Dear Permit Holder:

Enclosed please find a final Air Pollution Permit-to-Install and Operate ("PTIO") which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully.

Ohio EPA maintains a document entitled "Frequently Asked Questions about the PTIO". The document can be downloaded from the DAPC Web page, [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc), from the "Permits" link. This document contains additional information related to your permit, such as what activities are covered under the PTIO, who has enforcement authority over the permit and Ohio EPA's authorization to inspect your facility and records. Please contact the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469 if you need assistance.

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission ("ERAC") under Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and describe the action complained of and the grounds for the appeal. The appeal must be filed with the ERAC within thirty (30) days after notice of the Director's action. A filing fee of \$70.00 must be submitted to the ERAC with the appeal, although the ERAC, has discretion to reduce the amount of the filing fee if you can demonstrate (by affidavit) that payment of the full amount of the fee would cause extreme hardship. If you file an appeal of this action, you must notify Ohio EPA of the filing of the appeal (by providing a copy to the Director) within three (3) days of filing your appeal with the ERAC. Ohio EPA requests that a copy of the appeal also be provided to the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the ERAC at the following address:

Environmental Review Appeals Commission  
309 South Fourth Street, Room 222  
Columbus, OH 43215

If you have any questions regarding this permit, please contact the Regional Air Pollution Control Agency. This permit has been posted to the Division of Air Pollution Control (DAPC) Web page [www.epa.ohio.gov/dapc](http://www.epa.ohio.gov/dapc).

Sincerely,

Michael W. Ahern, Manager  
Permit Issuance and Data Management Section, DAPC

## Authorization

Facility ID: 0829060002  
Application Number(s): A0037081  
Permit Number: P0104566  
Permit Description: PTIO replacing PTI 08-507 for emissions unit N002, pathological lab animal incinerator with afterburner.  
Permit Type: Renewal  
Permit Fee: \$0.00  
Issue Date: 11/3/2009  
Effective Date: 11/3/2009  
Expiration Date: 11/3/2019  
Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15  
This document constitutes issuance to:

WRIGHT STATE UNIVERSITY  
3640 COL GLENN HWY  
FAIRBORN, OH 45435

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Regional Air Pollution Control Agency  
117 South Main Street  
Dayton, OH 45422-1280  
(937)225-4435

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski  
Director

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104566

**Facility ID:** 0829060002

**Effective Date:** 11/3/2009

## Authorization (continued)

Permit Number: P0104566

Permit Description: PTIO replacing PTI 08-507 for emissions unit N002, pathological lab animal incinerator with afterburner.

Permits for the following emissions unit(s) or groups of emissions units are in this document as indicated below:

<b>Emissions Unit ID:</b>	<b>N002</b>
Company Equipment ID:	Lab Incinerator
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104566

**Facility ID:** 0829060002

**Effective Date:** 11/3/2009

## **A. Standard Terms and Conditions**

**1. What does this permit-to-install and operate ("PTIO") allow me to do?**

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

**2. Who is responsible for complying with this permit?**

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

**3. What records must I keep under this permit?**

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

**4. What are my permit fees and when do I pay them?**

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

**5. When does my PTIO expire, and when do I need to submit my renewal application?**

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

**6. What happens to this permit if my project is delayed or I do not install or modify my source?**

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

**7. What reports must I submit under this permit?**

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

**8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?**

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

**9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?**

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

**10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?**

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Regional Air Pollution Control Agency in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

**11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?**

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

**12. What happens if one or more emissions units operated under this permit is/are shut down permanently?**

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

**13. Can I transfer this permit to a new owner or operator?**

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104566

**Facility ID:** 0829060002

**Effective Date:** 11/3/2009

change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

**14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?**

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

**15. What happens if a portion of this permit is determined to be invalid?**

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104566

**Facility ID:** 0829060002

**Effective Date:** 11/3/2009

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
  - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
    - (1) None.
  - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
    - (1) None.

