CERTIFIED MAIL

RE: Final Title V Chapter 3745-77 permit

03-32-02-0187
ADM-Fostoria
Kyle Hutton
608 Findlay Road
P.O. Box 110
Fostoria, OH 44830

Dear Kyle Hutton:

Enclosed is the Title V permit that allows you to operate the facility in the manner indicated in the permit. Because this permit may contain several conditions and restrictions, we urge you to read it carefully.

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed with the Environmental Review Appeals Commission within thirty (30) days after notice of the Director's action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. It is also requested by the Director that a copy of the appeal be served upon the Environmental Enforcement Section of the Office of the Attorney General. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
236 East Town Street
Room 300
Columbus, Ohio 43215

If you have any questions, please contact Northwest District Office.

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

cc: Northwest District Office
File, DAPC PMU

State of Ohio Environmental Protection Agency

FINAL TITLE V PERMIT

Issue Date: 12/12/01	Effective Date: 12/12/01	Expiration Date: 12/12/06
-----------------------------	---------------------------------	----------------------------------

This document constitutes issuance of a Title V permit for Facility ID: 03-32-02-0187 to:
 ADM-Fostoria
 608 Findlay Road
 P.O. Box 110
 Fostoria, OH 44830

Emissions Unit ID (Company ID)/Emissions Unit Activity Description

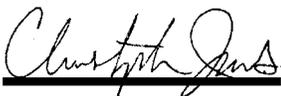

B001 (#1 Boiler) Murray Trane natural gas/oil boiler	P013 (Extraction) Oil extraction	P901 (Meal Loading to Truck) Meal loadout - truck
B004 (#2 Boiler) Cleaver Brooks natural gas/oil boiler	P017 (DTDC) Soybean meal desolventizing, drying, cooling	P902 (Meal Loading to Rail) Meal loadout - rail
F007 (Column Dryer) Column dryer for bean drying	P018 (Fluid Bed Dryer) Fluid bed drying, conditioning	P903 (Truck unloading) Soybean receiving - truck
P007 (Flaker Roller Mills) Flaking rolls	P020 (Pellet Cooler) Millfeed pellet cooler	P904 (Rail unloading) Soybean receiving - Rail, & transfer & conveying
P008 (Hull Grinder) Hull grinding	P021 (Dehulling Aspirators) Bean hull separating from meats	
P011 (Meal Grinding) Meal sifting & grinding	P022 (Material Conveyor) Flake conveyor	

You will be contacted approximately eighteen (18) months prior to the expiration date regarding the renewal of this permit. If you are not contacted, please contact the appropriate Ohio EPA District Office or local air agency listed below. This permit and the authorization to operate the air contaminant sources (emissions units) at this facility shall expire at midnight on the expiration date shown above. If a renewal permit is not issued prior to the expiration date, the permittee may continue to operate pursuant to OAC rule 3745-77-04(A) and in accordance with the terms of this permit beyond the expiration date, provided that a complete renewal application is submitted no earlier than eighteen (18) months and no later than one-hundred eighty (180) days prior to the expiration date.

Described below is the Ohio EPA District Office or local air agency that is responsible for processing and administering your Title V permit:

Northwest District Office
 347 North Dunbridge Road
 Bowling Green, OH 43402
 (419) 352-8461

OHIO ENVIRONMENTAL PROTECTION AGENCY

 Christopher Jones
 Director

PART I - GENERAL TERMS AND CONDITIONS

A. State and Federally Enforceable Section

1. Monitoring and Related Recordkeeping and Reporting Requirements

- a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
 - i. The date, place (as defined in the permit), and time of sampling or measurements.
 - ii. The date(s) analyses were performed.
 - iii. The company or entity that performed the analyses.
 - iv. The analytical techniques or methods used.
 - v. The results of such analyses.
 - vi. The operating conditions existing at the time of sampling or measurement.
- b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
 - i. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
 - ii. Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be promptly made to the appropriate Ohio EPA District Office or local air agency. These quarterly written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the submission of monitoring reports every six months and OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of all deviations except malfunctions, which shall be reported in accordance with OAC rule 3745-15-06. The written reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.) See B.8 below if no deviations occurred during the quarter.
 - iii. Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted to

the appropriate Ohio EPA District Office or local air agency every six months, i.e., by January 31 and July 31 of each year for the previous six calendar months. These semi-annual written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the reporting of any deviations related to the monitoring, recordkeeping, and reporting requirements. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.

- iv. Each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.

2. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports submitted pursuant to OAC rule 3745-15-06 shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of deviations caused by malfunctions or upsets.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

3. Risk Management Plans

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

4. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

5. Severability Clause

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

6. General Requirements

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.
- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, reopened, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

7. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78.

8. Marketable Permit Programs

No revision of this permit is required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in this permit.

9. Reasonably Anticipated Operating Scenarios

The permittee is hereby authorized to make changes among operating scenarios authorized in this permit without notice to the Ohio EPA, but, contemporaneous with making a change from one operating scenario to another, the permittee must record in a log at the permitted facility the scenario under which the permittee is operating. The permit shield provided in these general terms and conditions shall apply to all operating scenarios authorized in this permit.

10. Reopening for Cause

This Title V permit will be reopened prior to its expiration date under the following conditions:

- a. Additional applicable requirements under the Act become applicable to one or more emissions units covered by this permit, and this permit has a remaining term of three or more years. Such a reopening shall be completed not later than eighteen months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of OAC rule 3745-77-08.
- b. This permit is issued to an affected source under the acid rain program and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit, and shall not require a reopening of this permit.
- c. The Director of the Ohio EPA or the Administrator of the U.S. EPA determines that the federally applicable requirements in this permit are based on a material mistake, or that inaccurate statements were made in establishing the emissions standards or other terms and conditions of this permit related to such federally applicable requirements.
- d. The Administrator of the U.S. EPA or the Director of the Ohio EPA determines that this permit must be revised or revoked to assure compliance with the applicable requirements.

11. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA, the State, and citizens under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

12. Compliance Requirements

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this Title V permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.

- ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with paragraph (E) of OAC rule 3745-77-03.
 - iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
 - iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
- i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
- d. Compliance certifications concerning the terms and conditions contained in this permit that are federally enforceable emission limitations, standards, or work practices, shall be submitted to the appropriate Ohio EPA District Office or local air agency in the following manner and with the following content:
- i. Compliance certifications shall be submitted annually on a calendar year basis. The annual certification shall be submitted on or before April 30th of each year during the permit term.
 - ii. Compliance certifications shall include the following:
 - (a) An identification of each term or condition of this permit that is the basis of the certification.
 - (b) The permittee's current compliance status.
 - (c) Whether compliance was continuous or intermittent.
 - (d) The method(s) used for determining the compliance status of the source currently and over the required reporting period.
 - (e) Such other facts as the Director of the Ohio EPA may require in the permit to determine the compliance status of the source.
 - iii. Compliance certifications shall contain such additional requirements as may be specified pursuant to sections 114(a)(3) and 504(b) of the Act.

13. Permit Shield

- a. Compliance with the terms and conditions of this permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but

excluding terms and conditions for which the permit shield is expressly prohibited under OAC rule 3745-77-07) shall be deemed compliance with the applicable requirements identified and addressed in this permit as of the date of permit issuance.

- b. This permit shield provision shall apply to any requirement identified in this permit pursuant to OAC rule 3745-77-07(F)(2), as a requirement that does not apply to the source or to one or more emissions units within the source.

