**RE: FINAL PERMIT TO INSTALL  
FRANKLIN COUNTY**

**CERTIFIED MAIL**

Street Address:

122 S. Front Street

Lazarus Gov. Center TELE: (614) 644-3020 FAX: (614) 644-2329

Mailing Address:

Lazarus Gov. Center  
P.O. Box 1049

**Application No: 01-08730**

**DATE: 12/16/2003**

Capital Resin Corp  
Anne Tyler  
324 Dering Ave  
Columbus, OH 432072956

Enclosed please find an Ohio EPA Permit to Install which will allow you to install the described source(s) in a manner indicated in the permit. Because this permit contains several conditions and restrictions, I urge you to read it carefully.

The Ohio EPA is urging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action by the Director is final and may be appealed to the Ohio Environmental Review Appeals Commission pursuant to Chapter 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed within thirty (30) days after the notice of the Directors action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
309 South Fourth Street, Room 222  
Columbus, Ohio 43215

Sincerely,

Michael W. Ahern, Supervisor  
Field Operations and Permit Section  
Division of Air Pollution Control

cc: USEPA

**Permit To Install  
Terms and Conditions**

**Issue Date: 12/16/2003  
Effective Date: 12/16/2003**

---

**FINAL PERMIT TO INSTALL 01-08730**

Application Number: 01-08730  
APS Premise Number: 0125040238  
Permit Fee: **\$200**  
Name of Facility: Capital Resin Corp  
Person to Contact: Anne Tyler  
Address: 324 Dering Ave  
Columbus, OH 432072956

Location of proposed air contaminant source(s) [emissions unit(s)]:  
**324 Dering Ave  
Columbus, Ohio**

Description of proposed emissions unit(s):  
**Reactor number 5.**

The above named entity is hereby granted a Permit to Install for the above described emissions unit(s) pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the above described emissions unit(s) of environmental pollutants will operate in compliance with applicable State and Federal laws and regulations, and does not constitute expressed or implied assurance that if constructed or modified in accordance with those plans and specifications, the above described emissions unit(s) of pollutants will be granted the necessary permits to operate (air) or NPDES permits as applicable.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Director

## Part I - GENERAL TERMS AND CONDITIONS

### A. Permit to Install General Terms and Conditions

#### 1. Compliance Requirements

The emissions unit(s) identified in this Permit to Install shall remain in full compliance with all applicable State laws and regulations and the terms and conditions of this permit.

#### 2. Reporting Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

#### 3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

#### 4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized

representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

**5. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

**6. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

**7. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

**8. Termination of Permit to Install**

This Permit to Install shall terminate within eighteen months of the effective date of the Permit to Install if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification. This deadline may be extended by up to 12 months if application is made to the Director within a reasonable time before the termination date and the party shows good cause for any such extension.

**9. Construction of New Sources(s)**

The proposed emissions unit(s) shall be constructed in strict accordance with the plans and application submitted for this permit to the Director of the Ohio Environmental Protection Agency. There may be no deviation from the approved plans without the express, written approval of the Agency. Any deviations from the approved plans or the above conditions may lead to such sanctions and penalties as provided under Ohio law. Approval of these plans does not constitute an assurance that the proposed facilities will operate in compliance with all Ohio laws and regulations. Additional facilities shall be installed upon orders of the Ohio

**Capital Resin Corp**  
**PTI Application: 01-08730**  
**Issued: 12/16/2003**

**Facility ID: 0125040238**

Environmental Protection Agency if the proposed sources cannot meet the requirements of this permit or cannot meet applicable standards.

If the construction of the proposed emissions unit(s) has already begun or has been completed prior to the date the Director of the Environmental Protection Agency approves the permit application and plans, the approval does not constitute expressed or implied assurance that the proposed facility has been constructed in accordance with the approved plans. The action of beginning and/or completing construction prior to obtaining the Director's approval constitutes a violation of OAC rule 3745-31-02. Furthermore, issuance of the Permit to Install does not constitute an assurance that the proposed source will operate in compliance with all Ohio laws and regulations. Approval of the plans in any case is not to be construed as an approval of the facility as constructed and/or completed. Moreover, issuance of the Permit to Install is not to be construed as a waiver of any rights that the Ohio Environmental Protection Agency (or other persons) may have against the applicant for starting construction prior to the effective date of the permit. Additional facilities shall be installed upon orders of the Ohio Environmental Protection Agency if the proposed facilities cannot meet the requirements of this permit or cannot meet applicable standards.

**10. Public Disclosure**

The facility is hereby notified that this permit, and all agency records concerning the operation of this permitted source, are subject to public disclosure in accordance with OAC rule 3745-49-03.

