CERTIFIED MAIL

RE: Final Title V Chapter 3745-77 permit

03-39-01-0005
Central Soya Co. - Bellevue
Raymond P. Bowns Mr.
605 Goodrich Road
P.O. Box 369
Bellevue, OH 44811

Dear Raymond P. Bowns:

Enclosed is the Title V permit that allows you to operate the facility in the manner indicated in the permit. Because this permit may contain several conditions and restrictions, we urge you to read it carefully.

The Ohio EPA is encouraging companies to investigate pollution prevention and energy conservation. Not only will this reduce pollution and energy consumption, but it can also save you money. If you would like to learn ways you can save money while protecting the environment, please contact our Office of Pollution Prevention at (614) 644-3469.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed with the Environmental Review Appeals Commission within thirty (30) days after notice of the Director's action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency within three (3) days of filing with the Commission. It is also requested by the Director that a copy of the appeal be served upon the Environmental Enforcement Section of the Office of the Attorney General. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
236 East Town Street
Room 300
Columbus, Ohio 43215

If you have any questions, please contact Northwest District Office.

Very truly yours,

Thomas G. Rigo, Manager
Field Operations and Permit Section
Division of Air Pollution Control

cc: Northwest District Office
File, DAPC PMU

State of Ohio Environmental Protection Agency

FINAL TITLE V PERMIT

Issue Date: 11/14/01

Effective Date: 11/14/01

Expiration Date: 11/14/06

This document constitutes issuance of a Title V permit for Facility ID: 03-39-01-0005 to:
Central Soya Co. - Bellevue
605 Goodrich Rd
Bellevue, OH 44811

Emissions Unit ID (Company ID)/Emissions Unit Activity Description

Table with 3 columns: Emissions Unit ID (Company ID), Emissions Unit Activity Description, and Emissions Unit Activity Description. Rows include units like B005 (#2 Gas Fired Boiler), F002 (Sanders Grain Dryer), P011 (Hull Refining), P013 (Bean Flaking), P016 (Bean Cleaning), P020 (Millfeed Grinding), P021 (Primary Dehulling), P022 (Meal Screening Process), P023 (Meal Transfer Process), P034 (Bean Conditioning), P035 (Bean Cracking), P043 (Conventional Hexane Extraction), P051 (Specialty Soybean Extraction), P052 (Bulk Truck Loadout), P053 (Grinder #1-P.G./Conc), P054 (Grinder #2-P.G./Conc), P055 (Grinder #3-P.G./Conc), P057 (Bulk Storage Bins), P058 (Grinding & packaging aspiration), P060 (Ethanol Soybean Extraction), P061 (Promosoy Conveying to Grinding), P062 (Prom-Ext Conveying to Pckgng w/2 baghs), P063 (Conc/P&G Vacuum Cleaner System), P064 (Promosoy Vacuum Cleaner System), P065 (Prep Central Vacuum Cleaner System), P066 (Soybean Meal Cooler), P067 (Bleaching Earth Receiving), P069 (Warehouse Bagdump station w/Baghouse), P073 (Cx Packaging System), P075 (Bulk Filter Aid), and P076 (Bucket Elevator Leg W/ Dist Turnhead, ConveyorsBaghouse).

P077 (Clean Bean Conveying)
Clean bean transfer system

P078 (Mine Run B Product)
B Plant Mine Run conveying to Grinding

P079 (No.4 Grinder)
No.4 Concentrate Grinder

P080 (No.5 Grinder)
No.5 Concentrate grinder

P081 (B Plant Conveying)
B Plant Concentrate Conveying from Grinding to
Storage

P082 (Packaging Aspiration)

Concentrate Packaging Aspiration system

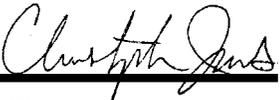

P083 (No. 6 Grinder)
No. 6 Concentrate Grinder

You will be contacted approximately eighteen (18) months prior to the expiration date regarding the renewal of this permit. If you are not contacted, please contact the appropriate Ohio EPA District Office or local air agency listed below. This permit and the authorization to operate the air contaminant sources (emissions units) at this facility shall expire at midnight on the expiration date shown above. If a renewal permit is not issued prior to the expiration date, the permittee may continue to operate pursuant to OAC rule 3745-77-04(A) and in accordance with the terms of this permit beyond the expiration date, provided that a complete renewal application is submitted no earlier than eighteen (18) months and no later than one-hundred eighty (180) days prior to the expiration date.

Described below is the Ohio EPA District Office or local air agency that is responsible for processing and administering your Title V permit:

Northwest District Office
347 North Dunbridge Road
Bowling Green, OH 43402
(419) 352-8461

OHIO ENVIRONMENTAL PROTECTION AGENCY

Christopher Jones
Director

PART I - GENERAL TERMS AND CONDITIONS

A. State and Federally Enforceable Section

1. Monitoring and Related Recordkeeping and Reporting Requirements

- a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
 - i. The date, place (as defined in the permit), and time of sampling or measurements.
 - ii. The date(s) analyses were performed.
 - iii. The company or entity that performed the analyses.
 - iv. The analytical techniques or methods used.
 - v. The results of such analyses.
 - vi. The operating conditions existing at the time of sampling or measurement.
- b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
 - i. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
 - ii. Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be promptly made to the appropriate Ohio EPA District Office or local air agency. These quarterly written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the submission of monitoring reports every six months and OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of all deviations except malfunctions, which shall be reported in accordance with OAC rule 3745-15-06. The written reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.) See B.8 below if no deviations occurred during the quarter.
 - iii. Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted to

the appropriate Ohio EPA District Office or local air agency every six months, i.e., by January 31 and July 31 of each year for the previous six calendar months. These semi-annual written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the reporting of any deviations related to the monitoring, recordkeeping, and reporting requirements. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.

- iv. Each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.

2. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports submitted pursuant to OAC rule 3745-15-06 shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of deviations caused by malfunctions or upsets.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

3. Risk Management Plans

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

4. Title IV Provisions

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

5. Severability Clause

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

6. General Requirements

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.
- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, reopened, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

7. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78.

8. Marketable Permit Programs

No revision of this permit is required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in this permit.

9. Reasonably Anticipated Operating Scenarios

The permittee is hereby authorized to make changes among operating scenarios authorized in this permit without notice to the Ohio EPA, but, contemporaneous with making a change from one operating scenario to another, the permittee must record in a log at the permitted facility the scenario under which the permittee is operating. The permit shield provided in these general terms and conditions shall apply to all operating scenarios authorized in this permit.

10. Reopening for Cause

This Title V permit will be reopened prior to its expiration date under the following conditions:

- a. Additional applicable requirements under the Act become applicable to one or more emissions units covered by this permit, and this permit has a remaining term of three or more years. Such a reopening shall be completed not later than eighteen months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of OAC rule 3745-77-08.
- b. This permit is issued to an affected source under the acid rain program and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit, and shall not require a reopening of this permit.
- c. The Director of the Ohio EPA or the Administrator of the U.S. EPA determines that the federally applicable requirements in this permit are based on a material mistake, or that inaccurate statements were made in establishing the emissions standards or other terms and conditions of this permit related to such federally applicable requirements.
- d. The Administrator of the U.S. EPA or the Director of the Ohio EPA determines that this permit must be revised or revoked to assure compliance with the applicable requirements.

11. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA, the State, and citizens under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

12. Compliance Requirements

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this Title V permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.

- ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with paragraph (E) of OAC rule 3745-77-03.
 - iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
 - iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
- i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
- d. Compliance certifications concerning the terms and conditions contained in this permit that are federally enforceable emission limitations, standards, or work practices, shall be submitted to the appropriate Ohio EPA District Office or local air agency in the following manner and with the following content:
- i. Compliance certifications shall be submitted annually on a calendar year basis. The annual certification shall be submitted on or before April 30th of each year during the permit term.
 - ii. Compliance certifications shall include the following:
 - (a) An identification of each term or condition of this permit that is the basis of the certification.
 - (b) The permittee's current compliance status.
 - (c) Whether compliance was continuous or intermittent.
 - (d) The method(s) used for determining the compliance status of the source currently and over the required reporting period.
 - (e) Such other facts as the Director of the Ohio EPA may require in the permit to determine the compliance status of the source.
 - iii. Compliance certifications shall contain such additional requirements as may be specified pursuant to sections 114(a)(3) and 504(b) of the Act.

13. Permit Shield

- a. Compliance with the terms and conditions of this permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but

excluding terms and conditions for which the permit shield is expressly prohibited under OAC rule 3745-77-07) shall be deemed compliance with the applicable requirements identified and addressed in this permit as of the date of permit issuance.

- b. This permit shield provision shall apply to any requirement identified in this permit pursuant to OAC rule 3745-77-07(F)(2), as a requirement that does not apply to the source or to one or more emissions units within the source.

14. Operational Flexibility

The permittee is authorized to make the changes identified in OAC rule 3745-77-07(H)(1)(a) to (H)(1)(c) within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the Act [as defined in OAC rule 3745-77-01(JJ)], and does not result in an exceedance of the emissions allowed under this permit (whether expressed therein as a rate of emissions or in terms of total emissions), and the permittee provides the Administrator of the U.S. EPA and the appropriate Ohio EPA District Office or local air agency with written notification within a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions. If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the Administrator of the U.S. EPA and the appropriate District Office of the Ohio EPA or local air agency as soon as possible after learning of the need to make the change. The notification shall contain the items required under OAC rule 3745-77-07(H)(2)(d).

15. Emergencies

The permittee shall have an affirmative defense of emergency to an action brought for noncompliance with technology-based emission limitations if the conditions of OAC rule 3745-77-07(G)(3) are met. This emergency defense provision is in addition to any emergency or upset provision contained in any applicable requirement.

16. Off Permit Changes

The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:

- a. The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition;
- b. The permittee provides contemporaneous written notice of the change to the director and the administrator, except that no such notice shall be required for changes that qualify as insignificant emission levels or activities as defined in OAC rule 3745-77-01(U). Such written notice shall describe each such change, the date of such change, any change in emissions or

pollutants emitted, and any federally applicable requirement that would apply as a result of the change;

- c. The change shall not qualify for the permit shield under OAC rule 3745-77-07(F);
- d. The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes; and
- e. The change is not subject to any applicable requirement under Title IV of the Act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of rule 3745-77-07 of the Administrative Code applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit to install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that Chapter. Nothing in paragraph (I) of rule 3745-77-07 of the Administrative Code shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

(For further clarification, the permittee can refer to Engineering Guide #63 that is available in their STARSHIP software package.)

17. Compliance Method Requirements

Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Fed. Reg. 8314, Feb. 24, 1997), in the context of any future proceeding.

18. Insignificant Activity

Each insignificant activity that has one or more applicable requirements shall comply with those applicable requirements.

