CERTIFIED MAIL

RE: Final Title V Chapter 3745-77 permit

03-62-01-0110

Alpha Coatings Inc - Port Clinton Division
Eric Pekarcik
228 Buckeye Blvd.
Port Clinton, OH 43452

Dear Eric Pekarcik:

Enclosed is the Title V permit that allows you to operate the facility in the manner indicated in the permit. Because this permit may contain several conditions and restrictions, we urge you to read it carefully.

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed with the Environmental Review Appeals Commission within thirty (30) days after notice of the Director's action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. It is also requested by the Director that a copy of the appeal be served upon the Environmental Enforcement Section of the Office of the Attorney General. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
236 East Town Street
Room 300
Columbus, Ohio 43215

If you have any questions, please contact Northwest District Office.

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

cc: Northwest District Office
File, DAPC PMU

State of Ohio Environmental Protection Agency

FINAL TITLE V PERMIT

Issue Date: 12/12/01	Effective Date: 12/12/01	Expiration Date: 12/12/06
-----------------------------	---------------------------------	----------------------------------

This document constitutes issuance of a Title V permit for Facility ID: 03-62-01-0110 to:
 Alpha Coatings Inc - Port Clinton Division
 228 Buckeye Blvd
 Port Clinton, OH 43452

Emissions Unit ID (Company ID)/Emissions Unit Activity Description

K001 (K001) Manual Paint Spray Booth #10	K006 (K006) Manual Paint Spray Booth #4	K012 (K012) Manual Paint Spray Booth #9
K002 (K002) Manual Paint Spray Booth #1	K008 (K008) Crown Victoria line Manual Paint Spray Booth #6	P001 (P001) Infared Cure Oven
K003 (K003) Manual Paint Spray Booth #2	K009 (K009) Back Room Manual Paint Spray Booth #7	R001 (R001) Manual Paint Spray Booth #5
K004 (K004) Manual Paint Spray Booth #3 and Dip Spin	K010 (K010) Chain-On-Edge Line booth #2	
K005 (K005) Manual Paint Spray Booth #8	K011 (K011) Chain-On-Edge Line booth #1	

You will be contacted approximately eighteen (18) months prior to the expiration date regarding the renewal of this permit. If you are not contacted, please contact the appropriate Ohio EPA District Office or local air agency listed below. This permit and the authorization to operate the air contaminant sources (emissions units) at this facility shall expire at midnight on the expiration date shown above. If a renewal permit is not issued prior to the expiration date, the permittee may continue to operate pursuant to OAC rule 3745-77-04(A) and in accordance with the terms of this permit beyond the expiration date, provided that a complete renewal application is submitted no earlier than eighteen (18) months and no later than one-hundred eighty (180) days prior to the expiration date.

Described below is the Ohio EPA District Office or local air agency that is responsible for processing and administering your Title V permit:

Northwest District Office
 347 North Dunbridge Road
 Bowling Green, OH 43402
 (419) 352-8461

OHIO ENVIRONMENTAL PROTECTION AGENCY

Christopher Jones
Director

PART I - GENERAL TERMS AND CONDITIONS

A. State and Federally Enforceable Section

1. Monitoring and Related Recordkeeping and Reporting Requirements

- a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
 - i. The date, place (as defined in the permit), and time of sampling or measurements.
 - ii. The date(s) analyses were performed.
 - iii. The company or entity that performed the analyses.
 - iv. The analytical techniques or methods used.
 - v. The results of such analyses.
 - vi. The operating conditions existing at the time of sampling or measurement.
- b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
 - i. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
 - ii. Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be promptly made to the appropriate Ohio EPA District Office or local air agency. These quarterly written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the submission of monitoring reports every six months and OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of all deviations except malfunctions, which shall be reported in accordance with OAC rule 3745-15-06. The written reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.) See B.8 below if no deviations occurred during the quarter.
 - iii. Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted to

the appropriate Ohio EPA District Office or local air agency every six months, i.e., by January 31 and July 31 of each year for the previous six calendar months. These semi-annual written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the reporting of any deviations related to the monitoring, recordkeeping, and reporting requirements. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.

- iv. Each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.

2. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports submitted pursuant to OAC rule 3745-15-06 shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of deviations caused by malfunctions or upsets.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

3. Risk Management Plans

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

4. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

5. Severability Clause

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

6. General Requirements

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.
- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, reopened, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

7. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78.

8. Marketable Permit Programs

No revision of this permit is required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in this permit.

9. Reasonably Anticipated Operating Scenarios

The permittee is hereby authorized to make changes among operating scenarios authorized in this permit without notice to the Ohio EPA, but, contemporaneous with making a change from one operating scenario to another, the permittee must record in a log at the permitted facility the scenario under which the permittee is operating. The permit shield provided in these general terms and conditions shall apply to all operating scenarios authorized in this permit.

10. Reopening for Cause

This Title V permit will be reopened prior to its expiration date under the following conditions:

- a. Additional applicable requirements under the Act become applicable to one or more emissions units covered by this permit, and this permit has a remaining term of three or more years. Such a reopening shall be completed not later than eighteen months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of OAC rule 3745-77-08.
- b. This permit is issued to an affected source under the acid rain program and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit, and shall not require a reopening of this permit.
- c. The Director of the Ohio EPA or the Administrator of the U.S. EPA determines that the federally applicable requirements in this permit are based on a material mistake, or that inaccurate statements were made in establishing the emissions standards or other terms and conditions of this permit related to such federally applicable requirements.
- d. The Administrator of the U.S. EPA or the Director of the Ohio EPA determines that this permit must be revised or revoked to assure compliance with the applicable requirements.

11. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA, the State, and citizens under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

12. Compliance Requirements

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this Title V permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.

- ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with paragraph (E) of OAC rule 3745-77-03.
 - iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
 - iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
- i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
- d. Compliance certifications concerning the terms and conditions contained in this permit that are federally enforceable emission limitations, standards, or work practices, shall be submitted to the appropriate Ohio EPA District Office or local air agency in the following manner and with the following content:
- i. Compliance certifications shall be submitted annually on a calendar year basis. The annual certification shall be submitted on or before April 30th of each year during the permit term.
 - ii. Compliance certifications shall include the following:
 - (a) An identification of each term or condition of this permit that is the basis of the certification.
 - (b) The permittee's current compliance status.
 - (c) Whether compliance was continuous or intermittent.
 - (d) The method(s) used for determining the compliance status of the source currently and over the required reporting period.
 - (e) Such other facts as the Director of the Ohio EPA may require in the permit to determine the compliance status of the source.
 - iii. Compliance certifications shall contain such additional requirements as may be specified pursuant to sections 114(a)(3) and 504(b) of the Act.

13. Permit Shield

- a. Compliance with the terms and conditions of this permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but

excluding terms and conditions for which the permit shield is expressly prohibited under OAC rule 3745-77-07) shall be deemed compliance with the applicable requirements identified and addressed in this permit as of the date of permit issuance.

- b. This permit shield provision shall apply to any requirement identified in this permit pursuant to OAC rule 3745-77-07(F)(2), as a requirement that does not apply to the source or to one or more emissions units within the source.

14. Operational Flexibility

The permittee is authorized to make the changes identified in OAC rule 3745-77-07(H)(1)(a) to (H)(1)(c) within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the Act [as defined in OAC rule 3745-77-01(JJ)], and does not result in an exceedance of the emissions allowed under this permit (whether expressed therein as a rate of emissions or in terms of total emissions), and the permittee provides the Administrator of the U.S. EPA and the appropriate Ohio EPA District Office or local air agency with written notification within a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions. If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the Administrator of the U.S. EPA and the appropriate District Office of the Ohio EPA or local air agency as soon as possible after learning of the need to make the change. The notification shall contain the items required under OAC rule 3745-77-07(H)(2)(d).

15. Emergencies

The permittee shall have an affirmative defense of emergency to an action brought for noncompliance with technology-based emission limitations if the conditions of OAC rule 3745-77-07(G)(3) are met. This emergency defense provision is in addition to any emergency or upset provision contained in any applicable requirement.

16. Off Permit Changes

The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:

- a. The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition;
- b. The permittee provides contemporaneous written notice of the change to the director and the administrator, except that no such notice shall be required for changes that qualify as insignificant emission levels or activities as defined in OAC rule 3745-77-01(U). Such written notice shall describe each such change, the date of such change, any change in emissions or

pollutants emitted, and any federally applicable requirement that would apply as a result of the change;

- c. The change shall not qualify for the permit shield under OAC rule 3745-77-07(F);
- d. The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes; and
- e. The change is not subject to any applicable requirement under Title IV of the Act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of rule 3745-77-07 of the Administrative Code applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit to install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that Chapter. Nothing in paragraph (I) of rule 3745-77-07 of the Administrative Code shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

(For further clarification, the permittee can refer to Engineering Guide #63 that is available in their STARSHIP software package.)

17. Compliance Method Requirements

Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Fed. Reg. 8314, Feb. 24, 1997), in the context of any future proceeding.

18. Insignificant Activity

Each insignificant activity that has one or more applicable requirements shall comply with those applicable requirements.

B. State Only Enforceable Section

1. Permit to Install Requirement

Prior to the “installation” or “modification” of any “air contaminant source,” as those terms are defined in OAC rule 3745-31-01, a permit to install must be obtained from the Ohio EPA pursuant to OAC Chapter 3745-31.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with

this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

Part II - Specific Facility Terms and Conditions

A. State and Federally Enforcable Section

1. This facility is subject to the applicable requirements specified in OAC Chapter 3745-25. In accordance with Ohio EPA Engineering Guide #64, the emission control action programs, as specified in OAC rule 3745-25-03, shall be developed and submitted within 60 days after receiving notification from the Ohio EPA.

B. State Only Enforceable Section

1. The following insignificant emissions units are located at this facility:

Room Space Heater (Z005); Room Space Heater (Z006); Room Space Heater (Z007); Room Space Heater (Z008); Room Space Heater (Z009); Room Space Heater (Z010); and Room Space Heater (Z011).

Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations, as well as any emission limitations and/or control requirements contained within a Permit to Install (PTI) for the emissions unit.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K001 (K001)
Activity Description: Manual Paint Spray Booth #10

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
manual paint spray booth #10, with dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, 14.54 tons OC/yr
		7.50 lbs VOC per gallon of coating, excluding water and exempt solvents
		0% opacity, as a six-minute average
		The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e** The 3.32 lbs of OC/hr and 14.54 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a** Emission Limitations:
3.32 lbs OC/hr, 14.54 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

1.b Emission Limitation:
7.50 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

1.c Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation in accordance with 40 CFR Part 60, Appendix A, Method 9.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
manual paint spray booth #10, with dry filtration system	none	none

2. Additional Terms and Conditions

None

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

- The permit to install for this emissions unit was evaluated based on the actual materials (typically coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: 1-methyl-2-chlorobenzene

TLV (mg/m3): 263

Maximum Hourly Emission Rate (lbs/hr): 0.81 *

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 1,218

MAGLC (ug/m3): 6,262

* This is the increase in the potential hourly emission rate for this emissions unit.

