (ACGIH)   Threshold Limit Values for Chemical Substances and Physical Agents Biological Exposure Indices; the STEL or ceiling value is multiplied by 0.737 to convert the 15-minute exposure limit to an equivalent 8-hour TLV.
        - ii. The TLV is divided by ten to adjust the standard from the working population to the general public (TLV/10).

- iii. This standard is/was then adjusted to account for the duration of the exposure or the operating hours of the emissions unit(s), i.e.,  $\Delta X$  hours per day and  $\Delta Y$  days per week, from that of 8 hours per day and 5 days per week. The resulting calculation was (and shall be) used to determine the Maximum Acceptable Ground-Level Concentration (MAGLC):

$$TLV/10 \times 8/X \times 5/Y = 4 TLV/XY = MAGLC$$

- b. The following summarizes the results of dispersion modeling for the significant toxic contaminants (emitted at 1 or more tons/year) or  $\Delta$ worst case $\Delta$  toxic contaminant(s):

Toxic Contaminant: xylene (worst case)

TLV (mg/m<sup>3</sup>): 434

Maximum Hourly Emission Rate (lbs/hr):

2.09 from K001 and K003, combined, and 0.83 from K002,

(0.42 lbs xylene/gal)

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m<sup>3</sup>): 441.6

MAGLC (ug/m<sup>3</sup>): 10,338

The permittee, has demonstrated that emissions of all toxic air contaminants, from emissions unit(s) K001, K002 and K003, are calculated to be less than eighty per cent of the maximum acceptable ground level concentration (MAGLC); any new raw material or processing agent shall not be applied without evaluating each component toxic air contaminant in accordance with the  $\Delta$ Toxic Air Contaminant Statute $\Delta$ , ORC 3704.03(F).

- c. Prior to making any physical changes to or changes in the method of operation of the emissions unit(s), that could impact the parameters or values that were used in the predicted 1-hour maximum ground-level concentration $\Delta$ , the permittee shall re-model the change(s) to demonstrate that the MAGLC has not been exceeded. Changes that can affect the parameters/values used in determining the 1-hour maximum ground-level concentration include, but are not limited to, the following:

- i. changes in the composition of the materials used or the use of new materials, that would result in the emission of a new toxic air contaminant with a lower Threshold Limit Value (TLV) than the lowest TLV previously modeled;
- ii. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any toxic air contaminant listed in OAC rule 3745-114-01, that was modeled from the initial (or last) application; and

- iii. physical changes to the emissions unit(s) or its/their exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).
- d. If the permittee determines that the AToxic Air Contaminant Statute will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01 solely due to a non-restrictive change to a parameter or process operation, where compliance with the AToxic Air Contaminant Statute, ORC 3704.03(F), has been documented. If the change(s) meet(s) the definition of a "modification", the permittee shall apply for and obtain a final permit-to-install and operate prior to the change. The Director may consider any significant departure from the operations of the emissions unit, described in the permit application, as a modification that results in greater emissions than the emissions rate modeled to determine the ground level concentration; and he/she may require the permittee to submit a permit application for the increased emissions.
- e. The permittee shall collect, record, and retain the following information for each toxic evaluation conducted to determine compliance with the AToxic Air Contaminant Statute, ORC 3704.03(F):
  - i. a description of the parameters/values used in each compliance demonstration and the parameters or values changed for any re-evaluation of the toxic(s) modeled (the composition of materials, new toxic contaminants emitted, change in stack/exhaust parameters, etc.);
  - ii. the Maximum Acceptable Ground-Level Concentration (MAGLC) for each significant toxic contaminant or worst-case contaminant, calculated in accordance with the AToxic Air Contaminant Statute, ORC 3704.03(F);
  - iii. a copy of the computer model run(s), that established the predicted 1-hour maximum ground-level concentration that demonstrated the emissions unit(s) to be in compliance with the AToxic Air Contaminant Statute, ORC 3704.03(F), initially and for each change that requires re-evaluation of the toxic air contaminant emissions; and
  - iv. the documentation of the initial evaluation of compliance with the AToxic Air Contaminant Statute, ORC 3704.03(F), and documentation of any determination that was conducted to re-evaluate compliance due to a change made to the emissions unit(s) or the materials applied.

(3) Record Keeping Requirements

- a. The permittee shall maintain a record of any change made to a parameter or value used in the dispersion model, used to demonstrate compliance with the AToxic Air Contaminant Statute, ORC 3704.03(F), through the predicted 1-hour maximum ground-level concentration. The record shall include the date and reason(s) for the change and if the change would increase the ground-level concentration.