B. State Only Enforceable Section

1. Permit to Install Requirement

Prior to the “installation” or “modification” of any “air contaminant source,” as those terms are defined in OAC rule 3745-31-01, a permit to install must be obtained from the Ohio EPA pursuant to OAC Chapter 3745-31.

2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

3. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

4. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with

this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

5. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

6. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

7. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

8. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

Part II - Specific Facility Terms and Conditions

A. State and Federally Enforceable Section

1. Emergency Action Plans: This facility has one or more emissions units that emit more than 0.25 ton/day of criteria pollutants and is subject to the emergency action plan provisions in accordance with OAC rule 3745-25-03. The permittee shall comply with the emergency action plan provisions as detailed in Engineering Guide #64.

B. State Only Enforceable Section

1. The following insignificant emissions units are located at this facility:

eclipse process heater, Ohio EPA emissions unit B004; natural gas-fired steam generator, Ohio EPA emissions unit B007; meal grinding, Ohio EPA emissions unit P010; bulk kaolin receiving system, Ohio EPA emissions unit P072; promosoyp dump tank, Ohio EPA emissions unit T005; ethanol receipt tank, Ohio EPA emissions unit T006; lagoon, Ohio EPA emissions unit Z001; chiller, Ohio EPA emissions unit Z002; elevator bin vents, Ohio EPA emissions unit Z003; stand-by diesel fire pump #1, Ohio EPA emissions unit Z004; stand-by diesel fire pump #2, Ohio EPA emissions unit Z005; stand-by diesel power generator, Ohio EPA emissions unit Z006; diesel storage tank, Ohio EPA emissions unit Z007; gasoline storage tank, Ohio EPA emissions unit Z008; brine maker - salt unloader, Ohio EPA emissions unit Z009; sulfuric acid storage tank, Ohio EPA emissions unit Z010; phosphoric acid storage tank, Ohio EPA emissions unit Z011; caustic storage tank, Ohio EPA emissions unit Z012; west deodorizer geka, Ohio EPA emissions unit Z015; and reject toaster, Ohio EPA emissions unit Z016.

Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations, as well as any emission limitations and/or control requirements contained within a Permit to Install (PTI) for the emissions unit.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: #2 Gas Fired Boiler (B005)

Activity Description: 32 MMBTU/HR Natural Gas Fired Boiler

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
32 mmBtu/hour, natural gas-fired boiler	OAC rule 3745-17-10(B)	0.020 pound particulate emissions (PE)/mmBtu of actual heat input
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent emissions opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-4114)	0.16 pound nitrogen oxides (NOx)/mmBtu of actual heat input The requirements of this rule also include compliance with the requirements of OAC rules 3745-17-10(B) and 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a This emissions unit was installed prior to June 9, 1989 and, therefore, is not subject to 40 CFR Part 60, Subpart Dc.
- 2.b Since natural gas is the only fuel fired in this emissions unit, OAC rule Chapter 3745-18 is not applicable. Hence, there is no SO2 limitation established for this emissions unit.

II. Operational Restrictions

1. The permittee shall burn only natural gas as fuel in this emissions unit.

III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel other than natural gas, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitations in Section A.I of the terms and conditions of this permit shall be determined in accordance with the following methods:

1.a Emission Limitation:
0.020 pound PE/mmBtu of actual heat input

Applicable Compliance Method:

The permittee may demonstrate compliance with the limitation above by multiplying an emission factor of 1.9 lbs PE (filterable)/mm cu. ft. of natural gas by the emissions unit's maximum hourly fuel consumption rate (mm cu. ft./hr) and dividing by the emissions unit's maximum heat input capacity (mmBtu/hr).

If required, the permittee shall demonstrate compliance with the PE limitation above in accordance with the methods specified in OAC 3745-17-03(B)(9).

1.b Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

1.c Emission Limitation:
0.16 pound NOx/mmBtu of actual heat input

Applicable Compliance Method:

The permittee may demonstrate compliance by multiplying the maximum hourly natural gas combustion rate (mm cu. ft/hr) by the AP-42 emission factor from Table 1.4-1 (revised 7/98) of 100 pounds NOx/mm cu. ft of natural gas and dividing by the maximum heat input to the boiler (mmBtu/hr).

If required, the test methods to be employed to demonstrate compliance with the emission limitation above shall be Methods 1 through 4 and 7, which are located in 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Emissions Unit: **#8 Gas Fired Boiler (B008)**

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: #8 Gas Fired Boiler (B008)

Activity Description: 125.8 MMBTU/HR (100,400 lbs/hr) natural gas boiler

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
100 mmBtu/hour, natural gas-fired boiler	40 CFR Part 60, Subpart Dc	none (See Section A.II.1.)
	OAC rule 3745-17-10(B)	See Section A.I.2.a. Visible emissions shall not exceed average, except as otherwise
	OAC rule 3745-31-05 (PTI No. 03-7241)	(0.48 pound/hour)
		0.038 pound carbon monoxide (CO)/mmBtu of actual heat input (3.81 pounds/hour)
		0.14 pound nitrogen oxides (NO _x)/mmBtu of actual heat input (14.0 pounds/hour)
	0.0006 pound sulfur dioxide (SO ₂)/mmBtu of actual heat input (0.051 pound/hour)	
	0.0016 pound organic compounds (OC)/mmBtu of actual heat input (0.16 pound/hour)	
	include compliance with the 3745-17-07(A).	

2. Additional Terms and Conditions

- 2.a The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

2. (continued)

- 2.b** Since natural gas is the only fuel fired in this emissions unit, OAC rule Chapter 3745-18 is not applicable.
- 2.c** The permittee shall properly operate and maintain low-NOx burners on this emissions unit.

II. Operational Restrictions

- 1. The permittee shall burn only natural gas as fuel in this emissions unit.

III. Monitoring and/or Record Keeping Requirements

- 1. For each day during which the permittee burns a fuel other than natural gas, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

IV. Reporting Requirements

- 1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

V. Testing Requirements

- 1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

- 1.b** Emission Limitation:
0.0048 pound PE/mmBtu of actual heat input (0.48 pound PE/hour)

Applicable Compliance Method:

The permittee may demonstrate compliance with the pound PE/mmBtu allowable limitation by multiplying an emission factor of 1.9 lbs PE (filterable)/mm cu. ft. of natural gas by the emissions unit's maximum hourly fuel consumption rate (mm cu. ft./hr) and dividing by the emissions unit's maximum heat input capacity (mmBtu/hr).

The permittee shall demonstrate compliance with the pound PE/hour allowable limitation by multiplying an emission factor of 1.9 lbs PE (filterable)/mm cu. ft. of natural gas by the emissions unit's maximum hourly fuel consumption rate (mm cu. ft./hr).

If required, the test methods to be employed to demonstrate compliance with the emission limitations above shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

V. Testing Requirements (continued)

1.c Emission Limitation:

Applicable Compliance Method:

The permittee may demonstrate compliance with the pound CO/mmBtu emission limitation by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-1 (revised 3/98) of 84 pounds CO/mm cu. ft. of natural gas and dividing by the maximum heat input to the boiler (mmBtu/hr).

The permittee shall demonstrate compliance with the pound CO/hour emission limitation by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-1 (revised 3/98) of 84 pounds CO/mm cu. ft. of natural gas.

If required, the test methods to be employed to demonstrate compliance with the emission limitations above shall be Methods 1 through 4 and 10, which are located in 40 CFR, Part 60, Appendix A.

1.d Emission Limitation:

0.14 pound NO_x/mmBtu of actual heat input (14 pounds NO_x/hour)

Applicable Compliance Method:

The permittee may demonstrate compliance with the pound NO_x/mmBtu emission limitation by multiplying the maximum hourly natural gas combustion rate (mmcu. ft./hr) by the AP-42 emission factor from Table 1.4-1 (revised 3/98) of 100 pounds NO_x/mm cu. ft. of natural gas and dividing by the maximum heat input to the boiler (mmBtu/hr).

The permittee may demonstrate compliance with the pounds NO_x/hour emission limitation by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-1 (revised 3/98) of 100 pounds NO_x/mm cu. ft. of natural gas.

If required, the test methods to be employed to demonstrate compliance with the emission limitations above shall be Methods 1 through 4 and 7, which are located in 40 CFR, Part 60, Appendix A.

1.e Emission Limitation:

0.0006 pound sulfur dioxide/mmBtu of actual heat input (0.051 pound sulfur dioxide/hour)

Applicable Compliance Method:

The permittee may demonstrate compliance with the pound SO₂/mmBtu emission limitation by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 3/98) of 0.6 pound SO₂/mm cu. ft. of natural gas and dividing by the maximum heat input to the boiler (mmBtu/hr).

The permittee may demonstrate compliance with the pound SO₂/hour emission limitation by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 3/98) of 0.6 pound SO₂/mm cu. ft. of natural gas.

If required, the test method to be employed to demonstrate compliance with the emission limitations above shall be Method 6, which is located in 40 CFR, Part 60, Appendix A.

Testing Requirements (continued)

1.f

0.0016 pound OC/mmBtu of actual heat input (0.16 pound OC/hour)

maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 3/98) of 11 pounds OC/mm cu. ft. of natural gas and dividing by the maximum heat input to the boiler (mmBtu/hr).

The permittee shall demonstrate compliance with the pound OC/hour emission limitation by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 3/98) of 11 pounds OC/mm cu. ft. of natural gas.

If required, the test methods to be employed to demonstrate compliance with the emission limitation shall be Methods 18, 25 or 25A (as appropriate), which are located in 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable

limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: #10 Gas Fired Boiler (B010)

Activity Description: Nebraska Gas Fired Boiler with Fuel Oil Backup

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
natural gas-fired boiler (91.2 mmBtu/hour), with number 2 fuel oil as backup (86.9 mmBtu/hour)	40 CFR, Part 60, Subpart Dc	when number 2 fuel oil is combusted
		0.50 pound sulfur dioxide (SO ₂)/mmBtu of actual heat input
		Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except for one six-minute period per hour during which visible emissions shall not exceed 27 percent opacity.
	OAC rule 3745-18-06(D)	See Section A.I.2.a.
	OAC rule 3745-17-10(B)	Refer to Section A.I.2.b.
	OAC rule 3745-17-07(A)	when natural gas is employed, visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-11260)	when firing natural gas: 0.014 pound particulate emissions (PE)/mmBtu of actual heat input (1.25 pound/hour); 0.0006 pound SO ₂ /mmBtu of actual heat input (0.055 pound/hour); 0.140 pound NO _x /mmBtu of actual heat input (12.8 pounds/hour); 0.134 pound CO/mmBtu of actual heat input (12.2 pounds/hour), 53.4 tons/year; and 0.0071 pound VOC/mmBtu of actual heat input (0.65 pound/hour).

