Dear Permit Holder:

Enclosed please find a final Air Pollution Permit-to-Install and Operate ("PTIO") which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully.

Ohio EPA maintains a document entitled "Frequently Asked Questions about the PTIO". The document can be downloaded from the DAPC Web page, [www.epa.state.oh.us/dapc](http://www.epa.state.oh.us/dapc), from the "Permits" link. This document contains additional information related to your permit, such as what activities are covered under the PTIO, who has enforcement authority over the permit and Ohio EPA's authorization to inspect your facility and records. Please contact the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469 if you need assistance.

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission ("ERAC") under Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and describe the action complained of and the grounds for the appeal. The appeal must be filed with the ERAC within thirty (30) days after notice of the Director's action. A filing fee of \$70.00 must be submitted to the ERAC with the appeal, although the ERAC, has discretion to reduce the amount of the filing fee if you can demonstrate (by affidavit) that payment of the full amount of the fee would cause extreme hardship. If you file an appeal of this action, you must notify Ohio EPA of the filing of the appeal (by providing a copy to the Director) within three (3) days of filing your appeal with the ERAC. Ohio EPA requests that a copy of the appeal also be provided to the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the ERAC at the following address:

Environmental Review Appeals Commission  
309 South Fourth Street, Room 222  
Columbus, OH 43215

If you have any questions regarding this permit, please contact the Ohio EPA DAPC, Southeast District Office. This permit has been posted to the Division of Air Pollution Control (DAPC) Web page [www.epa.state.oh.us/dapc](http://www.epa.state.oh.us/dapc).

Sincerely,

*Michael W. Ahern*

## Authorization

Facility ID: 0679000308  
Application Number(s): A0036363  
Permit Number: P0104094  
Permit Description: PTIO for a 145 HP (@ 1800 rpm) John Deere diesel engine that replaced a smaller engine (P001) on 8/1/06  
Permit Type: Initial Installation  
Permit Fee: \$400.00  
Issue Date: 3/5/2009  
Effective Date: 3/5/2009  
Expiration Date: 3/5/2019  
Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15  
This document constitutes issuance to:

Schlabach Finishing  
8261 Winklepleck Road NW  
Dundee, OH 44624

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Southeast District Office  
2195 Front Street  
Logan, OH 43138  
(740)385-8501

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski  
Director

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**  
**Permit Number:** P0104094  
**Facility ID:** 0679000308  
**Effective Date:** 3/5/2009

## Authorization (continued)

Permit Number: P0104094  
Permit Description: PTIO for a 145 HP (@ 1800 rpm) John Deere diesel engine that replaced a smaller engine (P001) on 8/1/06

Permits for the following emissions unit(s) or groups of emissions units are in this document as indicated below:

<b>Emissions Unit ID:</b>	<b>P002</b>
Company Equipment ID:	Diesel Engine #1
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104094

**Facility ID:** 0679000308

**Effective Date:** 3/5/2009

## **A. Standard Terms and Conditions**

**1. What does this permit-to-install and operate ("PTIO") allow me to do?**

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

**2. Who is responsible for complying with this permit?**

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

**3. What records must I keep under this permit?**

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

**4. What are my permit fees and when do I pay them?**

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

**5. When does my PTIO expire, and when do I need to submit my renewal application?**

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

**6. What happens to this permit if my project is delayed or I do not install or modify my source?**

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

**7. What reports must I submit under this permit?**

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

**8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?**

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

**9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?**

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

**10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?**

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Ohio EPA DAPC, Southeast District Office in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

**11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?**

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

**12. What happens if one or more emissions units operated under this permit is/are shut down permanently?**

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

**13. Can I transfer this permit to a new owner or operator?**

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104094

**Facility ID:** 0679000308

**Effective Date:** 3/5/2009

change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

**14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?**

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

**15. What happens if a portion of this permit is determined to be invalid?**

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Effective Date:** 3/5/2009

## **B. Facility-Wide Terms and Conditions**

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104094

**Facility ID:** 0679000308

**Effective Date:** 3/5/2009

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - (1) None.
  - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - (1) None.
2. Emissions unit P002 contained in this permit is subject to 40 CFR Part 60, Subpart IIII and 40 CFR Part 63, Subpart ZZZZ. The complete NSPS and MACT requirements, including the MACT General Provisions, may be accessed via the internet from the Electronic Code of Federal Regulation (e-CFR) website <http://ecfr.gpoaccess.gov> or by contacting the appropriate Ohio EPA District office or local air agency.