(4) Reporting Requirements

- a. The permittee shall include any changes made to a parameter or value used in the dispersion model, that was used to demonstrate compliance with the Toxic Air Contaminant Statute, ORC 3704.03(F), through the predicted 1-hour maximum ground-level concentration, in the quarterly deviation (excursion) reports. If no changes to the emissions, emissions unit(s), or the exhaust stack have been made, then the report shall include a statement to this effect.
- b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

(1) Applicable Rules/Requirements

40 CFR 63, Subpart XXXXXX

(2) Monitoring and Record Keeping

- a. Prior to the use of any coating in emissions unit K001, K002 and K003, the permittee shall determine if the coating contains metal fabricating and finishing hazardous air pollutant (MFHAP) as defined in 40 CFR 63.11522 by collecting, recording, and retaining the following information for each coating employed:

- i. the name and company identification of the coating;
- ii. the MSDS or other formulation information documenting the composition of the coating; and
- iii. statement if the coating contains any MFHAP.

The permittee shall apply for and obtain a permit-to-install and operate (PTIO) or PTIO modification to include the requirements of 40 CFR 63 Subpart XXXXXX, Area Source Standards for Nine Metal Fabrication and Finishing Source Categories prior to employing any coating containing MFHAP.

(3) Applicable Requirements

- a. OAC rule 3745-17-11(C)

(4) Additional Terms and Conditions

- a. On February 1, 2008, OAC rule 3745-17-11 was revised to include paragraph (C), pertaining to control requirements for particulate emissions from surface coating processes. These control requirements and the associated operational restrictions, monitoring, record keeping, and reporting requirements contained in this permit shall become federally enforceable on the date the U.S. EPA approves paragraph (C) of OAC rule 3745-17-11 as a revision to the Ohio State Implementation Plan.

(5) Operational Restrictions

- a. The permittee shall install, operate, and maintain a dry particulate filter system for the surface coating operations in accordance with the manufacturer=s recommendations, instructions, and/or operating manual(s) with any

modifications deemed necessary by the permittee. The dry particulate filter shall be employed during all periods of coating application to control particulate emissions, except when using a hand-held cup spray gun, an airless spray application method or when brush or roll coating.

- b. The permittee shall expeditiously repair the dry particulate filter or otherwise return it to normal operations, as recommended by the manufacturer with any modifications deemed necessary by the permittee, whenever it is determined that the control device is not operating in accordance with these requirements.

(6) Monitoring and Record Keeping Requirements

- a. The permittee shall maintain documentation of the manufacturer's recommendations, instructions, or operating manuals for the dry particulate filter, along with documentation of any modifications deemed necessary by the permittee. These documents shall be maintained at the facility and shall be made available to the appropriate Ohio EPA District Office or local air agency upon request.
- b. The permittee shall conduct periodic inspections of the dry particulate filter to determine whether it is operating in accordance with the manufacturer's recommendations, instructions, or operating manuals with any modifications deemed necessary by the permittee or operator. These inspections shall be performed at a frequency that shall be based upon the recommendation of the manufacturer and the permittee shall maintain a copy of the manufacturer's recommended inspection frequency and it shall be made available to the Ohio EPA upon request.
- c. In addition to the recommended periodic inspections, not less than once each calendar year the permittee shall conduct a comprehensive inspection of the dry particulate filter while the emissions unit is shut down and perform any needed maintenance and repair to ensure that it is operated in accordance with the manufacturer's recommendations.
- d. The permittee shall document each inspection (periodic and annual) of the dry particulate filter system and shall maintain the following information:
  - i. the date of the inspection;
  - ii. a description of each/any problem identified and the date it was corrected;
  - iii. a description of any maintenance and repairs performed; and
  - iv. the name of person who performed the inspection.

These records shall be maintained at the facility for not less than five years from the date the inspection and any necessary maintenance or repairs were completed and shall be made available to the appropriate Ohio EPA District Office or local air agency upon request.

- e. The permittee shall maintain records that document any time periods when the dry particulate filter was not in service when the emissions unit was in operation,

as well as, a record of all operations during which the dry particulate filter was not operated according to the manufacturer=s recommendations with any documented modifications made by the permittee. These records shall be maintained for a period of not less than five years and shall be made available to the Ohio EPA upon request.

(7) Reporting Requirements

- a. The permittee shall submit quarterly deviation (excursion) reports that identify any daily record showing that the dry particulate filter was not in service (normal operation) when the emissions unit was in operation. If there were no deviations from the requirements of this permit during the calendar quarter, the report shall so state that no deviations occurred during the reporting period. The quarterly deviation reports shall be submitted in accordance with the reporting requirements of the Standard Terms and Conditions of this permit.