III. Monitoring and/or Record Keeping Requirements (continued)

2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- a. changes in the composition of the materials used (coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

3. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

None

V. Testing Requirements

None

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K002 (K002)
Activity Description: Manual Paint Spray Booth #1

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
manual paint spray booth #1, with dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, 14.54 tons OC/yr
		6.63 lbs VOC per gallon of coating, excluding water and exempt solvents
		0% opacity, as a six-minute average
		The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e The 3.32 lbs of OC/hr and 14.54 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a Emission Limitations:
3.32 lbs OC/hr, 14.54 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

1.b Emission Limitation:
6.63 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

1.c Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation in accordance with 40 CFR Part 60, Appendix A, Method 9.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K003 (K003)
Activity Description: Manual Paint Spray Booth #2

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
manual paint spray booth #2, with dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, 14.54 tons OC/yr 6.63 lbs VOC per gallon of coating, excluding water and exempt solvents 0% opacity, as a six-minute average The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitation specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e** The 3.32 lbs of OC/hr and 14.54 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitation(s) in section A.I. of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a** Emission Limitations:
3.32 lbs OC/hr, 14.54 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

1.b Emission Limitation:
6.63 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

1.c Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation in accordance with 40 CFR Part 60, Appendix A, Method 9.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K004 (K004)

Activity Description: Manual Paint Spray Booth #3 and Dip Spin

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
manual paint spray booth and dip spin #3, with dry filtration system	OAC rule 3745-21-07(G)(2)	On any day when employing any photochemically reactive material to coat non-metal parts, 8 lbs/hour and 40 lbs/day of organic compounds (OC) for the coatings and photochemically reactive cleanup materials used for the non-metal parts.
	OAC rule 3745-21-09(U)(2)(f)	On any day when coating metal parts, see A.I.2.a for the coatings used for the metal parts.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, and 14.54 tons OC/yr (for the coatings used for the metal parts)
		7.0 lbs volatile organic compounds (VOC) per gallon of coating, excluding water and exempt solvents (for the coatings used for the metal parts)
		0% opacity, as a six-minute average
	See A.I.2.e through A.I.2.g.	
	The requirements of this rule also include compliance with the requirements of OAC rules 3745-21-07(G)(2) and 3745-21-09(U)(2)(f).	

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup material shall be recycled and used as thinner for all the coatings employed in this emissions unit.
- 2.e** On any day when only metal parts are coated, the OC emissions shall not exceed 79.7 lbs/day for the coatings and cleanup materials used for the metal parts.
- 2.f** On any day when only non-metal parts are coated and none of the materials applied are photochemically reactive materials, the OC emissions shall not exceed 79.7 lbs/day for the coatings and cleanup materials used for the non-metal parts.
- 2.g** On any day when both non-metal parts and metal parts are coated, the OC emissions shall not exceed 79.7 lbs/day for the coatings and cleanup materials used for the metal and non-metal parts.
- 2.h** The 3.32 lbs/hour and 14.54 tons per year OC emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to establish record keeping and reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

- 1.** The permittee shall not place any metal part coated in this emissions unit in an oven in which the temperature exceeds 200 degrees Fahrenheit.
- 2.** The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for this emissions unit for the coatings and cleanup materials used for the metal and non-metal parts:
 - a. the name and identification number of each coating and cleanup material employed;
 - b. the volume, in gallons, of each coating and cleanup material employed;
 - c. the OC content, in pounds/gallon, of each coating and cleanup material employed;
 - d. documentation on whether or not each coating and cleanup material employed is a photochemically reactive material;
 - e. the total OC emissions for all the coatings and cleanup materials employed [summation of (b x c) for all coatings and for all cleanup materials], in pounds;
 - f. for each day during which any photochemically reactive material (coating or cleanup material) is employed for non-metal parts, the total organic compound emission rate for all the coatings and photochemically reactive cleanup materials employed for such non-metal parts [summation of (b x c) for all coatings and for all photochemically reactive cleanup materials], in pounds;
 - g. for each day during which any photochemically reactive material (coating or cleanup material) is employed for non-metal parts, the total number of hours the emissions unit was in operation while coating such non-metal parts; and
 - h. for each day during which any photochemically reactive material (coating or cleanup material) is employed for non-metal parts, the average hourly organic compound emission rate for all the coatings and photochemically reactive cleanup materials employed for such non-metal parts, i.e., [(f)/(g)], in pounds per hour (average).
2. The permittee shall collect and record the following information each month for this emissions unit for the coatings used for the metal parts:
 - a. the name and identification number of each coating employed; and
 - b. the VOC content of each coating employed, in pounds per gallon (excluding water and exempt solvents), as applied.
3. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the daily OC emission limitation of 79.7 pounds.
2. For non-metal parts, the permittee shall submit quarterly deviation (excursion) reports that include the following information:
 - a. For the days during which any photochemically reactive material (coating or cleanup material) was employed, an identification of each day during which the average hourly organic compound emissions from the coatings and photochemically reactive cleanup materials used for the non-metal parts exceeded 8 pounds per hour, and the actual average hourly organic compound emissions for each such day.
 - b. For the days during which any photochemically reactive material (coating or cleanup material) was employed, an identification of each day during which the organic compound emissions from the coatings and photochemically reactive cleanup materials used for the non-metal parts exceeded 40 pounds per day, and the actual organic compound emissions for each such day.
3. All of the quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

IV. Reporting Requirements (continued)

4. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings for metal parts (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
5. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days after the event occurs.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a Emission Limitations:
8 lbs OC/hr and 40 lbs OC/day

Applicable Compliance Method:

Compliance may be determined based upon the record keeping requirements specified in Section A.III.1 of the terms and conditions of this permit.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

- 1.b Emission Limitations:
3.32 lbs OC/hr, and 14.54 tons OC/yr (for the coatings used for the metal parts)

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

- 1.c Emission Limitation:
7.0 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:

Compliance shall be based upon the record keeping requirements specified in Section A.III.2. of this permit.