14. Operational Flexibility

The permittee is authorized to make the changes identified in OAC rule 3745-77-07(H)(1)(a) to (H)(1)(c) within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the Act [as defined in OAC rule 3745-77-01(JJ)], and does not result in an exceedance of the emissions allowed under this permit (whether expressed therein as a rate of emissions or in terms of total emissions), and the permittee provides the Administrator of the U.S. EPA and the appropriate Ohio EPA District Office or local air agency with written notification within a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions. If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the Administrator of the U.S. EPA and the appropriate District Office of the Ohio EPA or local air agency as soon as possible after learning of the need to make the change. The notification shall contain the items required under OAC rule 3745-77-07(H)(2)(d).

15. Emergencies

The permittee shall have an affirmative defense of emergency to an action brought for noncompliance with technology-based emission limitations if the conditions of OAC rule 3745-77-07(G)(3) are met. This emergency defense provision is in addition to any emergency or upset provision contained in any applicable requirement.

16. Off Permit Changes

The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:

- a. The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition;
- b. The permittee provides contemporaneous written notice of the change to the director and the administrator, except that no such notice shall be required for changes that qualify as insignificant emission levels or activities as defined in OAC rule 3745-77-01(U). Such written notice shall describe each such change, the date of such change, any change in emissions or

pollutants emitted, and any federally applicable requirement that would apply as a result of the change;

- c. The change shall not qualify for the permit shield under OAC rule 3745-77-07(F);
- d. The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes; and
- e. The change is not subject to any applicable requirement under Title IV of the Act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of rule 3745-77-07 of the Administrative Code applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit to install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that Chapter. Nothing in paragraph (I) of rule 3745-77-07 of the Administrative Code shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

(For further clarification, the permittee can refer to Engineering Guide #63 that is available in their STARSHIP software package.)

17. Compliance Method Requirements

Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Fed. Reg. 8314, Feb. 24, 1997), in the context of any future proceeding.

18. Insignificant Activity

Each insignificant activity that has one or more applicable requirements shall comply with those applicable requirements.

B. State Only Enforceable Section

1. Permit to Install Requirement

Prior to the “installation” or “modification” of any “air contaminant source,” as those terms are defined in OAC rule 3745-31-01, a permit to install must be obtained from the Ohio EPA pursuant to OAC Chapter 3745-31.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with

this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

Part II - Specific Facility Terms and Conditions

A. State and Federally Enforcable Section

None

B. State Only Enforceable Section

1. The following insignificant emissions units are located at this facility:

pellet loadout to truck (F006); N hexane storage (T003); S hexane storage (T004); soybean preheater (Z002); hull storage (Z005); hull storage (Z006); meal storage (Z007); meal storage (Z008); clay storage (Z009); pellet storage (Z010); central vacuum (Z011); rail to truck meal (Z012); parts washer (Z013); paved roads (Z014); and cooling towers (Z016); fuel oil storage tank (Z017); and whole grain rotex, suction hood and aspiration (Z018).

Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations as well as any emission limitations and/or control requirements contained within a PTI for the emissions unit.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: #1 Boiler (B001)
Activity Description: Murray Trane natural gas/oil boiler

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
52 mmBtu/hour, natural gas, no. 2 and no. 6 fuel oil-fired boiler	OAC rule 3745-17-10(B)	when combusting natural gas and/or no. 2 fuel oil, 0.020 pound particulate emissions (PE)/mmBtu of actual heat input
	OAC rule 3745-17-10(C)	when combusting no. 6 fuel oil, 0.365 pound PE/mmBtu of actual heat input
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-18-80(I)	1.2 pounds sulfur dioxide (SO ₂)/mmBtu of actual heat input
	OAC rule 3745-31-05(A) PTI 03-1615	273 tons sulfur dioxide (SO ₂)/year 55.6 tons particulate emissions (PE)/year 85 tons nitrogen oxides (NO _x)/year
		The requirements of this rule also include compliance with the requirements of OAC rules 3745-17-10(B), 3745-17-10(C), 3745-17-07(A) and 3745-18-80(I).

2. Additional Terms and Conditions

None

II. Operational Restrictions

- The permittee shall burn only natural gas, no. 2 and/or no. 6 fuel oil as fuel in this emissions unit.
- The quality of oil burned in this emissions unit shall meet, on an as-received basis, a sulfur content that is sufficient to comply with the allowable sulfur dioxide emission limitation of 1.2 lbs of SO₂/mmBtu of actual heat input.

III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel other than natural gas, no. 2 and/or no. 6 fuel oil, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.
2. For each shipment of oil received for burning in this emissions unit, the permittee shall maintain records of the total quantity of oil received, the permittee's or oil supplier's analyses for sulfur content and heat content, and the calculated sulfur dioxide emission rate (in lbs/mmBtu). (The sulfur dioxide emission rate shall be calculated in accordance with the formula specified in OAC rule 3745-18-04(F).) A shipment may be comprised of multiple tank truck loads from the same supplier's batch and the quality of the oil for those loads may be represented by a single batch analysis from the supplier.

The permittee shall collect or require the oil supplier to collect a representative grab sample for each shipment of oil that is received for burning in this emissions unit. The permittee shall perform or require the supplier to perform the analyses for sulfur content and heat content in accordance with 40 CFR Part 60, Appendix A, Method 19, or the appropriate ASTM methods (such as, ASTM methods D240, D4294, D6010), or equivalent methods as approved by the Director.

3. On any day when burning no. 6 fuel oil, the permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emission incident; and
 - e. any corrective actions taken to eliminate the visible emissions.
4. As an alternative to complying with the limitation of 1.2 pounds SO₂/mmBtu of actual heat input (when combusting number 2 fuel oil or crude vegetable oil), the permittee may opt to combust number 2 fuel oil or crude vegetable oil which contains no greater than 0.5 percent sulfur, by weight, in this emissions unit.

IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas, no. 2 and/or no. 6 fuel oil was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any record showing a deviation of the allowable SO₂ limitation specified in Section A.1. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 45 days after the deviation occurs.
3. The permittee shall submit semiannual written reports which (a) identify all days during which the recorded visible particulate emissions were observed from this emissions unit while burning number 6 oil and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitation:
0.020 pound PE/mmBtu of actual heat input

Applicable Compliance Method:

For the combustion of natural gas, the permittee may determine compliance by multiplying the AP-42, Table 1.4-2 (revised 7/98) emission factor of 1.9 pounds PE (filterable)/million cubic feet of natural gas by the emissions unit's maximum hourly fuel consumption rate (million cubic feet/hour), and then dividing by the emissions unit's maximum heat input capacity (million Btu/hour).

For the combustion of no. 2 fuel oil, the permittee may determine compliance by multiplying the AP-42, Table 1.3-1 (revised 9/98) emission factor of 2 pounds PE (filterable)/1000 gallons of no. 2 fuel oil by the emissions unit's maximum hourly fuel consumption rate (gallons/hour), and then dividing by the emissions unit's maximum heat input capacity (million Btu/hour).

If required, the permittee shall demonstrate compliance with the PE limitation above in accordance with the methods specified in OAC 3745-17-03(B)(9).

- 1.b** Emission Limitation:
0.365 pound PE/mmBtu of actual heat input (when combusting no. 6 fuel oil)

Applicable Compliance Method:

The permittee may determine compliance by multiplying the AP-42, Table 1.3-1 (revised 9/98) emission factor of 10 pounds PE (filterable)/1000 gallons of no. 6 fuel oil by the emissions unit's maximum hourly fuel consumption rate (gallons/hour), and then dividing by the emissions unit's maximum heat input capacity (million Btu/hour).