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
		when firing number 2 fuel oil: 0.016 pound PE/mmBtu of actual heat input (1.40 pound/hour), 6.13 tons/year; 0.161 pound NOx/mmBtu of actual heat input (14.0 pounds/hour), 61.3 tons/year; 0.136 pound CO/mmBtu of actual heat input (11.8 pounds/hour); and 0.0136 pound OC/mmBtu of actual heat input (1.18 pounds/hour), 5.17 tons/year. The requirements of this rule also include compliance with the requirements of 40 CFR, Part 60, Subpart Dc.

2. Additional Terms and Conditions

- 2.a The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to 40 CFR, Part 60, Subpart Dc.
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
- 2.c The CO, PE, NOx, and OC tons/year emission limitations represent the emissions unit's potentials to emit and are established for PTI purposes only. Therefore, no record keeping and/or reporting requirements are necessary to ensure compliance with these limitations.

II. Operational Restrictions

- 1. The permittee shall burn only natural gas and/or number 2 fuel oil in this emissions unit.
- 2. As an alternative to complying with the limitation of 0.50 pound SO₂/mmBtu of actual heat input (when combusting number 2 fuel oil), the permittee may opt to combust number 2 fuel oil, which contains no greater than 0.5 percent sulfur, by weight, in this emissions unit.
- 3. The quality of the oil burned in this emissions unit shall either comply with the 0.5 percent sulfur, by weight, restriction in Section A.II.2 of the terms and conditions of this permit or the quality of oil burned in this emissions unit shall meet, on an as-received basis, a sulfur content which is sufficient to comply with the allowable sulfur dioxide emission limitation of 0.50 lb SO₂/mmBtu of actual heat input.

III. Monitoring and/or Record Keeping Requirements

1. For each shipment of oil received for burning in this emissions unit, the permittee shall maintain records of the total quantity of oil received, the permittee's or oil supplier's analyses for sulfur content and heat content, and the calculated sulfur dioxide emission rate (in lbs/mmBtu). (The sulfur dioxide emission rate shall be calculated in accordance with the formula specified in OAC rule 3745-18-04(F).) A shipment may be comprised of multiple tank truck loads from the same supplier's batch and the quality of the oil for those loads may be represented by a single batch analysis from the supplier.

The permittee shall collect or require the oil supplier to collect a representative grab sample for each shipment of oil that is received for burning in this emissions unit. The permittee shall perform or require the supplier to perform the analyses for sulfur content and heat content in accordance with 40 CFR Part 60, Appendix A, Method 19, or the appropriate ASTM methods (such as, ASTM methods D240, D4294, D6010), or equivalent methods as approved by the Director.

For each shipment of oil, the permittee shall obtain a fuel supplier certification which includes the following information:

- a. the name of the oil supplier; and
 - b. a statement from the oil supplier that the oil complies with the specifications under the definition of distillate oil in 40 CFR Part 60, section 60.41c.
2. The permittee shall maintain records of the following information each month for this emissions unit:
 - a. the weight percent of sulfur in each shipment of oil;
 - b. the sulfur dioxide emission rate, in pounds sulfur dioxide/mmBtu, calculated in accordance with the provisions of OAC rule 3745-18-04(F)(2), for each shipment of oil received that exceeded 0.5 weight percent of sulfur;
 - c. the quantity of natural gas burned, in cu. ft;
 - d. the quantity of number 2 fuel oil burned, in gallons; and
 - e. copies of the analytical results provided by the permittee or oil supplier for each shipment of oil.
 3. For each day during which the permittee burns a fuel other than natural gas and/or number 2 fuel oil, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas and/or number two fuel oil was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
2. The permittee shall notify the Director (the appropriate District Office or local air agency) in writing of any monthly record which shows a deviation of the allowable sulfur dioxide limitation of 0.50 lb SO₂/mmBtu of actual heat input or the restriction of the 0.5 percent sulfur content. The notification shall include a copy of such record and shall be sent to the Director (the appropriate District Office or local air agency) within 45 days after the deviation occurs.

V. Testing Requirements

1. When the permittee burns number 2 fuel oil with a sulfur content exceeding 0.5 percent by weight, the permittee shall conduct, or have conducted, emission testing for this emissions unit in accordance with the following requirements:
 - 1.a The emission testing shall be conducted within 60 days after the initial use of number 2 fuel oil with a sulfur content exceeding 0.5 percent by weight.
 - 1.b The emission testing shall be conducted to demonstrate compliance with the sulfur dioxide emission limitation (0.50 pound/mmBtu heat input) and the visible emission limitation.

V. Testing Requirements (continued)

- 1.c** The following test methods shall be employed to demonstrate compliance with the allowable mass emission rate(s):

SO₂ : Method 6, 40 CFR, Part 60, Appendix A
VE : Method 9, 40 CFR, Part 60, Appendix A

- 1.d** The test(s) shall be conducted while the emissions unit is operating at or near its maximum capacity, unless otherwise specified or approved by the appropriate Ohio EPA district office or local air agency.
- 2.** Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the appropriate Ohio EPA District Office or local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time(s) and date(s) of the test(s), and the person(s) who will be conducting the test(s). Failure to submit such notification for review and approval prior to the test(s) may result in the Ohio EPA District Office's or local air agency's refusal to accept the results of the emission test(s).

Personnel from the appropriate Ohio EPA District Office or local air agency shall be permitted to witness the test(s), examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test(s) shall be signed by the person or persons responsible for the tests and submitted to the appropriate Ohio EPA District Office or local air agency within 30 days following completion of the test(s). The permittee may request additional time for the submittal of the written report, where warranted, with prior approval from the appropriate Ohio EPA District Office or local air agency.

- 3.** Compliance Methods Requirements: Compliance with the emission limitations in Section A.I of the terms and conditions of this permit shall be determined in accordance with the following methods:

- 3.a** Emission Limitation:
0.50 pound sulfur dioxide/mmBtu of actual heat input (when firing number 2 fuel oil)

Applicable Compliance Method:

Compliance shall be demonstrated through the record keeping requirements established in Section A.III of the terms and conditions of this permit.

If required, the test method to be employed to demonstrate compliance with the emission limitation above shall be Method 6, which is located in 40 CFR, Part 60, Appendix A.

- 3.b** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except for one six-minute period per hour during which visible emissions shall not exceed 27 percent opacity (when firing number 2 fuel oil)

Applicable Compliance Method:

If required, the method to be employed to demonstrate compliance with the visible emissions limitations shall be Method 9, which is located in 40 CFR, Part 60, Appendix A.

- 3.c** Emission Limitation:
visible emissions shall not exceed 20 percent opacity, as a six-minute average (when combusting natural gas)

Applicable Compliance Method:

If required, the method to be employed to demonstrate compliance with the visible emissions limitation shall be Method 9, which is located in 40 CFR, Part 60, Appendix A.

V. Testing Requirements (continued)

- 3.d** Emission Limitation:
0.014 pound PE/mmBtu of actual heat input (1.25 pounds PE/hour)

Applicable Compliance Method:

The permittee may demonstrate compliance with the lb PE/mmBtu allowable limitation by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 7/98) of 1.9 pounds PE (filterable)/mm cu. ft. of natural gas and dividing by the maximum heat input to the boiler (mmBtu/hr).

Compliance with the lbs PE/hour allowable limitation may be determined by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 3/98) of 1.9 pounds PE (filterable)/mm cu. ft. of natural gas.

If required, the test methods to be employed to demonstrate compliance with the emission limitations above shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

- 3.e** Emission Limitation:
0.0006 pound SO₂/mmBtu of actual heat input (0.055 pound/hour)

Applicable Compliance Method:

The permittee may demonstrate compliance with the lb SO₂/mmBtu allowable emission limitation by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 7/98) of 0.6 pound SO₂/mm cu. ft. of natural gas and dividing by the maximum heat input to the boiler (mmBtu/hr).

Compliance with the lbs SO₂/hour allowable emission limitation may be determined by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 7/98) of 0.6 pound SO₂/mm cu. ft. of natural gas.

If required, the method to be employed to demonstrate compliance with the allowable emission limitations above shall be Method 6, which is located in 40 CFR, Part 60, Appendix A.

- 3.f** Emission Limitation:
0.140 pound NO_x/mmBtu of actual heat input (12.8 pounds/hour)

Applicable Compliance Method:

The permittee may demonstrate compliance with the lb NO_x/mmBtu allowable emission limitation by multiplying the maximum hourly natural gas combustion rate (mmcu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 7/98) of 50 pounds NO_x/mm cu. ft. of natural gas and dividing by the maximum heat input to the boiler (mmBtu/hr).

Compliance with the lbs NO_x/hour allowable emission limitation may be determined by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the AP-42 emission factor from Table 1.4-2 (revised 7/98) of 50 pounds NO_x/mm cu. ft. of natural gas.

If required, the test methods to be employed to demonstrate compliance with the emission limitations above shall be Methods 1 through 4 and 7, which are located in 40 CFR, Part 60, Appendix A.

V. Testing Requirements (continued)

3.g Emission Limitation:
0.134 pound CO/mmBtu of actual heat input (12.2 pounds/hour), 53.4 tons/year

Applicable Compliance Method:

The permittee shall demonstrate compliance with the lb/mmBtu allowable emission limitation based on the an emission factor of 0.133 lb CO/mmBtu*. Compliance with the lbs/hour emission limitation shall be determined by multiplying the maximum hourly heat input rate (mmBtu/hr by the emission factor of 0.133 lb CO/mmBtu.

If required, the method to be employed to demonstrate compliance with the emission limitation shall be Method 10, which is located in 40 CFR Part 60, Appendix A.

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation will be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

* This emission factor is based on information supplied by the manufacturer and was confirmed through emission testing of this emissions unit.

3.h Emission Limitation:
0.0071 pound OC/mmBtu of actual heat input (0.65 pound/hour)

Applicable Compliance Method:

The permittee may demonstrate compliance with the lb OC/mmBtu allowable emission limitation based on an emission factor of 0.0071 lb OC/mmBtu of actual heat input*.

Compliance with the lbs OC/hour allowable emission limitation may be determined by multiplying the maximum hourly heat input rate (mmBtu/hr by an emission factor of 0.0071 lb OC/mmBtu of actual heat input*.

If required, the test methods to be employed to demonstrate compliance with the emission limitation shall be Methods 18, 25 or 25A (as appropriate), which are located in 40 CFR, Part 60, Appendix A.

* This emission factor is based on information supplied by the manufacturer and was confirmed through emission testing of this emissions unit.