- 1.d Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation in accordance with 40 CFR Part 60, Appendix A, Method 9.

- 1.e Emission Limitation:
79.7 lbs OC/day

Applicable Compliance Method:

Compliance shall be determined based upon the record keeping requirements specified in Section A.III.1 of the terms and conditions of this permit.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents of all the coatings and the OC content of all the cleanup materials.

Facility Name: **Alpha Coatings, Inc. - Port Clinton Division**
Facility ID: **03-62-01-0110**
Emissions Unit: **K004 (K004)**

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
manual paint spray booth and dip spin #3, with dry filtration system	none	none

2. Additional Terms and Conditions

None

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

- The permit to install for this emissions unit was evaluated based on the actual materials (coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: tetrachloroethylene

TLV (mg/m3): 170

Maximum Hourly Emission Rate (lbs/hr): 0.4 *

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 118.0 **

MAGLC (ug/m3): 4,048

* This is the increase in the potential hourly emission rate for this emissions unit

** This is the concentration based on the combined impact for all emissions units with required modeling for the listed pollutant.

III. Monitoring and/or Record Keeping Requirements (continued)

2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- changes in the composition of the materials used (coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

3. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
- a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

None

V. Testing Requirements

None

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K005 (K005)
Activity Description: Manual Paint Spray Booth #8

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
back room manual paint spray booth #8, with dry filtration system	OAC rule 3745-21-07(G)(2)	On any day when employing any photochemically reactive material to coat non-metal parts, 8 lbs/hour and 40 lbs/day of organic compounds (OC) for the coatings and photochemically reactive cleanup materials used for the non-metal parts.
	OAC rule 3745-21-09(U)(2)(f)	On any day when coating metal parts, see A.I.2.a for the coatings used for the metal parts.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, and 14.54 tons OC/yr (for the coatings used for the metal parts)
		7.0 lbs volatile organic compounds (VOC) per gallon of coating, excluding water and exempt solvents (for the coatings used for the metal parts)
		0% opacity, as a six-minute average
	See A.I.2.e through A.I.2.g.	
	The requirements of this rule also include compliance with the requirements of OAC rules 3745-21-07(G)(2) and 3745-21-09(U)(2)(f).	

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup material shall be recycled and used as thinner for all the coatings employed in this emissions unit.
- 2.e** On any day when only metal parts are coated, the OC emissions shall not exceed 79.7 lbs/day for the coatings and cleanup materials used for the metal parts.
- 2.f** On any day when only non-metal parts are coated and none of the materials applied are photochemically reactive materials, the OC emissions shall not exceed 79.7 lbs/day for the coatings and cleanup materials used for the non-metal parts.
- 2.g** On any day when both non-metal parts and metal parts are coated, the OC emissions shall not exceed 79.7 lbs/day for the coatings and cleanup materials used for the metal and non-metal parts.
- 2.h** The 3.32 lbs/hour and 14.54 tons per year OC emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to establish record keeping and reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

- 1.** The permittee shall not place any metal part coated in this emissions unit in an oven in which the temperature exceeds 200 degrees Fahrenheit.
- 2.** The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for this emissions unit for the coatings and cleanup materials used for the metal and non-metal parts:
 - a. the name and identification number of each coating and cleanup material employed;
 - b. the volume, in gallons, of each coating and cleanup material employed;
 - c. the OC content, in pounds/gallon, of each coating and cleanup material employed;
 - d. documentation on whether or not each coating and cleanup material employed is a photochemically reactive material;
 - e. the total OC emissions for all the coatings and cleanup materials employed [summation of (b x c) for all coatings and for all cleanup materials], in pounds;
 - f. for each day during which any photochemically reactive material (coating or cleanup material) is employed for non-metal parts, the total organic compound emission rate for all the coatings and photochemically reactive cleanup materials employed for such non-metal parts [summation of (b x c) for all coatings and for all photochemically reactive cleanup materials], in pounds;
 - g. for each day during which any photochemically reactive material (coating or cleanup material) is employed for non-metal parts, the total number of hours the emissions unit was in operation while coating such non-metal parts; and
 - h. for each day during which any photochemically reactive material (coating or cleanup material) is employed for non-metal parts, the average hourly organic compound emission rate for all the coatings and photochemically reactive cleanup materials employed for such non-metal parts, i.e., [(f)/(g)], in pounds per hour (average).
2. The permittee shall collect and record the following information each month for this emissions unit for the coatings used for the metal parts:
 - a. the name and identification number of each coating employed; and
 - b. the VOC content of each coating employed, in pounds per gallon (excluding water and exempt solvents), as applied.
3. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the daily OC emission limitation of 79.7 pounds.
2. For non-metal parts, the permittee shall submit quarterly deviation (excursion) reports that include the following information:
 - a. For the days during which any photochemically reactive material (coating or cleanup material) was employed, an identification of each day during which the average hourly organic compound emissions from the coatings and photochemically reactive cleanup materials used for the non-metal parts exceeded 8 pounds per hour, and the actual average hourly organic compound emissions for each such day.
 - b. For the days during which any photochemically reactive material (coating or cleanup material) was employed, an identification of each day during which the organic compound emissions from the coatings and photochemically reactive cleanup materials used for the non-metal parts exceeded 40 pounds per day, and the actual organic compound emissions for each such day.
3. All of the quarterly deviation reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