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104094

**Facility ID:** 0679000308

**Effective Date:** 3/5/2009

## **C. Emissions Unit Terms and Conditions**

**1. P002, Diesel Engine #1**

**Operations, Property and/or Equipment Description:**

John Deere model # 6068TF150, a diesel-fired compression ignition internal combustion engine rated at 145 HP @ 1800 rpm (intermittent); fuel oil sulfur content maximum of 0.05%

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	<p>Nitrogen oxides (NO<sub>x</sub>) emissions shall not exceed 1.87 pounds per hour and 8.19 tons per year.</p> <p>Carbon monoxide (CO) emissions shall not exceed 0.20 pound per hour and 0.89 ton per year.</p> <p>Sulfur dioxide (SO<sub>2</sub>) emissions shall not exceed 0.05 pound per hour and 0.20 ton per year.</p> <p>Organic compound (OC) emissions shall not exceed 0.12 pound per hour and 0.53 ton per year.</p> <p>Particulate emissions (PE) shall not exceed 0.25 ton per year.</p> <p>Visible PE from any stack serving this</p>

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		emissions unit shall not exceed 10% opacity as a six-minute average.  The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-11(B)(5)(a), 40 CFR 60.4200 - 60.4219 and 40 CFR 63.6580 - 63.6675.
b.	OAC rule 3745-17-07(A)(1)	The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
c.	OAC rule 3745-17-11(B)(5)(a)	PE shall not exceed 0.310 pound/million Btu of actual heat input.
d.	OAC rule 3745-18-06(G)	This emissions unit is exempt from the requirements of OAC rule 3745-18-06(G) pursuant to OAC rule 3745-18-06(B).
e.	OAC rule 3745-21-08(B)	See b)(2)a. below.
f.	40 CFR Part 60, Subpart IIII (40 CFR 60.4200 - 60.4219)  [In accordance with 40 CFR 60.4200(a)(2)(i), this emissions unit is a stationary compression ignition internal combustion engine subject to the emissions limitations specified in this section]	NOx emissions shall not exceed 6.9 g/hp-hr (9.2 g/KW-hr). [40 CFR 60.4204(a) and Table 1 to Supart IIII of 40 CFR Part 60]  See b)(2)b. below.
g.	40 CFR Part 63, Subpart ZZZZ (40 CFR 63.6580 - 63.6675)  [In accordance with 40 CFR 636590(a)(2)(iii), this emissions unit is a stationary compression ignition internal combustion engine located at an area source of HAP emissions]	Pursuant to 40 CFR 63.6590(c), stationary compression ignition reciprocating internal combustion engines (RICE) located at an area source of HAP emissions must meet the requirements of this part by meeting the requirements of 40 CFR Part 60 Subpart IIII for compression ignition engines.  Pursuant to 40 CFR 63.6665, the General Provisions in 40 CFR 63.1 through 63.15 do not apply to a stationary RICE located at an area source of HAP emissions.

(2) Additional Terms and Conditions

- a. The permittee has satisfied the "latest available control techniques and operating practices" required pursuant to OAC rule 3745-21-08(B).

On November 5, 2002, OAC rule 3745-21-08 was revised to delete paragraph (B); therefore, paragraph (B) is no longer part of the State regulations. However,

that rule revision has not yet been submitted to the U.S. EPA as a revision to Ohio's State Implementation Plan (SIP). Therefore, until the SIP revision occurs and the U.S. EPA approves the revisions to OAC rule 3745-21-08, the requirement to satisfy the "best available control techniques and operating practices" still exists as part of the federally-approved SIP for Ohio.

- b. The permittee shall comply with the applicable requirements of 40 CFR Part 60 Subpart IIII, including the following sections:

60.4207(a)	Fuel requirements
60.4208(a)	Installation deadlines
60.4211(b)	Compliance demonstration

- c) Operational Restrictions

- (1) The permittee shall only burn diesel fuel containing no greater than 0.05% sulfur, by weight, in this emissions unit.
- (2) The permittee shall comply with the applicable restrictions of 40 CFR Part 60 Subpart IIII, including the following sections:

60.4206	Duration of compliance with emissions standards
60.4211(a)	Maintenance requirements

- d) Monitoring and/or Recordkeeping Requirements

- (1) For each day during which the permittee burns a fuel other than diesel fuel containing no greater than 0.05% sulfur, by weight, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

- e) Reporting Requirements

- (1) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the director by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve months for each air contaminant source identified in this permit.

- f) Testing Requirements

- (1) Compliance with the emission limitation(s) in b)(1) of these terms and conditions shall be determined in accordance with the following method(s):

- a. Emission Limitation:

Nitrogen oxides (NO<sub>x</sub>) emissions shall not exceed 1.87 pounds per hour and 8.19 tons per year.

**Applicable Compliance Method:**

Compliance with the lbs/hr emission limitation shall be demonstrated by multiplying the emission factor for NO<sub>x</sub> supplied by the engine manufacturer of 0.0129 lb/hp-hr by the maximum rated capacity of P002 (145 HP @ 1,800 rpm). Compliance with the annual emission limitation is demonstrated by multiplying 8,760 hours per year by the lbs/hr emission calculation, then dividing by 2,000 lbs/ton.