3.i Emission Limitations:
0.016 pound PE/mmBtu of actual heat input (1.40 pounds PE/hour), 6.13 tons PE/year

Applicable Compliance Method:

The permittee may demonstrate compliance with lbs PE/mmBtu allowable limitation by multiplying the maximum number 2 fuel oil combustion rate (gallons/hour) by the AP-42 emission factor from Table 1.3-2 (revised 1/95) of 2 pounds PE/1000 gallons of number 2 fuel oil and dividing by the maximum heat input to the boiler (mmBtu/hr).

Compliance with lbs PE/hour allowable limitation may be determined by multiplying the maximum number 2 fuel oil combustion rate (gallons/hour) by the AP-42 emission factor from Table 1.3-2 (revised 1/95) of 2 pounds PE/1000 gallons of number 2 fuel oil

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation shall be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

If required, the test methods to be employed to demonstrate compliance with the hourly and lb/mmBtu PE limitations above shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

V. Testing Requirements (continued)

- 3.j** Emission Limitation:
0.161 pound NO_x/mmBtu of actual heat input (14.0 pounds/hour), 61.3 tons/year

Applicable Compliance Method:

The permittee may demonstrate compliance with the lbs NO_x/mmBtu allowable emission limitation by multiplying the maximum number 2 fuel oil combustion rate (gallons/hour) by the AP-42 emission factor from Table 1.3-2 (revised 1/95) of 20 pounds NO_x/1000 gallons of no. 2 fuel oil and dividing by the maximum heat input to the boiler (mmBtu/hour).

Compliance with lbs NO_x/hour allowable emission limitation may be determined by multiplying the maximum number 2 fuel oil combustion rate (gallons/hour) by the AP-42 emission factor from Table 1.3-2 (revised 1/95) of 20 pounds NO_x/1000 gallons of no. 2 fuel oil.

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation shall be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

If required, the test methods to be employed to demonstrate compliance with the hourly and lbs/mmBtu NO_x emission limitations above shall be Methods 1 through 4 and 7, which are located in 40 CFR, Part 60, Appendix A.

- 3.k** Emission Limitation:
0.136 pound CO/mmBtu of actual heat input (11.8 pounds/hour)

Applicable Compliance Method:

The permittee may demonstrate compliance with the lb CO/mmBtu allowable emission limitation based on the an emission factor of 0.136 lb OC/mmBtu*.

Compliance with the lbs OC/hour allowable emission limitation may be determined by multiplying the maximum hourly heat input rate (mmBtu/hr) by the emission factor of 0.136 lb CO/mmBtu.

If required, the test methods to be employed to demonstrate compliance with the emission limitations above shall be Methods 1 through 4 and 10, which are located in 40 CFR, Part 60, Appendix A.

* This emission factor is based on information supplied by the manufacturer and was confirmed through emission testing of this emissions unit.

- 3.l** Emission Limitations:
0.0136 pound OC/mmBtu of actual heat input (1.18 pounds/hour), 5.17 tons/year

Applicable Compliance Method:

The permittee may demonstrate compliance with the lb OC/mmBtu allowable emission limitation based on the an emission factor of 0.014 lb OC/mmBtu.*

Compliance with the lbs OC/hour allowable emission limitation above may be determined by multiplying the maximum hourly heat input rate (mmBtu/hr) by the emission factor of 0.014 lb OC/mmBtu.

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation shall be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

If required, the test methods to be employed to demonstrate compliance with the hourly and lb/mmBtu OC emission limitations above shall be Methods 18, 25 or 25A (as appropriate), which are located in 40 CFR, Part 60, Appendix A.

* This emission factor is based on information supplied by the manufacturer and was confirmed through emission testing of this emissions unit.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Sanders Grain Dryer (F002)

Activity Description: Grain dryer (column type)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
column grain dryer	40 CFR, Part 60, Subpart DD	See Section A.I.2.a.
	OAC rule 3745-31-05 (PTI No. 03-3603)	2.88 pounds fugitive particulate emissions (PE)/hour The requirements of this rule also include compliance with the requirements of 40 CFR, Part 60, Subpart DD.
	OAC rule 3745-17-08(B)	none (See A.I.2.b.)
	OAC rule 3745-17-07(B)	none (See A.I.2.b.)

2. Additional Terms and Conditions

- 2.a The column plate perforations shall not exceed 0.094 inch.
- 2.b This facility is not located within an area identified in "Appendix A" of OAC rule 3745-17-08 (it is located in Huron County). Therefore, the requirements of OAC rule 3745-17-08(B) do not apply to this emissions unit and this emissions unit is also exempt from the visible emissions limitation specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).
- 2.c The 2.88 pounds fugitive PE/hour emission limitation was established for PTI purposes to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop recordkeeping and/or reporting requirements to ensure compliance with this limitation.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

None

IV. Reporting Requirements

None

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

1.a Emission Limitation:
2.88 pounds fugitive PE/hour

Applicable Compliance Method:
Compliance may be determined as follows:

i. multiply the maximum hourly throughput (tons/hour) by the emission factor from AP-42, Table 9.9.1-1 (revised 5/98) of 0.22 pound PE/ton by a control factor of (1-.9);*

ii. multiply the maximum hourly natural gas combustion rate (mmcu. ft./hour) by the emission factor from AP-42, Table 1.4-2 (revised 7/98) of 1.9 pounds PE (filterable)/mmcu. ft.; and

iii. sum i + ii.

* The control efficiency of the perforations is assumed to be 90%.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Bean Bowl #2, Soft Cover (F003)
Activity Description: Bean bowl #2, w/choke loader, telescopic spout

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
bean bowl #2	40 CFR, Part 60, Subpart DD	There shall be no visible fugitive emissions from the grain handling operations associated with bean bowl #2.
	OAC rule 3745-31-05 (PTI No. 03-3408)	See Section A.I.2.b. The requirements of this rule also include compliance with the requirements of 40 CFR, Part 60, Subpart DD.
	OAC rule 3745-17-08(B)	none (See A.I.2.a.)
	OAC rule 3745-17-07(B)	none (See A.I.2.a.)

2. Additional Terms and Conditions

- 2.a This facility is not located within an area identified in "Appendix A" of OAC rule 3745-17-08 (it is located in Huron County). Therefore, the requirements of OAC rule 3745-17-08(B) do not apply to this emissions unit and this emissions unit is also exempt from the visible emissions limitation specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to 40 CFR, Part 60, Subpart DD.

II. Operational Restrictions

1. The permittee shall operate this emissions unit with a choke loader and a telescopic spout at all times.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible fugitive dust emissions emanating from this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. the cause of the visible emissions;
 - c. the total duration of any visible emission incident; and
 - d. any corrective actions taken to eliminate the visible emissions.

IV. Reporting Requirements

1. The permittee shall submit semiannual written reports that (a) identify all days during which any visible fugitive dust emissions were observed emanating from this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):
 - 1.a Emission Limitation:
no visible fugitive emissions

Applicable Compliance Method:

If required, the method to be employed to demonstrate compliance with the visible emissions limitation shall be Method 22, which is located in 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Berico Grain Dryer (F004)

Activity Description: Grain dryer (column type)

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
column grain dryer	40 CFR, Part 60, Subpart DD	See Section A.I.2.a.
	OAC rule 3745-31-05 (PTI No. 03-6388)	2.04 pounds fugitive particulate emissions (PE)/hour 1.96 pounds nitrogen oxides (NOx)/hour
		There shall be no visible fugitive emissions from this emissions unit.
		The requirements of this rule also include compliance with the requirements of 40 CFR, Part 60, Subpart DD.
	OAC rule 3745-17-08(B)	none (See A.I.2.b.)
	OAC rule 3745-17-07(B)	none (See A.I.2.b.)

2. Additional Terms and Conditions

- 2.a The column plate perforations shall not exceed 0.094 inch.
- 2.b This facility is not located within an area identified in "Appendix A" of OAC rule 3745-17-08 (it is located in Huron County). Therefore, the requirements of OAC rule 3745-17-08(B) do not apply to this emissions unit and this emissions unit is also exempt from the visible emissions limitation specified in OAC rule 3745-17-07(B), pursuant to OAC rule 3745-17-07(B)(11)(e).
- 2.c The 2.04 pounds fugitive PE/hour emission limitation was established for PTI purposes to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with this limitation.
- 2.d The 1.96 pounds NOx/hour emission limitation was established for PTI purposes to reflect the potential to emit for this emissions unit. Therefore, it is not necessary to develop record keeping and/or reporting requirements to ensure compliance with this limitation.

II. Operational Restrictions

None

III. Monitoring and/or Record Keeping Requirements

None

IV. Reporting Requirements

None

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

1.a Emission Limitation:
2.04 pounds fugitive PE/hour

Applicable Compliance Method:
Compliance may be determined as follows:

i. multiply the maximum hourly throughput (tons/hour) by the emission factor from AP-42, Table 9.9.1-1 (revised 5/98) of 0.22 pound PE/ton by the a control factor of (1-0.9);*

ii. multiply the maximum hourly natural gas combustion rate (mm cu. ft./hr) by the emission factor from AP-42, Table 1.4-2 (revised 7/98) of 1.9 pounds PE (filterable)/mm cu. ft]; and

iii. sum i + ii.

* The control efficiency of the perforations is assumed to be 90%.

1.b Emission Limitation:
1.96 pounds NOx/hour

Applicable Compliance Method:
Compliance may be determined by multiplying the maximum hourly natural gas combustion rate (mm cu. ft./hour) by the emission factor from AP-42 Table, 1.4-1 (revised 7/98) of 100 pounds NOx/mm cu. ft.

If required, the test methods to be employed to demonstrate compliance with the emission limitation above shall be Methods 1 through 4 and 7, which are located in 40 CFR, Part 60, Appendix A.

1.c Emission Limitation:
no visible fugitive emissions

Applicable Compliance Method:
If required, the method to be employed to demonstrate compliance with the visible emissions limitation shall be Method 22, which is located in 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

None

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitations:
5.17 pounds fugitive PE/hour, 22.6 tons/year

Applicable Compliance Method:

The permittee shall demonstrate compliance with the hourly limitation by multiplying the estimated outlet grain loading (0.003 grain/cubic foot) by the total maximum volumetric air flow rate (200,960 cubic feet/minute), dividing by 7000, and then multiplying by 60.

As long as compliance with hourly emission limitation is maintained, compliance with the annual emission limitation shall be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

- 1.b** Emission Limitation:
20 percent opacity, as a 3-minute average, except as otherwise provided by rule

Applicable Compliance Method:

The method to be employed to demonstrate compliance with the visible emissions limitation shall be Method 9, which is located in 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: E&W Elevator House Aspiration System (P006)

Activity Description: Permit covering all conveying, elevating, and transferring operations inside the elevator. It includes all emission generating operations inside the elevator which pertain to the processes of HANDLING grain.

