No	SYNTHETIC MINOR TO AVOID TITLE V
No	FEDERALLY ENFORCABLE PTIO (FEPTIO)

Dear Permit Holder:

Enclosed please find a final Air Pollution Permit-to-Install and Operate (PTIO) which will allow you to install, modify, and/or operate the described emissions unit(s) in the manner indicated in the permit. Because this permit contains conditions and restrictions, please read it very carefully. Please complete a survey at www.epa.ohio.gov/dapc/permitsurvey.aspx and give us feedback on your permitting experience. We value your opinion.

The issuance of this PTI is a final action of the Director and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Kevin Boyce," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, OH 43215

If you have any questions, please contact Ohio EPA DAPC, Northeast District Office at (330)425-9171 or the Office of Compliance Assistance and Pollution Prevention at (614) 644-3469. This permit can be accessed electronically on the DAPC Web page, www.epa.ohio.gov/dapc, by clicking the "Issued Air Pollution Control Permits" link.

Sincerely,

Michael W. Ahern
Michael W. Ahern, Manager
Permit Issuance and Data Management Section, DAPC

Authorization

Facility ID: 0285000479
Application Number(s): A0040285
Permit Number: P0106870
Permit Description: State PTIO (not FEPTIO) - Initial installation of 422 BHP diesel engine
Permit Type: Initial Installation
Permit Fee: \$25.00
Issue Date: 9/23/2010
Effective Date: 9/23/2010
Expiration Date: 9/11/2019
Permit Evaluation Report (PER) Annual Date: Jan 1 - Dec 31, Due Feb 15

This document constitutes issuance to:

Chipmunk Hill Woodworking, Ltd.
6127 Zuercher Rd.
Apple Creek, OH 44606

of a Permit-to-Install and Operate for the emissions unit(s) identified on the following page.

Ohio EPA District Office or local air agency responsible for processing and administering your permit:

Ohio EPA DAPC, Northeast District Office
2110 East Aurora Road
Twinsburg, OH 43087
(330)425-9171

The above named entity is hereby granted this Permit-to-Install and Operate for the air contaminant source(s) (emissions unit(s)) listed in this section pursuant to Chapter 3745-31 of the Ohio Administrative Code. Issuance of this permit does not constitute expressed or implied approval or agreement that, if constructed or modified in accordance with the plans included in the application, the described emissions unit(s) will operate in compliance with applicable State and federal laws and regulations.

This permit is granted subject to the conditions attached hereto.

Ohio Environmental Protection Agency

Chris Korleski
Director

Authorization (continued)

Permit Number: P0106870
Permit Description: State PTIO (not FEPTIO) - Initial installation of 422 BHP diesel engine

Permits for the following Emissions Unit(s) or groups of Emissions Units are in this document as indicated below:

Emissions Unit ID:	P003
Company Equipment ID:	422 HP John Deere Stationary Diesel Engine
Superseded Permit Number:	
General Permit Category and Type:	Not Applicable

A. Standard Terms and Conditions

1. What does this permit-to-install and operate ("PTIO") allow me to do?

This permit allows you to install and operate the emissions unit(s) identified in this PTIO. You must install and operate the unit(s) in accordance with the application you submitted and all the terms and conditions contained in this PTIO, including emission limits and those terms that ensure compliance with the emission limits (for example, operating, recordkeeping and monitoring requirements).

2. Who is responsible for complying with this permit?

The person identified on the "Authorization" page, above, is responsible for complying with this permit until the permit is revoked, terminated, or transferred. "Person" means a person, firm, corporation, association, or partnership. The words "you," "your," or "permittee" refer to the "person" identified on the "Authorization" page above.

The permit applies only to the emissions unit(s) identified in the permit. If you install or modify any other equipment that requires an air permit, you must apply for an additional PTIO(s) for these sources.

3. What records must I keep under this permit?

You must keep all records required by this permit, including monitoring data, test results, strip-chart recordings, calibration data, maintenance records, and any other record required by this permit for five years from the date the record was created. You can keep these records electronically, provided they can be made available to Ohio EPA during an inspection at the facility. Failure to make requested records available to Ohio EPA upon request is a violation of this permit requirement.

4. What are my permit fees and when do I pay them?

There are two fees associated with permitted air contaminant sources in Ohio:

- PTIO fee. This one-time fee is based on a fee schedule in accordance with Ohio Revised Code (ORC) section 3745.11, or based on a time and materials charge for permit application review and permit processing if required by the Director.

