RE: FINAL AIR POLLUTION PERMIT-TO-INSTALL AND OPERATE
Facility ID: 0855100386
Permit Number: P0105682
Permit Type: Renewal
County: Miami

Dear Permit Holder:

Enclosed please find a final Air Pollution Permit-to-Install and Operate ("PTIO") which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. Please complete a survey at www.epa.ohio.gov/dapc/permitsurvey.aspx and give us feedback on your permitting experience. We value your opinion.

Ohio EPA maintains a document entitled "Frequently Asked Questions about the PTIO". The document can be downloaded from the DAPC Web page, www.epa.ohio.gov/dapc, from the "Permits" link. This document contains additional information related to your permit, such as what activities are covered under the PTIO, who has enforcement authority over the permit and Ohio EPA's authorization to inspect your facility and records. Please contact the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469 if you need assistance.

The issuance of this PTIO is a final action of the Director and may be appealed to the Environmental Review Appeals Commission ("ERAC") under Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and describe the action complained of and the grounds for the appeal. The appeal must be filed with the ERAC within thirty (30) days after notice of the Director's action. A filing fee of \$70.00 must be submitted to the ERAC with the appeal, although the ERAC, has discretion to reduce the amount of the filing fee if you can demonstrate (by affidavit) that payment of the full amount of the fee would cause extreme hardship. If you file an appeal of this action, you must notify Ohio EPA of the filing of the appeal (by providing a copy to the Director) within three (3) days of filing your appeal with the ERAC. Ohio EPA requests that a copy of the appeal also be provided to the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the ERAC at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, OH 43215

If you have any questions regarding this permit, please contact the Regional Air Pollution Control Agency. This permit has been posted to the Division of Air Pollution Control (DAPC) Web page www.epa.ohio.gov/dapc.

Sincerely,

Michael W. Ahern, Manager
Permit Issuance and Data Management Section, DAPC

This document constitutes issuance to:

HAMPSHIRE CO.
9225 NORTH STATE RT. 66
Piqua, OH 45356

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Regional Air Pollution Control Agency
117 South Main Street
Dayton, OH 45422-1280
(937)225-4435

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski
Director

Authorization (continued)

Permit Number: P0105682
 Permit Description: PTIO to update emissions, include new applicable rule requirements, and replace PTI 08-1084 for emissions units K001, K002 and K003.

Permits for the following emissions unit(s) or groups of emissions units are in this document as indicated below:

Group Name: wood parts coating spray booths

Emissions Unit ID:	K001
Company Equipment ID:	BOOTH #1
Superseded Permit Number:	P0046299
General Permit Category and Type:	Not Applicable
Emissions Unit ID:	K002
Company Equipment ID:	BOOTH #2
Superseded Permit Number:	P0046300
General Permit Category and Type:	Not Applicable
Emissions Unit ID:	K003
Company Equipment ID:	BOOTH #3
Superseded Permit Number:	P0046301
General Permit Category and Type:	Not Applicable

State of Ohio Environmental Protection Agency
Division of Air Pollution Control

Final Permit-to-Install and Operate

Permit Number: P0105682

Facility ID: 0855100386

Effective Date: 1/4/2010

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. For facilities that are permitted as synthetic minor sources, the fee schedule is adjusted annually for inflation. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is

very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Regional Air Pollution Control Agency in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emission unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the

State of Ohio Environmental Protection Agency
Division of Air Pollution Control

Final Permit-to-Install and Operate

Permit Number: P0105682

Facility ID: 0855100386

Effective Date: 1/4/2010

change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

Division of Air Pollution Control

Final Permit-to-Install and Operate

Permit Number: P0105682

Facility ID: 0855100386

Effective Date: 1/4/2010

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) The facility is subject to the 40 CFR Part 63, Subpart JJ, National Emission Standards for Wood Furniture Manufacturing Operations.
 - (2) In accordance with 63.800(b)(3) of 40 CFR Part 63, Subpart JJ, the permittee has chosen to comply with limitations and criteria in Subpart JJ to be classified as an area source for the purposes of subpart JJ. To be classified as an area source for the purpose of Subpart JJ, the facility wide emissions shall not exceed 5 tons of any one hazardous air pollutant (HAP) per rolling 12-month period, or no more than 12.5 tons of any combination of HAPs per rolling 12-month period; and at least 90% of the facility wide emissions per rolling 12-month period are associated with the manufacture of wood furniture or wood furniture components.
 - a. In accordance with section 63.800(b)(3) of 40 CFR Part 63, Subpart JJ, the permittee shall maintain records that demonstrate the annual facility-wide emissions do not exceed these limitations to be classified as an area source. The permittee shall maintain these records for five years.
 - b. If the facility-wide emissions exceeds these limitations without the permittee first obtaining and complying with other limits that keep its potential to emit (PTE) of HAPs below major source levels, the facility becomes a major source and must comply thereafter with all applicable provisions of Subpart JJ on the applicable compliance date defined in Subpart JJ.