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
elevator house aspiration system, with 2 baghouses	OAC rule 3745-17-11(B)	100 pounds particulate emissions (PE)/hour
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise

2. Additional Terms and Conditions

- 2.a The permittee shall employ 2 baghouses to control all the PE from this emissions unit.

II. Operational Restrictions

- The pressure drop across each baghouse shall be maintained within the range of 0.5 to 8 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

- The permittee shall properly operate and maintain equipment to monitor the pressure drop across each baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across each baghouse on a weekly basis.

IV. Reporting Requirements

- The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across either baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

- Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitation:
100 pounds PE/hour

Applicable Compliance Method:

The permittee shall demonstrate compliance with this limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (44,205 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the emission limitation shall be OAC rule 3745-17-03(B)(10).

- 1.b** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Hull Refining (P011)

Activity Description: Primary & secondary hull refining screeners & aspirators

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
hull refining, with 2 baghouses	OAC rule 3745-17-11(B)	See Section A.I.2.b.
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-13045)	0.80 pound particulate emissions (PE)/hour, 3.50 tons/year PE The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ 2 baghouses (CEPREPA and CEPREPB) to control all the PE from this emissions unit.
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

II. Operational Restrictions

1. The pressure drop across each baghouse shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across each baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across each baghouse on a weekly basis.

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the baghouses serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color and location of the emissions;
 - b. the cause of the visible emissions;
 - c. the total duration of any visible emission incident; and
 - d. any corrective actions taken to eliminate the visible emissions

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across either baghouse did not comply with the allowable range specified in Section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall submit semiannual written reports that (a) identify all days during which any visible emissions were observed from the baghouses serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

1.a Emission Limitation:

Visible PE shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

1.b Emission Limitations:

0.80 pound PE/hour, 3.50 tons/year

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (18,600 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the test methods to be employed to demonstrate compliance with the hourly allowable PE limitation above shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation shall be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

Emissions Unit ID: Bean Flaking (P013)
Activity Description: Conventional flaking rolls and aspiration

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
bean flaking, with baghouse	OAC rule 3745-17-11(B) OAC rule 3745-17-07(A)	33.6 pounds particulate emissions (PE)/hour Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse to control all the PE from this emissions unit.

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitation:
33.6 pounds PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (6,200 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation shall be OAC rule 3745-17-03(B)(10).

- 1.b** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

Emissions Unit ID: Bean Cleaning (P016)

Activity Description: Equipment for whole bean cleaning, screening, aspiraton, weighing, and scaling for extraction processes.

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
bean cleaning, with baghouse	OAC rule 3745-17-11(B) OAC rule 3745-17-07(A)	86.6 pounds particulate emissions (PE)/hour Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

2. Additional Terms and Conditions

- 2.a The permittee shall employ 2 baghouses (CEPREPA and CEPREPB) to control the PE from this emissions unit.

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitation:
86.6 pounds PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (19,600 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation shall be OAC rule 3745-17-03(B)(10).

- 1.b** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Millfeed Grinding (P020)
Activity Description: Millfeed screen and hull grinders

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
millfeed grinding, with baghouse	OAC rule 3745-17-11(B)	See Section A.I.2.b.
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-13045)	0.214 pound particulate emissions (PE)/hour, 0.94 ton PE/year The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2.
 - 2.a The permittee shall employ a baghouse (CEPRPB) to control the PE from this emissions unit.
 - 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 0.5 to 10 inches of water while

III. Monitoring and/or Record Keeping Requirements

1. ~~The permittee shall properly operate and maintain monitoring equipment so that it is properly calibrated, operated, and~~

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

1.a Emission Limitation:

Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

1.b Emission Limitations: 0.214 pound PE/hour, 0.94 ton/year

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation of 0.214 pound by multiplying the baghouse manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (5,000 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the test methods to be employed to demonstrate compliance with the emission limitation above shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation shall be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Primary Dehulling (P021)
Activity Description: Dehulling aspirators

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
primary dehulling, with baghouse	OAC rule 3745-17-11(B)	See Section A.I.2.b.
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-9532)	1.09 pounds PE/hour The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (CEPRPB) to control the PE from this emissions unit.
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

1.a Emission Limitation:

Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

1.b Emission Limitation: 1.09 pounds PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the baghouse manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (25,400 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly emission limitation shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Emissions Unit ID: Meal Screening Process (P022)
Activity Description: Soybean meal rotex screens, meal grinders

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
meal screening process, with baghouse	OAC rule 3745-17-11(B)	13.2 pounds particulate emissions (PE)/hour
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (CEP022) to control all the PE from this emissions unit.

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitation:
13.2 pounds PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (2,000 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation shall be OAC rule 3745-17-03(B)(10).

- 1.b** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

VI. Miscellaneous Requirements

None

Emissions Unit ID: Meal Transfer Process (P023)

Activity Description: Transfer conveyors and legs from process to storage

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
meal transfer process, with baghouse	OAC rule 3745-17-11(B)	15.4 pounds particulate emissions (PE)/hour
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

2. Additional Terms and Conditions

- The permittee shall employ a baghouse (CEP023) to control all the PE from this emissions unit.

II. Operational Restrictions

- The pressure drop across the baghouse shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

- The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

IV. Reporting Requirements

- The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

- Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitation:
15.4 pounds PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (2,400 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation shall be OAC rule 3745-17-03(B)(10).

- 1.b** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

VI. Miscellaneous Requirements

None

Emissions Unit ID: Bean Conditioning (P034)
Activity Description: Conventional rotary bean dryer

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
bean conditioning, with baghouse	OAC rule 3745-17-11(B) OAC rule 3745-17-07(A)	2.79 pounds particulate emissions (PE)/hour Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

2. Additional Terms and Conditions

- The permittee shall employ a baghouse (CEPREPB) to control all the PE from this emissions unit.

II. Operational Restrictions

- The pressure drop across the baghouse shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

- The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

IV. Reporting Requirements

- The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

- Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

V. Testing Requirements (continued)

- 1.a** Emission Limitation:
2.79 pounds PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (300 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation shall be OAC rule 3745-17-03(B)(10).

- 1.b** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

Emissions Unit ID: Bean Cracking (P035)
Activity Description: Cracking rolls

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
bean cracking, with baghouse	OAC rule 3745-17-11(B) OAC rule 3745-17-07(A) OAC rule 3745-31-05 (PTI No. 03-9532)	See Section A.I.2.b. Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule. 0.08 pounds PE/hour The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (CEPRPB) to control the PE from this emissions unit.
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the baghouse serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. the cause of the visible emissions;
 - c. the total duration of any visible emission incident; and
 - d. any corrective actions taken to eliminate the visible emissions

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall submit semiannual written reports that (a) identify all days during which any visible emissions were observed from the baghouse serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

- 1.b Emission Limitation: 0.08 pounds PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the baghouse manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (1,800 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly emission limitation shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Centrolex Process (P050)

Activity Description: Acetone process - Vic carbon adsorber, fugitive losses

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Centrolex process	OAC rule 3745-21-07(G) OAC rule 3745-31-05 (PTI No. 03-3111)	none (See Section A.II.1.) 55.0 pounds organic compounds (OC)/hour

2. Additional Terms and Conditions

None

II. Operational Restrictions

1. The permittee shall not employ any material in this emissions unit that is a photochemically reactive material. "Photochemically reactive material" is defined in OAC rule 3745-21-01(C)(5).

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall maintain the following information each month for this emissions unit:
 - a. the company identification of each liquid organic material employed; and
 - b. documentation on whether or not each liquid organic material employed is a photochemically reactive material.

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall maintain daily records of the following information for this emissions unit:
 - a. the amount of OC employed in this emissions unit (the input rate of OC into the process), in pounds;
 - b. the amount of OC, in pounds, that gets entrained in the wastewater and, therefore, is not emitted by this emissions unit;
 - c. the amount of OC, in pounds, that is removed from this emissions unit and incinerated, and whether or not the incineration was performed on site or off site;
 - d. the OC emissions from the process $[2.a - (2.b + 2.c)]$, in pounds;
 - e. the number of hours the emissions unit was in operation; and
 - f. the average hourly OC emission rate from this operation $[2.d/2.e]$, in pounds/hour (average).

[OC emissions shall be determined by performing a material balance around the process. OC emissions are calculated from inventory control, by subtracting known non-air losses from replacement acetone purchases. Known non-air losses include captured acetone waste material, OC in material incinerated for disposal, and measured losses to process wastewater.]

IV. Reporting Requirements

1. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying materials (i.e., photochemically reactive materials) in this emissions unit. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days of the date of the daily record indicating noncompliance.
2. The permittee shall submit quarterly deviation (excursion) reports that identify all exceedances of the hourly OC emission limitation of 55 pounds. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

Emission Limitation:
55.0 pounds OC/hour

Applicable Compliance Method:
The permittee shall demonstrate compliance with the hourly allowable OC emission limitation based upon the record keeping specified in Section A.III.2 of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. Emissions Unit ID: Specialty Soybean Extraction (P051)

Activity Description: Specialty Soybean Extraction. P043 and P051 share the hexane emission limit of : 0.388 gal/ton of crushed soybeans based on a 180-day rolling weighted average, 67.6 tons/month, or 811.2 tons per rolling 12 month period.
 Denatured O.C. - P051 and P060 share the emission limit of : 46.0 tons/month, or 552 tons per

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
specialty soybean extraction operation, with 2 baghouses and condensor/absorber	OAC rule 3745-17-11(B)	See Section A.I.2.b.
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-21-07(G)	none (See Section A.II.1.)
	OAC rule 3745-31-05 (PTI No. 03-13045)	2.3 pounds particulate emissions (PE)/hour
		hexane emissions: 67.6 tons of organic compounds (OC)/month (combined with P043)
		811.2 tons of OC/rolling, 12-month period (combined with P043)
	ethanol emissions: 46.0 tons OC/month (combined with P060)	
	552.0 tons OC/rolling, 12-month period (combined with P060)	
	The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).	
40 CFR, Part 63, Subpart GGGG	0.2 gallon hexane/ton soybeans processed (based on a rolling, 12-month weighted average)	
	See Section A.I.2.e.	