You will be sent an invoice for this fee after you receive this PTIO and payment is due within 30 days of the invoice date. You are required to pay the fee for this PTIO even if you do not install or modify your operations as authorized by this permit.

- Annual emissions fee. Ohio EPA will assess a separate fee based on the total annual emissions from your facility. You self-report your emissions in accordance with Ohio Administrative Code (OAC) Chapter 3745-78. This fee assessed is based on a fee schedule in ORC section 3745.11 and funds Ohio EPA's permit compliance oversight activities. Unless otherwise specified, facilities subject to one or more synthetic minor restrictions must use Ohio EPA's "Air Services" to submit annual emissions associated with this permit requirement. Ohio EPA will notify you when it is time to report your emissions and to pay your annual emission fees.

5. When does my PTIO expire, and when do I need to submit my renewal application?

This permit expires on the date identified at the beginning of this permit document (see "Authorization" page above) and you must submit a renewal application to renew the permit. Ohio EPA will send a renewal notice to you approximately six months prior to the expiration date of this permit. However, it is very important that you submit a complete renewal permit application (postmarked prior to expiration of this permit) even if you do not receive the renewal notice.

If a complete renewal application is submitted before the expiration date, Ohio EPA considers this a timely application for purposes of ORC section 119.06, and you are authorized to continue operating the emissions unit(s) covered by this permit beyond the expiration date of this permit until final action is taken by Ohio EPA on the renewal application.

6. What happens to this permit if my project is delayed or I do not install or modify my source?

This PTIO expires 18 months after the issue date identified on the "Authorization" page above unless otherwise specified if you have not (1) started constructing the new or modified emission sources identified in this permit, or (2) entered into a binding contract to undertake such construction. This deadline can be extended by up to 12 months, provided you apply to Ohio EPA for this extension within a reasonable time before the 18-month period has ended and you can show good cause for any such extension.

7. What reports must I submit under this permit?

An annual permit evaluation report (PER) is required in addition to any malfunction reporting required by OAC rule 3745-15-06 or other specific rule-based reporting requirement identified in this permit. Your PER due date is identified in the Authorization section of this permit.

8. If I am required to obtain a Title V operating permit in the future, what happens to the operating provisions and PER obligations under this permit?

If you are required to obtain a Title V permit under OAC Chapter 3745-77 in the future, the permit-to-operate portion of this permit will be superseded by the issued Title V permit. From the effective date of the Title V permit forward, this PTIO will effectively become a PTI (permit-to-install) in accordance with OAC rule 3745-31-02(B). The following terms and conditions will no longer be applicable after issuance of the Title V permit: Section B, Term 1.b) and Section C, for each emissions unit, Term a)(2).

The PER requirements in this permit remain effective until the date the Title V permit is issued and is effective, and cease to apply after the effective date of the Title V permit. The final PER obligation will cover operations up to the effective date of the Title V permit and must be submitted on or before the submission deadline identified in this permit on the last day prior to the effective date of the Title V permit.

9. What are my obligations when I perform scheduled maintenance on air pollution control equipment?

You must perform scheduled maintenance of air pollution control equipment in accordance with OAC rule 3745-15-06(A). If scheduled maintenance requires shutting down or bypassing any air pollution control equipment, you must also shut down the emissions unit(s) served by the air pollution control equipment during maintenance, unless the conditions of OAC rule 3745-15-06(A)(3) are met. Any emissions that exceed permitted amount(s) under this permit (unless specifically exempted by rule) must be reported as deviations in the annual permit evaluation report (PER), including nonexempt excess emissions that occur during approved scheduled maintenance.

10. Do I have to report malfunctions of emissions units or air pollution control equipment? If so, how must I report?

If you have a reportable malfunction of any emissions unit(s) or any associated air pollution control system, you must report this to the Ohio EPA DAPC, Northeast District Office in accordance with OAC rule 3745-15-06(B). Malfunctions that must be reported are those that result in emissions that exceed

permitted emission levels. It is your responsibility to evaluate control equipment breakdowns and operational upsets to determine if a reportable malfunction has occurred.

If you have a malfunction, but determine that it is not a reportable malfunction under OAC rule 3745-15-06(B), it is recommended that you maintain records associated with control equipment breakdown or process upsets. Although it is not a requirement of this permit, Ohio EPA recommends that you maintain records for non-reportable malfunctions.