IV. Reporting Requirements (continued)

4. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings for metal parts (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
5. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days after the event occurs.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

1.a Emission Limitations: 8 lbs OC/hr and 40 lbs OC/day

Applicable Compliance Method:

Compliance may be determined based upon the record keeping requirements specified in Section A.III.1 of the terms and conditions of this permit.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

1.b Emission Limitations:
3.32 lbs OC/hr, and 14.54 tons OC/yr (for the coatings used for the metal parts)

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

1.c Emission Limitation:
7.0 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:

Compliance shall be based upon the record keeping requirements specified in Section A.III.2. of this permit.

1.d Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation in accordance with 40 CFR Part 60, Appendix A, Method 9.

1.e Emission Limitation:
79.7 lbs OC/day

Applicable Compliance Method:

Compliance shall be determined based upon the record keeping requirements specified in Section A.III.1 of the terms and conditions of this permit.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents of all the coatings and the OC content of all the cleanup materials.

Facility Name: **Alpha Coatings, Inc. - Port Clinton Division**
Facility ID: **03-62-01-0110**
Emissions Unit: **K005 (K005)**

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
back room manual paint spray booth #8, with dry filtration system	none	none

2. Additional Terms and Conditions

None

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

- The permit to install for this emissions unit was evaluated based on the actual materials (coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: tetrachloroethylene

TLV (mg/m3): 170

Maximum Hourly Emission Rate (lbs/hr): 0.4 *

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 118.0 **

MAGLC (ug/m3): 4,048

* This is the increase in the potential hourly emission rate for this emissions unit

** This is the concentration based on the combined impact for all emissions units with required modeling for the listed pollutant.

III. Monitoring and/or Record Keeping Requirements (continued)

2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- a. changes in the composition of the materials used (coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

3. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

None

V. Testing Requirements

None

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K006 (K006)
Activity Description: Manual Paint Spray Booth #4

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
manual paint spray booth #4, with dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, 14.54 tons OC/yr 6.63 lbs VOC per gallon of coating, excluding water and exempt solvents 0% opacity, as a six-minute average The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e** The 3.32 lbs of OC/hr and 14.54 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a** Emission Limitations:
3.32 lbs OC/hr, 14.54 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

1.b Emission Limitation:
6.63 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

1.c Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with 40 CFR Part 60, Appendix A, Method 9.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K008 (K008)

Activity Description: Crown Victoria line Manual Paint Spray Booth #6

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
manual paint spray booth #6, with dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, 14.54 tons OC/yr 6.63 lbs VOC per gallon of coating, excluding water and exempt solvents 0% opacity, as a six-minute average The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e** The 3.32 lbs of OC/hr and 14.54 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a** Emission Limitations:
3.32 lbs OC/hr, 14.54 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

1.b Emission Limitation:
6.63 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

1.c Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with 40 CFR Part 60, Appendix A, Method 9.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K009 (K009)

Activity Description: Back Room Manual Paint Spray Booth #7

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
back room manual paint spray booth #7, with dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, 14.54 tons OC/yr
		7.0 lbs VOC per gallon of coating, excluding water and exempt solvents
		0% opacity, as a six-minute average
		The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e** The 3.32 lbs of OC/hr and 14.54 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a** Emission Limitations:
3.32 lbs OC/hr, 14.54 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

- 1.b** Emission Limitation:
7.0 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

- 1.c** Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with 40 CFR Part 60, Appendix A, Method 9.

- 2.** Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
back room manual paint spray booth #7, with dry filtration system	none	none

2. Additional Terms and Conditions

None

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

- The permit to install for this emissions unit was evaluated based on the actual materials (typically coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: 1-methyl-2-chlorobenzene

TLV (mg/m3): 263

Maximum Hourly Emission Rate (lbs/hr): 0.81 *

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 1,218

MAGLC (ug/m3): 6,262

* This is the increase in the potential hourly emission rate for this emissions unit.

III. Monitoring and/or Record Keeping Requirements (continued)

2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- a. changes in the composition of the materials used (coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

3. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

None

V. Testing Requirements

None

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K010 (K010)
Activity Description: Chain-On-Edge Line booth #2

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
chain-on edge line paint spray booth #2 top coat, with flash-off oven and dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	6.86 lbs organic compounds (OC)/hr, 30.5 tons OC/yr 7.53 lbs VOC per gallon of coating, excluding water and exempt solvents 0% opacity, as a six-minute average The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e** The 6.86 lbs of OC/hr and 30.05 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a** Emission Limitations:
6.86 lbs OC/hr, 30.05 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

1.b Emission Limitation:
7.53 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

1.c Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with 40 CFR Part 60, Appendix A, Method 9.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
chain-on edge line paint spray booth #2 top coat, with flash-off oven and dry filtration system	none	none

2. Additional Terms and Conditions

None

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

- The permit to install for this emissions unit was evaluated based on the actual materials (typically coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: 1-methyl-2-chlorobenzene

TLV (mg/m3): 263

Maximum Hourly Emission Rate (lbs/hr): 0.81 *

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 1,218

MAGLC (ug/m3): 6,262

* This is the increase in the potential hourly emission rate for this emissions unit.