2. Additional Terms and Conditions

- 2.a** The permittee shall employ 3 baghouses (CEPREPA, CEPREPB and CEP051A) to control all the PE from this emissions unit.
- 2.b** The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).
- 2.c** Hexane consumption, i.e., the emission rates from the hexane extraction operations in emissions units P043 and P051 combined, shall be determined on a "mass balance" basis. Consumption, i.e., the emission rates, shall not exceed the following levels:
- i. total hexane consumption in emissions units P043 and P051 combined shall not exceed 285,400 gallons (811.2 tons)/rolling, 12-month period;
 - ii. total hexane consumption in emissions units P043 and P051 combined shall not exceed 0.388 gallon/ton of crushed soybeans (0.00075 pound of hexane/pound of crushed soybeans from emissions unit P043 and 0.0035 pound of hexane/pound of crushed soybeans from emissions unit P051), based on a rolling, 6-month weighted average; and
 - iii. the short-term loss of hexane from emissions units P043 and P051 combined shall not exceed 67.6 tons/month.
- 2.d** Ethanol consumption, i.e., emission rates from the ethanol extraction operations in emissions units P051 and P060 combined, shall be determined on a "mass balance" basis. Consumption, i.e., emission rates, shall not exceed the following levels:
- i. total ethanol consumption in emissions units P051 and P060 combined shall not exceed 152,302 gallons (552.0 tons)/rolling, 12-month period;
 - ii. ethanol consumption in emission units P051 and P060 combined shall not exceed 0.012 pounds per pound of white flakes (0.0011 pound of alcohol per pound of white flakes from P051 and 0.011 pound of alcohol per pound of white flakes from P060), based on a 6-month rolling weighted average; and
 - iii. the short-term loss of ethanol from emissions units P051 and P060 combined shall not exceed 46.0 tons/month.
- 2.e** This emissions unit, which is an existing source in accordance with 40 CFR, Part 63, shall achieve compliance with the emission limitation of 0.2 gallon hexane/ton soybeans processed (specified by 40 CFR, Part 63, Subpart GGGG) by April 12, 2004.

II. Operational Restrictions

1. The permittee shall not employ any material in this emissions unit that is a photochemically reactive material. "Photochemically reactive material" is defined in OAC rule 3745-21-01(C)(5).
2. The pressure drop across each baghouse (CEPREPA, CEPREPB and CEP051A) shall be maintained within the range of 0.5 to 10 inches of water while the emissions unit is in operation.
3. In accordance with the provisions in 40 CFR, Part 63, Section 63.2852, the permittee shall develop a written startup, shutdown and malfunction (SSM) plan by the compliance date. The permittee shall implement the plan, when applicable. The permittee shall complete the SSM plan before the compliance date for this emissions unit. The permittee shall keep the SSM plan on-site and readily available as long as this emissions unit is operational. The SSM plan shall provide detailed procedures for operating and maintaining this emissions unit to minimize emissions during a qualifying SSM event for which the permittee chooses Section 63.2850(e)(2) malfunction period, or Section 63.2850(c)(2) or (d)(2) initial startup period. The SSM plan must specify a program of corrective action for malfunctioning process and air pollution control equipment and reflect the best practices now in use by the industry to minimize emissions. Some or all of the procedures may come from plans the permittee has developed for other purposes such as a Standard Operating Procedure manual or an Occupational Safety and Health Administration Process Safety Management plan. To qualify as a SSM plan, other such plans must meet all the applicable requirements of this NESHAP.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across each baghouse while this emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across each baghouse on a weekly basis.
2. The permittee shall maintain the following information each month for this emissions unit:
 - a. the company identification of each liquid organic material employed; and
 - b. documentation on whether or not each liquid organic material employed is a photochemically reactive material.
3. The permittee shall collect and record the following information on a monthly basis for emissions units P043 and P051, combined:
 - a. the total amount of hexane input* to the process (purchased), in pounds and gallons;
 - b. the total quantity of soybeans weighed in the preparation process before the hexane extraction operation, in pounds and tons;
 - c. the weighted-average hexane loss rate, in gallons of hexane/ton of crushed soybeans, and in pounds hexane/pound crushed soybeans [a/b];
 - d. the rolling, 6-month weighted average hexane loss rate, in gallons of hexane/ton of crushed soybeans, and in pounds hexane/pound crushed soybeans [the sum of c for any 6-month period];
 - e. the rolling, 12-month total hexane consumption, in gallons;
 - f. all incidents of startup or shutdown of the emissions unit, including all amounts of hexane that are routinely added to the system or returned to the storage tanks due to startup or shutdown. This amount of hexane is process hexane that is present in the system during times of continuous operation, but will drain out of the system during shutdown and needs to be charged back into the system prior to startup. The amount of hexane used to "recharge" the system should not be interpreted as a "hexane loss" in calculating emission rates.;
 - g. dates of scheduled cleaning/maintenance; and
 - h. dates of any process upsets.

*Note: it is assumed that all of the hexane input into the process is emitted via point sources (mineral oil absorber and DTDC) and fugitive sources.

III. Monitoring and/or Record Keeping Requirements (continued)

4. The permittee shall collect and record the following information on a monthly basis for emissions units P051 and P060, combined:
 - a. the total amount of ethanol input* to the process (purchased), in pounds and gallons;
 - b. the total quantity of soybeans weighed in the preparation process before the specialty extraction operation, in pounds and tons;
 - c. the weighted-average ethanol loss rate, in gallons of ethanol/ton of crushed soybeans, and in pounds ethanol/pound crushed soybeans [a/b];
 - d. the rolling, 6-month weighted average ethanol loss rate, in gallons of ethanol/ton of crushed soybeans, and in pounds ethanol/pound crushed soybeans [the sum of c for any 6-month period];
 - e. the rolling, 12-month total ethanol consumption, in gallons;
 - f. all incidents of startup or shutdown of the emissions unit, including all amounts of ethanol that are routinely added to the system or returned to the storage tanks due to startup or shutdown. This amount of ethanol is process ethanol that is present in the system during times of continuous operation, but will drain out of the system during shutdown and needs to be charged back into the system prior to startup. The amount of ethanol used to "recharge" the system should not be interpreted as a "ethanol loss" in calculating emission rates;
 - g. dates of scheduled cleaning/maintenance; and
 - h. dates of any process upsets.

*Note: it is assumed that all of the ethanol input into the process is emitted via point and fugitive sources.

5. When this emissions unit has processed soybeans for 12 operating months following the compliance date in the MACT regulations, the permittee shall begin calculating the compliance ratio (which compares the actual HAP (n-hexane) loss to the allowable HAP (n-hexane) loss for the previous 12 operating months) by the end of each calendar month following an operating month (refer to A.III.1.a below) considering the following conditions and exclusions:
 - 5.a if the emissions unit processes any quantity of soybeans in a calendar month and the emissions unit is not operating under an initial startup period (subject to 40 CFR, Part 63, Section 63.2850(c)(2) or (d)(2)) or malfunction period (subject to 40 CFR, Part 63, Section 63.2850(e)(2)), then the permittee must categorize the month as an operating month;
 - 5.b the 12-month compliance ratio may include operating months occurring prior to the emissions unit shutdown and operating months that follow after the emissions unit resumes operation;
 - 5.c if the emissions unit shuts down and processes no soybeans for an entire calendar month, then the permittee must categorize the month as a nonoperating month, as defined in 40 CFR, Part 63, Section 63.2872 (exclude any nonoperating months from the compliance ratio determination);
 - 5.d if the emissions unit is subject to an initial startup period as defined in 40 CFR, Part 63, Section 63.2872, exclude from the compliance ratio determination any solvent (hexane) and soybean information recorded for the initial startup period;
 - 5.e if the emissions unit is subject to a malfunction period as defined in 40 CFR, Part 63, Section 63.2872, exclude from the compliance ratio determination any solvent (hexane) and soybean information recorded for the malfunction period;
 - 5.f the solvent (hexane) loss factor used to determine the compliance ratio may change each operating month depending on the tons of soybeans processed during all normal operating periods in a 12 operating month period; and
 - 5.g if the compliance ratio is less than or equal to 1.0, the emissions unit was in compliance with the HAP (n-hexane) emission requirements for the previous operating month.

III. Monitoring and/or Record Keeping Requirements (continued)

- 6.** By the compliance date in the MACT regulations, in accordance with 40 CFR, Part 63, Section 63.2851, the permittee shall develop and implement a plan for demonstrating compliance. In this plan, the permittee shall describe the procedures that will be followed in obtaining and recording data, and determining compliance under normal operations. The permittee shall complete the plan before the compliance date for this emissions unit and keep it on site and readily available as long as this emissions unit is operational. The plan shall include the following information:
 - 6.a** the name and address of the owner or operator;
 - 6.b** the physical address of the vegetable oil production process;
 - 6.c** a detailed description of all methods of measurement the permittee will use to determine the solvent losses, HAP (n-hexane) content of solvent (hexane), and the tons of soybeans processed;
 - 6.d** when each measurement will be made;
 - 6.e** examples of each calculation the permittee will use to determine the compliance status (include examples of how the permittee will convert data measured with one parameter to other terms for use in compliance determination);
 - 6.f** example logs of how data will be recorded; and
 - 6.g** a plan to ensure that the data continue to meet compliance demonstration needs.
- 7.** For periods of normal operation (i.e., for each operating month), the permittee shall maintain the following records, beginning on the compliance date in the MACT regulations:
 - 7.a** determine and record the extraction solvent (hexane) loss, in gallons, from this emissions unit;
 - 7.b** record the volume fraction of HAP (n-hexane) present at greater than 1 percent, by volume, and gallons of extraction solvent (hexane), in each shipment received;
 - 7.c** determine and record the tons of soybeans processed by this emissions unit;
 - 7.d** determine the weighted average volume fraction of HAP (n-hexane) in extraction solvent (hexane) received as described in 40 CFR, Part 63, Section 63.2854 by the end of the following calendar month; and
 - 7.e** determine and record the actual solvent (hexane) loss, weighted average volume fraction HAP (n-hexane), soybeans processed and compliance ratio for each 12 operating months period as described in 40 CFR, Part 63, Section 63.2840 by the end of the following calendar month.
- 8.** For initial startup periods subject to 40 CFR, Part 63, Section 63.2850(c)(2) or (d)(2), the permittee shall maintain the following records, beginning on the compliance date in the MACT regulations:
 - 8.a** the permittee shall operate and maintain this emissions unit in accordance with the SSM plan;
 - 8.b** determine and record the extraction solvent (hexane) loss, in gallons, from this emissions unit; and
 - 8.c** record the volume fraction of HAP (n-hexane) present at greater than 1 percent, by volume, and gallons of extraction solvent (hexane), in shipment received.
- 9.** If this emissions unit processes any soybeans, the permittee shall record the following information, beginning on the compliance date in the MACT regulations:

III. Monitoring and/or Record Keeping Requirements (continued)

- 9.a** For the solvent (hexane) inventory, record the following information in accordance with the permittee's plan for demonstrating compliance:
- i. dates that define each operating status period during a calendar month;
 - ii. the operating status of this emissions unit such as normal operation, nonoperating, initial startup period, malfunction period, or exempt operation for each recorded time interval;
 - iii. record the gallons of extraction solvent (hexane) in the inventory on the beginning and ending dates of each normal operating period;
 - iv. the gallons of all extraction solvent (hexane) received, purchased, and recovered during each calendar month;
 - v. all extraction solvent (hexane) inventory adjustments, additions or subtractions (the permittee must document the reason for the adjustment and justify the quantity of the adjustment);
 - vi. the total solvent (hexane) loss for each calendar month, regardless of this emissions unit's operating status; and
 - vii. the actual solvent (hexane) loss in gallons for each operating month.
- 9.b** For the weighted average volume fraction of HAP (n-hexane) in the extraction solvent, the permittee shall record the following information:
- i. the gallons of extraction solvent (hexane) received in each delivery;
 - ii. the volume fraction of each HAP (n-hexane) exceeding 1 percent by volume in each delivery of extraction solvent (hexane); and
 - iii. the weighted average volume fraction of HAP (n-hexane) in extraction solvent (hexane) received since the end of the last operating month as determined in accordance with 40 CFR, Part 63, Section 63.2854(b)(2).
- 9.c** Record the following information in accordance with the permittee's plan for demonstrating compliance:
- i. the dates that define each operating status period (these dates must be the same as the dates entered for the extraction solvent (hexane) inventory);
 - ii. the operating status of this emissions unit such as normal operation, nonoperating, initial startup period, malfunction period, or exempt operation for each recorded time interval;
 - iii. the soybean inventory on the beginning and ending dates of each normal operating period;
 - iv. the tons of soybeans received at this emissions unit during each normal operating period;
 - v. all soybean adjustments, additions or subtractions for normal operating periods (the permittee shall document the reason for the adjustment and justify the quantity of the adjustment); and
 - vi. the tons of soybeans processed during each operating month.