**11. Applicability**

This Permit To Install is applicable only to the emissions unit(s) identified in the Permit To Install. Separate Permit To Install for the installation or modification of any other emissions unit(s) are required for any emissions unit for which a Permit To Install is required.

**12. Best Available Technology**

As specified in OAC Rule 3745-31-05, all new sources must employ Best Available Technology (BAT). Compliance with the terms and conditions of this permit will fulfill this requirement.

**13. Source Operation and Operating Permit Requirements After Completion of Construction**

This facility is permitted to operate each source described by this Permit to Install for a period of up to one year from the date the source commenced operation. This permission to operate is granted only if the facility complies with all requirements contained in this permit and all applicable air pollution laws, regulations, and policies. Pursuant to OAC Chapter 3745-35, the permittee shall submit a complete operating permit application within ninety (90) days after commencing operation of the emissions unit(s) covered by this permit.

Capital Resin Corp  
 PTI Application: 01-08730  
 Issued: 12/16/2003

Facility ID: 0125040238

#### 14. Construction Compliance Certification

The applicant shall provide Ohio EPA with a written certification (see enclosed form) that the facility has been constructed in accordance with the Permit to Install application and the terms and conditions of the Permit to Install. The certification shall be provided to Ohio EPA upon completion of construction but prior to startup of the source.

#### 15. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78. The permittee shall pay all applicable Permit to Install fees within 30 days after the issuance of this Permit to Install.

### B. Permit to Install Summary of Allowable Emissions

The following information summarizes the total allowable emissions, by pollutant, based on the individual allowable emissions of each air contaminant source identified in this permit.

**SUMMARY (for informational purposes only)**  
**TOTAL PERMIT TO INSTALL ALLOWABLE EMISSIONS**

<u>Pollutant</u>	<u>Tons Per Year</u>
OC	1.89
Acetonitrile	1.64
Glycol ether PM	0.25

Capital Resin Corp  
 PTI Application: 01-08730  
 Issued: 12/16/2003

Facility ID: 0125040238

Emissions Unit ID: P012

## PART II - SPECIAL TERMS AND CONDITIONS FOR SPECIFIC EMISSIONS UNIT(S)

### A. Applicable Emissions Limitations and/or Control Requirements

- The specific operations(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
P012 - Resin reactor R-5 w/condenser (4,000-gallon) with steam jacketed vacuum dryer w/condenser (1,000-gallon) for acetoguanamine resin production.	OAC rule 3745-31-05(A)(3)	Organic compound (OC) emissions shall not exceed 2.45 lbs/hr and 1.89 tons per year.  Best available control measures (BACM) that are sufficient to eliminate visible emissions of fugitive dust.  See A.2.a, A.2.b, A.2.c, B.1, and B.2 below.  The requirements of this rule also include compliance with the requirements of OAC rules 3745-35-07(B), 3745-21-07(G) and 3745-17-08(B).
	OAC rule 3745-35-07(B)	Acetonitrile emissions shall not exceed 8.67 lbs/batch and 1.64 tons per rolling, 12-month period. See A.2.d, A.2.e, and B.3 below.  Glycol ether PM emissions shall not exceed 1.19 lbs/batch and 0.25 ton per rolling, 12-month period. See A.2.d, A.2.e, and B.3 below.
	OAC rule 3745-21-07(G)(2)	The emission limitations specified by this rule are less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
	OAC rule 3745-17-08(B)	The control requirement specified by this rule are less stringent than the control requirement established pursuant to OAC rule 3745-31-05(A)(3). See section A.2.b.

Capital Resin Corp  
PTI Application: 01-08730  
Issued: 12/16/2003

Facility ID: 0125040238  
Emissions Unit ID: P012

**2. Additional Terms and Conditions**

- 2.a** This permit supercedes PTI 01-3895 issued November 18, 1992 and represents a net allowable increase of 0.29 ton of OC per year.
- 2.b** The permittee achieves compliance with BACM by charging solids within an enclosed room passively vented inside the building.
- 2.c** The facility-wide individual and combined hazardous air pollutant (HAP)<sup>1</sup> emissions shall not exceed 9.9 tons and 24.9 tons per rolling, 12-month period, respectively, by limiting the total HAP emissions from all emissions units. The permittee shall restrict total facility OC emissions to less than 99.9 tons per rolling, 12- month period.

<sup>1</sup>A listing of the HAPs can be found in Section 112(b) of the Clean Air Act or can be obtained by contacting your Ohio EPA field office or local air agency contact. Material Safety Data Sheets typically include a listing of the solvents contained in the adhesive/coatings and clean up materials. This information does not have to be kept on a line-by-line basis.