If required, the permittee shall demonstrate compliance with the PE limitation above in accordance with the methods specified in OAC 3745-17-03(B)(9).

- 1.c** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a 6-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

- 1.d** Emission Limitation:
1.2 pounds SO₂/mmBtu of actual heat input

Applicable Compliance Method:

When firing fuel oil, except as provided below, compliance with the allowable SO₂ emission limitation shall be demonstrated by documenting that the sulfur content of each shipment of oil received during a calendar month meets the limitation.

When firing natural gas, compliance with this limitation will be assumed due to the negligible percent sulfur, by weight, in the fuel.

If required, the permittee shall demonstrate compliance with this emission limitation in accordance with the methods specified in 40 CFR, Part 60, Appendix A, Method 6.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: #2 Boiler (B004)
Activity Description: Cleaver Brooks natural gas/oil boiler

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
69 mmBtu/hour, natural gas, no. 2 fuel oil and crude vegetable oil-fired boiler	OAC rule 3745-17-10(B)	when combusting natural gas, 0.020 pound particulate emissions (PE)/mmBtu of actual heat input
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-18-06(D)	The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
	OAC rule 3745-31-05 (PTI No. 03-3905)	when combusting no. 2 fuel oil and/or crude vegetable oil: 0.09 pound PE/mmBtu of actual heat input 1.04 pounds SO ₂ /mmBtu of actual heat input when combusting natural gas: 0.37 pound nitrogen oxides (NO _x)/mmBtu of actual heat input The requirements of this rule also include compliance with the requirements of OAC rules 3745-17-10(B) and 3745-17-07(A).

2. Additional Terms and Conditions

None

II. Operational Restrictions

1. The permittee shall burn only natural gas, no. 2 fuel oil and/or crude vegetable oil as fuel in this emissions unit.
2. The quality of oil burned in this emissions unit shall meet, on an as-received basis, a sulfur content that is sufficient to comply with the allowable SO₂ emission limitation of 1.04 lbs/mmBtu of actual heat input. The no. 2 fuel oil shall also meet the following specifications for each shipment:
 - a. a minimum heating value of 128,440 Btu/gallon; and
 - b. a maximum sulfur content of 1.0 percent, by weight.
3. The permittee shall comply with the following fuel usage restrictions for this emissions unit:
 - a. if, during any rolling, 12-month period, only no. 2 fuel oil and/or crude vegetable oil are combusted, the permittee shall combust no more than 500,000 gallons of oil during that period;
 - b. if, during any rolling, 12-month period, only natural gas is combusted, the permittee shall combust no more than 557 million cubic feet of natural gas during that period; and
 - c. if, during any rolling, 12-month period, both no. 2 fuel oil/crude vegetable oil and natural gas are combusted, the permittee shall limit the fuel combustion to 500,000 gallons of oil and 361 million cubic feet of natural gas during that period.

III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel other than natural gas, no. 2 fuel oil and/or crude vegetable oil, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.
2. For each shipment of oil received for burning in this emissions unit, the permittee shall maintain records of the total quantity of oil received, the permittee's or oil supplier's analyses for sulfur content and heat content, and the calculated sulfur dioxide emission rate (in lbs/mmBtu). (The sulfur dioxide emission rate shall be calculated in accordance with the formula specified in OAC rule 3745-18-04(F).) A shipment may be comprised of multiple tank truck loads from the same supplier's batch and the quality of the oil for those loads may be represented by a single batch analysis from the supplier.

The permittee shall collect or require the oil supplier to collect a representative grab sample for each shipment of oil that is received for burning in this emissions unit. The permittee shall perform or require the supplier to perform the analyses for sulfur content and heat content in accordance with 40 CFR Part 60, Appendix A, Method 19, or the appropriate ASTM methods (such as, ASTM methods D240, D4294, D6010), or equivalent methods as approved by the Director.
3. The permittee shall maintain monthly records of the following information for this emissions unit:
 - a. the quantity of no. 2 fuel oil combusted, in gallons;
 - b. the rolling, 12-month summation of the monthly no. 2 fuel oil usage rates, in gallons;
 - c. the quantity of crude vegetable oil combusted, in gallons;
 - d. the rolling, 12-month summation of the monthly crude vegetable oil usage rates, in gallons;
 - e. the quantity of natural gas combusted, in cubic feet; and
 - f. the rolling, 12-month summation of the monthly natural gas usage rates, in million cubic feet.
4. As an alternative to complying with the limitation of 1.2 pounds SO₂/mmBtu of actual heat input (when combusting number 2 fuel oil and/ or crude vegetable oil), the permittee may opt to combust number 2 fuel oil and/or crude vegetable oil that contains no greater than 0.5 percent sulfur, by weight, in this emissions unit.

IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas, no. 2 fuel oil and/or crude vegetable oil were burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
2. The permittee shall notify the Director (appropriate Ohio EPA District Office or local air agency) in writing of any record which shows a deviation of the allowable SO₂ limitation specified in Section A.1 of this permit. The notification shall include a copy of such record and shall be sent to the Director (appropriate Ohio EPA District Office or local air agency) within 30 days after the deviation occurs.
3. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the annual natural gas, no. 2 fuel oil and/or crude vegetable oil usage restrictions, based upon rolling, 12-month summations. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
4. The permittee shall submit deviation (excursion) reports that identify all shipments of no. 2 fuel oil and/or crude vegetable oil for which the heat content and/or the sulfur content of the no. 2 fuel oil and/or crude vegetable oil did not meet the restrictions specified in Sections A.II.2.a and b, respectively, of this permit. Each report shall be submitted within 30 days after the deviation occurs.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitation:
0.020 pound PE/mmBtu of actual heat input (when combusting natural gas)

Applicable Compliance Method:

The permittee may determine compliance by multiplying the AP-42, Table 1.4-2 (revised 7/98) emission factor of 1.9 pounds PE (filterable)/million cubic feet of natural gas by the emissions unit's maximum hourly fuel consumption rate (million cubic feet/hour), and then dividing by the emissions unit's maximum heat input capacity (million Btu/hour).

If required, the permittee shall demonstrate compliance with the PE limitation above in accordance with the methods specified in OAC 3745-17-03(B)(9).

- 1.b Emission Limitation:
0.09 pound PE/mmBtu of actual heat input (when combusting no. 2 fuel oil and/or crude vegetable oil)

Applicable Compliance Method:

The permittee may determine compliance by multiplying the AP-42, Table 1.3-1 (revised 9/98) emission factor of 2 pounds PE (filterable)/1000 gallons of oil by the emissions unit's maximum hourly fuel consumption rate (gallons/hour), and then dividing by the emissions unit's maximum heat input capacity (million Btu/hour).

If required, the permittee shall demonstrate compliance with the PE limitation above in accordance with the methods specified in OAC 3745-17-03(B)(9).

- 1.c Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a 6-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

V. Testing Requirements (continued)

- 1.d** Emission Limitation:
1.04 pounds SO₂/mmBtu of actual heat input

Applicable Compliance Method:

When firing no. 2 fuel oil, except as provided below, compliance with the allowable SO₂ emission limitation shall be demonstrated by documenting that the sulfur content of each shipment of oil received during a calendar month meets the limitation.

When firing natural gas, compliance with this limitation will be assumed due to the negligible percent sulfur, by weight, in the fuel.

If required, the permittee shall demonstrate compliance with this emission limitation in accordance with the methods specified in 40 CFR Part 60, Appendix A, Method 6.