III. Monitoring and/or Record Keeping Requirements (continued)

- 9.d** After this emissions unit has processed soybeans for 12 operating months, and the permittee is not operating during an initial startup period as described in 40 CFR, Part 63, Section 63.2850(c)(2) or (d)(2), or a malfunction period as described in Section 63.2850(e)(2), the permittee shall record the following information by the end of the calendar month following each operating month, beginning on the compliance date:
- i. the 12 operating months rolling sum of the actual solvent (hexane) loss in gallons as described in Section 63.2853(c);
 - ii. the weighted average volume fraction of HAP (n-hexane) in extraction solvent (hexane) received for the previous 12 operating months as described in Section 63.2854(b)(3);
 - iii. the 12 operating months rolling sum of soybeans processed at this emissions unit in tons as described in Section 63.2855(c);
 - iv. a determination of the compliance ratio (using the values from Sections 63.2853, 63.2854, 63.2855, and Table 1 of Section 63.2840, calculate the compliance ratio using Equation 2 of Section 63.2840); and
 - v. a statement of whether this emissions unit is in compliance with all of the requirements of 40 CFR, Part 63, Subpart GGGG. This includes a determination of whether the permittee has met all of the applicable requirements in Section 63.2850.
- 9.e** For each SSM event subject to an initial startup period as described in 40 CFR, Part 63, Section 63.2850(c)(2) or (d)(2), or a malfunction period as described in Section 63.2850(e)(2), the permittee shall record the following information by the end of the calendar month following each month in which the initial startup period or malfunction period occurred, beginning on the compliance date:
- i. a description and date of the SSM event, its duration, and reason it qualifies as an initial startup or malfunction;
 - ii. an estimate of the solvent (hexane) loss in gallons for the duration of the initial startup or malfunction period with supporting documentation; and
 - iii. a checklist or other mechanism to indicate whether the SSM plan was followed during the initial startup or malfunction period.

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across either baghouse did not comply with the allowable range specified in section A.II.2 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall notify the Director (the appropriate Ohio EPA District Office or local air agency) in writing of any monthly record showing the use of noncomplying materials (i.e., photochemically reactive materials) in this emissions unit. The notification shall include a copy of such record and shall be sent to the Director (the appropriate Ohio EPA District Office or local air agency) within 30 days of the date of the daily record indicating noncompliance.
3. The permittee shall submit quarterly deviation (excursion) reports for the following (for emissions units P043 and P051, combined):
 - a. any monthly record that shows an exceedance of the limitation of 285,400 gallons (811.2 tons) hexane/rolling 12-month period;
 - b. any monthly record that shows an exceedance of the limitation of 0.388 gallon hexane/ton of crushed soybeans (0.00075 pound of hexane/pound of crushed soybeans from P043 and 0.0035 pound of hexane/pound of crushed soybeans from P051) based on a 6-month rolling, weighted average; and
 - c. any monthly record that shows any exceedance of the limitation of 67.6 tons hexane/month.

IV. Reporting Requirements (continued)

- 4.** The permittee shall submit quarterly deviation reports for the following (for emissions units P051 and P060, combined):
 - a. any monthly record that shows an exceedance of the limitation of 152,302 gallons (552.0 tons)/rolling 12-month period; and
 - b. any monthly record that shows an exceedance of the limitation of 0.012 pounds per pound of white flakes (0.0011 pound of alcohol per pound of white flakes from P051 and 0.011 pound of alcohol per pound of white flakes from P060), based on a 6-month rolling weighted average; and
 - c. any monthly record that shows any exceedance of the limitation of 46.0 tons/month.
- 5.** All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
- 6.** The permittee shall submit the initial notification for existing sources in accordance with 40 CFR, Part 63, Section 63.2860. This is a one-time notification submitted to the Director (the appropriate District Office or local air agency) no later than 120 days after the effective date of 40 CFR, Part 63, Subpart GGGG, which includes the following information:
 - 6.a** the name and address of the owner or operator;
 - 6.b** the physical address of the vegetable oil production process;
 - 6.c** identification of the relevant standard, such as the vegetable oil production NESHAP, and compliance date;
 - 6.d** a brief description of the emissions unit including the types of listed oilseeds (e.g., soybeans) processed, nominal operating capacity, and type of desolventizer(s) used; and
 - 6.e** a statement designating the emissions unit as a major source of HAP (n-hexane) or a demonstration that the emissions unit meets the definition of an area source. An area source is an emissions unit that is not a major source and is not collocated within a plant site with other emissions units that are individually or collectively a major source.
- 7.** The permittee shall submit the initial notification for significant modifications to existing or new sources prior to any such modification (refer to 40 CFR, Part 63, Section 63.2860).
- 8.** The permittee shall submit a notification of compliance status for the MACT regulations once compliance is achieved in accordance with 40 CFR, Part 63, Section 63.2860. The permittee shall submit a notification of compliance status report to the Director (appropriate District Office or local air agency) no later than 60 days after determining the initial 12 operating months compliance ratio. If the emissions unit is an existing source, the permittee should submit this notification no later than 50 calendar months after the effective date of these NESHAP (36 calendar months for compliance, 12 operating months to record data, and 2 calendar months to complete the report). If the emissions unit is a new or reconstructed source, the notification of compliance status is generally due no later than 20 calendar months after initial startup (6 calendar months for the initial startup period, 12 operating months to record data, and 2 calendar months to complete the report). The notification of compliance status must contain the following information:
 - 8.a** the name and address of the owner or operator;
 - 8.b** the physical address of the vegetable oil production process;
 - 8.c** each listed oilseed type (e.g., soybeans) processed during the previous 12 operating months;
 - 8.d** each HAP (n-hexane) identified under Section 63.2854(a) as being present in concentrations greater than 1 percent by volume in each delivery of solvent (hexane) received during the 12 operating months period used for the initial compliance determination;
 - 8.e** a statement designating the emissions unit as a major source of HAP (n-hexane) or a demonstration that the emissions unit qualifies as an area source (an area source is a source that is not a major source and is not collocated within a plant site with other emissions units that are individually or collectively a major source) and;

IV. Reporting Requirements (continued)

- 8.f** a compliance certification indicating whether the emissions unit complied with all of the requirements of 40 CFR, Part 63, Subpart GGGG throughout the 12 operating months used for the initial source compliance determination. This certification must include a certification of the following items:
- i. the plan for demonstrating compliance (as described in Section 63.2851) and SSM plan (as described in Section 63.2852) are complete and available on-site for inspection;
 - ii. the permittee is following the procedures described in the plan for demonstrating compliance; and
 - iii. the compliance ratio is less than or equal to 1.00.
- 9.** The permittee shall submit an annual compliance certification in accordance with 40 CFR, Part 63, Section 63.2861(a). The first annual compliance certification is due 12 calendar months after the permittee submits the notification of compliance status. Each subsequent annual compliance certification is due 12 calendar months after the previous annual compliance certification. The annual compliance certification provides the compliance status for each operating month during the 12 calendar months period ending 60 days prior to the date on which the report is due. Include the following information in the annual certification:
- 9.a** the name and address of the owner or operator;
 - 9.b** the physical address of the vegetable oil production process;
 - 9.c** each listed oilseed type (e.g., soybeans) processed during the 12 calendar months period covered by the report;
 - 9.d** each HAP (n-hexane) identified under Section 63.2854(a) as being present in concentrations greater than 1 percent by volume in each delivery of solvent (hexane) received during the 12 calendar months period covered by the report;
 - 9.e** a statement designating the emissions unit as a major source of HAP (n-hexane) or a demonstration that the emissions unit qualifies as an area source. An area source is an emissions unit that is not a major source and is not collocated within a plant site with other emissions units that are individually or collectively a major source;
 - 9.f** a compliance certification to indicate whether the emissions unit was in compliance for each compliance determination made during the 12 calendar months period covered by the report. For each such compliance determination, the permittee must include a certification of the following information:
 - i. the permittee is following the procedures described in the plan for demonstrating compliance; and
 - ii. the compliance ratio is less than or equal to 1.00.
- 10.** Beginning on the compliance date in the MACT regulations, the permittee shall submit deviation notification reports for each compliance determination the permittee makes in which the compliance ratio exceeds 1.00 as determined in 40 CFR, Part 63, Section 63.2840(c). The permittee shall submit the deviation report by the end of the month following the calendar month in which the permittee determined the deviation. The deviation notification report must include the following items:
- 10.a** the name and address of the owner or operator;
 - 10.b** the physical address of the vegetable oil production process;
 - 10.c** each listed oilseed type (e.g., soybeans) processed during the 12 operating months period for which the permittee determined the deviation;
 - 10.d** the compliance ratio comprising the deviation. The permittee may reduce the frequency of submission of the deviation notification report if the agency responsible for this NESHAP does not object as provided in Section 63.10(e)(3)(iii).