State of Ohio Environmental Protection Agency  
Division of Air Pollution Control

**Final Permit-to-Install and Operate**

**Permit Number:** P0104566

**Facility ID:** 0829060002

**Effective Date:** 11/3/2009

## **C. Emissions Unit Terms and Conditions**

**1. N002, Lab Incinerator**

**Operations, Property and/or Equipment Description:**

pathological animal incinerator with afterburner, 65 lb material/hr

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	The particulate emissions (PE) shall not exceed 0.57 tons/year. See b)(2)a.  The requirements of this rule also include compliance with the requirements of OAC rules 3745-17-07(A), 3745-17-09(B), and 3745-105.
b.	OAC rule 3745-105-02(A)	The PE shall not exceed 0.20 pound of PE per one hundred pounds of material charged.
c.	OAC rule 3745-105-02(D)	The carbon monoxide (CO) emissions shall not exceed 100 ppm, by volume, on a dry basis, adjusted to 7% oxygen as an hourly average.
d.	OAC rule 3745-105-02(E)	The visible PE from this emissions unit shall not exceed five per cent opacity except for six minutes in any continuous sixty minute period during which opacity shall not exceed ten per cent.
e.	OAC rule 3745-17-09(B)	The PE limitation specified by this rule is

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
		<p>equivalent to requirements established pursuant to OAC rule 3745-105-02(A).</p> <p>This emissions unit, shall be designed, operated and maintained so as to prevent the emission of objectionable odors.</p>
f.	OAC rule 3745-17-07(A)	The visible emissions limitation specified by this rule is less stringent than the requirement established pursuant to OAC rule 3745-105-02(E).

(2) Additional Terms and Conditions

- a. The annual PE limitation was established, taking into account the applicable emissions limitation of OAC rule 3745-105-02(A), to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping or reporting requirements to ensure compliance with this emissions limitation.
- b. This emissions unit shall meet the applicable design parameters, operating restrictions, monitoring and recordkeeping, and testing requirements specified in OAC rules 3745-105-02 through 06.
- c. In accordance with 3745-105-03(D), the secondary combustion chamber shall provide a minimum one-second retention time at one thousand six hundred (1600) degrees Fahrenheit.
- d. In accordance with 3745-105-03(F), the incinerator shall incorporate a lockout system which will prevent the ignition of material until the exit gas temperature of the gas exiting the secondary combustion chamber reaches 1600 degrees Fahrenheit and which will prevent recharging until the combustion and burn-down cycles are complete.
- e. In accordance with the applicable rules of the Ohio Department of Health and regulations of the United States Nuclear Regulatory Commission, the permittee shall implement and maintain a plan to manage radioactive waste for the facility. The plan shall include procedures that specify and demonstrate that no radioactive waste enters or is combusted in this emissions unit. This requirement has been determined to be an acceptable alternative to the monitoring requirement specified in OAC rule 3745-105-04(C).

c) Operational Restrictions

- (1) The amount of material charged to the unit for any batch burn cycle shall not exceed 65 lb/hr.
- (2) The exit temperature of the primary combustion chamber temperature shall be maintained at a minimum of 1200 degrees Fahrenheit during the each cycle when material is being combusted.

- (3) The exit temperature of the secondary combustion chamber temperature shall be maintained at a minimum of 1600 degrees Fahrenheit during the each cycle when material is being combusted.
  - (4) No radioactive waste shall be burned in this unit.
  - (5) The type of material to be burned in this emissions unit shall be limited to type 0 (trash), type 4 (pathological waste) and type 5 (industrial by-product wastes).
  - (6) The permittee shall not intentionally dispose of the following items by burning in the incinerator:
    - a. visible globules of mercury;
    - b. nickel-cadmium batteries;
    - c. switches, thermometers, batteries, and other devices containing mercury; and
    - d. bags or other containers for infectious waste handling which contain cadmium, chromium or lead as a pigmenting agent.
  - (7) The permittee shall follow proper operating procedures at all times during operation of this emissions unit. The procedures shall include a pre-heating cycle for the secondary chamber, prior to combusting material, following procedures set forth by the incinerator manufacturer. The standard operating procedures shall be posted in a conspicuous place near the incinerator.
  - (8) The incinerator shall be cleaned regularly and maintained in good repair and operating order at all times.
- d) Monitoring and/or Recordkeeping Requirements
- (1) In accordance with 3745-105-04(E), the permittee install a scale, accurate to within one pound, to weigh all of the material charged to the unit. The permittee shall maintain a written log to record the amount of material charged on a pounds per hour basis.
  - (2) The permittee shall operate and maintain a continuous temperature monitor and recorder which measures and records the primary and the secondary combustion chamber temperatures, in degrees Fahrenheit, during each combustion cycle. The temperature monitor recorder shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, with any modifications deemed necessary by the permittee. The monitoring and recording devices shall be capable of accurately measuring the desired parameter.
  - (3) The permittee shall maintain a log of all periods of time when the emissions unit is in operation when the primary chamber temperature was less than 1200 degrees Fahrenheit and/or when the secondary chamber temperature was less than 1600 degrees Fahrenheit.
  - (4) The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the stack serving this emissions unit. The presence or absence of any visible emissions shall be

noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:

- a. the color of the emissions;
- b. whether the emissions are representative of normal operations;
- c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
- d. the total duration of any visible emission incident; and
- e. any corrective actions taken to minimize or eliminate the visible emissions.

If visible emissions are present, a visible emission incident has occurred. The observer does not have to document the exact start and end times for the visible emission incident under item d)(1)d. above or continue the daily check until the incident has ended. The observer may indicate that the visible emission incident was continuous during the observation period (or, if known, continuous during the operation of the emissions unit). With respect to the documentation of corrective actions, the observer may indicate that no corrective actions were taken if the visible emissions were representative of normal operations, or specify the minor corrective actions that were taken to ensure that the emissions unit continued to operate under normal conditions, or specify the corrective actions that were taken to eliminate abnormal visible emissions.

The permittee may, upon receipt of written approval from the appropriate Ohio EPA District Office or local air agency, modify the above-mentioned frequencies for performing the visible emissions checks if operating experience indicates that less frequent visible emissions checks would be sufficient to ensure compliance with the above-mentioned applicable requirements.

e) Reporting Requirements

- (1) The permittee shall identify the following information in the annual permit evaluation report in accordance with the monitoring requirements for visible emissions in term number d)(4) above:
  - a. all days during which any visible PE were observed from the stack serving this emissions unit; and
  - b. any corrective actions taken to minimize or eliminate the visible PE.
- (2) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the director by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve-months for each air contaminant source identified in this permit.

f) Testing Requirements

- (1) Compliance with the emission limitation(s) in b)(1) of these terms and conditions shall be determined in accordance with the following method(s):

a. Emission Limitation-

The PE shall not exceed 0.20 pound of PE per one hundred pounds of material charged.

Applicable Compliance Method-

Compliance shall be shall be based upon stack testing. Testing was conducted on February 12 and 13, 2008 that demonstrated compliance with this limitation. In accordance with OAC rule 3745-105-06, the permittee shall a conduct the next compliance performance stack test by February 13, 2011 to demonstrate compliance.

b. Emission Limitation-

The PE shall not exceed 0.57 tons/year.

Applicable Compliance Method-

This limit is based on the rated capacity of the emissions unit (65 pounds of pathological waste/hour) multiplied by the allowable emission limit of 0.20 lb PE/100 lbs material charged. The result, 0.13 lb/hr, is then multiplied by the 8760 hours/year and divided by 2000 lbs/ton. Therefore, provided compliance is shown with the mass emission limitation of 0.20 lb particulate/100 lbs of material charged, compliance will also be shown with the annual limitation.

c. Emission Limitation-

The carbon monoxide (CO) emissions shall not exceed 100 ppm, by volume, on a dry basis, adjusted to 7% oxygen as an hourly average.

Applicable Compliance Method-

Compliance shall be shall be based upon stack testing. Testing was conducted on February 12 and 13, 2008 that demonstrated compliance with this limitation.

d. Emission Limitation-

The visible PE from this emissions unit shall not exceed five per cent opacity except for six minutes in any continuous sixty minute period during which opacity shall not exceed ten per cent.

Applicable Compliance Method-

Compliance shall be determined by visible emission evaluations performed using procedures specified in U.S. EPA Method 9.

- (2) In accordance with OAC rule 3745-105-06, the permittee shall a conduct a stack test once every three years to demonstrate compliance with paragraphs (A) to (D) of OAC rule 3745-105-02. A compliance performance stack test was conducted on February 12 and 13, 2008 that demonstrated compliance with the applicable requirements. The permittee shall conduct the next compliance stack test for this emissions unit by