III. Monitoring and/or Record Keeping Requirements (continued)

2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- a. changes in the composition of the materials used (coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

3. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K011 (K011)
Activity Description: Chain-On-Edge Line booth #1

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
chain-on-edge line paint spray booth #1 prime coat, with flash-off oven and dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	6.86 lbs organic compounds (OC)/hr, 30.5 tons OC/yr
		7.53 lbs VOC per gallon of coating, excluding water and exempt solvents
		0% opacity, as a six-minute average
		The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e** The 6.86 lbs of OC/hr and 30.05 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a** Emission Limitations:
6.86 lbs OC/hr, 30.05 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

1.b Emission Limitation:
7.53 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

1.c Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with 40 CFR Part 60, Appendix A, Method 9.

2. Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

- The permit to install for this emissions unit was evaluated based on the actual materials (typically coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: 1-methyl-2-chlorobenzene

TLV (mg/m3): 263

Maximum Hourly Emission Rate (lbs/hr): 0.81 *

Predicted 1-Hour Maximum Ground-Level
Concentration (ug/m3): 1,218

MAGLC (ug/m3): 6,262

* This is the increase in the potential hourly emission rate for this emissions unit.

III. Monitoring and/or Record Keeping Requirements (continued)

2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- a. changes in the composition of the materials used (coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

3. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

None

V. Testing Requirements

None

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: K012 (K012)
Activity Description: Manual Paint Spray Booth #9

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
back room paint spray booth #9, with dry filtration system	OAC rule 3745-21-09(U)(2)(f)	See A.I.2.a.
	OAC rule 3745-17-11(B)(3)	none (See A.I.2.b.)
	OAC rule 3745-17-07(A)	none (See A.I.2.c.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	3.32 lbs organic compounds (OC)/hr, 14.54 tons OC/yr 6.63 lbs VOC per gallon of coating, excluding water and exempt solvents 0% opacity, as a six-minute average The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-09(U)(2)(f).

2. Additional Terms and Conditions

- 2.a** Pursuant to OAC rule 3745-21-09(U)(2)(f), the Director has determined that "best available technology" for this emissions unit, as defined in PTI # 03-13187, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (U)(1) of OAC rule 3745-21-09. Specifically, the VOC content limitation in the PTI for the coatings is less stringent than the applicable VOC content limitation in paragraph (U)(1) of OAC rule 3745-21-09.
- 2.b** The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II of OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- 2.c** This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- 2.d** The permittee shall reclaim all the cleanup materials used in this emissions unit. The reclaimed cleanup materials shall be recycled and used as thinner for all the coatings employed in this emissions unit.

2. Additional Terms and Conditions (continued)

- 2.e The 3.32 lbs of OC/hr and 14.54 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

1. This emissions unit shall be used only to apply adhesive coatings to miscellaneous metal parts.
2. The permittee shall operate the dry filtration system when this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each month for the coatings employed in this emissions unit:
 - a. the company identification of each adhesive coating employed;
 - b. the VOC content of each adhesive coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis; and
 - c. a log of all instances when any adhesive coating was applied to non-metal parts.
2. The permittee shall maintain daily records that document any time periods when the dry filtration system was not in service when the emissions unit was in operation.

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any daily record showing that the dry filtration system was not in service when the emissions unit was in operation. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 30 days after the event occurs.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
3. The permittee shall submit quarterly summaries that include a log of all instances when any adhesive coating was applied to non-metal parts.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 1.a Emission Limitations:
3.32 lbs OC/hr, 14.54 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon).

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

If required, the permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25.

V. Testing Requirements (continued)

- 1.b** Emission Limitation:
6.63 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:

Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of this permit.

- 1.c** Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with 40 CFR Part 60, Appendix A, Method 9.

- 2.** Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
back room paint spray booth #9, with dry filtration system	none	none

2. Additional Terms and Conditions

None

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

- The permit to install for this emissions unit was evaluated based on the actual materials (coatings and cleanup materials) and the design parameters of the emissions unit's exhaust system, as specified by the permittee in the permit to install application. The Ohio EPA's "Review of New Sources of Air Toxic Emissions" policy ("Air Toxic Policy") was applied for each pollutant emitted by this emissions unit using data from the permit to install application and the SCREEN 3.0 model (or other Ohio EPA approved model). The predicted 1-hour maximum ground-level concentration from the use of the SCREEN 3.0 model was compared to the Maximum Acceptable Ground-Level Concentration (MAGLC). The following summarizes the results of the modeling for the "worst case" pollutant(s):

Pollutant: 1-methyl-2-chlorobenzene

TLV (mg/m3): 263

Maximum Hourly Emission Rate (lbs/hr): 0.81 *

Predicted 1-Hour Maximum Ground-Level Concentration (ug/m3): 1,218

MAGLC (ug/m3): 6,262

* This is the increase in the potential hourly emission rate for this emissions unit.

III. Monitoring and/or Record Keeping Requirements (continued)

2. Physical changes to or changes in the method of operation of the emissions unit after its installation or modification could affect the parameters used to determine whether or not the "Air Toxic Policy" is satisfied. Consequently, prior to making a change that could impact such parameters, the permittee shall conduct an evaluation to determine that the "Air Toxic Policy" will still be satisfied. If, upon evaluation, the permittee determines that the "Air Toxic Policy" will not be satisfied, the permittee will not make the change. Changes that can affect the parameters used in applying the "Air Toxic Policy" include the following:
- a. changes in the composition of the materials used (coatings or cleanup materials), or the use of new materials, that would result in the emission of a compound with a lower Threshold Limit Value (TLV), as indicated in the most recent version of the handbook entitled "American Conference of Governmental Industrial Hygienists (ACGIH)," than the lowest TLV value previously modeled;
 - b. changes in the composition of the materials, or use of new materials, that would result in an increase in emissions of any pollutant with a listed TLV that was proposed in the application and modeled; and
 - c. physical changes to the emissions unit or its exhaust parameters (e.g., increased/ decreased exhaust flow, changes in stack height, changes in stack diameter, etc.).

