

Facility ID: 0228000094 Issuance type: Final State Permit To Operate

This version of facility specific terms and conditions was converted from a database format to an HTML file during an upgrade of the Ohio EPA, Division of Air Pollution Control's permitting software. Every attempt has been made to convert the terms and conditions to look and substantively conform to the permit issued or being drafted in STARS. However, the format of the terms may vary slightly from the original. In addition, although it is not expected, there is a slight possibility that a term and condition may have been inadvertently "left out" of this reproduction during the conversion process. Therefore, if this version is to be used as a starting point in drafting a new version of a permit, it is imperative that the entire set of terms and conditions be reviewed to ensure they substantively mimic the issued permit. The official version of any permit issued final by Ohio EPA is kept in the Agency's Legal section. The Legal section may be contacted at (614) 644-3037.

In addition to the terms and conditions, hyperlinks have been inserted into the document so you may more readily access the section of the document you wish to review.

Finally, the term language under "Part II" and before "A. Applicable Emissions Limitations..." has been added to aid in document conversion, and was not part of the original issued permit.

THIS IS NOT AN OFFICIAL VERSION OF THE PERMIT. SEE PAGE 1 FOR ADDITIONAL INFORMATION

Facility ID: 0228000094 Emissions Unit ID: P011 Issuance type: Final State Permit To Operate

Part II - Special Terms and Conditions

This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

1. For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (a) None.
2. For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (a) None.

A. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
Molten Salt System including a Molten Salt Tank, a Quench Tank, a Acid Tank, and a Rinse Tank. Emissions are controlled by a 25,000 acfm Molten Salt Scrubber	OAC rule 3745-17-07 (A)	Visible particulate emissions from this emissions unit shall not exceed twenty percent (20%) opacity as a six-minute average.
	OAC rule 3745-17-11	The emission limitation specified by this rule is less stringent than the emission limitation established pursuant to OAC rule 3745-31-05 (A)(3).
	OAC rule 3745-31-05 (A)(3) PTI No. 02-04902	Particulate emissions from this emissions unit shall not exceed 0.01 grain per dry standard cubic foot and 8.60 tons per year.

2. **Additional Terms and Conditions**
 - (a) None

B. Operational Restrictions

1. The scrubber water flow rate shall be continuously maintained at a value of not less than 9.10 gallons per minute at all times while the emissions unit is in operation

C. Monitoring and/or Record Keeping Requirements

1. The permittee shall properly install, operate and maintain equipment to continuously monitor the scrubber water flow rate while the emissions unit is in operation. The monitoring devices and any recorders shall be installed, calibrated, operated and maintained in accordance with the manufacturer's recommendations, instructions and operating manuals.
2. The permittee shall collect and record the following information each day:
 - a. The scrubber water flow rate, in gallons per minute, on once per shift basis.
 - b. The operating times for the capture (collection) system, control device, monitoring equipment, and the associated emissions unit.

D. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify all periods of time during which the following scrubber parameters were not maintained at or above the required levels:
 - a. The scrubber water flow rate.

E. Testing Requirements

1. Compliance with the emission limitations in section A.1 of these terms and conditions shall be determined in accordance with the following methods:
 - a. Emission Limitation:
20% opacity as a 6-minute average

Applicable Compliance Method:
Compliance shall be determined by visible emission evaluations performed in accordance with OAC rule 3745-

17-03 (B)(1) using the test methods and procedures specified in U.S. EPA Reference Method 9.

b. Emission Limitation
0.01 gr/dscf of particulate

Applicable Compliance Method:
Compliance shall be determined in accordance with the test methods and procedures in Method 26 of 40 CFR Part 60, Appendix A, if required by Ohio EPA.

c. Emission Limitation
8.6 tons/yr

Applicable Compliance Method:
Compliance shall be based upon the calculation by using following equation:

$$E(t) = [E(g) * F * OT * 60 \text{ minute/hour}] / [(7000 \text{ grain/lb})(2000 \text{ lbs/ton})]$$

where,

E(t) = emission rate, in tons per year;

E(g) = emission rate, in grain per dry standard cubic foot;

F = molten salt scrubber inlet gas flow rate, in dry standard cubic foot per minute;

OT = annual operating hours, in hours per year.

F. **Miscellaneous Requirements**

1. None