- 1.e** Emission Limitation:
0.37 pound NO_x/mmBtu of actual heat input (when combusting natural gas)

Applicable Compliance Method:

The permittee may determine compliance with the limitation above by multiplying the AP-42, Table 1.4-1 (revised 7/98) emission factor of 100 pounds NO_x/million cubic feet of natural gas by the emissions unit's maximum hourly fuel consumption rate (million cubic feet/hour), and then dividing by the emissions unit's maximum heat input capacity (million Btu/hour).

If required, the permittee shall demonstrate compliance with the NO_x limitation above in accordance with the methods specified in 40 CFR, Part 60, Appendix A, Methods 1 through 4 and 7.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Column Dryer (F007)
Activity Description: Column dryer for bean drying

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
5,000 bushel/hour, column grain dryer, with enclosed conveying	40 CFR, Part 60, Subpart DD OAC rule 3745-31-05(A) PTI # 03-13219	See A.I.2.a. 107.25 tons particulate emissions (PE)/year (fugitive), 26.81 tons PM10/year (fugitive) 3.62 pounds nitrogen oxides (NOx)/hour, 11.76 tons NOx/year 3.04 pounds carbon monoxide (CO)/hour, 9.88 tons CO/year Visible emission shall not exceed 20 percent opacity, as a 3-minute average. The requirements of this rule also include compliance with the requirements of 40 CFR, Part 60, Subpart DD.

2. Additional Terms and Conditions

- 2.a Column plate perforation diameter shall not exceed 0.094 inch.
- 2.b This facility is not located within the areas identified in "Appendix A" of OAC rule 3745-17-08 (it is located in Hancock County). Therefore, the requirements of OAC rule 3745-17-08(B) do not apply to this emissions unit.
- 2.c This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).

II. Operational Restrictions

1. This emissions unit shall not operate in excess of 6,500 hours annually.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall maintain monthly records of the number of hours this emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall submit annual reports that summarize the number of hours this emissions unit was in operation. This report shall be submitted by January 31 of each year and shall cover the previous calendar year.

V. Testing Requirements

1. Compliance with the emission limitations in this permit shall be determined in accordance with the following methods:

- 1.a Emission Limitation:
107.25 tons PE/year

Applicable Compliance Method:

Compliance with annual allowable PE limitation shall be determined by multiplying the emission factor of 0.22 pound PE/ton (AP-42, Table 9.9.1 (revised 5/98) by the annual number of hours the emissions unit was in operation (this is calculated by summing the 12 monthly numbers of hours the emissions unit was in operation (from Section A.III.1) for the calendar year), and then multiplying by the maximum hourly production rate (tons/hour).

- 1.b Emission Limitation:
26.81 tons PM10/year

Applicable Compliance Method:

Compliance with annual allowable PM10 emission limitation shall be determined by multiplying the emission factor of 0.055 pound PM10/ton (AP-42, Table 9.9.1 (revised 5/98) by the annual number of hours the emissions unit was in operation (this is calculated by summing the 12 monthly numbers of hours the emissions unit was in operation (from Section A.III.1) for the calendar year), and then multiplying by the maximum hourly production rate (tons/hour).

- 1.c Emission Limitations:
3.62 pounds NOx/hour, 11.76 tons NOx/year

Applicable Compliance Method:

Compliance with the hourly allowable NOx emission limitation may be determined by multiplying the natural gas emission factor of 100 pounds NOx/mm cu. ft (AP-42, Table 1.4-1 (revised 3/98) by the maximum natural gas combustion rate (mm cu. ft/hr).

Compliance with the annual allowable NOx emission limitation shall be assumed as long as compliance with the hourly emission limitation and the annual number of hours restriction are maintained (the annual emission limitation was calculated by multiplying the hourly emission limitation by 6,500, and then dividing by 2000).

- 1.d Emission Limitations:
3.04 pounds CO/hour, 9.88 tons CO/year

Applicable Compliance Method:

Compliance with the hourly allowable CO emission limitation may be determined by multiplying the natural gas emission factor of 84 pound CO/mm cu. ft (AP-42, Table 1.4-1 (revised 3/98) by the maximum natural gas combustion rate (mm cu. ft/hr).

Compliance with the annual allowable CO emission limitation shall be assumed as long as compliance with the hourly emission limitation and the annual number of hours restriction are maintained (the annual emission limitation was calculated by multiplying the hourly emission limitation by 6,500, and then dividing by 2000).

- 1.e Emission Limitation:
20 percent opacity, as a 3-minute average

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with 40 CFR, Part 60, Appendix A, Method 9.

Facility Name: **ADM-Fostoria**

Emissions Unit ID: Meal Grinding (P011)
Activity Description: Meal sifting & grinding

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
meal grinders, with baghouse	OAC rule 3745-17-11(B)	24.7 pounds particulate emissions (PE)/hour
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (BFP011) to control all the PE from this emissions unit.

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 0.5 to 5 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

IV. Reporting Requirements

1. The permittee shall submit quarterly deviation reports that identify all recorded periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitation:
24.7 pounds PE/hour

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable PE limitation by multiplying the maximum throughput (tons/hour)* by the emission factor from AP-42, Table 9.11.1-1 (revised 11/95) of 2.27 lbs PE/ton, and then multiplying by the baghouse control factor (1-0.99).**

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation above shall be OAC rule 3745-17-03(B)(10).

* as included in the Title V permit application (claimed confidential by the applicant)

** The estimated baghouse control efficiency is 99%.

- 2.b** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

hexane oil extraction operation	OAC rule 3745-21-07(G)	none (Refer to Section A.II.1 of the terms and conditions of this permit.)
	40 CFR, Part 63, Subpart GGGG	0.2 gallon hexane/ton soybeans processed (based on a rolling, 12-month weighted average)
		See Section A.I.2.a.

2. Additional Terms and Conditions

- 2.a This emissions unit, which is an existing source in accordance with 40 CFR, Part 63, shall achieve compliance with the emission limitation of 0.2 gallon hexane/ton soybeans processed (specified by 40 CFR, Part 63, Subpart GGGG) by April 12, 2004.