If the permittee determines that the "Air Toxic Policy" will be satisfied for the above changes, the Ohio EPA will not consider the change(s) to be a "modification" under OAC rule 3745-31-01(VV)(1)(a)(ii), and a modification of the existing permit to install will not be required. If the change(s) is (are) defined as a modification under other provisions of the modification definition (other than (VV)(1)(a)(ii)), then the permittee shall obtain a final permit to install prior to the change.

3. The permittee shall collect, record, and retain the following information when it conducts evaluations to determine that the changed emissions unit will still satisfy the "Air Toxic Policy:"
- a. a description of the parameters changed (composition of materials, new pollutants emitted, change in stack/exhaust parameters, etc.);
 - b. documentation of its evaluation and determination that the changed emissions unit still satisfies the "Air Toxic Policy"; and
 - c. where computer modeling is performed, a copy of the resulting computer model runs that show the results of the application of the "Air Toxic Policy" for the change.

IV. Reporting Requirements

None

V. Testing Requirements

None

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: P001 (P001)
Activity Description: Infrared Cure Oven

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
infrared cure oven for emissions unit R001; the oven has two curing chambers which can be operated simultaneously	OAC rule 3745-21-07(G)(1) OAC rule 3745-31-05(A) (PTI #03-13187)	3 lbs organic compounds (OC)/hr and 15 lbs OC/day 2.74 tons organic compounds (OC)/yr The requirements of this rule also include compliance with the requirements of OAC rule 3745-21-07(G)(1).

2. Additional Terms and Conditions

None

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information for each day for this emissions unit:
 - a. The total potential (prior to applying the booth/oven "split") uncontrolled daily organic compound emission rate, from Section III.1.g for emissions unit R001, for all the coatings employed in the coating operation associated with this emissions unit (R001), multiplied by the maximum percentage of the emissions associated with this emissions unit as defined below (see Section A.III.2), in pounds.
 - b. The total number of hours this emissions unit was in operation (this number should be the same as the number of hours the associated coating operation was in operation).
 - c. The average hourly organic compound emission rate, i.e., a/b, in pounds per hour (average).

III. Monitoring and/or Record Keeping Requirements (continued)

2. For purposes of calculating the OC emission rates for this emissions unit and the associated spray booth (R001), the permittee shall utilize a value of 85 percent as the maximum percentage of the organic compounds employed in the spray booth that are emitted uncontrolled from the spray booth. The remaining 15 percent of the organic compounds employed in the spray booth shall be considered to be the uncontrolled emissions for this emissions unit. This "split" of OC emissions between this emissions unit and the associated spray booth is based upon calculations provided by the company that incorporated information from the coating supplier. The "split" of organic compound emissions between this emissions unit and the associated spray booth shall be revised in accordance with the results of any future testing to determine the over/booth split (weight%).

IV. Reporting Requirements

1. The permittee shall submit quarterly deviation (excursion) reports that include the following information:
 - a. an identification of each day during which the average hourly organic compound emissions exceeded 3 pounds per hour, and the actual average hourly organic compound emissions for each such day; and
 - b. an identification of each day during which the organic compound emissions exceeded 15 pounds per day, and the actual organic compound emissions for each such day.
2. The quarterly deviation (excursion) reports shall be submitted in accordance with paragraph A.1.c. of the General Terms and Conditions.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:
 - 1.a Emission Limitations:
3.0 pounds/hour OC and 15.0 pounds/day OC

Applicable Compliance Method:
Compliance shall be based upon the record keeping requirements specified in Sections A.III.1 and A.III.2 of the terms and conditions of this permit and also on the results of emission testing conducted in accordance with Methods 1 through 4 and 25 or 25A of 40 CFR Part 60, Appendix A.
 - 1.b Emission Limitation:
2.74 tons OC/yr

Applicable Compliance Method:
The permittee shall determine compliance with the annual allowable emission limitation by multiplying the daily limitation by 365, and then dividing by 2,000. Therefore, provided that compliance with the daily OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

V. Testing Requirements (continued)

2. The permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:
 - a. The emission testing shall be conducted within 3 months of issuance of this permit.
 - b. The emission testing shall be conducted to demonstrate compliance with the allowable OC emission limitation of 3 lbs/hr.
 - c. The following test methods shall be employed to demonstrate compliance with the allowable mass emission rate: Methods 1 through 4 and 25 or 25A which are located in 40 CFR Part 60, Appendix A. Alternative U.S. EPA-approved test methods may be used with prior approval from Ohio EPA.
 - d. The test(s) shall be conducted while this emissions unit and emissions unit R001 are operating at or near their maximum capacities, unless otherwise specified or approved by the appropriate Ohio EPA District Office or local air agency.