11. Can Ohio EPA or my local air agency inspect the facility where the emission unit(s) is/are located?

Yes. Under Ohio law, the Director or his authorized representative may inspect the facility, conduct tests, examine records or reports to determine compliance with air pollution laws and regulations and the terms and conditions of this permit. You must provide, within a reasonable time, any information Ohio EPA requests either verbally or in writing.

12. What happens if one or more emissions units operated under this permit is/are shut down permanently?

Ohio EPA can terminate the permit terms associated with any permanently shut down emissions unit. "Shut down" means the emissions unit has been physically removed from service or has been altered in such a way that it can no longer operate without a subsequent "modification" or "installation" as defined in OAC Chapter 3745-31.

You should notify Ohio EPA of any emissions unit that is permanently shut down by submitting¹ a certification that identifies the date on which the emissions unit was permanently shut down. The certification must be submitted by an authorized official from the facility. You cannot continue to operate an emissions unit once the certification has been submitted to Ohio EPA by the authorized official.

You must comply with all recordkeeping and reporting for any permanently shut down emissions unit in accordance with the provisions of the permit, regulations or laws that were enforceable during the period of operation, such as the requirement to submit a PER, air fee emission report, or malfunction report. You must also keep all records relating to any permanently shutdown emissions unit, generated while the emissions unit was in operation, for at least five years from the date the record was generated.

Again, you cannot resume operation of any emissions unit certified by the authorized official as being permanently shut down without first applying for and obtaining a permit pursuant to OAC Chapter 3745-31.

13. Can I transfer this permit to a new owner or operator?

You can transfer this permit to a new owner or operator. If you transfer the permit, you must follow the procedures in OAC Chapter 3745-31, including notifying Ohio EPA or the local air agency of the change in ownership or operator. Any transferee of this permit must assume the responsibilities of the transferor permit holder.

14. Does compliance with this permit constitute compliance with OAC rule 3745-15-07, "air pollution nuisance"?

This permit and OAC rule 3745-15-07 prohibit operation of the air contaminant source(s) regulated

¹ Permittees that use Ohio EPA's "Air Services" can mark the affected emissions unit(s) as "permanently shutdown" in the facility profile along with the date the emissions unit(s) was permanently removed and/or disabled. Submitting the facility profile update will constitute notifying of the permanent shutdown of the affected emissions unit(s).

under this permit in a manner that causes a nuisance. Ohio EPA can require additional controls or modification of the requirements of this permit through enforcement orders or judicial enforcement action if, upon investigation, Ohio EPA determines existing operations are causing a nuisance.

15. What happens if a portion of this permit is determined to be invalid?

If a portion of this permit is determined to be invalid, the remainder of the terms and conditions remain valid and enforceable. The exception is where the enforceability of terms and conditions are dependent on the term or condition that was declared invalid.

B. Facility-Wide Terms and Conditions

1. This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).
 - a) For the purpose of a permit-to-install document, the facility-wide terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.
 - (1) None.
 - b) For the purpose of a permit-to-operate document, the facility-wide terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.
 - (1) None.

C. Emissions Unit Terms and Conditions

1. P003 - 422 HP John Deere compression ignition Stationary Diesel Engine Model 6090HF485

Operations, Property and/or Equipment Description:

422 HP 4-stroke fuel injected engine with engine control unit (ECU), engine mounted and exhaust gas recirculation (EGR) in-built

a) This permit document constitutes a permit-to-install issued in accordance with ORC 3704.03(F) and a permit-to-operate issued in accordance with ORC 3704.03(G).

(1) For the purpose of a permit-to-install document, the emissions unit terms and conditions identified below are federally enforceable with the exception of those listed below which are enforceable under state law only.

a. None.

(2) For the purpose of a permit-to-operate document, the emissions unit terms and conditions identified below are enforceable under state law only with the exception of those listed below which are federally enforceable.

a. None.

b) Applicable Emissions Limitations and/or Control Requirements

(1) The specific operation(s), property, and/or equipment that constitute each emissions unit along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures are identified below. Emissions from each unit shall not exceed the listed limitations, and the listed control measures shall be specified in narrative form following the table.