II. Operational Restrictions

1. The permittee shall not employ any liquid organic material in this emissions unit that is a photochemically reactive material. "Photochemically reactive material" is defined in OAC rule 3745-21-01(C)(5).
2. In accordance with the provisions in 40 CFR, Part 63, Section 63.2852, the permittee shall develop a written startup, shutdown and malfunction (SSM) plan by the compliance date. The permittee shall implement the plan, when applicable. The permittee shall complete the SSM plan before the compliance date for this emissions unit. The permittee shall keep the SSM plan on-site and readily available as long as this emissions unit is operational. The SSM plan shall provide detailed procedures for operating and maintaining this emissions unit to minimize emissions during a qualifying SSM event for which the permittee chooses Section 63.2850(e)(2) malfunction period, or Section 63.2850(c)(2) or (d)(2) initial startup period. The SSM plan must specify a program of corrective action for malfunctioning process and air pollution control equipment and reflect the best practices now in use by the industry to minimize emissions. Some or all of the procedures may come from plans the permittee has developed for other purposes such as a Standard Operating Procedure manual or an Occupational Safety and Health Administration Process Safety Management plan. To qualify as a SSM plan, other such plans must meet all the applicable requirements of this NESHAP.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall maintain the following information each month for this emissions unit:
 - a. the company identification of each liquid organic material employed; and
 - b. documentation on whether or not each liquid organic material employed is a photochemically reactive material.
2. When this emissions unit has processed soybeans for 12 operating months following the compliance date in the MACT regulations, the permittee shall begin calculating the compliance ratio (which compares the actual HAP (n-hexane) loss to the allowable HAP (n-hexane) loss for the previous 12 operating months) by the end of each calendar month following an operating month (refer to A.III.1.a below) considering the following conditions and exclusions:
 - 2.a if the emissions unit processes any quantity of soybeans in a calendar month and the emissions unit is not operating under an initial startup period (subject to 40 CFR, Part 63, Section 63.2850(c)(2) or (d)(2)) or malfunction period (subject to 40 CFR, Part 63, Section 63.2850(e)(2)), then the permittee must categorize the month as an operating month;
 - 2.b the 12-month compliance ratio may include operating months occurring prior to the emissions unit shutdown and operating months that follow after the emissions unit resumes operation;
 - 2.c if the emissions unit shuts down and processes no soybeans for an entire calendar month, then the permittee must categorize the month as a nonoperating month, as defined in 40 CFR, Part 63, Section 63.2872 (exclude any nonoperating months from the compliance ratio determination);
 - 2.d if the emissions unit is subject to an initial startup period as defined in 40 CFR, Part 63, Section 63.2872, exclude from the compliance ratio determination any solvent (hexane) and soybean information recorded for the initial startup period;
 - 2.e if the emissions unit is subject to a malfunction period as defined in 40 CFR, Part 63, Section 63.2872, exclude from the compliance ratio determination any solvent (hexane) and soybean information recorded for the malfunction period;
 - 2.f the solvent (hexane) loss factor used to determine the compliance ratio may change each operating month depending on the tons of soybeans processed during all normal operating periods in a 12 operating month period; and
 - 2.g if the compliance ratio is less than or equal to 1.0, the emissions unit was in compliance with the HAP (n-hexane) emission requirements for the previous operating month.
3. By the compliance date in the MACT regulations, in accordance with 40 CFR, Part 63, Section 63.2851, the permittee shall develop and implement a plan for demonstrating compliance. In this plan, the permittee shall describe the procedures that will be followed in obtaining and recording data, and determining compliance under normal operations. The permittee shall complete the plan before the compliance date for this emissions unit and keep it on site and readily available as long as this emissions unit is operational. The plan shall include the following information:
 - 3.a the name and address of the owner or operator;
 - 3.b the physical address of the vegetable oil production process;
 - 3.c a detailed description of all methods of measurement the permittee will use to determine the solvent losses, HAP (n-hexane) content of solvent (hexane), and the tons of soybeans processed;
 - 3.d when each measurement will be made;
 - 3.e examples of each calculation the permittee will use to determine the compliance status (include examples of how the permittee will convert data measured with one parameter to other terms for use in compliance determination);
 - 3.f example logs of how data will be recorded; and
 - 3.g a plan to ensure that the data continue to meet compliance demonstration needs.

III. Monitoring and/or Record Keeping Requirements (continued)

4. For periods of normal operation (i.e., for each operating month), the permittee shall maintain the following records, beginning on the compliance date in the MACT regulations:
 - 4.a determine and record the extraction solvent (hexane) loss, in gallons, from this emissions unit;
 - 4.b record the volume fraction of HAP (n-hexane) present at greater than 1 percent, by volume, and gallons of extraction solvent (hexane), in each shipment received;
 - 4.c determine and record the tons of soybeans processed by this emissions unit;
 - 4.d determine the weighted average volume fraction of HAP (n-hexane) in extraction solvent (hexane) received as described in 40 CFR, Part 63, Section 63.2854 by the end of the following calendar month; and
 - 4.e determine and record the actual solvent (hexane) loss, weighted average volume fraction HAP (n-hexane), soybeans processed and compliance ratio for each 12 operating months period as described in 40 CFR, Part 63, Section 63.2840 by the end of the following calendar month.
5. For initial startup periods subject to 40 CFR, Part 63, Section 63.2850(c)(2) or (d)(2), the permittee shall maintain the following records, beginning on the compliance date in the MACT regulations:
 - 5.a the permittee shall operate and maintain this emissions unit in accordance with the SSM plan;
 - 5.b determine and record the extraction solvent (hexane) loss, in gallons, from this emissions unit; and
 - 5.c record the volume fraction of HAP (n-hexane) present at greater than 1 percent, by volume, and gallons of extraction solvent (hexane), in shipment received.
6. If this emissions unit processes any soybeans, the permittee shall record the following information, beginning on the compliance date in the MACT regulations:
 - 6.a For the solvent (hexane) inventory, record the following information in accordance with the permittee's plan for demonstrating compliance:
 - i. dates that define each operating status period during a calendar month;
 - ii. the operating status of this emissions unit such as normal operation, nonoperating, initial startup period, malfunction period, or exempt operation for each recorded time interval;
 - iii. record the gallons of extraction solvent (hexane) in the inventory on the beginning and ending dates of each normal operating period;
 - iv. the gallons of all extraction solvent (hexane) received, purchased, and recovered during each calendar month;
 - v. all extraction solvent (hexane) inventory adjustments, additions or subtractions (the permittee must document the reason for the adjustment and justify the quantity of the adjustment);
 - vi. the total solvent (hexane) loss for each calendar month, regardless of this emissions unit's operating status; and
 - vii. the actual solvent (hexane) loss in gallons for each operating month.
 - 6.b For the weighted average volume fraction of HAP (n-hexane) in the extraction solvent, the permittee shall record the following information:
 - i. the gallons of extraction solvent (hexane) received in each delivery;
 - ii. the volume fraction of each HAP (n-hexane) exceeding 1 percent by volume in each delivery of extraction solvent (hexane); and
 - iii. the weighted average volume fraction of HAP (n-hexane) in extraction solvent (hexane) received since the end of the last operating month as determined in accordance with 40 CFR, Part 63, Section 63.2854(b)(2).

III. Monitoring and/or Record Keeping Requirements (continued)

- 6.c** Record the following information in accordance with the permittee's plan for demonstrating compliance:
- i. the dates that define each operating status period (these dates must be the same as the dates entered for the extraction solvent (hexane) inventory);
 - ii. the operating status of this emissions unit such as normal operation, nonoperating, initial startup period, malfunction period, or exempt operation for each recorded time interval;
 - iii. the soybean inventory on the beginning and ending dates of each normal operating period;
 - iv. the tons of soybeans received at this emissions unit during each normal operating period;
 - v. all soybean adjustments, additions or subtractions for normal operating period (the permittee shall document the reason for the adjustment and justify the quantity of the adjustment); and
 - vi. the tons of soybeans processed during each operating month.
- 6.d** After this emissions unit has processed soybeans for 12 operating months, and the permittee is not operating during an initial startup period as described in 40 CFR, Part 63, Section 63.2850(c)(2) or (d)(2), or a malfunction period as described in Section 63.2850(e)(2), the permittee shall record the following information by the end of the calendar month following each operating month, beginning on the compliance date:
- i. the 12 operating months rolling sum of the actual solvent (hexane) loss in gallons as described in Section 63.2853(c);
 - ii. the weighted average volume fraction of HAP (n-hexane) in extraction solvent (hexane) received for the previous 12 operating months as described in Section 63.2854(b)(3);
 - iii. the 12 operating months rolling sum of soybeans processed at this emissions unit in tons as described in Section 63.2855(c);
 - iv. a determination of the compliance ratio (using the values from Sections 63.2853, 63.2854, 63.2855, and Table 1 of Section 63.2840, calculate the compliance ratio using Equation 2 of Section 63.2840); and
 - v. a statement of whether this emissions unit is in compliance with all of the requirements of 40 CFR, Part 63, Subpart GGGG. This includes a determination of whether the permittee has met all of the applicable requirements in Section 63.2850.
- 6.e** For each SSM event subject to an initial startup period as described in 40 CFR, Part 63, Section 63.2850(c)(2) or (d)(2), or a malfunction period as described in Section 63.2850(e)(2), the permittee shall record the following information by the end of the calendar month following each month in which the initial startup period or malfunction period occurred, beginning on the compliance date:
- i. a description and date of the SSM event, its duration, and reason it qualifies as an initial startup or malfunction;
 - ii. an estimate of the solvent (hexane) loss in gallons for the duration of the initial startup or malfunction period with supporting documentation; and
 - iii. a checklist or other mechanism to indicate whether the SSM plan was followed during the initial startup or malfunction period.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying liquid organic materials (i.e., photochemically reactive materials) in this emissions unit. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days of the date of the daily record indicating noncompliance.