- 2.d** The batch emission limitations for acetonitrile, and glycol ether PM were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop any additional monitoring, record keeping and/or reporting requirements to ensure compliance with these emission limitations.
- 2.e** Based on formulation data and emission testing, acetonitrile and glycol ether PM are the only HAPs emitted from the production of acetoguanamine resin and represent the total OC emissions from this emissions unit.
- 2.d** The facility-wide potential to emit (PTE) for emission units at this facility, following issuance of this permit, will ensure that the HAP/VOC emissions will not exceed the Title V and MACT applicability thresholds of 10 tons individual HAP (Hazardous Air Pollutant), 25 tons total combined HAP emissions and 100 tons VOC per rolling, 12-month period, respectively.. Therefore, the permittee, by complying with the federally enforceable terms and conditions for emission units, as listed in the table below, will not be subject to Title V permitting and provisions in either the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Miscellaneous Organic Chemical Manufacturing 40 CFR Part 63 Subpart FFFF and Polymer & Resins III MACT under 40 CFR Part 63 Subpart OOO.

## B. Operational Restrictions

1. The temperature of the exhaust gases from the condenser on the reactor shall not exceed 77 degrees Fahrenheit.

2. The temperature of the exhaust gases from the condenser on the dryer shall not exceed 75 degrees Fahrenheit.
3. The permittee shall not produce more than 30 batches of acetoguanamine resin during any month.

**C. Monitoring and/or Recordkeeping Requirements**

1. The permittee shall operate and maintain continuous temperature monitors and recorder(s) which measure and record the temperature of the exhaust gases from the condensers on the reactor and dryer when the emissions unit is in operation. Units shall be in degrees Fahrenheit. The accuracy for each thermocouple, monitor, and recorder shall be guaranteed by the manufacturer to be within  $\pm 1$  percent of the temperature being measured or  $\pm 5$  degrees Fahrenheit, whichever is greater. The temperature monitor and recorder shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, instructions and operating manuals.
2. The permittee shall collect and record the following information each day of resin production:
  - a. the temperature of the exhaust gases from the reactor and dryer condensers ; and
  - b. a log or record of downtime for the condensers and/or temperature monitoring equipment when this emissions unit was in operation.
3. The permittee shall collect and record the following information for each month for this emissions unit:
  - a. the number of batches produced;
  - b. the total acetonitrile emissions and the total glycol ether PM emissions; and
  - c. the rolling, 12-month summation of the acetonitrile emissions and the rolling, 12-month summation of the glycol ether PM emissions.
4. The permittee shall collect and record the following information for each month for the facility:
  - a. the individual HAP emissions for each emissions unit at this facility, in pounds or ton(s);
  - b. the total combined HAP emissions for each emissions unit at this facility, in pounds or ton(s);
  - c. the individual HAP emissions for all emissions units at this facility, in pounds or tons;
  - d. the total combined HAP emissions for all emissions units at this facility, in pounds or tons;
  - e. the rolling, 12-month summation of the individual HAP emissions for all emissions units at

**Capital Resin Corp**  
**PTI Application: 01-08730**  
**Issued: 12/16/2003**

**Facility ID: 0125040238**  
**Emissions Unit ID: P012**

- the facility, in tons (i.e., the value from the current month added to the summation of the individual HAP emissions from the previous 11 months);
- f. the rolling, 12-month summation of the total combined HAP emissions for all emissions units at the facility, in tons (i.e., the value from the current month added to the summation of the total combined HAP emissions from the previous 11 months);
  - g. the OC emissions for each emissions unit at the facility, in pounds or tons;
  - h. the total OC emissions for all emissions units at the facility, in pounds or tons; and
  - i. the rolling 12-month summation of the OC emissions for all emissions units at the facility, in tons (i.e., the value from the current month added to the summation of the OC emissions from the previous 11 months).
5. The permit to install for this emissions unit (P012) was evaluated based on the actual materials and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: Acetonitrile

Maximum Hourly Emission Rate (lbs/hr): 2.25

TLV (mg/m<sup>3</sup>): 67

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m<sup>3</sup>): 655.6

MAGLC (ug/m<sup>3</sup>): 1,595

Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be still satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:

- a. changes in the composition of the materials used (typically for coatings or cleanup

Capital Resin Corp  
PTI Application: 01-08730  
Issued: 12/16/2003

Facility ID: 0125040238

Emissions Unit ID: P012

materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;

- b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
- c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy":

- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
- b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
- c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