(8) Applicable Rules/Requirements

OAC rule 3745-31-05(D)(1)(b)

(9) Emissions Limitation

The emissions of any single hazardous air pollutant (HAP) shall not exceed 9.81 tons per year from emission units K001, K002 and K003, combined.

(10) Operational Restrictions

- a. The maximum annual coating usage for emissions units K001, K002 and K003, combined shall not exceed 43,650 gallons per rolling, 12-month period, as applied. The content of any single HAP in any coating shall not exceed 0.42 pounds per gallon, as applied. The maximum annual clean-up material consumed in K001, K002 and K003, combined shall not exceed 180 gallons per year. The content of any single HAP in clean-up material shall not exceed 7.17 pounds per gallon.
- b. To ensure enforceability during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall not exceed the coating usage and clean-up material levels specified in the following table:

<u>Month(s)</u>	<u>Maximum Allowable Cumulative Coating Usage</u>	<u>Maximum Allowable Cumulative Clean-up Usage</u>
1	3640	30
1-2	7280	45
1-3	10,900	60
1-4	14,560	75
1-5	18,180	90

1-6	21,830	105
1-7	25,460	120
1-8	29,090	135
1-9	32,740	150
1-10	36,370	165
1-11	40,010	180
1-12	43,650	180

After the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, compliance with the annual coating usage limitation shall be based upon a rolling, 12-month summation of the coating usage figures. After the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, compliance with the annual clean-up material usage limitation shall be based upon a rolling, 12-month summation of the clean-up material usage figures.

(11) Monitoring and Record Keeping Requirements

- a. The permittee shall collect and record the following information for each month for emissions units K001, K002 and K003, combined to demonstrate compliance with the synthetic minor operational restrictions:
  - i. the name and company identification of each coating employed;
  - ii. the MSDS or other formulation information documenting the each single HAP content of the coating, in pounds per gallon as applied;
  - iii. the total coating usage for each month, in gallons;
  - iv. during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall record the cumulative coating usage for each calendar month;
  - v. beginning after the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the actual coating usage for the previous, 12-month period;
  - vi. the name and company identification of each clean-up material employed;
  - vii. the MSDS or other formulation information documenting the each single HAP content of the clean-up material, in pounds per gallon;
  - viii. the total clean-up material usage for each month, in gallons;

- ix. during the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the permittee shall record the cumulative clean-up material usage for each calendar month; and
- x. beginning after the first 12 calendar months of operation or the first 12 calendar months following the issuance of this permit, the actual clean-up material usage for the previous, 12-month period.

(12) Reporting Requirements

- a. The permittee shall submit quarterly deviation (excursion) reports that identify:
  - i. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the Potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
    - (a) The maximum annual coating usage for emissions units K001, K002 and K003, combined shall not exceed 43,650 gallons per rolling, 12-month period, as applied.
    - (b) The content of any single HAP in any coating shall not exceed 0.42 pounds per gallon, as applied.
    - (c) The maximum annual clean-up material consumed in K001, K002 and K003, combined shall not exceed 180 gallons per year.
    - (d) The content of any single HAP in clean-up material shall not exceed 7.17 pounds per gallon.
  - ii. the probable cause of each deviation (excursion);
  - iii. any corrective actions that were taken to remedy the deviations (excursions) or prevent future deviations (excursions); and
  - iv. the magnitude and duration of each deviation (excursion).

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.
- b. The quarterly reports shall be submitted (postmarked) each year by the thirty-first of January (covering October to December), the thirtieth of April (covering January to March), the thirty-first of July (covering April to June), and the thirty-first of October (covering July to September), unless an alternative schedule has been established and approved by the director (the appropriate district office or local air agency).

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Draft Permit-to-Install and Operate**

**Permit Number:** P0104351

**Facility ID:** 0285030456

**Effective Date:** To be entered upon final issuance

## **C. Emissions Unit Terms and Conditions**

**1. K003, Paint Booth 02**

**Operations, Property and/or Equipment Description:**

Metal tank coating operation including one booth with dry overspray filters, one manual spray coating gun. Parts air dried and manually moved.

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	Volatile organic compound (VOC) emissions shall not exceed 8.75 pounds per hour as a daily average from coatings, and 38.6 tons per year from both coatings and cleanup materials.
b.	OAC rule 3745-21-09(U)(1)	See b)(2)a.
c.	ORC 3704.03(F)(3) and F(4)	See 1.a)(1) through 1.a)(4) of section B.
d.	40 CFR 63, Subpart XXXXXX	See 1.b)(1) and 1.b)(2) of section B.
e.	OAC rule 3745-17-11(C)	See 1.b)(3) through 1.b)(7) of section B.
f.	OAC rule 3745-31-05(D)(1)(b)	See 1.b)(8) through 1.b)(12) of section B.