IV. Reporting Requirements (continued)

- 2.** The permittee shall submit the initial notification for existing sources in accordance with 40 CFR, Part 63, Section 63.2860. This is a one-time notification submitted to the Director (the appropriate District Office or local air agency) no later than 120 days after the effective date of 40 CFR, Part 63, Subpart GGGG, which includes the following information:
 - 2.a** the name and address of the owner or operator;
 - 2.b** the physical address of the vegetable oil production process;
 - 2.c** identification of the relevant standard, such as the vegetable oil production NESHAP, and compliance date;
 - 2.d** a brief description of the emissions unit including the types of listed oilseeds (e.g., soybeans) processed, nominal operating capacity, and type of desolventizer(s) used; and
 - 2.e** a statement designating the emissions unit as a major source of HAP (n-hexane) or a demonstration that the emissions unit meets the definition of an area source. An area source is an emissions unit that is not a major source and is not collocated within a plant site with other emissions units that are individually or collectively a major source.
- 3.** The permittee shall submit the initial notification for significant modifications to existing or new sources prior to any such modification (refer to 40 CFR, Part 63, Section 63.2860).
- 4.** The permittee shall submit a notification of compliance status for the MACT regulations once compliance is achieved in accordance with 40 CFR, Part 63, Section 63.2860. The permittee shall submit a notification of compliance status report to the Director (appropriate District Office or local air agency) no later than 60 days after determining the initial 12 operating months compliance ratio. If the emissions unit is an existing source, the permittee should submit this notification no later than 50 calendar months after the effective date of these NESHAP (36 calendar months for compliance, 12 operating months to record data, and 2 calendar months to complete the report). If the emissions unit is a new or reconstructed source, the notification of compliance status is generally due no later than 20 calendar months after initial startup (6 calendar months for the initial startup period, 12 operating months to record data, and 2 calendar months to complete the report). The notification of compliance status must contain the following information:
 - 4.a** the name and address of the owner or operator;
 - 4.b** the physical address of the vegetable oil production process;
 - 4.c** each listed oilseed type (e.g., soybeans) processed during the 12 calendar months period covered by the report;
 - 4.d** each HAP (n-hexane) identified under Section 63.2854(a) as being present in concentrations greater than 1 percent by volume in each delivery of solvent (hexane) received during the 12 calendar months period covered by the report;
 - 4.e** a statement designating the emissions unit as a major source of HAP (n-hexane) or a demonstration that the emissions unit qualifies as an area source (an area source is an emissions unit that is not a major source and is not collocated within a plant site with other emissions units that are individually or collectively a major source); and
 - 4.f** a compliance certification to indicate whether the emissions unit was in compliance for each compliance determination made during the 12 calendar months period covered by the report. For each such compliance determination, the permittee must include a certification of the following information:
 - i.** the permittee is following the procedures described in the plan for demonstrating compliance; and
 - ii.** the compliance ratio is less than or equal to 1.00.
- 5.** Beginning on the compliance date in the MACT regulations, the permittee shall submit deviation notification reports for each compliance determination the permittee makes in which the compliance ratio exceeds 1.00 as determined in 40 CFR, Part 63, Section 63.2840(c). The permittee shall submit the deviation report by the end of the month following the calendar month in which the permittee determined the deviation. The deviation notification report must include the following items:

IV. Reporting Requirements (continued)

- 5.a** the name and address of the owner or operator;
- 5.b** the physical address of the vegetable oil production process;
- 5.c** each listed oilseed type (e.g., soybeans) processed during the 12 operating months period for which the permittee determined the deviation;
- 5.d** the compliance ratio comprising the deviation. The permittee may reduce the frequency of submission of the deviation notification report if the agency responsible for this NESHAP does not object as provided in Section 63.10(e)(3)(iii).
- 6.** Beginning on the compliance date in the MACT regulations, the permittee shall submit periodic startup, shutdown and malfunction (SSM) reports in accordance with 40 CFR, Part 63, Section 63.2861(c). If the permittee chooses to operate this emissions unit under an initial startup period subject to Section 63.2850(c)(2) or (d)(2) or a malfunction period subject to Section 63.2850(e)(2), the permittee must submit a periodic SSM report by the end of the calendar month following each month in which the initial startup period or malfunction period occurred. The periodic SSM report must include the following information:
 - 6.a** the name, title, and signature of the facility's responsible official who is certifying that the report accurately states that all actions taken during the initial startup or malfunction period were consistent with the emissions unit's SSM plan;
 - 6.b** a description of events occurring during the time period, the date and duration of the events, and reason the time interval qualifies as an initial startup period or malfunction period; and
 - 6.c** an estimate of the solvent (hexane) loss during the initial startup or malfunction period with supporting documentation.
- 7.** Beginning on the compliance date in the MACT regulations, the permittee shall submit immediate SSM reports in accordance with 40 CFR, Part 63, Section 63.2861(d). If the permittee handles a SSM during an initial startup period subject to Section 63.2850(c)(2) or (d)(2) or a malfunction period subject to Section 63.2850(e)(2) differently from procedures in the SSM plan, then the permittee must submit an immediate SSM report. Immediate SSM reports consist of a telephone call or facsimile transmission to the Director (appropriate District Office or local air agency) within 2 working days after starting actions inconsistent with the SSM plan, followed by a letter within 7 working days after the end of the event. The letter must include the following information:
 - 7.a** the name, title, and signature of a facility's responsible official who is certifying the accuracy of the report, an explanation of the event, and the reasons for not following the emissions unit's SSM plan;
 - 7.b** a description and date of the SSM event, its duration, and reason it qualifies as a SSM; and
 - 7.c** an estimate of the solvent (hexane) loss for the duration of the SSM event with supporting documentation.

V. Testing Requirements

- 1.** Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

Emission Limitation:

0.20 gallon hexane/ton crushed soybeans, based on a 12-month rolling, weighted average

Applicable Compliance Method:

The permittee shall demonstrate compliance with the hexane emission limitation above based upon the record keeping required in Section A.III of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: DTDC (P017)

Activity Description: Soybean meal desolventizing, drying, cooling

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
DTDC, with 3 cyclones	OAC rule 3745-31-05 (PTI No. 03-2231)	0.24 pound particulate emissions (PE)/hour (from dryer deck #1)
		0.28 pound PE/hour (from dryer deck #2)
		0.59 pound PE/hour (from the cooler deck)
	OAC rule 3745-17-11(B)	none (Refer to section A.I.2.a of the terms and conditions of this permit.)
	OAC rule 3745-17-07(A)	none (Refer to section A.I.2.b of the terms and conditions of this permit.)