State of Ohio Environmental Protection Agency
Division of Air Pollution Control

Final Permit-to-Install and Operate

Permit Number: P0105682

Facility ID: 0855100386

Effective Date: 1/4/2010

C. Emissions Unit Terms and Conditions

1. Emissions Unit Group - wood parts coating spray booths: K001, K002, K003,

EU ID	Operations, Property and/or Equipment Description
K001	spray booth for coating wood parts with exhaust system and fabric filter control
K002	spray booth for coating wood parts and exhaust system with fabric filter control
K003	spray booth for coating wood parts and exhaust system with fabric filter control

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. b)(1)e and d)(5).

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operations(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	The organic compound (OC) emissions from this emissions unit shall not exceed 6.3 lbs/hour and 27.59 tons/year from coatings. The OC emissions from cleanup operations shall not exceed 2.76 tons/year for emissions units K001, K002 and K003 combined. The requirements established pursuant to this rule also include the requirements of OAC rules 3745-17-11(C), 3745-17-07(A)(1), and 40 CFR Part 63, Subpart JJ.
b.	40 CFR Part 63, Subpart JJ, National Emission Standards for Wood Furniture Manufacturing	The facility wide emissions shall not exceed 5 tons of any one hazardous air pollutant (HAP) per rolling 12-month

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
	Operations, restrictions to maintain facility as an area source for the purposes of Subpart JJ and exempt from Title V permitting	period, or no more than 12.5 tons of any combination of HAPs per rolling 12-month period; and at least 90% of the facility wide emissions per rolling 12-month period are associated with the manufacture of wood furniture or wood furniture components. See Section B.1.b)(1) and B.1.b)(2). See b)(2)b below.
c.	OAC rule 3745-17-11(C)	The particulate emissions (PE) from this emissions unit shall be controlled by a dry particulate filter system, or equivalent control devices. See c)(1) and c)(2).
d.	OAC rule 3745-17-07(A)(1)	The visible PE from any stack serving this emissions unit shall not exceed 20% opacity, as a six-minute average, except as specified by rule.
e.	OAC rule 3745-114-01 and ORC 3704.03(F)(4)(c)	See d)(5).

(2) Additional Terms and Conditions

- a. The hourly OC emissions limitation is based on the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping or reporting requirements to ensure compliance with this short term emissions limitation.
- b. These emissions units have been in operation for more than 12 months and, as such, the permittee has existing records to generate the rolling, 12-month summation of the emissions, upon issuance of this permit.

c) Operational Restrictions

- (1) The permittee shall install and operate a dry filtration system for the control of particulate emissions whenever this emissions unit is in operation and shall maintain the dry particulate filter in accordance with the manufacturer's recommendations, instructions, and/or operating manual(s), with any modifications deemed necessary by the permittee.
- (2) The permittee shall expeditiously repair the dry particulate filter or otherwise return it to normal operations, as recommended by the manufacturer with any modifications deemed necessary by the permittee, whenever it is determined that the control device is not operating in accordance with these requirements.

d) Monitoring and/or Recordkeeping Requirements

- (1) The permittee shall maintain records that document any time periods when the dry particulate filter was not in service when the emissions unit was in operation, as well as, a record of all operations during which the dry particulate filter was not operated according to the manufacturer's recommendations with any documented modifications made by the permittee.
- (2) The permittee shall collect and record the following information on a monthly basis for the coating materials applied in this emissions unit:
 - a. the number of gallons of each coating applied or all coatings applied during the month;
 - b. the maximum VOC content for each or the maximum VOC content for any coating applied, in pounds per gallon;
 - c. the total VOC emissions from all coatings applied [i.e., the summation of the products of d)(2)a. times d)(2)b. for each individual coating applied], or the product of the maximum VOC content of any coating applied times the total gallons of coating employed during the month [i.e., d)(2)a. times d)(2)b. for worst case coating]; and
 - d. the total VOC emissions from all coatings materials employed, in pounds or tons [i.e., sum of d)(2)c].

These monthly records shall be maintained for the purpose of determining annual VOC emissions from applied coating materials for the emissions unit.

- (3) The permittee shall collect and record the following information on a monthly basis for the cleanup materials applied in emissions unit K001, K002 and K003 combined:
 - a. the name and identification of each cleanup material employed;
 - b. the number of gallons of each cleanup material employed;
 - c. the VOC content of each cleanup material, in pounds per gallon;
 - d. the number of gallons of cleanup materials recovered for recycling or treatment;
 - e. the total VOC emissions from all cleanup materials employed, in pounds [i.e., the summation of the products of d)(3)b. times d)(3)c. for all cleanup materials employed];
 - f. the amount of cleanup materials recovered, in pounds [i.e., the summation of the products of d)(3)d. times d)(3)c. for cleanup materials recovered for recycling or treatment]; and
 - g. the total monthly VOC emissions from cleanup operations, in pounds [i.e., d)(3)e. minus d)(3)f.]

These monthly records shall be maintained for the purpose of determining annual VOC emissions from cleanup operations for the emissions units K001, K002 and K003 combined.