#### **D. Reporting Requirements**

1. The permittee shall submit quarterly deviation (excursion) reports that include the following information:
  - a. an identification of all periods of time during which the temperature of the exhaust gases from the reactor and dryer condensers exceeded the temperature limitations specified in terms B.1 and B.2, above ;
  - b. an identification of all exceedances of the monthly batch operational restriction in term B.3, above;
  - c. an identification of all exceedances of the rolling, 12-month acetonitrile emission limitation and the 12-month glycol ether PM emission limitations;

**Capital Resin Corp**  
**PTI Application: 01-08730**  
**Issued: 12/16/2003**

**Facility ID: 0125040238**  
**Emissions Unit ID: P012**

- d. an identification of all exceedances of the rolling, 12-month individual and combined HAP emission limitations; and
  - e. an identification of all exceedances of the rolling, 12-month OC emission limitation.
2. These deviation (excursion) reports shall be submitted in accordance with the requirements specified in General Term and Condition A.2 of this permit.
  3. The permittee shall submit annual reports to the Ohio EPA, Central District Office that identify the total OC emissions emitted from this emissions unit for the previous calendar year. These annual reports shall be submitted by April 15 of each year. This reporting requirement may be satisfied by including and identifying the specific emission data for this emissions unit in the annual Fee Emission Report.

#### **E. Testing Requirements**

1. Compliance with the emission limitations in Section A.1. shall be determined in accordance with the following methods:

- a. Emission Limitation:  
OC emissions shall not exceed 2.45 lbs/hr.

**Applicable Compliance Method:**

This emission limitation was established by summing the maximum hourly emission rates of 2.25 lbs of acetonitrile and 0.195 lb of glycol ether PM determined through emission testing on December 17, 2002 while charging acetonitrile and blending with glycol ether PM. If required, the permittee shall demonstrate compliance with this emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 18.

- b. Emission Limitation:  
OC emissions shall not exceed 1.89 tons/yr.

**Applicable Compliance Method:**

This emission limitation was established by summing the batch emission rates of 8.67 lbs of acetonitrile and 1.19 lbs of glycol ether PM (9.86 lbs OC/batch) determined through emission testing on December 17, 2002 and multiplying the total OC batch emission rate by 360 batches per year. An additional 0.12 ton of OC/yr is generated as a working loss during transfer to storage tanks. Compliance with this emission limitation shall

Emissions Unit ID: **P012**

demonstrated based upon the record keeping requirements of this permit.

**Capital Resin Corp**  
**PTI Application: 01-08730**  
**Issued: 12/16/2003**

**Facility ID: 0125040238**  
**Emissions Unit ID: P012**

- c. Emission Limitation:  
Acetonitrile emissions shall not exceed 8.67 lbs/batch.

Applicable Compliance Method:

This emission limitation was established by summing the hourly acetonitrile emission rates from the reactor and dryer associated with this emissions unit as determined through emission testing on December 17, 2002. If required, the permittee shall demonstrate compliance with this emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 18.

- d. Emission Limitation:  
Acetonitrile emissions shall not exceed 1.64 tons per rolling, 12-month period.

Applicable Compliance Method:

This emission limitation was established by multiplying the batch emission rate of 8.67 lbs of acetonitrile by 360 batches per year. An additional 0.08 ton of acetonitrile/yr is generated during transfer to storage tanks. Compliance with this emission limitation shall demonstrated based upon the record keeping requirements of this permit.

- e. Emission Limitation:  
Glycol ether PM emissions shall not exceed 1.19 lbs/batch.

Applicable Compliance Method:

This emission limitation was established by summing the hourly glycol ether PM emission rates from the reactor and dryer associated with this emissions unit as determined through emission testing on December 17, 2002. If required, the permittee shall demonstrate compliance with this emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 18.

- f. Emission Limitation:  
Glycol ether PM emissions shall not exceed 0.25 ton per rolling, 12-month period.

Applicable Compliance Method:

This emission limitation was established by multiplying the batch emission rate of 1.19 lbs of glycol ether PM by 360 batches per year. An additional 0.04 ton of glycol ether PM/yr is generated during transfer to storage tanks. Compliance with this emission limitation shall demonstrated based upon the record keeping requirements of this permit.

- g. The individual and combined HAP emissions shall not exceed 9.9 tons and 24.9 tons per

rolling, 12-month period, respectively, from all emissions units at the facility.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements of this permit.

h. Emission Limitation:

The total OC emissions shall not exceed 99.9 tons per rolling, 12- month period from all emissions units at the facility.

Applicable Compliance Method:

Compliance shall be demonstrated based upon the record keeping requirements of this permit.

**F. Miscellaneous Requirements**