2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of PE from this emissions unit is less than 10 pounds/hour. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. In addition, Table I of OAC rule 3745-17-11 does not apply because the facility is located in Hancock County, which is identified as a P-2 county.
- 2.b This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.c The permittee shall employ 3 cyclones (CYP017A, CYP017B and CYP017C) to control all the PE from the desolventizer toaster, dryer, and cooler (DTDC) portions of this process.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the cyclones serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emission incident; and
 - e. any corrective actions taken to eliminate the visible emissions.

IV. Reporting Requirements

1. The permittee shall submit semiannual written reports that (a) identify all days during which any visible particulate emissions were observed from the cyclones serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:
 - 1.a The emission testing shall be conducted within 6 months following the issuance of this permit.
 - 1.b The emission testing shall be conducted to demonstrate compliance with the allowable mass emission rates for PE.
 - 1.c The following test method(s) shall be employed to demonstrate compliance with the allowable mass emission rates: Methods 1 - 5, 40 CFR, Part 60, Appendix A.
 - 1.d The test(s) shall be conducted while the emissions unit is operating at or near its maximum capacity, unless otherwise specified or approved by the appropriate Ohio EPA District Office or local air agency.
2. Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission test(s).

Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the appropriate Ohio EPA District Office or local air agency.

3. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

Emission Limitations:

0.24 pound PE/hour (from dryer deck #1)

0.28 pound PE/hour (from dryer deck #2)

0.59 pound PE/hour (from the cooler deck)

Applicable Compliance Method:

The permittee shall demonstrate compliance with the hourly allowable PE limitations above based upon the results of emission testing conducted in accordance with Methods 1 - 5, 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Fluid Bed Dryer (P018)
Activity Description: Fluid bed drying, conditioning

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
fluid bed dryer, with cyclone	OAC rule 3745-17-11(B)	none (Refer to section A.I.2.a of the terms and conditions of this permit.)
	OAC rule 3745-17-07(A)	none (Refer to section A.I.2.b of the terms and conditions of this permit.)
	OAC rule 3745-31-05 (PTI No. 03-13224)	9.5 pounds particulate emissions (PE)/hour (including PM10) 41.61 tons PE/year (including PM10) 3.36 lbs PM10/hour 14.72 tons PM10/year Visible emissions shall not exceed 20% opacity, as a six-minute average.

2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of PE from this emissions unit is less than 10 pounds/hour. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. In addition, Table I of OAC rule 3745-17-11 does not apply because the facility is located in Hancock County, which is identified as a P-2 county.
- 2.b This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.c The permittee shall employ a cyclone (CYP018) to control the all the PE from this emissions unit.

II. Operational Restrictions

1. The pressure drop across the cyclone shall be maintained within the range of 1 to 6 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the cyclone while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the cyclone on a daily basis.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all recorded periods of time during which the pressure drop across the cyclone did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitations:
9.5 pounds PE/hour, 41.61 tons PE/year

Applicable Compliance Method:

The permittee shall demonstrate compliance with the hourly allowable PE limitation by multiplying the air flow rate (28,000 cubic feet/minute) by the manufacturer-guaranteed emission rate (0.014 grain/standard cubic foot), then multiplying this value by 60 minutes/hour then dividing by 7000 grains/pound.

Compliance with the annual allowable PE limitation shall be assumed as long as compliance with the hourly limitation is maintained (the annual limitation was calculated by multiplying the hourly limitation by 8760, and then dividing by 2000).

If required, the permittee shall demonstrate compliance with the hourly allowable PE limitation in accordance with Methods 1 through 5 of 40 CFR, Part 60, Appendix A.

- 1.b Emission Limitations:
3.36 pounds PM10/hour, 14.72 tons PM10/year

Applicable Compliance Method:

The permittee shall demonstrate compliance with the hourly allowable PM10 emission limitation by multiplying the hourly PE rate by 0.35 (the testing-derived percentage of PM10).

Compliance with the annual allowable PM10 emission limitation shall be assumed as long as compliance with the hourly allowable PM10 emission limitation is maintained (the annual limitation was calculated by multiplying the hourly limitation by 8760, and then dividing by 2000).

If required, the permittee shall demonstrate compliance with the hourly allowable PM10 emission limitation in accordance with Methods 1 through 5 of 40 CFR, Part 60, Appendix A, including the back half of the filter, or Methods 201, or 201 A of 40 CFR, Part 51, Appendix A.

- 1.c Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Pellet Cooler (P020)
Activity Description: Millfeed pellet cooler

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
pellet cooler, with cyclone	OAC rule 3745-31-05 (PTI No. 03-9408)	2.9 pounds particulate emissions (PE)/hour
	OAC rule 3745-17-11(B)	1.5 pounds PM10/hour Refer to section A.I.2.a of the terms and conditions of this permit.
	OAC rule 3745-17-07(A)	Refer to section A.I.2.b of the terms and conditions of this permit.

2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of PE from this emissions unit is less than 10 pounds/hour. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. In addition, Table I of OAC rule 3745-17-11 does not apply because the facility is located in Hancock County, which is identified as a P-2 county.
- 2.b This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.c The permittee shall employ a cyclone (CYP007-20) to control all the PE from this emissions unit.

II. Operational Restrictions

1. The pressure drop across the cyclone shall be maintained within the range of 2 to 7 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the cyclone while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the cyclone on a daily basis.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all recorded periods of time during which the pressure drop across the cyclone did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

1.a Emission Limitation:
2.9 pounds PE/hour

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable PE limitation by multiplying the maximum process weight rate (tons/hour)* by the emission factor from AP-42, Table 9.9.1-2 (revised 5/98) of 0.36 pound PE/ton.

If required, the permittee shall demonstrate compliance with the hourly allowable PE limitation using Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

* as included in the Title V permit application (claimed confidential by the applicant)

1.b Emission Limitation:
1.5 pounds PM10/hour

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable PM10 emission limitation by multiplying the maximum process weight rate (tons/hour)* by the emission factor from AP-42, Table 9.9.1-2 (revised 5/98) of 0.18 pound PE/ton.

If required, the permittee shall demonstrate compliance with the hourly allowable PM10 emission limitation in accordance with Methods 1 through 5 of 40 CFR, Part 60, Appendix A, including the back half of the filter, or Methods 201, or 201A of 40 CFR, Part 51, Appendix A.

* as included in the Title V permit application (claimed confidential by the applicant)

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Meal Loading to Truck (P901)
Activity Description: Meal loadout - truck

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
meal loadout (truck), with baghouse	OAC rule 3745-17-11(B)	The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-13053)	2.14 pounds of PM10 from the stack/hour (for emissions units P901 and P902, combined)
		9.39 tons of PM10/year (for emissions units P901 and P902, combined)
		0.84 ton fugitive PM10/year (for emissions units P901 and P902, combined)
		The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (BFP901-P902) to control all the PE of PM10 from emissions units P901 and P902.
- 2.b This facility is not located within the areas identified in "Appendix A" of OAC rule 3745-17-08 (it is located in Hancock County). Therefore, the requirements of OAC rule 3745-17-08(B) do not apply to this emissions unit.
- 2.c This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 1 to 8 inches of water while the emissions unit is in operation.
2. The permittee shall not operate emissions units P901 and P902 simultaneously.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a daily basis.
2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any fugitive dust emissions from this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the location and color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emission incident; and
 - e. any corrective actions taken to eliminate the visible emissions.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all recorded periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall submit semiannual written reports that (a) identify all days during which any recorded fugitive dust emissions were observed from this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

- 1.b Emission Limitation:
2.14 pounds PM10/hour

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable PM10 emission limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.01 grain/cubic foot) by the total maximum volumetric air flow rate (25,000 cubic feet/minute), and dividing by 7000, and then multiplying by 60.