(2) Additional Terms and Conditions

a. The VOC content of the coatings employed shall not exceed a daily volume-weighted average of 3.5 lbs per gallon, as applied, excluding water and exempt solvents.

c) Operational Restrictions

None.

d) Monitoring and/or Record Keeping Requirements

(1) The permittee shall collect and record the following information each day for the coating line:

- a. The name and identification number of each coating employed.
- b. The VOC content (excluding water and exempt solvents) of each coating, as applied.
- c. The number of gallons (excluding water and exempt solvents) of each coating, as applied.
- d. The daily VOC emissions from all the coatings employed, in pounds, [i.e., the sum of d)(2)b. times d)(2)c. for each coating employed].
- e. The daily volume-weighted average VOC content of all the coatings, as applied, calculated in accordance with the equation specified in paragraph (B)(9) of OAC rule 3745-21-10 for CVOC,2.
- f. The total number of hours this emissions unit was in operation.
- g. The average hourly VOC emissions from all coatings employed, in pounds [i.e., the quotient of d)(2)d. divided by d)(2)f.].

Note: If the VOC content of each of the coatings employed during a day is less than 3.5 lbs per gallon, as applied, excluding water and exempt solvents, the daily volume-weighted average VOC content record is not required for that day.

(2) The permittee shall collect and record the following information for each month for this emissions unit:

- a. The company identification of each cleanup material employed.
- b. The number of gallons of each cleanup material employed.
- c. The VOC content of each cleanup material employed, in pounds per gallon.
- d. The total VOC emissions from all the cleanup materials employed, in pounds [i.e., the sum of d)(3)b. x d)(3)c. for each cleanup material employed].
- e. The amount of cleanup material recovered, in pounds.
- f. The total monthly VOC emissions from cleanup operations, in pounds [i.e., d)(3)d. – d)(3)e.].

(3) The permittee shall calculate and record the total annual VOC emissions from coatings and cleanup materials, [i.e., the sum of the daily VOC emission rates from the coating

materials for the calendar year in d)(2) plus the sum of the monthly emissions from cleanup materials for the calendar year in d)(3)].

e) Reporting Requirements

- (1) The permittee shall notify the Director (appropriate District Office or local air agency) in writing of each daily record showing a daily volume-weighted average greater than 3.5 pounds VOC per gallon, as applied, excluding water and exempt solvents. The notification shall include a copy of such record and shall be sent to the Director (appropriate District Office or local air agency) within 30 days after the exceedance occurs.
- (2) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the director by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve-months for each air contaminant source identified in this permit.

f) Testing Requirements

- (1) Compliance with the emission limitations in b)(1) shall be determined in accordance with the following methods:
  - a. Emissions Limitation:  
  
Daily volume-weighted average of 3.5 lbs VOC per gallon, as applied, excluding water and exempt solvents  
  
Applicable Compliance Method:  
  
Compliance shall based upon the record keeping specified in d)(2).
  - b. Emissions Limitation:  
  
8.75 lbs/hr of VOC emissions, as a daily average  
  
Applicable Compliance Method:  
  
Compliance shall based upon the record keeping specified in d)(2).
  - c. Emissions Limitation:  
  
38.6 TPY of VOC emissions  
  
Applicable Compliance Method:  
  
Compliance shall based upon the record keeping specified in d)(4).
- (2) In accordance with OAC rule 3745-21-04(B)(5), facilities located in Ashtabula, Butler, Clark, Clermont, Cuyahoga, Delaware, Franklin, Geauga, Greene, Hamilton, Lake, Licking, Lorain, Lucas, Mahoning, Medina, Miami, Montgomery, Portage, Stark, Summit, Trumbull, Warren and Wood Counties shall use USEPA Method 24 to determine the

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Permit Number:** P0104351

**Facility ID:** 0285030456

**Effective Date:** To be entered upon final issuance

VOC contents of the coatings. If, pursuant to section 4.3 of Method 24, 40 CFR Part 60, Appendix A, an owner or operator determines that Method 24 cannot be used for a particular coating, the permittee shall so notify the Administrator of the USEPA and shall use formulation data for that coating to demonstrate compliance until the USEPA provides alternative analytical procedures or alternative precision statements for Method 24.

Facilities located in all other counties shall use USEPA Method 24 or formulation data to determine the VOC contents of the coatings.

US EPA Method 24 or formulation data shall be used to determine the VOC contents of the cleanup materials.

g) Miscellaneous Requirements

- (1) None.