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
a.	OAC rule 3745-31-05(A)(3)	Emissions of nitrogen oxides (NOx) shall not exceed 2.50 lbs/hr and 9.90 TPY. See b)(2)c and c)(3).
b.	OAC rule 3745-17-11(B)(5)(a)	The permittee shall not cause or permit particulate emissions (PE) from the engine's exhaust to exceed 0.25 pound per million Btu of actual heat input.
c.	OAC rule 3745-17-07(A)	Visible emissions from the stack serving this emissions unit shall not exceed 20 percent (%) opacity, as a six-minute average, except as provided by rule.
d.	40 CFR, Part 60, Subpart IIII Table 1 [422 BHP CI 6 cylinder engine, model year 2010 with 9.0 liter	See b)(2)a, b)(2)b, c(1) and c)(2). To comply with 40 CFR 60.4207(b) via 40 CFR 80.510(b), see fuel requirements

	Applicable Rules/Requirements	Applicable Emissions Limitations/Control Measures
	displacement]	specified in c)(1).
e.	40 CFR, Part 60, Subpart A	Table 8 of 40 CFR Part 60 subpart IIII specifies which sections of the general provisions apply to this subpart.
f.	40 CFR, Part 63, Subpart ZZZZ [New 422 BHP 4-stroke CI RICE located at an area source]	Compliance with 40 CFR Part 60 subpart IIII fulfills the requirements of this rule per 40 CFR 63.6590(c).

(2) Additional Terms and Conditions

- a. NOx emissions shall not exceed 9.2 g/KW-hr (6.9 g/HP-hr).
 HC emissions shall not exceed 1.3 g/KW-hr (1.0 g/HP-hr).
 CO emissions shall not exceed 11.4 g/KW-hr (8.5 g/HP-hr).
 PM emissions shall not exceed 0.54 g/KW-hr (0.40 g/HP-hr).
- b. The permittee shall install a non-resettable hour meter prior to startup of the engine.
- c. The Best Available Technology (BAT) requirements under OAC rule 3745-31-05(A)(3) do not apply to the uncontrolled OC (as HC), CO, PM and SO2 emissions from this air contaminant source since the potential to emit for OC, CO, PM and SO2 is less than ten tons per year.

c) Operational Restrictions

(1) Diesel fuel must meet the following requirements:

- a. Beginning October 1, 2007 –
 - i. 500 ppm maximum sulfur content and
 - ii. either minimum cetane index of 40 or a maximum aromatic content of 35 volume percent
- b. Beginning October 1, 2010 –
 - i. 15 ppm maximum sulfur content and
 - ii. either minimum cetane index of 40 or a maximum aromatic content of 35 volume percent.

- (2) The emissions unit must be operated and maintained according to the manufacturer's written instructions or procedures developed by the owner or operator that are approved by the engine manufacturer, over the entire life of the engine. The permittee may only change those settings that are permitted by the manufacturer.

(3) This emissions unit shall not be operated more than 7925 hours per year.

d) **Monitoring and/or Recordkeeping Requirements**

(1) For each shipment of diesel fuel received for burning in this emissions unit, the permittee shall retain documentation that the fuel meets the requirements for non-road, locomotive and marine fuel in 40 CFR 80.510 and section c)(1).

(2) The permittee shall maintain an operations log that documents all maintenance conducted on the engine.

(3) The permittee shall perform weekly checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the stack serving this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:

- a. the color of the emissions;
- b. whether the emissions are representative of normal operations;
- c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
- d. the total duration of any visible emission incident; and
- e. any corrective actions taken to minimize or eliminate the visible emissions.

If visible emissions are present, a visible emission incident has occurred. The observer does not have to document the exact start and end times for the visible emission incident under item (d) above or continue the weekly check until the incident has ended. The observer may indicate that the visible emission incident was continuous during the observation period (or, if known, continuous during the operation of the emissions unit). With respect to the documentation of corrective actions, the observer may indicate that no corrective actions were taken if the visible emissions were representative of normal operations, or specify the minor corrective actions that were taken to ensure that the emissions unit continued to operate under normal conditions, or specify the corrective actions that were taken to eliminate abnormal visible emissions.

(4) The permittee shall retain a copy of the initial notification required in section e)(1) on site and made available to the director or a representative upon request.

(5) The permittee shall retain documentation that the engine meets the short term emissions standards on site and made available to the director or a representative upon request. This documentation includes the CARB certification for this same engine family.