If required, the permittee shall demonstrate compliance with the hourly allowable PM10 emission limitation in accordance with Methods 1 through 5 of 40 CFR, Part 60, Appendix A, including the back half of the filter, or Methods 201, or 201 A of 40 CFR, Part 51, Appendix A.

V. Testing Requirements (continued)

- 1.c** Emission Limitation:
9.39 tons PM10/year

Applicable Compliance Method:

As long as compliance with the hourly allowable PM10 emission limitation is maintained, compliance with the annual allowable PM10 emission limitation shall be assumed (the annual limitation was determined by multiplying the hourly limitation by 8760, and then dividing by 2000).

- 1.d** Emission Limitation:
0.84 ton fugitive PM10/year

Applicable Compliance Method:

The permittee may determine compliance with the annual allowable PM10 emission limitation above by multiplying the maximum process throughput (tons/year)* by the emission factor from AP-42, Table 9.11.1-1 (revised 11/95) of 0.176 pound PE/ton and by the percentage of PE not captured by the control device (0.05), and then dividing by 2000 .

* as included in the Title V permit application (claimed confidential by the applicant)

- 2.** The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:
- a. The emission testing shall be conducted within 6 months following the issuance of this permit.
 - b. The emission testing shall be conducted to demonstrate compliance with the allowable mass emission rate for PM10.
 - c. The following test method(s) shall be employed to demonstrate compliance with the allowable mass emission rate: Methods 1 through 5 of 40 CFR, Part 60, Appendix A, including the back half of the filter, or Methods 201, or 201A of 40 CFR, Part 51, Appendix A.
 - d. The test(s) shall be conducted while the emissions unit is operating at or near its maximum capacity, unless otherwise specified or approved by the appropriate Ohio EPA District Office or local air agency.
- 3.** Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission test(s).

Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the appropriate Ohio EPA District Office or local air agency.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Meal Loading to Rail (P902)
Activity Description: Meal loadout - rail

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
meal loadout (rail), with baghouse	OAC rule 3745-17-11(B)	The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-13053)	2.14 pounds of PM10 from the stack/hour (for emissions units P901 and P902, combined) 9.39 tons of PM10/year (for emissions units P901 and P902, combined)
		0.84 ton fugitive PM10/year (for emissions units P901 and P902, combined) The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (BFP901-P902) to control all the PE of PM10 from emissions units P901 and P902.
- 2.b This facility is not located within the areas identified in "Appendix A" of OAC rule 3745-17-08 (it is located in Hancock County). Therefore, the requirements of OAC rule 3745-17-08(B) do not apply to this emissions unit.
- 2.c This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 1 to 8 inches of water while the emissions unit is in operation.
2. The permittee shall not operate emissions units P901 and P902 simultaneously.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a daily basis.
2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any fugitive dust emissions from this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the location and color of the emissions;
 - b. whether the emissions are representative of normal operations;
 - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - d. the total duration of any visible emission incident; and
 - e. any corrective actions taken to eliminate the visible emissions.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all recorded periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall submit semiannual written reports that (a) identify all days during which any recorded fugitive dust emissions were observed from this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

- 1.b Emission Limitation:
2.14 pounds PM10/hour

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable PM10 emission limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.01 grain/cubic foot) by the total maximum volumetric air flow rate (25,000 cubic feet/minute), and dividing by 7000, and then multiplying by 60.

If required, the permittee shall demonstrate compliance with the hourly allowable PM10 emission limitation in accordance with Methods 1 through 5 of 40 CFR, Part 60, Appendix A, including the back half of the filter, or Methods 201, or 201 A of 40 CFR, Part 51, Appendix A.

V. Testing Requirements (continued)

- 1.c** Emission Limitation:
9.39 tons PM10/year

Applicable Compliance Method:

As long as compliance with the hourly allowable PM10 emission limitation is maintained, compliance with the annual allowable PM10 emission limitation shall be assumed (the annual limitation was determined by multiplying the hourly limitation by 8760, and then dividing by 2000).

- 1.d** Emission Limitation:
0.84 ton fugitive PM10/year

Applicable Compliance Method:

The permittee may determine compliance with the annual allowable PM10 emission limitation above by multiplying the maximum process throughput (tons/year)* by the emission factor from AP-42, Table 9.11.1-1 (revised 11/95) of 0.176 pound PE/ton and by the percentage of PE not captured by the control device (0.05), and then dividing by 2000 .

* as included in the Title V permit application (claimed confidential by the applicant)

- 2.** The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:
- a. The emission testing shall be conducted within 6 months following the issuance of this permit.
 - b. The emission testing shall be conducted to demonstrate compliance with the allowable mass emission rate for PM10.
 - c. The following test method(s) shall be employed to demonstrate compliance with the allowable mass emission rate: Methods 1 through 5 of 40 CFR, Part 60, Appendix A, including the back half of the filter, or Methods 201, or 201A of 40 CFR, Part 51, Appendix A.
 - d. The test(s) shall be conducted while the emissions unit is operating at or near its maximum capacity, unless otherwise specified or approved by the appropriate Ohio EPA District Office or local air agency.
- 3.** Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission test(s).

Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the appropriate Ohio EPA District Office or local air agency.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Truck unloading (P903)
Activity Description: Soybean receiving - truck

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
truck unloading, with baghouse	OAC rule 3745-17-11(B)	11.0 pounds particulate emissions (PE)/hour
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (BFP903) to control all the PE from this emissions unit.
- 2.b This facility is not located within the areas identified in "Appendix A" of OAC rule 3745-17-08 (it is located in Hancock County). Therefore, the requirements of OAC rule 3745-17-08(B) do not apply to this emissions unit.
- 2.c This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 1 to 8 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a daily basis.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

1.a Emission Limitation:
11.0 pounds PE/hour

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable PE limitation above by multiplying the maximum throughput (tons/hour)* by the emission factor from AP-42, Table 9.9.1-1 (revised 5/98) of 0.18 lb PE/ton, and then multiplying by a baghouse control factor of (1-0.99).**

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation above shall be OAC rule 3745-17-03(B)(10).

* as included in the Title V permit application (claimed confidential by the applicant)

** The baghouse efficiency is assumed to be 99%.

1.b Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Rail unloading (P904)
Activity Description: Soybean receiving - Rail, & transfer & conveying

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
rail unloading, with baghouse	OAC rule 3745-17-11(B)	none (Refer to section A.I.2.a of the terms and conditions of this permit.)
	OAC rule 3745-17-07(A)	none (Refer to section A.I.2.b of the terms and conditions of this permit.)
	OAC rule 3745-17-08(B)	Refer to section A.I.2.c of the terms and conditions of this permit.
	OAC rule 3745-17-07(B)	Refer to section A.I.2.d of the terms and conditions of this permit.

2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 pounds/hour. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. In addition, Table I of OAC rule 3745-17-11 does not apply because the facility is located in Hancock County, which is identified as a P-2 county.
- 2.b This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.c This facility is not located within the areas identified in "Appendix A" of OAC rule 3745-17-08 (it is located in Hancock County). Therefore, the requirements of OAC rule 3745-17-08(B) do not apply to this emissions unit.
- 2.d This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

None

IV. Reporting Requirements