IV. Reporting Requirements (continued)

- 11.** Beginning on the compliance date in the MACT regulations, the permittee shall submit periodic startup, shutdown and malfunction (SSM) reports in accordance with 40 CFR, Part 63, Section 63.2861(c). If the permittee chooses to operate this emissions unit under an initial startup period subject to Section 63.2850(c)(2) or (d)(2) or a malfunction period subject to Section 63.2850(e)(2), the permittee must submit a periodic SSM report by the end of the calendar month following each month in which the initial startup period or malfunction period occurred. The periodic SSM report must include the following information:
 - 11.a** the name, title, and signature of the facility's responsible official who is certifying that the report accurately states that all actions taken during the initial startup or malfunction period were consistent with the emissions unit's SSM plan;
 - 11.b** a description of events occurring during the time period, the date and duration of the events, and reason the time interval qualifies as an initial startup period or malfunction period; and
 - 11.c** an estimate of the solvent (hexane) loss during the initial startup or malfunction period with supporting documentation.
- 12.** Beginning on the compliance date in the MACT regulations, the permittee shall submit immediate SSM reports in accordance with 40 CFR, Part 63, Section 63.2861(d). If the permittee handles a SSM during an initial startup period subject to Section 63.2850(c)(2) or (d)(2) or a malfunction period subject to Section 63.2850(e)(2) differently from procedures in the SSM plan, then the permittee must submit an immediate SSM report. Immediate SSM reports consist of a telephone call or facsimile transmission to the Director (appropriate District Office or local air agency) within 2 working days after starting actions inconsistent with the SSM plan, followed by a letter within 7 working days after the end of the event. The letter must include the following information:
 - 12.a** the name, title, and signature of a facility's responsible official who is certifying the accuracy of the report, an explanation of the event, and the reasons for not following the emissions unit's SSM plan;
 - 12.b** a description and date of the SSM event, its duration, and reason it qualifies as a SSM; and
 - 12.c** an estimate of the solvent (hexane) loss for the duration of the SSM event with supporting documentation.

V. Testing Requirements

- 1.** Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):
 - 1.a** Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).
 - 1.b** Emission Limitation:
2.30 pounds PE/hour

Applicable Compliance Method:
If required, the permittee shall demonstrate compliance with the hourly allowable PE limitation in accordance with the methods specified in OAC rule 3745-17-03(B)(10).

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation will be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

V. Testing Requirements (continued)

- 1.c** Emission Limitations:
85.0 tons hexane/month, 811.2 tons hexane/rolling, 12-month period
- Applicable Compliance Method:
The permittee shall demonstrate compliance with the emission limitations above based upon the record keeping required in Section A.III.4 of the terms and conditions of this permit.
- 1.d** Emission Limitation:
0.388 gallon hexane/ton crushed soybeans, based on a rolling, 6-month weighted average (combined with P043)
- Applicable Compliance Method:
The permittee shall demonstrate compliance with the emission limitation above based upon the record keeping required in Section A.III.4.
- 1.e** Emission Limitation:
0.0035 pound of hexane/pound of crushed soybeans (for emissions unit P051)
- Applicable Compliance Method:
The permittee shall demonstrate compliance with this emission limitation based upon the record keeping required in Section A.III.4 of the terms and conditions of this permit.
- 1.f** Emission Limitation:
0.0011 pound of ethanol per pound of white flakes (for emissions unit P051)
- Applicable Compliance Method:
The permittee shall demonstrate compliance with the hexane emission limitation of 0.388 gallon/ton crushed soybeans based upon the record keeping required in Section A.III.5 of the terms and conditions of this permit.
- 1.g** Emission Limitations:
58.0 tons ethanol/month, 552.0 tons ethanol/rolling, 12-month period
- Applicable Compliance Method:
The permittee shall demonstrate compliance with the emission limitations above based upon the record keeping required in Section A.III.5 of the terms and conditions of this permit.
- 1.h** Emission Limitation:
0.20 gallon hexane/ton crushed soybeans, based on a 12-month rolling, weighted average
- Applicable Compliance Method:
The permittee shall demonstrate compliance with the hexane emission limitation above based upon the record keeping required in Section A.III of the terms and conditions of this permit.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Bulk Truck Loadout (P052)

Activity Description: Bulk truck loadout w/choke flow & baghouse

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
bulk truck loadout, with baghouse	OAC rule 3745-17-11(B)	none (See section A.I.2.a.)
	OAC rule 3745-17-07(A)	none (See Section A.I.2.b.)
	OAC rule 3745-31-05 (PTI No. 03-4114)	0.06 pound particulate emissions (PE)/hour
		0.26 ton PE/year
		Visible emissions shall not exceed 10 percent opacity, as a six-minute average.

2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of particulate emissions from this emissions unit is less than 10 pounds/hour. Therefore, pursuant to OAC rule 3745-17-11(A)(2)(ii), this emissions unit is exempt from the requirements of OAC rule 3745-17-11(B)(3). Also, Table I of OAC rule 3745-17-11 does not apply because the facility is located in Huron County.
- 2.b This emissions unit is exempt from the visible emissions limitations specified in OAC rule 3745-17-07(A), pursuant to OAC rule 3745-17-07(A)(3)(h), because OAC rule 3745-17-11 is not applicable .

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 1 to 15 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the baghouse serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. the cause of the visible emissions;
 - c. the total duration of any visible emission incident; and
 - d. any corrective actions taken to eliminate the visible emissions

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in Section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall submit semiannual written reports that (a) identify all days during which any visible emissions were observed from the baghouse serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitations:
0.06 pound PE/hour, 0.26 ton/year

Applicable Compliance Method: The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the maximum hourly throughput (tons/hour) by the emission factor from AP-42, Table 9.9.1-1 (revised 5/98) of 0.086 pound PE/ton and then multiplying by a control factor of (1-.99).*

If required, the test methods to be employed to demonstrate compliance with the hourly allowable PE limitation shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation shall be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

* The control efficiency of the baghouse is estimated to be 99%.

- 1.b Emission Limitation:
10 percent opacity, as a 6-minute average

Applicable Compliance Method:

If required, the method to be employed to demonstrate compliance with the visible emissions limitation shall be Method 9, which is located in 40 CFR, Part 60, Appendix A.

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Emissions Unit ID: Grinder #1-P.G./Conc (P053)
Activity Description: Grinder, classifier, and filter.

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
grinder #1 - white flakes, system with baghouse	OAC rule 3745-17-11(B)	See Section A.I.2.b.
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-4114)	0.13 pound particulate emissions (PE)/hour The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (CEP053) to control the all PE from this emissions unit.
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 1 to 15 inches of water while the emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while the emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the baghouse serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. the cause of the visible emissions;
 - c. the total duration of any visible emission incident; and
 - d. any corrective actions taken to eliminate the visible emissions

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in Section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall submit semiannual written reports that (a) identify all days during which any visible emissions were observed from the baghouse serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

- 2.b Emission Limitation:
0.13 pound PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (3,000 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the test methods to be employed to demonstrate compliance with the emission limitation above shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-9547)	0.13 pound PE/hour The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse to control all the PE from this emissions unit.
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 1 to 15 inches of water while this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while this emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the baghouse serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. the cause of the visible emissions;
 - c. the total duration of any visible emission incident; and
 - d. any corrective actions taken to eliminate the visible emissions

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in Section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall submit semiannual written reports that (a) identify all days during which any visible emissions were observed from the baghouse serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

- 1.b Emission Limitation:
0.13 pound PE/hour

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (3,000 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation will be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).

VI. Miscellaneous Requirements

None

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

Emissions Unit ID: B Plant Conveying (P081)
Activity Description: B Plant Concentrate Conveying from Grinding to Storage

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
B plant concentrate conveying from grinding to storage, with baghouse	OAC rule 3745-17-11(B)	See Section A.I.2.b.
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-9547)	0.011 pound PE/hour The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse to control all the PE from this emissions unit.
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

II. Operational Restrictions

1. The pressure drop across the baghouse shall be maintained within the range of 0.5 to 5 inches of water while this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while this emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the baghouse serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. the cause of the visible emissions;
 - c. the total duration of any visible emission incident; and
 - d. any corrective actions taken to eliminate the visible emissions

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in Section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Packaging Aspiration (P082)
Activity Description: Concentrate Packaging Aspiration system

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
packaging aspiration, with baghouse	OAC rule 3745-17-11(B)	See Section A.I.2.b.
	OAC rule 3745-17-07(A)	Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.
	OAC rule 3745-31-05 (PTI No. 03-10474)	0.13 pound PE/hour, 0.57 ton/year The requirements of this rule also include compliance with the requirements of OAC rule 3745-17-07(A).

2. Additional Terms and Conditions

- 2.a The permittee shall employ a baghouse (CEP082) to control all the PE from this emissions unit.
- 2.b The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05(A)(3).

II. Operational Restrictions

1. The pressure drop across the baghouse (CEPREPA) shall be maintained within the range of 0.25 to 5 inches of water while this emissions unit is in operation.

III. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly operate and maintain equipment to monitor the pressure drop across the baghouse while this emissions unit is in operation. The monitoring equipment shall be calibrated, operated, and maintained in accordance with the manufacturer's recommendations, instructions, and operating manual(s). The permittee shall record the pressure drop across the baghouse on a weekly basis.

III. Monitoring and/or Record Keeping Requirements (continued)

2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the baghouse serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
 - a. the color of the emissions;
 - b. the cause of the visible emissions;
 - c. the total duration of any visible emission incident; and
 - d. any corrective actions taken to eliminate the visible emissions

IV. Reporting Requirements

1. The permittee shall submit quarterly pressure drop deviation (excursion) reports that identify all periods of time during which the pressure drop across the baghouse did not comply with the allowable range specified in Section A.II.1 of the terms and conditions of this permit. All quarterly reports shall be submitted in accordance with paragraph A.1.c of the General Terms and Conditions of this permit.
2. The permittee shall submit semiannual written reports that (a) identify all days during which any visible emissions were observed from the baghouse serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

V. Testing Requirements

1. Compliance Methods Requirements: Compliance with the emission limitation(s) in section A.I of the terms and conditions of this permit shall be determined in accordance with the following method(s):

- 1.a Emission Limitation:
Visible emissions shall not exceed 20 percent opacity, as a six-minute average, except as otherwise provided by rule.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the visible emissions limitation above in accordance with the methods specified in OAC rule 3745-17-03(B)(1).

- 1.b Emission Limitations:
0.13 pound PE/hour, 0.57 ton/year

Applicable Compliance Method:

The permittee may demonstrate compliance with the hourly allowable PE limitation by multiplying the manufacturer-guaranteed outlet grain loading (0.005 grain/cubic foot) by the total maximum volumetric air flow rate (2,500 cubic feet/minute), dividing by 7000, and then multiplying by 60.

If required, the method to be employed to demonstrate compliance with the hourly allowable PE limitation shall be Methods 1 through 5, which are located in 40 CFR, Part 60, Appendix A.

As long as compliance is maintained with the hourly emission limitation, compliance with the annual emission limitation shall be shown (the annual emission limitation was calculated by multiplying the hourly limitation by 8760 and dividing by 2000).