- (4) The permittee shall collect and record the following information each month for the entire facility for the purpose of determining the HAP* emissions:
- a. the total (after recovery or recycling of materials) individual HAP emissions for each HAP, in tons;
 - b. the total (after recovery or recycling of materials) combined HAPs emissions, in tons;
 - c. the rolling, 12-month summation of individual HAP emissions for each HAP, in tons; and
 - d. the rolling, 12-month summation of total combined HAPs emissions, in tons.

The total after recovery or recycling of materials HAPs emission rates shall be calculated by subtracting the mass amount of HAPs contained in materials recovered for recycling or treatment from the mass of HAPs contained in materials employed or used at the facility.

* A listing of the HAPs can be found in Section 112(b) of the Clean Air Act or can be obtained by contacting your Ohio EPA field office or local air agency contact. Material Safety Data Sheets typically include a listing of the solvents contained in the coatings or clean materials. This information does not have to be kept on a line-by-line basis

- (5) Modeling to demonstrate compliance with, the "Toxic Air Contaminant Statute", ORC 3704.03(F)(4)(b), was not necessary because the emissions unit's maximum annual emissions for each toxic air contaminant, as defined in OAC rule 3745-114-01, will be less than 1.0 ton per year. OAC Chapter 3745-31 requires permittees to apply for and obtain a new or modified PTIO prior to making a "modification" as defined by OAC rule 3745-31-01. The permittee is hereby advised that changes in the composition of the materials, or use of new materials, that would cause the emissions of any toxic air contaminant to increase to above 1.0 ton per year may require the permittee to apply for and obtain a new PTIO.

e) Reporting Requirements

- (1) The permittee shall submit quarterly deviation (excursion) reports that identify:
- a. all deviations (excursions) of the following emission limitations, operational restrictions and/or control device operating parameter limitations that restrict the potential to emit (PTE) of any regulated air pollutant and have been detected by the monitoring, record keeping and/or testing requirements in this permit:
 - i. An identification of each month during which the rolling, 12-month individual facility HAP emission rate exceeded the 5 tons/year rolling, 12-month individual facility HAP emission limitation, and the actual rolling, 12-month individual facility HAP emission rate for each such month.

- ii. An identification of each month during which the rolling, 12-month combined facility HAP emission rate exceeded the 12.5 tons/year rolling, 12-month combined facility HAP emission limitation, and the actual rolling, 12-month combined facility HAP emission rate for each such month.

If no deviations (excursions) occurred during a calendar quarter, the permittee shall submit a report that states that no deviations (excursions) occurred during the quarter.

The quarterly reports shall be submitted, electronically through Ohio EPA Air Services, each year by January 31 (covering October to December), April 30 (covering January to March), July 31 (covering April to June), and October 31 (covering July to September), unless an alternative schedule has been established and approved by the Director (the appropriate District Office or local air agency).

- (2) The permittee shall submit annual reports which specify the individual and/or combined HAP emissions from this emissions unit for the previous calendar year. The reports shall be submitted by April 15 of each year. This reporting requirement may be satisfied by including and identifying the specific emission data from this emissions unit in the annual Fee Emission Report.
- (3) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the director by the due date identified in the Authorization section of this permit. The permit evaluation report shall cover a reporting period of no more than twelve-months for each air contaminant source identified in this permit.

f) Testing Requirements

- (1) Compliance with the emission limitations in b)(1) of these terms and conditions shall be determined in accordance with the following methods:

a. Emission Limitation -

The OC emissions from this emissions unit shall not exceed 6.3 lbs/hour from coatings.

Applicable Compliance Method -

The hourly OC emissions limitation for coating materials shall be based upon multiplying the maximum coating usage of 1 gallon/hour by the maximum VOC coating content of the coatings (i.e., 6.30 lb-VOC/gallon).

b. Emission Limitation -

The OC emissions from this emissions unit shall not exceed 27.59 tons/year from coatings.

Applicable Compliance Method -

The annual OC emissions limitation for coating materials shall be based upon multiplying the hourly emissions limitation by 8760 hours per year and dividing by

2000 lbs/ton. Compliance shall be based on the record keeping requirements specified in d)(2).

c. Emission Limitation -

The OC emissions from cleanup operations shall not exceed 2.76 tons/year for emissions units K001, K002 and K003 combined.

Applicable Compliance Method -

The annual OC emissions limitation for cleanup operations shall be based upon multiplying the total combined cleanup material (i.e., 770 gallons/year) used for emissions units K001 through K003 by the maximum VOC coating content of the cleanup materials (i.e., 7.17 lb-VOC/gallon) and dividing by 2000 lbs/ton. Compliance shall be based on the record keeping requirements specified in d)(3).

d. Emission Limitation -

The facility wide emissions shall not exceed 5 tons of any one HAP per rolling 12-month period, or no more than 12.5 tons of any combination of HAPs per rolling 12-month period; and at least 90% of the facility wide emissions per rolling 12-month period are associated with the manufacture of wood furniture or wood furniture components.

Applicable Compliance Method -

Compliance shall be based on the record keeping requirements specified in d)(4).

g) Miscellaneous Requirements

- (1) This PTIO supersedes PTI 08-1084 issued 10/29/1986.