An OC emission test also shall be conducted at the inlet of this oven (P001) to determine the uncontrolled mass rate of OC emissions for this emissions unit for purposes of determining the oven/booth split as defined in Section A.III.1 of this permit. To determine the oven/booth split, the permittee shall employ the following equations during the period of emission testing:

$$\text{UOCbooth} = \text{TOCbooth} - \text{UOCoven}$$

$$\text{Bsplit (wt\%)} = (\text{UOCbooth}/\text{TOCbooth}) \times 100\%$$

$$\text{Osplit (wt\%)} = 100 - \text{Bsplit}$$

where,

UOCbooth = uncontrolled OC emissions from the booth (R001) [lbs/t]

TOCbooth = total potential (prior to applying the booth/oven split) uncontrolled OC emission rate for all the coatings employed in the spray booth (R001) [lbs/t]

UOCoven = uncontrolled VOC emissions from this emissions unit (P001), in lbs/t, [this value is obtained from the results of the emission testing required above]

Bsplit = the portion of the "TOC_Booth" emitted in the booth (wt%)

Osplit = the portion of the "TOC_Booth" emitted in the oven (wt%)

t = the duration of the emission testing, in minutes or hours

V. Testing Requirements (continued)

Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission test(s).

Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emission test(s) shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the appropriate Ohio EPA District Office or local air agency.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: R001 (R001)
Activity Description: Manual Paint Spray Booth #5

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Amana line manual paint spray booth #5, with dry filtration system	OAC rule 3745-17-11(B)(3)	none (See A.I.2.a.)
	OAC rule 3745-17-07(A)	none (See A.I.2.b.)
	OAC rule 3745-21-07(G)	none (See A.II.1.)
	OAC rule 3745-31-05(A) (PTI #03-13187)	2.80 lbs organic compounds (OC)/hr, 12.26 tons OC/yr 1.83 lbs VOC per gallon of coating, excluding water and exempt solvents (See A.I.2.c.) 0% opacity, as a six-minute average

2. Additional Terms and Conditions

- The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 lbs/hr. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(a)(ii), Figure II in OAC rule 3745-17-11 does not apply. Also, pursuant to OAC rule 3745-17-11(A)(2)(b)(ii), Table I does not apply because the facility is located in Ottawa County.
- This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable.
- The permittee has demonstrated that the current "best available technology" is a coating with a maximum VOC content of 1.83 lbs VOC per gallon of coating, excluding water and exempt solvents.
- The 2.80 lbs of OC/hr and 12.26 tons of OC/yr emission limitations were established for PTI purposes to reflect the potentials to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with these limitations.

II. Operational Restrictions

- The permittee shall not employ any coating and/or cleanup material in this emissions unit that is a photochemically reactive material. "Photochemically reactive material" is defined in OAC rule 3745-21-01(C)(5).
- This emissions unit shall be used only to apply low-friction coatings to non-metal parts.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall collect and record the following information each day for this emissions unit:
 - a. The company identification for each coating and/or cleanup material employed.
 - b. Documentation on whether or not each coating and/or cleanup material is a photochemically reactive material.
 - c. Documentation on whether or not each coating is a low-friction coating.
 - d. The VOC content of each coating employed, in pounds/gallon (excluding water and exempt solvents), on an "as applied" basis.
 - e. The number of gallons of each coating employed.
 - f. The organic compound content of each coating, in pounds per gallon.
 - g. The total potential (prior to applying the booth/oven "split") daily organic compound emission rate for all the coatings employed [summation of (e x f) for all coatings], in pounds.

[Note: The coating information must be for the coatings as employed, including any thinning solvents added at the emissions unit.]

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing the use of noncomplying coatings (i.e., for VOC content). The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days following the end of the calendar month.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing the use of any photochemically reactive coating and/or cleanup material in this emissions unit. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 45 days after the event occurs.
3. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any daily record showing the use of any coating other than a low-friction coating in this emissions unit. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 45 days after the event occurs.

V. Testing Requirements

1. Compliance with the emission limitations in Section A.I. of the terms and conditions of this permit shall be determined in accordance with the following methods:

V. Testing Requirements (continued)

- 1.a** Emission Limitations:
2.80 lbs OC/hr, 12.26 tons OC/yr

Applicable Compliance Method:

The permittee may determine compliance with the hourly allowable emission limitation by multiplying the maximum coatings usage rate (gallons/hr) by the maximum OC content of all the coatings (lbs/gallon), and then multiplying by 0.85.*

The annual limitation was developed by multiplying the hourly limitation by 8,760, and then dividing by 2,000. Therefore, provided that compliance with the hourly OC limitation is maintained, compliance with the annual OC limitation shall be ensured.

The permittee shall demonstrate compliance with the hourly emission limitation through emission tests performed in accordance with 40 CFR Part 60, Appendix A, Methods 1 through 4 and 25 (see Section A.V.2 for emissions unit P001).

* For purposes of calculating the organic compound emission rates for this emissions unit and the associated oven (P001), the permittee shall utilize a value of 85% as the maximum percentage of the organic compounds employed in this emissions unit that are emitted uncontrolled from the emissions unit. The remaining 15% of the organic compounds employed in this emissions unit shall be considered to be the uncontrolled emissions for the associated oven. This "split" of organic compound emissions between this emissions unit and the associated oven is based upon calculations provided by the company that incorporated information from the coating supplier. The "split" of organic compound emissions between this emissions unit and the associated oven shall be revised in accordance with the results of any future testing to determine the oven/booth split (weight%).

- 1.b** Emission Limitation:
1.83 lbs VOC per gallon of coating, excluding water and exempt solvents

Applicable Compliance Method:

Compliance shall be based upon the record keeping requirements specified in Section A.III.1. of the terms and conditions of this permit.

- 1.c** Emission Limitation:
0% opacity, as a six-minute average

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation in accordance with 40 CFR Part 60, Appendix A, Method 9.

- 2.** Formulation data or USEPA Method 24 shall be used to determine the VOC and OC contents for all the coatings.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.