(6) The permittee shall maintain records of the hours of operation for each month.

e) **Reporting Requirements**

(1) The permittee shall furnish to US EPA, Region V and the Ohio EPA, Northeast District Office a written initial notification that contains:

- a. the name and address of the owner or operator;
- b. the address of the emissions unit;
- c. the engine information including make, model, engine family, serial number, model year, maximum engine power and engine displacement;
- d. the date construction of the emissions unit commenced;
- e. emissions control equipment; and
- f. fuel used.

The notification shall be postmarked no later than 30 days after such date.

- (2) Annual Permit Evaluation Report (PER) forms will be mailed to the permittee at the end of the reporting period specified in the Authorization section of this permit. The permittee shall submit the PER in the form and manner provided by the Director by the due date identified in the Authorization section of this permit. The PER shall cover a reporting period of no more than 12 months for each air contaminant source identified in this permit. The PER shall include all relevant information, including the following:

- a. identify all days during which any visible particulate emissions were observed from the stack serving this emissions unit;
- b. describe the cause of the emissions and any corrective actions taken to minimize or eliminate the visible particulate emissions;
- c. identify any record which shows the fuel did not meet the requirements for non-road, locomotive and marine fuel;
- d. a statement that the engine was operated and maintained according to the manufacturer's written instructions or procedures developed by the owner or operator that are approved by the engine manufacturer; and
- e. identify any year this emissions unit operated more than 9725 hours and the actual hours of operation for that year.

- (3) The permittee shall notify the director (Ohio EPA, Northeast District Office) in writing of any record which shows the fuel did not meet the requirements for non-road, locomotive and marine fuel. The notification shall include a copy of such record and shall be sent to the director (the Ohio EPA, Northeast District Office) within 45 days after the deviation occurs.

f) **Testing Requirements**

- (1) Compliance with the emission limitations specified in sections b)(1) and b)(2) and the operational restrictions specified in sections c)(1) and c)(3) of these terms and conditions shall be determined in accordance with the following methods:

a. Emission Limitation:

NOx emissions shall not exceed 9.2 g/KW-hr (6.9 g/HP-hr).
HC emissions shall not exceed 1.3 g/KW-hr (1.0 g/HP-hr).
CO emissions shall not exceed 11.4 g/KW-hr (8.5 g/HP-hr).
PM emissions shall not exceed 0.54 g/KW- hr (0.40 g/HP-hr).

Applicable Compliance Method:

Compliance shall be demonstrated by the California Air Resources Board Executive Order U-R-004-0150 and the manufacturer information submitted with the permit application package demonstrating compliance with these limitations. Ongoing compliance shall be documented as specified in sections c)(2) and d)(2).

b. Emission Limitation:

NOx emissions shall not exceed 2.50 lbs/hr and 9.90 tons per year.

Applicable Compliance Method:

Compliance with the hourly emission limitation above shall be determined by multiplying 2.7 g/hp-hr, the manufacturer's guaranteed performance, times 422 HP, the standby power output rating of this unit. This result, in grams/hour shall be multiplied by the conversion factor 0.0022 to determine hourly emissions.

Compliance with the annual limitation shall be determined by multiplying the hourly emissions, 2.50 lbs, by the maximum hours of operation per year (up to 7925) and dividing by 2,000 pounds per ton.

c. Emission Limitation:

PE emissions shall not exceed 0.25 pound per million Btu of actual heat input.

Applicable Compliance Method:

Compliance with the emission limitation above shall be determined by multiplying 0.08 g/hp-hr, the manufacturer's guaranteed performance, times 422 HP, the standby power output rating of this unit. This result, in grams/hour shall be multiplied by the conversion factor 0.0022 to determine hourly emissions in pounds.

d. Operational Restriction:

This emissions unit shall not be operated more than 7925 hours per year.

Applicable Compliance Method:

Compliance shall be determined by summing the monthly hours of operation as recorded in d)(6) for the year.

e. Emission Limitation:

Visible emissions from the stack serving this emissions unit shall not exceed 20 percent (%) opacity, as a six-minute average, except as provided by rule.

Applicable Compliance Method:

If required, compliance with the visible emission limitation shall be demonstrated based upon visible emission observations performed in accordance with the procedures specified in 40 CFR, Part 60, Appendix A, Method 9.

g) Miscellaneous Requirements

(1) None.