If required, compliance with the lbs/hr emission limitation shall be demonstrated based upon the methods and procedures specified in 40 CFR Part 60, Appendix A, Methods 1 through 4 and 7.

**b. Emission Limitation:**

Carbon monoxide (CO) emissions shall not exceed 0.20 pound per hour and 0.89 ton per year.

**Applicable Compliance Method:**

Compliance with the lb/hr emission limitation shall be demonstrated by multiplying the emission factor for CO supplied by the engine manufacturer of 0.0014 lb/hp-hr by the maximum rated capacity of P002 (145 HP @ 1,800 rpm). Compliance with the annual emission limitation is demonstrated by multiplying 8,760 hours per year by the lbs/hr emission calculation, then dividing by 2,000 lbs/ton.

If required, compliance with the lb/hr emission limitation shall be demonstrated based upon the methods and procedures specified in 40 CFR Part 60, Appendix A, Methods 1 through 4 and 10.

**c. Emission Limitation:**

Sulfur dioxide (SO<sub>2</sub>) emissions shall not exceed 0.05 pound per hour and 0.20 ton per year.

**Applicable Compliance Method:**

Compliance with the lb/hr emission limitation shall be demonstrated by the following calculation from the permittee's application:

$$\text{lb/hr} = (0.345 \text{ lb of fuel/hp-hr})(145 \text{ HP})(0.0005 \text{ (\% sulfur in fuel)})(2 \text{ (SO}_2\text{/S)})(0.9 \text{ conversion}) = 0.05 \text{ lb/hr}$$

Compliance with the annual emission limitation is demonstrated by multiplying 8,760 hours per year by the lbs/hr emission calculation, then dividing by 2,000 lbs/ton.

If required, compliance with the lb/hr emission limitation shall be demonstrated based upon the methods and procedures specified in 40 CFR Part 60, Appendix A, Methods 1 through 4 and 6.

- d. Emission Limitation:  
Organic compound (OC) emissions shall not exceed 0.12 pound per hour and 0.53 ton per year.

**Applicable Compliance Method:**

Compliance with the lb/hr emission limitation shall be demonstrated by multiplying the emission factor for OC supplied by the engine manufacturer of 0.0008 lb/hp-hr by the maximum rated capacity of P002 (145 HP @ 1,800 rpm). Compliance with the annual emission limitation is demonstrated by multiplying 8,760 hours per year by the lbs/hr emission calculation, then dividing by 2,000 lbs/ton.

If required, compliance with the lb/hr emission limitation shall be determined based upon the methods and procedures specified in 40 CFR Part 60, Appendix A, Methods 1 - 4, and 18, 25, or 25A.

- e. Emission Limitation:  
Particulate emissions (PE) shall not exceed 0.25 ton per year.

**Applicable Compliance Method:**

Compliance with the annual emission limitation is demonstrated by multiplying 8,760 hours per year and the emission factor for particulate supplied by the manufacturer of 0.0004 lb/hp-hr by the maximum rated capacity of P002 (145 HP @ 1,800 rpm), then dividing by 2,000 lbs/ton.

- f. Emission Limitation:  
Visible PE from any stack serving this emissions unit shall not exceed 10% opacity as a six-minute average.

**Applicable Compliance Method:**

If required, compliance with the visible PE limitation shall be determined according to USEPA Method 9.

- g. Emission Limitation:  
PE shall not exceed 0.310 pound/million Btu of actual heat input.

**Applicable Compliance Method:**

Compliance with the 0.310 lb/million Btu emission limitation is demonstrated by using the emissions factor for lb/million Btu from AP-42, Table 3.3-1 (10/96).

If required, compliance with the PE emission limitation shall be demonstrated based upon the methods and procedures specified in 40 CFR Part 60, Appendix A, Methods 1 through 5.

- h. Emission Limitation:  
NOx emissions shall not exceed 6.9 g/hp-hr (9.2 g/KW-hr).  
[40 CFR 60.4204(a) and Table 1 to Supart IIII of 40 CFR Part 60]

**Applicable Compliance Method:**

Compliance with the g/hp-hr emission limitation is demonstrated by the manufacturer guarantee presented in the permittee's permit application. If required, compliance with this emission limit must be demonstrated according to

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104094

**Facility ID:** 0679000308

**Effective Date:** 3/5/2009

one of the methods in 40 CFR 60.4211(b)(2) through (5) and 40 CFR 60.4212 if applicable.

g) Miscellaneous Requirements

- (1) Modeling to demonstrate compliance with the Toxic Air Contaminant Statute, ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified PTIO prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new PTIO.
